

UNITED STATES WANTS BIDS ON STOCK

Specifications and other particulars have been received at the Klamath Agency regarding the cattle and stallions for which bids are to be received. The stock is all to be delivered at the Klamath Agency, or shipping point.

Ten Percheron stallions are to be purchased and bids on these will be opened at the Klamath Agency March 31st. Range grown horses are preferred.

Separate bids should be made for each stallion offered, giving full description, stating whether grade, purebred or registered. If grade only, the amount of Percheron blood should be stated.

Where a bidder offers more than one stallion, he may, in a separate communication, submit a bid for delivery at the school of all such stallions on the basis of one shipment.

The cattle to be purchased for the Klamath reservation consist of fifty bulls and 686 heifers. These bids will be opened at the office of the bureau of Indian affairs in Washington, D. C., on April 2d.

The specifications given by the government, follow:

Animals must be satisfactory in type, color and conformation, and free from physical defects and deformities that will injure their value for breeding purposes, or for the market.

Heifers should average normal size and individuals conspicuously undersized will be rejected. They must be two years old, full age July 1, 1914, range raised; none to show traces of recognized dairy breeds. They must be either native bred and raised, not less than three-fourths Hereford blood; native bred and raised, not less than one-half Hereford blood; Mexican bred and raised, not less than three-fourths Hereford blood; Mexican bred and raised, not less than one-half Hereford blood.

Bulls must not be below normal breeding size, nor so lacking in type or conformation as to render them unsuitable for breeding purposes. They must be native grown and preference will be given to those grown in climates and altitudes similar to where they are to be used. They must be either pure bred Hereford two years old; not less than seven-eighths Hereford blood, two years old; pure bred Hereford, one year old; not less than seven-eighths Hereford blood, one year old.

Preference will be given the first named of each class, but bids on the others will be considered, providing the difference in prices justify. In either case they should be full age July 1, 1914. Bids should state clearly what class is offered.

Certificates from the breeders as to breeding, place where bred, and where raised must accompany cattle when presented for inspection.

Rules and regulations of the bureau of animal industry, United States department of agriculture, and state laws with respect to contagious and infectious diseases must be complied with, and documentary evidence to that effect satisfactory to representatives of the bureau of animal industry must accompany the cattle when presented for inspection.

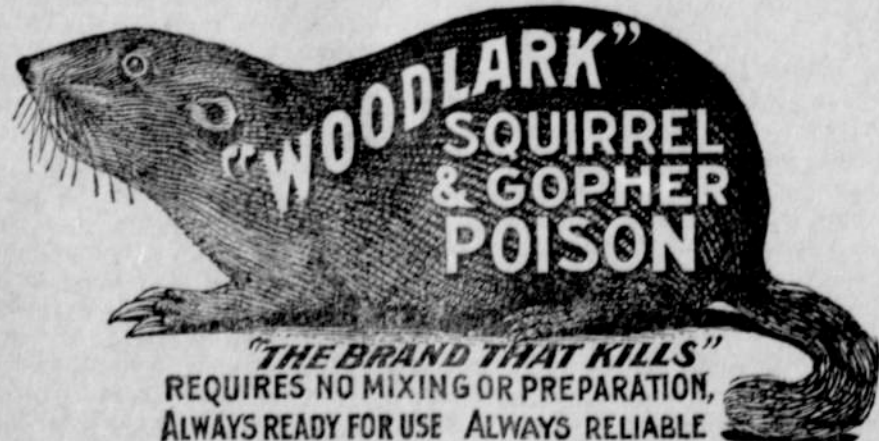

Delivery must be made between June 1st and June 30, 1914.

Famous Skin Soap Free!

Absolutely free—a 25 cent cake of D. D. D. Skin Soap, with the purchase of a full size bottle of D. D. D. Prescription for Eczema—for 15 years the standard skin remedy. Relief guaranteed from this first bottle or your money refunded. D. D. D. Skin Soap, purest and blandest of skin soaps, should always be used in connection with D. D. D. Prescription, the soothing, healing lotion. We have made fast friends of more than one family by recommending these famous products and we want you to try them now on the special offer. This is immediate. You must bring this ad with you. Come today.

Whitman Drug Co., Klamath Falls

"WOODLARK" SQUIRREL & GOPHER POISON
"THE BRAND THAT KILLS"
REQUIRES NO MIXING OR PREPARATION,
ALWAYS READY FOR USE ALWAYS RELIABLE
Sure death to Prairie Dogs distributed early in the spring before the frost is out, and before the grass starts up. Hundreds of dog towns have been completely destroyed with the "Woodlark" brand. Try it the first bright warm days this spring and be convinced. It's easily and quickly done. Don't wait till the grass begins to grow. They won't eat the poison then. Get a supply NOW and have it ready to use at the right time. The results will make your heart glad. But do it now. Destroys Gophers, Sage Rats, and Ground Squirrels of all kinds. A single kernel kills. Most economical poison made. Hundreds have been killed with the contents of a single can. USE EARLY when feed is scarce and before the young are born, for best results. When you buy do not experiment. Ask for the "Woodlark" Brand. It is the best. Money back if you're not satisfied.
CLARKE, WOODWARD DRUG CO., PORTLAND, OREGON.

START WORK ON LIBRARY SOON

Work on the \$24,000 Carnegie Library building, in course of construction near the new court house, will be resumed about the 15th, according to County Judge Worden.

"The exact date depends upon the condition of the weather," said the judge. "There is some more work to be done on the basement, but it is expected that this will be finished in time to allow the laying of cement to commence by the 1st of April."

WILL START RAILROAD BY FIRST OF MAY

SUSANVILLE, March 6.—It was reported here that the Southern Pacific would begin building north from Westwood to Klamath Falls May 1st.

It is stated that fifty miles have already been contracted for by the Utah Construction company, which built the Fernley & Lassen railway.

Nearly \$3,000,000 has been appropriated for the first fifty miles.

That this road would be built has been expected as the Utah Construction company stored its entire plant here for the winter. It is wintering several hundred head of stock here.

CAN BUY LUNCH FOR PENNY NOW

WASHINGTON, D. C., March 6.—Denizens of the Bowery used to marvel at "Beefsteak Johns," fifteen cent dinners, but here in Washington there is today a real penny lunch room.

For one cent the Weary Willies may have their choice of bean soup, hominy, baked potato, or fresh rolls. One cent also buys a cup of coffee; milk and sugar cost another penny.

Three cents will buy beef or lamb stew, or frankfurters.

The penny lunch is an adjunct to the Washington mission. About 300 meals are served there daily.

MRS. HAYNES DIES IN JACKSON CO.

Miss Elizabeth Haynes, long a resident of Klamath county, died Thursday morning at Ashland, following a brief illness. She was 84 years of age.

The remains have been shipped from Ashland and reached here Friday evening. The funeral was held at Bonanza.

Surviving Mrs. Haynes are three daughters, Mrs. Stephen Griffith, Mrs. H. G. Bussey and Mrs. Walter Purdy of this county, and two sons, J. R. and Henry Haynes, both of whom reside in Ashland.

SINNOTT IS OUT FOR SECOND TERM

WASHINGTON, D. C., March 6.—Nicholas J. Sinnott, congressman from the Second Oregon district, will be a candidate for re-election. Today he mailed to Salem, Ore., his announcement of candidacy, to be filed with the secretary of state, prior to the republican primaries in May.

Sinnott is a resident of The Dalles. During his present term of office he has done a great deal for the homesteaders, irrigationists and other vital interests peculiar to Eastern Oregon, and his re-election by a landslide vote is predicted.

Stout Gets Old Job.

Deputy Game Warden Henry Stout has received notification from Salem that he has been reappointed to that position. As yet Deputy District Game Warden Carey M. Ramsby has not been renamed.

Mrs. Moulten Better.

Mrs. Fred Moulten, who recently underwent an operation for appendicitis at Blackburn hospital, has passed the danger mark, according to Dr. Hamilton.

John Martin, who underwent an operation in San Francisco, left the hospital there Thursday, according to advices received by friends.

Missouri's new state capitol is to be built by union labor.

AGRICULTURAL TALKS IMPORTANT

IRRIGATION LECTURE OF GREAT VALUE HERE

Alkali and Its Treatment, Breeding, Feeding and Handling of Beef Cattle, and Other Important Phases of Farm Life Are Discussed by Experts—Big Attendance by Women at Home Science Course.

Friday morning's session of the short course was opened by Max A. McCall in a lecture that concerned every farmer present. His subject was "Alkali Soils and Their Treatment." After going into details regarding the origin of alkali and the universal presence of soluble salts in all arid lands, he declared all lands in Klamath county contained a certain amount of alkali.

This, he stated, was not really a detriment to the land only in such case where the alkali was concentrated. He said alkali was a valuable addition, if not in too great amounts, as it indicated the presence of other plant foods, and that such soils retain moisture better.

Black alkali, he explained, was more injurious than white because it dissolved the organic matter, allowing the soil to become compact and hard, making it difficult for water to percolate through properly.

The permanent reclamation of alkali soils, said the speaker, can only be accomplished by thorough drainage system, and in the case of black alkali, in addition to drainage, the use of gypsum land plaster. Thorough tillage, he remarked, was also necessary in treatment for alkali, as it not only checked the rise of alkali, but helped materially in eradicating it from the soil.

Professor Flitts spoke from 11 to 12 on "Breeding, Feeding and Management of Beef Cattle." He detailed the economic way of handling beef cattle from birth to market, and proved by facts, presented and implied, that the farmers realized more money for their crops of hay and grain by feeding it sensibly to cattle than by selling it in bulk or sack.

In the afternoon Professor Powers talked on a timely topic, "Handling of Irrigation Water."

He told the farmers to measure the water they used till they found out the amount needed for the best results, and where the water was costing money, it would do no harm, he said, to measure and see if one was receiving the amount bought.

For this purpose he advised the farmers to send to the Oregon Agricultural College for small weir tables, which are appliances for measuring all water passing through the weir.

The duty and service of water, said the speaker, depends on soils and crops, and is also affected by fertility of soil and weather conditions and method of planting.

The application of water to land is modified by kind and amount of cultivation, and method of purchase, and is closely related to the time, amount and frequency of irrigation.

The proper amount per each irrigation depends on the water capacity of the soil, depth of root zone, capillary power of soil below root zone and dryness of soil at time of irrigation. He said the frequency of irrigation depends on rate of lost moisture from the soil, and the amount of wetness the crop would tolerate. The time for irrigation, said the speaker, would have to be judged by the appearance of crops, weather conditions, escape of moisture by evaporation, etc.

UNIVERSITY WILL HELP IN BATTLES ON TIMBER BUGS

Bids for the construction of a storage dam, a diversion dam and approximately fourteen miles of canals will be opened April 14th by the officers of the Horsey Irrigation district. On the same day the directors will also consider bids for eleven 30-year bonds, aggregating \$570,000.

These are to be advertised at once. The Horsey project will irrigate about 20,000 acres of fine land in the vicinity of Bonanza. Under the new estimate the cost of the project is placed at \$30 an acre.

The Horsey reservoir site, recently secured, covers about 4,000 acres. After the dam is built this will collect the waters of Barnes Valley and Dry Prairie creeks, or the watershed of 270 square miles.

The dam will be a 70-foot loose rock fill, with a wooden front. It will measure 400 feet across the top, and will entail the handling of about 50,000 yards of loose rock.

Jacob Rueck, a well known resident of Yonka Valley, and one of the directors of the Horsey Irrigation project, is in the county seat today attending to business matters.

The Boston and Maine Trackmen's Union is asking for a wage increase of 15 per cent.

Twenty-one women are employed as railway brakemen and ten as baggagemen in the United States.

JACKSON WANTS PART OF THE PARK

WEST GOES TO WASHINGTON TO URGE THIS

Governor, Among Other Matters, Will Take Up Move for Increased Appropriation for Park, and an Extension of the Boundaries, So as to Give Jackson County Some Leverage to Work for a Better Road.

Governor West has gone to Washington, and it has been announced that he will endeavor to secure a larger appropriation for road construction by the government in Crater Lake National park. Incidentally he will make an effort to have the boundaries of the park increased so as to include within its borders several miles of the Medford-Crater Lake road.

Medford has been making an effort for several years past to have a good road constructed from that city to the park. Klamath county people fear that if the scheme to increase the boundaries succeeds, it will mean that the greater portion of the federal money for roads in the park will be used in the construction of the Medford road.

Objections to the extension of the park boundaries to the west is heard from the sportsmen of the county, who contend that it would eliminate the finest deer hunting and fishing in this section of the state.

During the fall open season the mountains of the Rogue River in this section is the favorite hunting ground of hundreds of sportsmen.

The fishing is said to be the finest ever. Should it be included in the national park, no hunting would be permitted.

SOX AND GIANTS ARE GIVEN BIG WELCOME

United Press Service

NEW YORK, March 6.—The big town awoke today to give the globe trotting Giants and White Sox baseball players a rousing, if not a formal welcome as was accorded to Admiral Dewey in honor of the latter's batting and fielding average in the Spanish-American series in 1898.

After "showing 'em how" in Australia, Japan, China, Rome, Paris, London and other minor league countries and towns, the big leaguers landed in New York today.

Two big tugs, chartered by Giant and White Sox routers, respectively, slipped down the bay in the cold gray dawn to meet the incoming "baseball steamer" at the mouth of the lower harbor and act as escorts to the steamer's pier.

Those of the delegation who didn't get up in time to make the trip to the bay were on the end of the pier with fifty-seven varieties of "welcome home."

The traveling White Sox and Giant players with Manager Comiskey and John McGraw will be tendered a banquet tomorrow evening. The following day the men will prepare for the trip to their respective training camps.

Thursday afternoon Miss Bessie Applegate, at the head of the department of expression, selected the ones to take part in the Senior Class play, an annual event ranking near the top of commencement exercises. This year the play will be staged at the Houston opera house two weeks before commencement.

Miss Applegate has chosen a three-act comedy entitled "A Pair of Spectacles" for the 1914 Senior Class play, which will be presented by the following Seniors:

Ralph Hurn	Benjamin Goldfinch
John Stankey	His Uncle Gregory
Leon Boller	His Son Perry
Walter Hales	His Nephew Oick
Edwin Cox	His Friend Lorimer
George Stankey	
His Shoemaker Bartholomew	
Fritz Markwardt	A Rival Shoemaker
Kenneth Stewart	His Butler Joyce
Margaret Dunbar	His Wife
Ether McAndrews	
His Parlor Maid Charlotte	
Elizabeth Houston	Lucy Lorimer

HOB0 ARMIES ARE MADE TO MOVE

OAKLAND, March 6.—When the Thorne and Kelley armies of unemployed awoke this morning they were surrounded by 200 police officers, armed with rifles, and ordered to leave. The Thorne, or I. W. W. faction, yielded, and were herded aboard box cars and started to Contra Costa county.

Kelley, though, said he would die first, but he finally weakened, and ordered his men to take box cars for Richmond. He remained with the army's baggage, the police allowing him time to pack up.

Federal Official Here.

Deputy U. S. Marshal Jackson came in Thursday from Portland to get Jim George and Fauldestone, two Indians under arrest, the former on a murder charge, the latter for bootlegging.

HE IS TOO MUCH OF A GENTLEMAN

While E. J. Murray still refuses to take seriously the petitions being circulated, asking him to become a candidate for mayor, his friends are confident his name will appear on the ballot on election day.

"Wait until he sees the petitions," said one of his supporters this morning. "I am confident that on the show-we will make, he will be compelled to accept. When we show him the names of over half the ladies of Klamath Falls on petitions asking him to be a candidate, I know he will be too much of a gentleman to refuse."

From dozens of men who have voluntarily and for the past few days have been giving their time to circulating petitions in every ward of the city, it is assured that he will have a large force of active campaign workers, should he consent to run.

ALASKA LEASING BILL COMES OUT

WASHINGTON, D. C., March 6.—Congressman Scott Ferriss of Oklahoma today introduced the administration's bill for the lease of Alaskan coal lands.

This measure provides for the leasing of blocks of forty acres or multiples, up to 2,560 acres. It fixes a two-cent a ton minimum royalty system, together with an annual rental for the lands.

CHURCHILL IS ON WAR PATH

SALEM, March 6.—In an endeavor to stop the flow of circular letters into Oregon from alleged Eastern "Lecture bureaus," which offer to supply students expecting to graduate from high schools or colleges this spring, with orations or essays on any possible subject, State School Superintendent J. A. Churchill today is on the trail of the "canned oration" producers, with threats to prosecute under the law regulating correspondence schools.

Not only do the bureaus offer to furnish students with anything from a "valedictory" to a "class prophecy," but they offer to furnish "very cleverly" written presentation addresses" for the chairman of the school board.

HIGHLANDERS IN TRAINING WORK

HOUSTON, Tex., March 6.—Thos. Daly, the veteran coach, secured to train the New York Americans, has arrived here, and will lose no time in putting the boys through a vigorous system of preparation.

Daly was famous as a National League catcher. He made the trip around the world with the Chicago team and in 1890 signed with the Brooklyn club, playing behind the bat and second base.

He has been a scout for several clubs in recent years.

HORSEFLY DAM ADVERTISED SOON

HODGE WILL TELL OF THE PERIL IN TALKS

Local Man, Former Student at the University, Secures the Interest of the Department of Zoology in the Local Campaign for the Eradication of the Pine Beetle, and Experts Will Come Here.

The timber interests of Southern Oregon have secured another powerful ally in their fight against the spread of the Western pine beetle through the forested areas of this part of the state. This is the University of Oregon.

In a letter just received from Professor John F. Bozard, head of the department of Zoology at the University, he states that the University will send the field agent employed in the biological survey here to give attention to this menace, and that Bozard himself will also visit the various camps and take an active part in the fight to kill off this pest, which with a little longer headway would destroy practically all of the timber in a short time.

Besides the personal work here, Bozard has also stated that he will take up with Dr. Clifton Hodge, professor of civic biology and extension lecturer, the abridgement of his lecture on "Oregon's Forest Resources" to include some terse statements regarding the timber beetle peril among the other dangers to the forest.

The importance of the work being done in this section for the eradication of the beetle can be gathered from the fact that in addition to several crews from the Klamath-Lake Forest Fire Association, the state bureau of forestry has detailed men to participate in the campaign, while the bureau of entomology of the department of agriculture is taking an active part in the work.

Participation by the University is indirectly due to Robert B. Kuykendall, a graduate of the University, who is reading law in this city. Being interested in forestry, Kuykendall has made a number of investigations, and on some of these, he asked the advice of Professor Bozard.

Learning of the campaign being waged, the University man at once volunteered the services of his entire department.

C. M. RAMSBY MAY RUN FOR OFFICE

Another well known Klamathite may be added to the number already entered to dance around the "May Poll" for the republican nomination as sheriff. This is Carey M. Ramsby, who has been deputy district game warden for the past two years.

Friends of Ramsby are confident that he will enter the race. Ramsby himself remains evasive on this question, and it is believed that he is giving the matter careful study before making an announcement.

"Concord" Pianos

are built to satisfy the popular demand for a standard, high-grade instrument at a reasonable price. They are backed by an experience of more than thirty years in the manufacture of pianos of the highest grade only. The idea constantly in mind is to produce standard, high-grade instruments which are truly

"A Concord of Sweet Sounds"

Each piano is fully guaranteed for ten years, and, what is more important, we have yet to find one which has not lived up to this guarantee to the letter.

Let us show you a really good piano with a full, rich tone and even scale, which can be purchased at a moderate price and on easy monthly payments.

We Invite Comparison
