## MEXICAN STEERS ARE SOLD TODAY

A deal closed Friday resulted in a sale of 500 head of steers to J. C. Mitchell of Mt. Dome, by Offield & Stukel, a Merrill firm. The cattle were delivered at Merrill Friday morning.

The beef animals were some of the Mexican stock shipped in several months ago, and they rounded into prime condition on the Klamath range. They are to be driven to Gazelle, Calif.

Marie's the noisiest of Girls That ever talked or sang.

Why, even when she does her hair She does it with a bang.

For a time there has been a fashion edict that the best of nairs should part, but now there is no longer a parting of the waves (Marcel ones) for flat pompadours have sprung up again into feminine fancy. Our hair still has us by the ears, however, for never a peek from under cover are our aural appendages allowed out in the cold, cold world. The stiff undulations of the Marcel wave after wavering for some time are now firmly rooted in favor and the very latest coiffure shows the tresses drawn up in Marcel waves from the nape of the neck to the crown of the head, and back from the face in the same fashion. And for these high brows whose domes of thought seem startlingly nude when the pompadour rolls back and leaves it bare the bang is a necessity and a softening adjunct to the coiffure that covers a multitude of skins.

A style of hair dressing very popular indeed is dubbed the "Casque." It is a division of the hair into two parts with the right side rolled over the left and tucked under and pinned.

### All But One

Wm. Harvey, the horse buyer, recently returned from a trip over Harney and other counties, where he bought seventy-five head of horses. While returning with the stock to this valley he met with a misfortune which resulted in much trouble and inconvenience. The horses were placed in a field on the Warren Laird ranch, and during the night they broke down the fence, all getting out and starting back to the various places from which they had come. Mr. Harvey says every animal out of the seventy-five got out excepting one mule. It took several days to again round up the band, and he is still out six head.—Lake County Examiner.

### We Should Worry

Advertisements are abroad for 5,000 young men to fill up the ranks of the United States army. The average young American does not take kindly to the army in time of peace. But let there be a call for men to serve against a foreign enemy, and there will be ten men offer for every soldier wanted. In fact, there are 10,000,000 men in the United States ready and willing to defend the country against a foreign foe. So don't get discouraged, Uncle, you can get plenty of recruits when needed.—Alturas Plaindealer.

### Get Game Birds

District Game Warden McKay this morning received word from State Game Warden Finley that twenty-four pair of Chinese pheasants will be shipped to this district probably next week. These beautiful game birds will be the first of their species to come to Central Oregon. They have thrived wonderfully in the Willamette Valley, where the season was opened this summer for the first time. All the state east of the Cascades, however, is closed, and a very severe penalty is imposed for shooting the birds. With proper co-operation it is expected that Crook county will become well populated with these birds.—Bend Bulletin.

### Extend Phone Service

A large crew of men are busy working on the California & Oregon Telephone and Telegraph company's new line system, and are now stringing lead cables on the new poles. W. E. Hills, the manager of the company, arrived here a few days ago from Susanville, and is looking after matters connected with the new lines. Scott Hendricks, president of the company, is also expected to arrive here soon on a tour of inspection.—Alturas New Era.

Visiting in Klamath. O. Goodman of San Francisco arrived in Klamath Falls Saturday evening for a couple of weeks' visit with his nephew, J. Granis, manager of the House of Berry Tailoring company.

Pins and combs for the hair are a-glitter with gems and jet for evening wear, but the plain tortoise shell ones are favored for day and street wear. Shell pins with three or four prongs instead of the erstwhile regulation two-pronged hairpin are the fad of the moment, and much more adequate as well as ornamental in keeping your locks where they belong.

To acquire the flat puff of hair which is being worn over each and every ear it is necessary to resort to a sweetly scented and sticky hair dressing which practically glues and holds your hair in a set place. Nowadays lovely woman is indeed all stuck up.

From your head to your feet brings into prominence the cothurn or the slipper that is laced around the instep and ankles with ribbons in the empire style. While the gay Parisian wore these fancy foot effects all summer, it is now only that they are really seizing upon American pedal extremities and adding new zest to the tangos and trots. For dancing these slippers come with flat heels, but for other evening and dress occasions cothurns come with extremely high and anachronistic heels. The most striking effects are those with rhinestone buckles and lacings of that black and white grosgrain ribbon which has been so chic for suspending your watch or monocle about your throat.

Sashes and slashes seem to be the order of the day. Sashes of every description have fair females on the hip. The treading sash is the very newest. It is of heavily fringed

black satin and is knotted lightly around the hips with the fringed ends falling on to the knee and the other to the bottom of the skirt in front. Another sash novelty shows the crush girdle ending in the back with a huge chou of tulle instead of the usual bow and ends. In most sash instances the ends are no longer left free and untrammelled to float in every passing breeze, but are pressed into service to catch up the many voluminous skirt draperies.

As for the slash, absolutely no skirt seems to be without one and in dancing frocks particularly it is a case of on with the dance, let limbs be unconfined. First you had your skirt slash on the side, now the front slash is the thing, but the future slash promises to be in the back and already several smart stage frocks are shown slit up to the knee behind.

This putting the slash behind seems to be a sort of evening up for the train that is now put before. This is one of the weirdest of the many weird inventions of the fashion makers.

With the train having its beginning in front and then being drawn between the feet until it struggles out in the rear, the general effect upon the wearer's gait is a sort of straddle stride.

Most appropriate for the days of Indian Summer are the newest tan gloves from France, bearing the name of "peau rouge," which in plain United States is just plain redskin. They make a brave showing and are chief among the fashion novelties of the season.
