Lead Pencils May Be Next Hit by H. C. L.

United Press Service
BERLIN, May 7.—There is a threatening increase in the prices of lead pencils due to the effect of the new conservation laws in the United States. Germany supplies the world with lead pencils, but obtains its cedar from America.

The devastation of the American cedar and cypress forests, together with areas now set aside to which the axe and saw may not be laid, has created a great scarcity of this wood for lead pencils.

Hydroplane of the Type Used in Mexico by U. S. Troops

Hydroplanes and aeroplanes will be commonly used by American troops if the war in Mexico goes on any length. Already several have been taken to Vera Cruz on the battleship Mississippi, and an aeroplane was used by Admiral Fletcher's men in flying over the Mexican city to locate the troops of General Mass, the military governor, who fled after an engagement with the marines. The illustration shows marines experimenting with a hydroplane in the water.

RUSSIA ORDERS EMBARGO ON SHIPS

COUNCIL OF MINISTERS AUTHORIZES WAR MINISTER TO SEIZE VESSELS FOR THE TRANSPORTATION OF WAR SUPPLIES

United Press Service
ST. PETERSBURG, May 7.—Diplomatic circles are considerably exercised over a new order just issued by the council of ministers, which authorizes the war minister to lay an embargo on any vessel or vessels of the Russian mercantile marine needed for transportation of war stores and troops fourteen days before formal mobilization orders are issued.

The order provides that on the imposition of the embargo no member of the crew of the vessel affected may leave the ship, and the clerical staff of the ship owners' office must also remain at their posts, all being placed under military law. It is pointed out that under the new law Russia could secretly have everything ready for war a fortnight before a general mobilization order was issued.

Threatening Jewish Folks Again at Kieff

United Press Service
ODESSA, May 7.—More than five thousand Jews are threatened with expulsion owing to the incorporation of several suburbs with Kieff, the city made famous by the Mondel Bells trial, and which is outside the pale.

The suburb of Demiovka, with 1,184 Jewish families, comprising 5,040 persons, and that of Shulavka,

with 120 families or 556 persons, were within the pale, but as part of Kieff, Jews are no longer permitted to live there.

The governor of Kieff has recommended to St. Petersburg that the residents of these suburbs be attached to the district of Lukamovska, but in the meantime the police are inspecting permits of residents, with a view to prosecution and expulsion.
