One Pure Baking Powder.

Like Telling a Secret.

A story is told and it is a true story that over seventy per cent. of all the baking powders sold contain either alum or ammonia, and many of these powders contain both. The ill effects upon the system of food raised by alum or ammonia powders are the more dangerous because of their insidious character. It would be less dangerous for the people were it fatal at once, for then such food would be avoided, but their baneful action because imperceptible at first and slow in its advances, is no less certain.

Dr. Price's Cream Baking Powder is declared by all authorities as free from alum, ammonia or any other adulterant. Its purity has never been questioned, and while it does finer and better work, it costs no more at retail than many of the adulterated powders.

may totally change that system and those says ite has known this method of murder Friday night the citizens of this town fere all the time. The road will be better methods in order to keep up our progress. frequently among the Indians, and there were awakened by a weird shrick, so and the roate is a little nearer. It is not piercing and appalling in its effect that it intended to abandon the Trask river who deliberates before he votes can vote the democratic ticket after reading that platform. They acknowledge that the evils of a fluctuating currency fall bardest on the laboring classes, and then propose that set the dogs howling. No Commanche route, but the probabilities are that the
