

Carbon monoxide gas can kill *More on flood clean-up guidelines*

From page 1
 garage,
 • Do not run a car or truck inside an attached garage, even if the door is open,
 • Never burn anything in a stove or fireplace that isn't vented to the outside, and
 • Never heat your house with a gas oven.
 The most common symptoms of carbon monoxide poi-

soning are headache, dizziness, weakness, nausea, vomiting, chest pain and confusion. However, people who are sleeping or who have been drinking alcohol can die from poisoning before even having symptoms.
 10 people died of unintentional carbon monoxide poisoning following Hurricanes Rita and Katrina in the Gulf Coast.

From page 8
 oughly dry sub-flooring before installing new carpet.
 • Remove valuable stuffed furniture and carpets and have them commercially cleaned and dried.
 • Clean and thoroughly dry flooded heating and ventilation ductwork.
 • Use caution when using chemical cleaners and disinfectants.

Read and follow product directions and use in a well-ventilated area.
 • Do not use combustion space heaters in enclosed spaces when drying areas out. These include heaters that run on gas, kerosene, propane, or natural gas.
 • Flood-damaged debris can be placed in normal garbage or taken to regular waster collection and transfer stations.

Hazardous materials should be taken to specially designated hazardous waste collection centers.
 Additional flood recovery information is on the DHS Public Health Division Web site. For more information about Oregon's severe winter storm efforts, visit the Governor's Web site.
