The vote in the county this election was very light, being only 130 more than it was two years ago, being an increase of only 15 per cent in two years, but the population has increased at a much faster rate, and it is known that a great many voters stayed at home on election day, and quite a number were out of the county engaged in work.

She can be ill spared, but our loss will be Oregon's gain.—Colfax Sentinel.
The Steamer Elmore is prompt and regular in its trips from Astoria to Tillamook bay and has good passenger accommodations. The freight rates are low or lower than by any other route, and the passenger fare is the quickest route to Portland or Astoria, and goods can be brought here most expeditiously by this route. The Elmore makes two trips a week from Astoria to this bay, connecting with the Columbia river boats at Astoria and with the small steamers on Tillamook bay.
Ernest Smith, son of C. H. Smith, had his leg broken between the knee and ankle last Sunday. He and several other small boys were in a boat on the slough as the Garfield was coming up, and tried to throw a tow-line aboard the Garfield. In making a short turn just where the small boat lay, the steamer ran too close and pinched the boy's leg between the two boats. Dr. Patchen attended the lad and expects his speedy recovery. No

The much talked of campaign sheet that was issued last week had nothing in it but the following:

WEATHER BULLETIN.

The season has been a little backward. Spring has been retarded by the hand that guides the elements, and grass is short considering the time of the year. Yet, pasture is middling good and the farmers' flocks are in fair order, as the winter was open, and the range was pretty fair during the mid-winter months. Owing to this fact, the stock was in fair condition to go safely over any shortage in the early spring. The temperature has been very cool this year so far, though there has been little frost, and there has been a copious flow from Jupiter's fountains, though not so much as might have been. If there had been a few more days sunshine the grass would have been much farther advanced. At any rate, there is a good outlook for the hay crop, and if there is a little fair weather in the latter part of this month and the first of July, so the farmers can save their hay and get it well cured, there will be a bounteous supply for next winter, and stock will thrive. A larger potato crop has been planted, and they promise well. This will be a great help for the country. There will be a heavy crop of berries and small fruits as usual, and plenty of garden truck. Taking all in all, the outlook for the general prosperity of the country was never better, and the farming community is correspondingly jubilant.

Let every body rejoice in the prospect for good times and a plentiful harvest. May the loutish outpouring of nature's lavish hands reimburse us for the isolated condition of the country and the lethargy of the market for better. Let us all eat, drink and be merry, and thrive on the fat of the land.

P. S. Vote as you please.
