

DON'T ALLOW FLIES IN YOUR HOUSE
DON'T PERMIT THEM NEAR YOUR FOOD.
DON'T BUY FOOD WHERE FLIES ARE TOLERATED
DON'T EAT WHERE FLIES HAVE ACCESS TO FOOD

Flies are most dangerous insects known to man.

Flies are the filthiest of all vermin. They are born in filth, live on filth, and carry filth around with them.

Flies are known to be carriers of millions of death dealing disease germs. They leave some of these germs wherever they alight.

Flies may infect the food you eat. They come to your kitchen or your dining table, fresh from the privy vault, from the garbage box, from the manure pile, from the cesspolder, from decaying animal or vegetable matter, or from the contagious sick room, and they deposit in your food, and YOU DO swallow filth from privy vaults, etc., etc., if you eat food that has come in contact with flies.

Flies may infect you with tuberculosis, typhoid fever, scarlet fever, diphtheria, summer complaint or diarrhoea of children, infantile paralysis and other infectious diseases. They have the habit of feasting on tuberculosis sputum and other discharges of the sick with these diseases and then go direct to your food, to your drink, to the lips of your sleeping child, or, perhaps, to a small open wound on your hands or face.

What to Do to Get Rid of Flies
Screen your windows and doors. Do it early, before fly time, and keep screens up until snow falls.

Screen all food, especially milk. Do not eat food that has been in contact with flies.

Screen the baby's bed, and keep flies away from baby's bottle, the baby's food and the baby's "comforter."

Keep flies away from the sick, especially those ill with typhoid fever, scarlet fever, diphtheria and tuberculosis. Screen the patient's bed. Kill every fly that enters the sick room. Immediately disinfect and dispose of all discharges.

Catch the flies as fast as they appear.

Use liquid poisons, sticky fly paper and traps.

Place this fly poison in shallow dishes throughout the house: Two teaspoonsful of formaldehyde to a pint of water.

To quickly clear rooms of flies, burn pyrethrum powder or blow powdered black flag into the air of the room with a powder blower. This causes flies to fall to the floor in a stunned condition. They must then be gathered up and destroyed.

Eliminate Breeding Place of Flies
Sprinkle chloride of lime or kerosene over contents of privy vaults and garbage boxes. Keep garbage receptacles tightly covered, clean the cans every day, the boxes every week. Keep the ground around garbage boxes clean.

Sprinkle chloride of lime over piles, old paper, old straw and other refuse of like nature. Keep manure in screened pit or vault, if possible. Manure should be removed at least every week.

Pour kerosene into the drains. Keep sewerage system in good order, repair all leaks immediately.

Clean cuspidores every day. Keep 5 per cent solution of carbolic acid in them all the time. Get rid of sawdust boxes used as cuspidores—destroy them—they're unsanitary.

Don't allow dirt to accumulate in corners, behind doors, back of radiators, under stoves, etc.

Allow no decaying matter of any sort to accumulate on or near your premises.

Flies in the home indicate a careless housekeeper. Remember: No dirt—no flies.

If there is a nuisance in the neighborhood notify the health department.

Home Gardening a Recreation

There is nothing in the world that will remove that "depressed" feeling like half an hour spent gardening. In fact, there are hundreds of people in the city who look upon their little patch of ground, rake, hoe and spade as the best sort of tonic for tired bodies and strained nerves.

BONANZA WANTS TO PLAY A GAME

A letter from Dr. Harris to Kieth Ambrose of this city asks for a ball game with the Klamath team to be played at Bonanza Sunday, April 26. The doctor, who is manager of the Bonanza Athletic Club, wants to have a reply tomorrow, so he can arrange for transportation, get his team in shape, and do the proper thing in the way of publicity.

The letter indicates that the boys from that neck of the woods mean to have a team in the field this season, and are getting in readiness early in the game. Mr. Ambrose has turned the letter over to the directors of the baseball association, who, in the absence of Manager Morrow, will take

the matter up with Dr. Harris. Most of the boys who will likely make the team this season are in favor of making the trip to Bonanza, as it will be a good practice game, and also allow the "powers that be" an opportunity to see how the players are going to perform.

Very little land is needed to raise enough garden truck to keep an ordinary family supplied throughout the spring and early summer and leave them sufficient vegetables, such as potatoes, corn, onions and carrots for winter use. The ordinary city lot, 50x100 feet, gives ample room for a nicely arranged front yard with a lawn, shrubs, climbing vines and trees, and a back lot vegetable garden.

KIDS SEE SHOW FREE; KLAMATH IS CLEAN CITY

J. V. HOUSTON IS HOST TO THE CHILDREN
In Return for Their Work of Making Klamath Falls "Spotless Town," Youngsters Are Giving a Movie Matinee—City's Teams Have Their Work Ahead of Them in Hauling Garbage.

If the Klamath Falls kids remain as good always as they are today, the passing of the present generation of grownups will witness also the passing of penal institutions, for since John V. Houston announced a free matinee for the good children who worked to clean up the city, the crowd of angels has grown until the number rivals the "just-before-Christmas" attendance at the Sunday schools.

Long before the Temple theater opened, the kids were on hand with notes from parents saying that they had worked.

Mr. and Mrs. J. V. Houston enjoyed the children's matinee more than any other two children at the show. Their pleasure and enjoyment was gained by watching the little "City Beautiful" tots bringing in their notes from parents, stating what the bearer had accomplished in the way of cleaning up the city, and using these notes as passes into the show.

As a special concession to the little ones, Mr. Houston put such pictures on the screen as could be easily understood and appreciated by the younger ones.

The Temple was comfortably filled in a few minutes after the show started, and in a very short time many of the older ones who came to watch the tots had to content themselves with standing room.

"This must be the cleanest city in the land," said Mrs. Houston, as she fondly glanced over the aggregation of youthful workers.

THE DANDELION WILL SOON APPEAR IN LAWNS

Within a very short time the dandelion, enemy of all lawns, will be spreading his long leaves over the sod and strangling the sprouting grasses, unless steps are taken to remove him. Dandelion is probably one of the most hardy weeds with which home owners have to contend.

When its root is cut in twain and the stock and stem removed, it does not seem to bother the thing at all. It simply gets busy, grows another crop of leaves, unfolds its brilliant yellow flower and continues to do business at the old stand.

One of the recognized ways to rid a lawn of the obnoxious and persistent invader is to either pull it out root and all, or to cut off the head and part of the root and then pour in some kerosene and salt. This mixture usually kills what life remains.

In digging out dandelions, a thorough way is to take two strings and stretch them across the yard, leaving a space of possibly three feet between them. Then work across the yard, digging out only such plants as are found within the limits set by the string.

As soon as one row is completed, make another row, and so move across the yard. Without the guiding strings, many plants are not discovered, and one soon is parent to a hundred new ones.

MOTORCYCLISTS HAVE BIG RACE AT SACRAMENTO

SACRAMENTO, April 18.—What promises to be the biggest motorcycle race meet held in the United States will formally open tonight with a decorated motorcycle parade. Awards will be made to owners of the most attractive turnout.

More than 1,000 riders from many sections of the country were expected here by tonight or tomorrow, when the races are to be held at the fair grounds.

Tours have been arranged from many cities of California, and awards are offered for the largest representation from any one city.

A prize will also be awarded to the individual motorcyclist who rides his machine the longest distance to attend the meet.

Tomorrow's events will be run under the auspices of the Federation of American Motorcyclists.

Here to Reside.

A. Shetler, formerly of Montague, has taken charge of the pumping for the Southern Pacific on the Klamath division. He has his family here, and has rented one of Bob Alexander's houses.

The Klamath county high school debating team met defeat Friday, when they met the team from Oregon City high school at Eugene. The vote stood two to one against the local debaters. As a result of this decision, the Klamath debaters, Forrest Piel and William Hagelstein, are eliminated from the finals for the state championship.

ASSAILANT OF MAYOR WILL BE INDICTED

WILL PROBABLY BE SENT TO MATTEAWAN
Mayor Mitchell Thinks That the Attempt on His Life Was the Result of Dementia—Was a Characteristic Product of Cheap Whiskey and Life in Cheap Lodging Houses—Might Be Given Twenty Years for Crime

United Press Service
NEW YORK, April 18.—It has been learned that the aged man who yesterday attempted the life of Mayor John Puroy Mitchell is William Mahoney.

He will probably be indicted by the grand jury on Monday, and the probabilities are that on account of his condition he will be sent to Matteawan, New York's asylum for the criminal insane. Should it be considered that he is responsible, and realized the gravity of his act, however, he is liable to a twenty-year sentence in Sing Sing.

Mayor Mitchell thinks the man is insane, and he is described by District Attorney Whitman as "a rum-soaked hobo, sodden and embittered, and in all probability insane. Except for his advanced years, he is a characteristic product of the lodging houses and cheap whiskey bars. He might be imprisoned for twenty years, which in this case would mean a life sentence. It will be better to send him to an asylum."

MARIE HARPOLD WINS DECLAMATION CONTEST

From the opening musical number by Miss Waive Drew to the closing address of F. M. Upp in presenting the medals, the Upp gold medal declamation contest held in the high school auditorium last night was a brilliant success.

Miss Marie Harpold won first place, with Miss Ida Thomas a close second. The entire quintet of speakers surprised and delighted their friends by their cleverness before an audience, and each received a full measure of deserved applause.

The musical numbers on the program pleased immensely, and the audience proved its appreciation by insistent encores.

Mr. Frank M. Upp, donator of the Upp medals, made a neat talk to the contestants before presenting the medals to the winners. His talk was instructive, not only to those who had taken part in the contest, but to the entire audience as well.

Mrs. Don J. Zumwalt, Chas. Stone and W. S. Slough were the judges of the contest. Following is the program in full:

Piano Solo—"Butterflies" G. A. Grant-Schaefer, Poupée Val-sante, Poldini.

Waive Drew
"A Legend of Bregenz," . . . Proctor
Wayne Keesee

Violin Solo—"Dream of Love," Liszt; "Serenade Badine," Gabriel-Marie; "Humoreske," Ovorak

Anton Polivka
"The Boy Orator of Zepata City" Davis

Clifford Sevits
Piano Duet—"Zampa Overture, Herold; "Polonaise," Hoffman
Verda Cosad, Nina Noel
"Wilson's Inaugural Address," Charles Dorr

Music—"Swing Song," Frederick Loehr; "Now Good Evening, Good Night," Brahms
Girls' Glee Club

"Lasca" Duprez
Marie Harpold

Piano Solo—"Berceuse," Kronke; "La Sultane," Thome
Clara Calkins

"The Honor of the Woods," Anonymous
Ida Thomas

Song—"Forget Me Not," Gleese; "Ciribiribin," Pestalozza
High School Chorus

Awarding of Medals . . . Frank M. Upp

LOGGER'S MIND TO BE TESTED

John Coleman, a logger who has been in the employ of the Algoma Lumber Co. was on Friday morning placed in the county jail, to await a hearing to test his sanity.

The young man's actions have been noticeably peculiar, and his discourse is strong evidence that he is suffering from hallucinations.

SUBSCRIBE FOR RESERVE STOCK

The First National bank of Klamath Falls Friday subscribed for sixty-six shares of stock in the Federal Reserve bank to be established in San Francisco under the currency reform system. The currency bill makes it compulsory for all national banks to join the reserve system or surrender their charters. Each member bank subscribes 6 per cent of its capital stock toward the capital stock of the reserve bank in its district.

"CLEAN UP" THE ORDER OF THE DAY IN KLAMATH

RUBBISH AND TRASH MAGICALLY VANISHING
Schools Are Dismissed, and Scholars Are Busily Plying the Rake and Hoe—Bonfires Are Incinerating Much Garbage, and the City Will Furnish Teams to Haul the Refuse Out of Town.

(From Friday's Daily)
This is Clean-Up Day!

In all parts of the city, rakes, hoes and other implements are being plied vigorously, scraps of paper, rags, tin cans, old bottles and other debris that accumulates is being gathered; bonfires are sending to the high heavens the smoke from sacrificial altars of trash, and in the front of the houses there are being piled up boxes, barrels and sacks, laden with trash to be hauled away.

Today and tomorrow were the days set aside by Mayor Nicholas' proclamation as Clean Up Days. It was deemed advisable to devote two days to the good cause, in order to get out every speck of rubbish and trash.

This will be no little "lick-and-a-promise" clean up, either. Those who are at work today are not contenting themselves with a superficial scouring, but are delving into the hidden places, and almost tearing up the surface.

Besides raking up the yards, lawn mowers which have lain rusty in the sheds since last fall, are being hauled forth, given a generous oiling, and sent whirling through the grass and clover. On top of all this, many are figuring with the painters on improvement applied with a brush out of a can, and others are picking out shrubs vines and other plants for beautifying their homes.

In order to allow all the children a chance to participate in the work, the schools were dismissed this afternoon.

HOW LIFE INSURANCE RISKS ARE FIGURED

SAN FRANCISCO, April 18.—According to the records of the big life insurance companies of the country, slender women are better risks than stout women, and single women live longer than their married sisters. "A woman who is thirty pounds under weight," said George H. Beaudry of a coast life insurance company, "is 18 per cent better risk than a woman who is thirty pounds over weight. Mortality among women who are thirty pounds under weight is only 94 per cent, whereas among women over-weight the mortality is 112 per cent.

"The spinster's chances for long life are 50 per cent better than those of her married sisters. Out of 149,000 single women insuring the mortality rate was only 81 per cent, while among the women insuring with their husbands as beneficiaries the percentage was 126 per cent. The married woman has not an even chance with the married man, at least in the first few years of married life. The percentages among the men increase with age. For the first two years of insurance women have a high mortality rate, whether they be married or single, and this fact the companies attribute to a premonition which women are declared to possess. The insurance people call this instinct, and they say women feel possibilities of death so keenly that often the companies lose during the first two years of policy holding.

"Two per cent of all the policies the companies grant to suicide, and the figures relating to women's suicide throws an interesting light on the facts. Death from self-inflicted causes among spinsters total only six-tenths of 1 per cent, while among married women the percentage is less than one-tenth higher. The companies make a distinction, however, among the married women. Between the 'happily married' class, or women whose insurance is drawn in favor of their husbands, and the single women there is almost no difference. "The women whose beneficiaries are people other than their husbands show one and one-tenth percent, while among the widows and divorced women the percentage from suicide climbs to 1.7."

A LITTLE PRUNING IS A GREAT HELP TO SHRUBS

Many people wonder why their flowering shrubs fail to blossom, particularly those kind which bloom early in the spring. The fault in most cases is not with the shrub, but with the cultivator. Deciduous trees and shrubs should be given severe cutting back or pruning when transplanted, and should also be pruned regularly afterward, but due respect should be paid to the fact that the time to prune different shrubs varies.

Proper pruning, in short, depends upon their habits and the purpose for which the operation is performed. Shrubs that bloom early in the spring form their flower buds during the pre-

Interesting to the Ladies

BY MARGARET MASON

(Written for the United Press)

NEW YORK, April 18.—What a boon these new three-in-one dresses will be to all fascinating lady black-maillers and shoplifters. Nowadays, when Alicia, the alluring adventuress, leaves her hotel in a chic costume of black taffeta and robin's egg blue, with a brace of square-jawed detectives at her high French heels, she despairs not. Instead, she hurriedly turns the corner, pulls a string, and lo! she is garbed in ebony hue from top to toe. Curses from the baffled bloodhounds of the law, who are left bewildered, swallowing their chagrin and Adam's apple—and there you are.

But assuredly these are not the only circles which will receive the handy quick-change costumes with open arms. The more circumspect embrace of the poor but honest society girl, whose frocks must needs number more than her paltry pence, awaits them joyously.

A sample of the possibility of these chameleon-like garments is a model of ash colored faille with a self-toned shoulder cape and deep tunic banded in rose and blue striped taffeta. Scene two, and the tunic and cape are turned wrong side out, becoming a tunic of old blue taffeta. For the third and positively last appearance, a cord about the waist is deftly tweaked and the tunic gathers itself up into a delectable bustle effect, while the cape is simply shed entirely. Naturally the combinations and surprises of these trick gowns are as limitless as the ingenuity of the present day dressmakers.

Since the skirts have reached the limit of narrowness they have been forced to bow to the law of locomotion and take up their slack in other directions. Hence their upward trend and pronounced tendency toward abbreviation. The shorter your skirt the better seems to be the last gasp of fickle fashion, and actually some of them are finished in flaring ruffles and double and treble rufflings on their ankle length edges. It will obviously take the hobbled and mincing step maiden of the last few seasons some time to get her stride in the newest short and almost wide skirts.

And just to prove that the old adage "a place for everything and everything in its place" has no standing in the realms of the mode, back combs are now being worn in front, if you please. It's the very smartest place

ceding summer, and they should, therefore, not be pruned until immediately after flowering, if their flowers are to be preserved.

Late blooming shrubs flower on wood of the same season's growth, and should be pruned while dormant, late in winter or early spring. One-third of the previous season's growth may be removed. When dense growth is desired the plants should be pruned regularly, particularly when grown in masses. Otherwise some of them will become too tall, with unsightly open branches. The shearing or trimming of hedges should never be done later than the 1st of July. Late cutting allows a new growth which does not have time to ripen and harden enough to withstand the rigors of winter.

Among the early blooming shrubs that should not be pruned at this time of the year are such plants as lilacs, snowballs, spiraea and others of this family. To prune them now means virtual ruin of the flowering.

UPPER LAKE NAVIGATOR HAS A NARROW ESCAPE

Dragging submerged through the water at a rate of ten or twelve miles an hour, clinging desperately to a painter attached to a motor boat, and just a few inches from the propeller blades that would hack him to pieces, Captain H. E. Calkins of the mail boat Spray escaped a watery grave in Upper Klamath Lake Friday afternoon by almost a miracle.

The Spray was making its usual trip to Upper Lake ports, and after the last passenger had landed at Odessa, Calkins started alone in the big launch for Harriman Lodge. When he was several miles from Odessa, and some distance out in the water, Calkins, on the front deck of the Spray, slipped on a box in some manner, and was precipitated into the water.

There was nobody to shut off the engine, and as the boat sped by him Calkins grasped the front tie rope. The speed of the boat through the water pulled the mariner under the surface and beneath the boat, and his feet were so close to the whirling propeller blades that the heel was cut from one shoe.

With this danger beneath him, Calkins, with the strength that comes close to the edge of despair, laboriously and slowly worked his way against the current caused by the

for them, nestling right over your forehead fringe in the front fluff of the correct new high coiffure.

Whether you choose the zebra or a stick of peppermint candy as your model, it little matters if you are just striped. To be right in line with the style you must be heavily lined in two-toned stripes or the variegated hues of the Roman silks. Black and white stripes running up and down are very chic with the combination of blue and green as a close rival.

Striped skirts in combination with plain jackets of taffeta or moire are decidedly good, while Russian blouse suit with the plain blue toned duvetyne blouse finished around the hips in a tangle of striped green and blue taffeta and silk sleeves of the same are stunning with the plain duvetyne skirt. Stripes have even stamped themselves upon the smart spring hosey mostly in black and white effects.

If a mere man meets a pretty maid these days toting a neat little leather case like a miniature medicine bag he hasn't built up hopes of annexing her as his family physician by any means. One case doesn't make a doctor, particularly if it be a smart little leather affair in colored leather. All the girls are carrying these practical zwall square leather boxes in lieu of the more conventional bags and purses of yore.

Opened up before the uninitiated they display a bewildering array of every little thing needed to repair, perfect or manufacture a complexion on the spot. You may have all the comforts and necessities of your dressing table at your finger ends, so no wonder femininity is quite mad about 'em.

Less practical as first aid to injured complexions, but more charming as accessories of the dainty spring frocks are the brilliant hand colored bags of hand wrought leather, their tops incrustated with many colored semi-precious stones and suspended on chains of gay toned beads.

With an omnipresent bead necklace to match, these illuminated leather bags are bright and effective touches to an otherwise monotonous toilet.

Since the maid of yore was so devout at telling her beads, it is only meet that the maid of today should see to it that beads are the telling part of her chic costume.

speeding boat, until he was at the boat's side, and out of danger.

Owing to his weakened condition he had difficulty in clambering again to the deck of the boat, but he finally accomplished this, and finished his daily run.

CUP DEFENDER LAUNCHED TODAY

BRISTOL, R. I., April 18.—Mother Ocean today took to her bosom one of the yachts which will battle among themselves for the honor of representing America in the defense of the America's cup against Sir Thomas Lipton's Shamrock IV next September.

The ocean racer launched today is the Resolute, the Herrschoff's entry. It was the first of the American defenders to take the water. The ceremonies today were elaborate.

FIRE PREVENTION DAY IN FRISCO

SAN FRANCISCO, April 18.—Today was observed throughout California as "Fire Prevention Day," and more than a thousand prominent insurance men were guests of the Panama-Pacific exposition officials.

The visit of the insurance men to the exposition grounds marked the recovery of San Francisco from the disaster of 1906, and was an "eight-year-after" celebration.

All the means of fire prevention to be used on the fair grounds were exhibited, and a demonstration of the municipal high-pressure system was also given under the direction of Fire Chief Murphy.

HOW TO DOCTOR THE SICK LAWN

The lawn that looked sick last fall is in all probability still sick, and this is the time of the year to give it the proper medicine to cure it. If there are bare spots, an examination of the soil may lead to the discovery that there is need of a good strong application of fertilizer to give the earth sufficient food to make the grass grow again.

If the lawn has an appearance of "thinness," a fair sprinkling of seed will work wonders in a short time. Besides the introduction of new stock does the entire lawn much good, and aids in the production of stronger and better grass.

PIGS and calves thrive and grow fat when fed with warm, skim milk. You cannot get warm skim milk to feed them unless there is a cream separator on your farm. There is money enough in this one advantage to pay for a cream separator the first year. This is especially true if you buy a close skimming, durable International Harvester cream separator—Lily, Bluebell or Dairymaid. These separators have all the points which make cream separators good. They have the balanced bowl, the self-adjusting neck bearing, the tool steel spindles, the bronze bushings, the spiral gears, the low supply can, the high skim milk spout, and the open, sanitary base, without which no separator can be satisfactory. Some dealer near you handles I H C separators. If you do not know, write us and we will tell you who he is. We will also send you our cream separator book which tells you why it pays so well to buy an I H C separator.
