**DRUG STORE!**  
Tillamook, Oregon.  
**A FULL LINE OF DRUGS & PATENT MEDICINES.**  
Prescriptions Compounded  
At all hours.

**ANOTHER FIRE.**

**LUMBER YARDS AND FIVE RESIDENCE BLOCKS BURNED.**  
Chicago again suffers from upsetting of a Lamp.  
CHICAGO, Aug. 24.—A fire, which, in extent of territory covered, is the largest known in this city for many years, began in that portion known as South Chicago about 5 o'clock this afternoon, and before brought under control had destroyed 200 buildings.  
As a consequence, many hundreds of peoples are homeless. The fire started in the three-story building at the corner of Ninety-first and Superior avenue, occupied as a residence by William Gilles. It was caused by his daughter, who accidentally upset a lamp while heating a hair-curling iron. The flames ate their way over block after block of small frame residences, until it reached the lake. Within two hours after the fire started it had consumed at least five blocks of a great industrial section of the city. Before the few engines of the district could make the slightest impression upon the flames, they bounded eastward between Ninetieth and Ninety-first streets, in the direction of the lake. The brands being carried long distances by the wind. The assistant marshal in charge of that district, seeing that the utmost efforts of the department were necessary if the greater part of the town was to be saved, notified Chief Marshal Sweeney of the condition of affairs, and two engines were started down from the main portion of the city as soon as possible. The largest fireboat, the Yosemite, was also hurriedly started out on a 13-mile trip to the burning section. Before it had reached the harbor at South Chicago the fire had eaten its way five blocks between Superior avenue and the lake. From this time on the forces of the fire department gradually increased and the flames were brought under control. By 8 o'clock the work of nearly forty engines, besides the fireboats, had told and in a little while it was practically under control. Conservative estimates put the aggregate loss in the residence district at \$400,000. The Sunday Creek Coal Company will lose \$250,000, and the Peck Lumber Company \$200,000. The number of people homeless is variously estimated at from 4,000 to 5,000, but it is thought these figures are a little exaggerated.

**Iron Casing for Piling.**  
In building the new government quarantine station at Diamond Point near Port Townsend, Wash., the government will cause the lower portion of the piles to be encased in a cast iron cover to protect them from the ravages of the teredo. The castings are fourteen inches in diameter and some are 35 feet long and weigh 6,000 pounds. There are to be 35 of these piles and the casings are now being cast by a foundry on the Sound at a rate of two a day. This will be the first wharf of the kind to be built on Puget Sound. The plan is to drive the piling timber and then slip the iron casing over them, filling in each one with cement, and it is believed that there will be practically no end to the service of the piles so constructed. It is thought that the cement will eventually become so hardened as to resist wear of the elements and the boring of the teredo, even when iron has worn away, and it will likely lead to the construction of similar wharves at other parts of the Sound.

**Cruelty.**  
An old Italian writer says that where the plague attacked a family or clan of the Sicilians their custom was to load a mule with the infected garments of the dead and drive it into the territory of a neighboring tribe "Why should we bear trouble alone?" was said to be their sole apology for the inhuman act. The Italian historian may have slandered the Sicilians, against whom he evidently had a grudge; but there are English-speaking people as cruel. Whatever little worry or great grief has been given them to carry they inflict upon their neighbors by incessant lamentations and complaints. In one house it is a strong, healthy man who is at odds with the weather, his business, his family, the town, and sometimes even with God himself, and by perpetual grumbings he lays the weight of his misery on a sickly, patient wife. Or is it a nervous, fretful woman who makes the lives of a whole family wretched because she will not bear her petty physical ailments alone. The victims of such cruelties would perhaps prefer to take their chances in ancient Sicily, and would cry "Better the risk of a plague for the body than that of leprosy for the soul."

**Storm on the Atlantic Coast.**  
New York, Aug. 24.—A West Indian cyclone, which swept over this part of the Atlantic coast last night and this morning on its way to the New England coast, left its mark over the whole region around New York within a sweep of fully hundred miles. The rainfall measured 3.82 inches during the last 12 hours, the severest that has ever been recorded by the local signal service. Many ships from the harbor, as well as steamships which are due today, are now cruising outside waiting for the wind to subside. Through the dragging of anchors of escaping ships in the bay and North river, more than 50 cables of the Western Union Telegraph Company were torn and are laid useless on the bottom of the river. The ravages of the storm were no less severe on land. Trees were overturned in Central Park and many plants ruined. Many plate-glass windows in the vicinity of Madison square and along Broadway were shattered by the violence of the wind, while shutters were torn from the houses throughout the city. Telegraphic and railroad communication was badly interrupted in all directions. Summer resorts suffered greatly from high seas. In Brooklyn the storm was as severe as in New York. During its height a policeman found the body of a dead man lying in a peddler's wagon on Whipple street. The wagon was filled with water. In New Jersey the storm was severely felt. The streets at Elizabethport, near the sound, are under water to a depth of two and three feet, and people float about on rafts to get to work.

**Mid-Winter Fair.**  
SAN FRANCISCO, Aug. 24.—At 2 o'clock this afternoon the first spadeful of earth was turned for the midwinter fair in Golden Gate Park. It was an occasion of great ceremony. Thousands of people were present, business was suspended in town, the schools closed, and the National Guard paraded. A salute was fired by the United States artillery, and speeches were made by prominent citizens. Shipping in the harbor was profusely decorated with bunting, and the afternoon was a general holiday. The \$500,000 guarantee fund has been nearly all subscribed by citizens, and the work of constructing the buildings and preparing the grounds will proceed without intermission until the fair opens. The fair will be opened January 1st, 1894, and will continue six months to June 30. This afternoon director De Young took

the first spadeful of earth, which was put in a silver casket and sold at auction to the highest bidder. The first bid was \$350. The bidding was spirited and the earth was finally knocked down to Roos Brothers for \$650. The spade with which the first earth was turned was sold at auction to Davis Brothers for \$105. Five hundred men then commenced work immediately on the excavations for the site.

**Iron Casing for Piling.**  
In building the new government quarantine station at Diamond Point near Port Townsend, Wash., the government will cause the lower portion of the piles to be encased in a cast iron cover to protect them from the ravages of the teredo. The castings are fourteen inches in diameter and some are 35 feet long and weigh 6,000 pounds. There are to be 35 of these piles and the casings are now being cast by a foundry on the Sound at a rate of two a day. This will be the first wharf of the kind to be built on Puget Sound. An old Italian writer says that where the plague attacked a family or clan of the Sicilians their custom was to load a mule with the infected garments of the dead and drive it into the territory of a neighboring tribe "Why should we bear trouble alone?" was said to be their sole apology for the inhuman act. The Italian historian may have slandered the Sicilians, against whom he evidently had a grudge; but there are English-speaking people as cruel. Whatever little worry or great grief has been given them to carry they inflict upon their neighbors by incessant lamentations and complaints. In one house it is a strong, healthy man who is at odds with the weather, his business, his family, the town, and sometimes even with God himself, and by perpetual grumbings he lays the weight of his misery on a sickly, patient wife. Or is it a nervous, fretful woman who makes the lives of a whole family wretched because she will not bear her petty physical ailments alone. The victims of such cruelties would perhaps prefer to take their chances in ancient Sicily, and would cry "Better the risk of a plague for the body than that of leprosy for the soul."

**In the Caucasus.**  
In the Caucasus mountains there are many wild, uncivilized tribes of people whose rough ways would make the heart of a civilized mother stand still with fear if her child were to be treated as the people of Caucasus treat their children every day. The first plaything given a Caucasian baby is a dagger. This is presented to him as soon as he can walk. For an hour or two each day his mother spends her time teaching him how to use the weapon, so that he will some day become an expert. He is taught to stab so that it makes no splash, and is made to hurl his dagger at a mark again and again until he cannot miss his aim. And all this is done during the time that a mother spends her time teaching him how to use the weapon, so that he will some day become an expert. He is taught to stab so that it makes no splash, and is made to hurl his dagger at a mark again and again until he cannot miss his aim. And all this is done during the time that a mother spends her time teaching him how to use the weapon, so that he will some day become an expert. He is taught to stab so that it makes no splash, and is made to hurl his dagger at a mark again and again until he cannot miss his aim. And all this is done during the time that a mother spends her time teaching him how to use the weapon, so that he will some day become an expert.

**A Blessing Well Asked.**  
A son of a dignified Hartford man, although not old in years, has a good bit of age in his brains.  
The family observe the custom of silent blessing at the table, and at dinner recently the six-year-old spoke up:  
"Why don't you say it aloud, pa?"  
"You can say it aloud if you choose, my son," replied the father, and bowing his head solemnly the little fellow originated this unique grace:  
"God have mercy on these victuals."

**The New Tune.**  
The daughter of a country rector taught the choir boys a new tune at a Monday evening's practice, to be sung on the following Sunday. Sunday morning came.  
"Well, Johnny," said Miss X, "I hope you haven't forgotten the new tune, for we depend much on you."  
"Naw, mum, not a bit. Why, I've been a-skeerin' the crows with it all week."

**A Bank Re-Opens.**  
THE DALLES, Ore., Aug. 25.—The First National Bank will open its doors again tomorrow morning, fulfilling the prediction on the part of Dalles people that it would be the first in Oregon to resume business. The city is jubilant over the report and the First National will doubtless do a rushing business.

**CLIPPINGS**

SHORT ITEMS OF INTEREST FROM OUR EXCHANGES.

Information for all Sorts and Condition of Men.

A rose in the hand isn't always a rose. Like countenances indicate like characters.

Newspapers are printed in fifty-nine languages.

Poe always wrote with a brandy bottle at his elbow.

Weber wrote best in the beer garden with plenty of liquid refreshment.

Great theologians don't go to heaven because they are great theologians.

Love laughs at locksmiths, because locksmiths have been in love themselves.

Before saying an unkind thing of one think how you would like to have it said of you.

Shelley wrote very rapidly, but revised carefully and spent much time in polishing his verses.

The consumption of bricks in the United Kingdom amounts to about 250,000,000 a month.

It has been estimated that Great Britain has about 100,000 absolutely "homeless" wanderers.

Oliver Wendell Holmes is said to write very slowly and carefully. His handwriting is small and clear.

A letter mailed in London April 7 and remailed in Hong-Kong made the circuit of the world in the fast time of sixty-two days.

The city of London drinks every year 45,000,000 gallons of malt liquor, 8,000,500 gallons of wine and 1,500,000 gallons of spirits.

Fifty-six years ago the block on which the Chicago postoffice now stands was sold at auction for \$505. It is now worth \$5,000,000.

It is asserted that the best, strongest and most fibrous material in the shape of wood, now used as pulp for paper, is made from spruce logs.

"Ben," the famous Irish setter dog, that has for ten years past run to every fire with the fire department of Malden, Mass., died last week. His death has caused a feeling of sadness among the members of the fire department.

Careful inquiry into the circumstances antecedent to collapse during torrid weather shows that in rare cases only has actual exposure to the sun been responsible for the disaster, and it is a fact that nearly as many cases occur after sunset as at midday.

By irrigation 25,000,000 acres are made fruitful in India alone. In Egypt there are about 6,000,000 acres and in Europe about 5,000,000. The United States has just begun the work of improving waste area, and has already about 4,000,000 acres of irrigated land.

A man living on Fishing Creek, Wetzel county, W. Va., has been deaf for five years. The other day he went to a physician for examination, when a wad of cotton completely coated over was found in each ear. The cotton wads were put in five years ago to stop earache and has been forgotten.

President Eliot of Harvard College challenges with some asperity the statement of Bishop Mallie that drunkenness among the students of Harvard and Yale has become so common as to excite no comment. President Eliot says the Bishop doesn't know what he is talking about and that the charge is absurd.

When a horse is trotting a 2:20 gait his feet move a little faster than a mile in 1:10. As his body is moving at 2:20, and as each of his feet when in contact with the ground is stationary and then is picked up and moved forward to take the next step, the foot must move as much faster than the body as to make the step, which is over twice as fast.

The Duke of Newcastle's specialty in amateur photography is to secure portraits of rare wild animals in their native surroundings. He is traveling in quest of these with Gambier Bolton, a member of the Royal Geographical Society, and well known as one of the most expert amateur photographers of animals in the world. The two proceeded from the World's Fair to California, where one of their chief objects is to photograph the sea lions on the cliffs.

In sorting over the letters for Chicago a man in the general Chicago office has kept an account of the number of different ways the word Chicago is spelled. Recently the record showed 197 different ways. Some ripe scholar in Finland sent a letter to his brother and spelled the name of the Garden City Zizzazo. Still another foreigner, possibly with a sinister motive, spelled the word Jag-jazo. Hipaho, Jajijo, Scheehacho, Hiazgo, and Chachicho are also prime favorites.
