Oxford University Has Begun Sessions Today

United Press Service
OXFORD, Oct. 8.—Oxford opened today, despite a great decrease in attendance, due to a big part of the student body having joined England's army. The total enrollment at the school is not expected to exceed 1,000. The students absent on military service will suffer no loss in their standings as a result, it was announced.

The time spent in serving their country will count as time in residence at Oxford, if the undergraduates so desire. American students entering Oxford for the first time are expected to receive a great deal more attention this year. They are expected to be more of a force in the school. All students will spend each day in drilling for military service.

OFFERS NEW SCHEME FOR THE LABOR PROBLEM

United Press Service
CHICAGO, Oct. 7.—Co-operating with various charity organizations, the city marketing commission, which has touched the problem of the unemployed in its campaign for municipal markets, has formulated a program for handling the labor problem this winter, and has sent it to the Chamber of Commerce and leading employers of labor for approval.

SMITH-LEVER ACT IS NOT FULLY UNDERSTOOD

WASHINGTON, D. C., Oct. 7.—Many letters are being received by the United States department of agriculture which indicate that farm women in various sections of the country have come to believe that the government is about to assist them with grants of money to individuals. This unfortunate mistake which, it is feared, will be the cause of considerable disappointment, appears to have arisen through a misunderstanding of the Smith-Lever act recently passed by congress.

The marketing commission suggests that before winter sets in the city take a definite stand against being made the dumping ground of thousands of floaters, who drift into Chicago every fall to spend the winter. It believes that if the city and employers alike announce that residents of Chicago will be given the preference in hiring men through the winter months, this movement will be checked.

Under this act funds contributed both by the federal and state governments are made available for practical demonstration work in agriculture and home economics. Experts from the agricultural colleges and the county agents, both men and women, are to show farmers and farm women the value of modern methods in agriculture and housekeeping, and demonstrate the use of labor saving devices.

Big employers are urged to aid the workers during the winter months by putting employes on half pay, instead of cutting their forces in half if business conditions make any reductions necessary. They are further urged to give preference to married men, or those supporting dependents, if lopping names off the payroll becomes a necessity.

The purposes of the act are thus entirely educational; and there are no provisions whatever for direct financial assistance. This demonstration work, which the Smith-Lever act is designed to promote has already met with considerable success in the states where it has been started, but the additional funds now available will greatly increase its efficiency.

Department stores and factories employing girls are asked to retain girls who must support themselves in preference to those who are seeking work to earn "pin money." The situation among the working girls, the commission declared, demands particular attention.

To avail themselves to the full of its possibilities the department officials recommend that farm women form local clubs and then communicate with the county agent or the state agricultural college. In this way it will often be possible to secure a visit from the county agent or from the home economics expert.

SHAKEUP COMING IN POSTOFFICES

WASHINGTON, D. C., Oct. 7.—Plans for the reorganization of the postoffice staffs in a score or more of the larger cities, with general shakeups in the personnel, has been announced by the postmaster general. Cleveland, Ohio, will probably be the first affected. The plan is to discharge the postmaster from all except executive functions, and to put experienced men in charge of the direct work of handling the mails.

WASHINGTON, D. C., Oct. 7.—

Plans for the reorganization of the postoffice staffs in a score or more of the larger cities, with general shakeups in the personnel, has been announced by the postmaster general. Cleveland, Ohio, will probably be the first affected. The plan is to discharge the postmaster from all except executive functions, and to put experienced men in charge of the direct work of handling the mails.

SCHOOL BOARDS AT INSTITUTE

The following letter is being sent the school officers of the county by County School Superintendent Fred Peterson:

The annual school board convention will meet at the high school building in Klamath Falls, at 10 o'clock, Friday, October 16, 1914. I should like very much to have at least one member from each school board of the county present at this meeting.

Subjects for discussion will be "Condition and Care of School Buildings," "The Teacher," "School Legislation," "School Taxes." Definite action on some matters of importance will be taken at this time. Do not fail to be present. Meals may be taken at the high school lunch counter.

JAP EXHIBIT ON WAY HERE

SAN FRANCISCO, Oct. 7.—The first shipment of materials for the Japanese government building at the Panama-Pacific exposition, consisting of building materials, stones and trees for the garden, will be brought to this city on the steamer Shinyo Maru, which leaves Kobe October 8th. On the same steamer will be picked Japanese workmen. The Shinyo Maru will bring 400 tons of material for the building, eighty-five tons for the Japanese tea house and 150 tons of stone.

The Chiyo Maru, leaving Kobe October 27th, will bring additional components of men and materials. Architect Goichi Takeda is also expected to arrive on the Chiyo Maru.

Fractures His Nose.
Howard Dayton, connected with the Conon electrical store, has his nasal appendage in a metal cast, as the result of a spill from a motorcycle on the Pelican City road last night.

Wages of women operatives in the silk mills of China are nearly at the vanishing point, as they only receive 5 cents a day.

At the request of a number of yacht clubs in this country and abroad, the management of the Panama-Pacific exposition has decided to postpone the international yacht regatta from April, 1915, to August and September, 1915.

According to a Warsaw correspondent a German dirigible was shot down near the fortress of Modlin, and the German crew captured.

It is announced that a giant lumber corporation with a capital of several million dollars is planned by holders of large timber interests in Clatsop and Tillamook counties. It will build a fleet of steamers and maintain a string of eastern distributing yards.

The Otis Elevator company of Portland will install the largest battery of elevators on the coast in the new Meier & Frank building in Portland.

Diplomats in Rome say they expect Russia to declare war upon Turkey unless Turkey demobilizes.

LIQUOR QUESTION EXCITES CONGRESS

LAWMAKERS AGITATED OVER WAR TAX PROPOSED FOR BEER AND WHISKEY AND CONTEST IS A BITTER ONE

United Press Service
WASHINGTON, D. C., Oct. 8.—A bitter contest is expected in both the house and senate when the war tax measure now in the hands of senate committee is reported to congress.

The "liquor question" will be the prime issue, and will overshadow all other articles in the bill, and a strenuous fight will be made by the liquor interests to prevent an additional tax on their goods. The democratic senate caucus met at 10 o'clock this morning in an effort to hasten the completion of the committee's report.

Hotel Arrivals

White Pelican
E. H. Daniels and wife, Medford; Mr. and Mrs. S. O. Johnson, J. W. Dana, E. C. Notter, Berkeley; J. B. Irwin, Pittsburg; Daniel Kleih, Salt Lake; Frank W. Hooper Esq., Yreka; Jack Hammond, Harry Green, San Francisco; Raphael on, Washington, D. C.; C. S. Judd, Portland; W. J. McEnerney, Dunsmuir.

Hotel Hall

Lester Nichols, Bonanza; W. C. Tucknell, Dunsmuir; Mrs. Geo. Lisk, C. E. Hoyt, A. A. Mitchell, Fort Klamath; N. G. Ginsbach and wife, Chiloquin; W. C. Dalton, Malin; C. D. Webster, Dorris; R. Kattenhorn, Merrill; W. G. Akers, Santa Barbara; W. E. Glendinning, C. F. Raymond, Ashland; R. W. Terrell, A. F. Hunt, Portland; W. W. Morrow, H. L. Buettner, Lee Renchards, A. E. Slig, M. Hill, San Francisco; E. R. Smith, B. A. Barry, Sacramento; Mrs. N. Berry, G. K. Harrington, Salem.

To retard the speed of motor trucks or stop them entirely, if not running too swiftly, a Frenchman has invented a wide bladed fan, horizontally mounted beneath the vehicle.

OREGON POTATO FARMERS ARE OFFERED INDUCEMENTS

CORVALLIS, Oct. 7.—By growing known varieties of potatoes free from disease pests Oregon farmers may secure a reasonable bonus from California growers who want the potatoes for seed. In the San Joaquin delta region 40,000 acres of potatoes are grown annually, and the growers are anxious to get reliable sources of seed supply in Oregon, and if the right kind of reputation is made for the Oregon product considerable quantities will find a ready market at Stockton. At the present time much of the crop that goes from Oregon is said to be a badly mixed lot that shows no indication of selection of desirable types.

Serious losses resulting from the inroads of fungus and insect pests led to a potato emergency convention, which was recently held in Stockton," said Professor F. D. Bailey of the Oregon Agriculture College plant pathology department, who attended the convention. "At the close of the convention a permanent organization to be known as the Pacific Coast Potato Growers' Association was effected, and a resolution passed unanimously asking the potato growers of Oregon and other Western states to join in the organization.

"Oregon growers have a fine opportunity here, and it is to be hoped that some action will be taken to profit by it." Plans for organizing this work will be considered during convention week at the college, November 30 to December 5, and it is altogether likely that steps will be taken to meet the demand for Oregon-grown seed potatoes.

As a part of a study, national in its scope, the forest service, in co-operation with the National Association of Box Manufacturers, has just issued a little circular which gives some interesting statistics in regard to the kinds of wood used in the manufacture of boxes.

According to this circular, box makers use annually 4,547,973,180 feet of lumber, 69 per cent of which is soft wood and the balance hard wood. Virginia uses the largest quantity of wood for boxes, while the Dakotas use the least, the former heading the list with 433,028,887 feet, foard measure, annually, and the Dakotas bringing up the rear with only 18,667 feet, board measure.

Oregon and Washington rank about the middle of the list with 78,939,000 and 91,484,500 feet, board measure, respectively.

Of the kinds of wood used, white pine seems to be the preferred box material, with 1,131,960,940 feet, board measure, to its credit, 96 per cent of which is the eastern species. Yellow pine, eastern species, ranks next, followed closely by red gum, spruce and western yellow pine.

Sitka spruce and western hemlock are the principal Northwest woods used for boxes; in fact, 19 per cent of the boxes made in the United States are manufactured on the Pacific Coast.

Austin Hayden leaves in the morning for San Francisco, to attend to business matters.

Skulls and Jaws Are to Form the Exhibit

United Press Service

SAN FRANCISCO, Oct. 8.—One of the educational features of the hygiene display in the social economy exhibit of the Panama-Pacific exposition will be the largest collection of skulls and jaws of prehistoric and modern races of men and of skulls and plaster casts of the dental equipment of lower animals ever exhibited. These skulls will demonstrate that the soft foods of men of civilized races and, of domestic animals have caused diseases from which many barbarous races and all the wild animals are immune.

By means of plaster casts and stereopticon slides the causes of disease of the teeth will be shown.

There will be a large display showing the comparatively maxillary anatomy of various animals, including man, and explaining why wild animals and savages seldom have tooth-ache.

The display will include a reproduction of the \$2,500,000 Forsythe infirmary for children in Boston, with its modern dental and hygienic equipment, and of a model hygienic dental office. It will occupy 600 square feet of space.

WAIT ALL NIGHT TO GET TICKETS

PHILADELPHIA, Oct. 7.—Tickets for the world's series games were placed on sale at 9 o'clock this morning. Three thousand fans were in line all night, despite a drizzling rain. It is estimated that three-quarters of these tickets are bona fide fans, the rest being scalpers. Each is entitled to purchase two tickets.

INVENTION PRECLUDES POSSIBILITY OF PANIC

United Press Service
CLEVELAND, Oct. 7.—Repetitions of panic horrors of the past will be averted forever, according to Fire Chief Wallace of Cleveland today, if owners of public buildings and theaters will adopt a safety lock device patented by George H. Stanbridge, a Cleveland carpenter.

Stanbridge's invention can be placed on either double or single doors with surety of keeping them locked from the outside. The slightest pressure from the inside, however, allows the doors to immediately swing wide open.

Oppose Proposed Laws

SACRAMENTO, Oct. 7.—The Farmers' Protective League of California, representing thirty counties, met recently in California and adopted plans to oppose the proposed universal eight-hour law, the home rule in taxation proposal, the water commission act, and several other measures that were declared to be detrimental to the interest of agriculture in California.

Plans for New York city's \$50,000 building on the grounds of the Panama-Pacific exposition have been received by the exposition board of works. One of the features of this building will be oil paintings of great size, showing New York city in 1715, 1815 and 1915. Many other interesting features are being prepared.

American Steamship Captured

While the steamship Lorenzo, registered as a United States merchantman, and the Norwegian steamer Thor were engaged in coaling the German cruiser Karlsruhe at sea, they were surprised and captured by a British warship and taken to St. Lucia to await disposition by a prize court.

Fleets of Great Britain and France are bombarding all the fortified positions of Austria in the vicinity of Cattaro in Dalmatia.

Douglas W. Bailey, W. H. Farnett and Mrs. A. DeLoch Ross of Pendleton have organized an industry to employ a dozen people in manufacture of women toilet articles.

Dr. R. R. Hamilton is now located in rooms 1, 2 and 3, in White building. Phone 80 8-2w

Word just received from England by officials of the Panama-Pacific International Exposition gives hope that specimens of the famous Chillingham wild, white cattle will be in the livestock show of the exposition. These cattle were first enclosed in Chillingham Park in 1220 A. D. They have been traced as descendants of the white bull of Caledonia.

Some of the occupations now open to women are laundry overseers, landscape gardeners, dietitians, social secretaries, farm managers, interior decorators, photographers, chemists and bacteriologists.

Notice of Appointment of Administratrix

Notice is hereby given that I have been appointed as the administratrix of the estate of Vivian R. Evans, deceased.

All persons having claims against the said estate are directed to present same, with proper vouchers attached, to me, at my residence in Poe Valley, Klamath county, Oregon, or at the office of my attorneys, Kaykendall & Ferguson, whose offices are in the Loomis building, Klamath Falls, Oregon, such claims to be presented within six months from this date, to-wit: October 8th, 1914.

ZELLA G. EVANS, Administratrix of the Estate of Vivian R. Evans, Deceased. 10-8 11-5 sw
