MORE THAN 2 MI. MINUTE IN AIR

WINS INTERNATIONAL CHAMPIONSHIP FOR FRANCE

Maurice Prevost Averages 125 Miles an Hour in Flight for the James Gordon Bennett Trophy—Second is Also Won by a Frenchman, Verdines, Who Won the Trophy at Last Year's Competitions.

RHEIMS, Sept. 29.—Attaining an average speed of 125 miles an hour, Maurice Prevost, a French aviator, won the James Gordon Bennett trophy for France today at the international championship competitions.

Emile Verdines, also of the French team, and last year's winner of the trophy, finished second, and third place also went to France, on account of the showing made by Gilbert.

The course of the race is a closed circuit, 6½ miles in circumference. The aviators flew around this ten times, nearly all of them attaining a speed of 100 miles an hour.

Prevost's time was faster than two miles a minute.

The time of the first four follows: Prevost, 0:59:45. Verdines, 1:00:51. Gilbert, 1:02:55. Crombez, 1:09:52.

RHEIMS, France, Sept. 29.—The pick of six nations today are competing for the coveted international aviation cup over a 20-lap course of 200 kilometres or about 125 miles. The United States, England, France, Germany, Italy and Belgium are represented by the crack aviators of that country.

Charles Weymann, representing America, has recently done better than 100 miles an hour over short trial courses, and is thought to have an excellent chance for victory.

Long before the races were scheduled to start the ground for miles about the course were packed with a brilliant audience, which included representatives of the war departments of the various countries competing.

Special Delivery.

S. O. Johnson, who is spending a few days at Fort Klamath, learned that a much desired letter had arrived for him in Klamath Falls Sunday. He wanted to get hold of the letter immediately, so he phoned to the Clapp garage and had Mr. Clapp bring it up in his car.

SECOND UNIT IS ALMOST COMPLETED

Within a very short time, all the work in connection with the construction of the Second Unit of the Klamath reclamation project will be completed. This insures the turning of water into the new ditches early next Spring.

The excavation of the laterals and sub laterals was completed some time ago by sub contractors under Maney Brothers. The government has finished the structural work in North Poe Valley, and the structures on the South Poe Valley lateral will be completed in a short time.

The Second Unit will irrigate approximately 7,500 acres of farm land, the greater portion of it situated in the vicinity of Poe Valley. Water for irrigation is taken from the east branch of the main canal.

Included in the scheme are four main waterways. These are designated as the North and South Poe Valley laterals, the Nuss Lake lateral and the Griffith lateral. Water for South Poe Valley is carried across Lost River at Olene by a metal flume.

BUSY DAY FOR

LADY DEPUTY

Miss Elsie Low is taking care of the clerical department of the sheriff's office all by her lonely today, owing to the absence of Deputy Geo. A. Hayden, who is on a trip to the lava beds.

Miss Low declared that more people were in to pay their taxes Monday than had ever come in any one day since she had been in the office. Besides the many taxpayers, she had a couple of callers much under the influence of "snake medicine," who wandered in for a social chat.

Marine Band in New England

WASHINGTON, Sept. 29.—The United States Marine Band, the best known organization of its kind in America, left here today for a tour of the New England states, New York, Ohio, Pennsylvania, West Virginia and Maryland. Lieutenant Santleman is the band's director. The organization is always used at the White House functions and innumerable diplomatic and semi-official social affairs in Washington. This is the fourth concert tour the band has made. The renowned John Philip Sousa was one time director of the Marine Band.

KLAMATH COUNTY HIGH IS GETTING ENTHUSIASTIC

The prospects of Klamath County high school having a championship football team were never so bright as at present.

A rousing football meeting was held Monday morning in the school assembly hall. At this time talks were made by Instructor McCall, who is athletic manager for this term; E. V. Hawley, head of the manual training department; Edwin Cox, Forest Peil, Leon Boller and Sterling Garrett.

A royal welcome was extended four new students at the school, each of whom is excellent material for a gridiron idol. Others in school who have never appeared for football practice have agreed to come out and don football togs and help make up a championship team.

A rousing big meeting is scheduled for tonight, at which time the team will adopt a suitable yell for the team, elect a manager, take steps toward securing dates for games with Ashland, Medford and Grants Pass, and also fix the date for their game with the town team, which Keith Ambrose is whipping into shape.

It was unanimously agreed that the high school team should make every effort to arrange a game with Medford for the morning of the day on which the New York Giants and the Chicago White Sox play baseball at Medford, and make the trip on the special car that will go from Klamath Falls on that date.

COULSON WOMAN

DENIES WHISPER

SAN FRANCISCO, Sept. 29.—Mrs. Coulson testified today at the inquest over the remains of Acker and Kovack, who were killed when with her, when they were the targets for a fusillade of bullets in the Atlas garage early last week.

"As I fell fainting in the street a voice seemed to murmur to me: 'You are hurt darling. I did not mean to harm you.' I have since come to the conclusion that this was a hallucination," she concluded. "I saw nobody."

No word or look of recognition passed between Mrs. Coulson and her estranged husband, who is charged with the shooting.

ADAMS DITCH TO

BE STARTED SOON

Bids for the earthwork in connection with the deepening and widening of the Adams canal will be opened this afternoon at the local office of the reclamation service.

The work has been divided into twenty-seven schedules, entalling about 3,500 cubic yards each. The farmers in that part of the country have been invited to bid on these, and it is their plan to do the work following harvesting.

The rock work will be done by the reclamation service.

SUFFS AGAIN

ACT NAUGHTY

YARMOUTH, Sept. 29.—Suffragettes today raided the Two Greens municipal golf links. In addition to destroying much property, they posted placards with the following: "No votes—No Sport, No Peace." "We Burned the Lumber Yard Saturday."

The yard was the largest here. The fire entailed a loss of \$75,000.

BASEBALL SPECIAL

SEEMS CERTAINTY

The welcome word comes from Mr. Bailey, passenger agent here for the Southern Pacific company, that it is almost certain that the Southern Pacific company will make a special rate to Medford for the baseball game between the Giants of New York and the White Sox of Chicago, which will be played on the Medford grounds November 18th.

"If 100 or more sign up for the trip," said Mr. Bailey, "it is probable that the company will make a rate of one-way fare for the round trip, and furnish a special train for the occasion. That way the people of Klamath Falls could arrange their own schedule, leaving and returning at their own convenience."

With the likelihood of a football game between the Klamath County high school and the Medford high school arranged for the morning of the big baseball game, it should be an easy matter to get enough for a special train.

Fred Bremer and R. B. Guthridge returned Sunday from Lakeview, where they went for the former's wife and child, who have been visiting Mrs. Bremer's parents, Mr. and Mrs. C. A. Rehart. As the auto neared the reservation line a rain storm set in, and by the time the car reached Dairy the roads were a sea of mud. Despite this, however, the intrepid electric light expert reached Klamath Falls without loss of life or other trouble.

TARIFF REPORT TO BE PRESENTED

ADOPTION LOOKED FOR BY TOMORROW

Only Disagreement Now Is Regarding Cotton Futures—Following Adoption Tomorrow by the House, Senate Is Expected to Pass It Thursday, and the Addition of Wilson's Signature Will Make It Law.

WASHINGTON, D. C., Sept. 29.—The conference report on the Underwood tariff revision measure was presented to the house at noon.

The only disagreement noted is regarding cotton futures.

The conferees agreed on the tariff report by a strict party vote. None of the minority signed the paper.

Th house is expected to pass the measure tomorrow.

Adoption by the senate is set for Thursday, and that night Wilson will affix his signature.

The only possibility of delay would be a desire by republicans for final speeches in favor of protection.

"The bill is highly satisfactory now," said Congressman Underwood. "As it is now drafted it yields a surplus revenue next year of \$18,000,000."

When asked if it would further reduce the cost of living, Underwood replied:

"The conference lowers the duties more than either the senate or the house. The senate yielded about half its increases, and we yielded the rest."

GOVERNMENT STARTS A WAR ON MOSQUITOS

WASHINGTON, D. C., Sept. 26.—With two of its most eminent sanitation experts—battle scarred veterans of a hundred wars against disease—already in the field, the United States public health service is today engaged in the most scientific engagement since the inception of the war against the hated mosquito and its child, malaria.

Other experts are held in readiness and the service is listening with hand to ear, prepared to invade the mosquito-ridden sections of the country as it has already done in the cases of calls for assistance from the health authorities of North Carolina, Alabama and Mississippi.

The cotton mill sections of these states are in the grasp of malaria epidemics unprecedented. Unable to handle the situations themselves, the state health officers appealed to the public health service.

Co-operating with the health officers of North Carolina is Assistant Surgeon H. R. Carter, one of the men who drove yellow fever from New Orleans and Cuba. Extensive sanitation surveys of the affected districts are under way, and already in many districts mosquito breeding pools have been "dry cleaned," and malaria has died with the mosquitos.

Parallel work is being carried on in Alabama and Mississippi under the supervision of Surgeon R. H. Von Ezdorf, whose famous work in Havana during the "fever days" was a potent factor in restoring the health and commerce of the port.

Malaria is directly traced to "anopheles." The latter is a living animal parasite. It is transmitted to humans by mosquito bite. The mosquito's breeding haunt is stagnant water.

Stagnant water is the result of human carelessness. And human carelessness is directly responsible for the mosquito, the "anopheles" and resultant malaria.

On this theory, which has been proved to be correct by medical research, the experts are on a campaign of education. Lectures are being made in the many districts embracing a direct appeal to the people to eliminate the basic evil of malaria.

Educational lectures on scientific discoveries, the public health service believes, coupled with an appeal for precaution, is the most effective weapon that can be wielded against the disease.

Reports from Surgeons Carter and Von Ezdorf show that their educational campaigns have brought results in the already "dry cleaned" districts.

ACQUITTED, HE

SHOOTS OFFICER

United Press Service
DIEDENHOFF, Germany, Sept. 29.—Because Ensign Foerster remonstrated with him on account of his intoxication, Lieutenant Tiede, an artillery officer, shot and killed the naval man.

Tiede was courtmartialled for disturbing religious services. Today he was acquitted, and he and his friends celebrated by a drinking bout.

Sunday in the Country.

Mr. and Mrs. A. D. Miller motored out to the Ankney ranch and to the home of Mrs. Hiram Murdock Sunday, taking with them Mrs. Murdock, who had been visiting at the Miller home during the county fair.
