GETS HYSTERICAL

TELLER WEEPS FOR THE FUTURE OF THE NATION.

Thinks we are inaugurating a System of Slavery.

When Perkins of California offered his amendment in the Senate Teller said he would vote for the amendment if it was better than the proposed act. Teller then went on to speak with great bitterness of the desertion of the cause of silver by the republican senators. "To me this is the most terrible moment of my legislative life," said Teller, with much feeling. "To me it brings more fear than any other moment since I entered public life. I fear we are entering on a financial system from which there is absolutely no escape. I know that there will be no favorable legislation for silver until the American people are heard from at the ballot box, and heard from in a way that will compel the attention to their desires." Here Teller's voice choked and tears came to his eyes. He spoke most impressively, and was accorded the undivided attention of every senator and the large audience in the galleries. "I cannot contemplate this condition of things without absolute terror. It strikes to my very soul, and I want to enter this as a warning to the American people that if they do not resist, they will enter upon a system of industrial slavery that will be the worst known to the human race."

Pacific Mail Steamer Wrecked.

SAN FRANCISCO, Oct. 26.—The Pacific Mail company's steamer City of New York went ashore this evening in a dense fog and will probably be a total loss. She is hard and fast on the rocks at Point Bonita with eight feet of water in her hold. She sailed for China and Japan at 3:30 this afternoon and went down the bay under a full head of steam. The fog was very thick and in a few minutes the big steamer was lost sight of. About 5 o'clock the booming of cannon could be heard and signal rockets were seen as they burst above the fog. At first it was not known what vessel was in distress and it was thought it might be the Monowai due today from Australia. Later it was ascertained it was the City of New York. The steamer was in command of Captain F. H. Johnson and in charge of Pilot Stephenson. She carried a large cargo of flour and a large passenger list, including 200 Chinese. When the ship struck the rocks the Chinese in the steerage set up a howl and intense confusion reigned.

Preparing to Demolish the Fair.

Builders of the World's Fair are now getting ready to tear down the great exposition. More than a year elapsed between the time Congress voted to send the exposition to Chicago and the beginning of operations in Jackson Park. One day after the final closing of the gates on October 30 the work of destruction will begin. The organization is already perfected for the destruction. It only waits the word from Director-General Davis. The word will be given on the morning of October 31. How fast the exposition will fall cannot of course be told now. Many elements of uncertainty enter into the question, not the least of which is the state of the weather during the closing day of October. If the winds that sweep down over Lake Michigan bring icicles and snow little will be left at the end of a month but a remembrance of the gorgeous interiors. The buildings will stay—most of them for six months and some of them longer—but the exhibits will be boxed and crated and hauled away on freightcars.

A Celestial Mystery.

PORTLAND, Oct. 26.—Mystery surrounds the demise of Gum Fung, a young Chinese woman, who came here from Victoria, B. C., about a year ago, and who died from a dose of unknown poison this morning, in the building on the southeast corner of Alder and Third streets, formerly known as the Royal theater. The fatal dose was administered soon after midnight, and not till 6:30 this morning was medical aid summoned for her. At present there are a number of strange highbinders in the city who are attempting to run the Chinese colony in a manner to suit their own desires. These fellows will not stop at murder even to accomplish any purpose to further their own ends.

Explosion of a Boiler.

PITTSBURG, Oct. 27.—About noon a boiler exploded on the fifth floor of the large warehouse of the Chataqua Lake Ice company, on Pine street, where a large lot of whisky was stored. Four men were seriously hurt by jumping. The loss will be heavy. The warehouse was stored with a large amount of valuable goods and carries an insurance of a quarter of a million dollars. The Pitte-

burg Storage Co.'s building adjoining was threatened and a row of frame dwellings in the rear were set on fire. All the people in the neighborhood started moving their goods. A man named Weisman was struck by falling timbers and had his skull fractured. John Rissica, a boy, was also hurt by falling timbers. At 3 P. M. the fire was under control. The loss is estimated at a quarter of a million.

The Chinese Bill.

WASHINGTON, Oct. 27.—Senator Gray, of the committee on foreign relations, told an Associated Press Reporter today that he thought the committee would bring a favorable report in upon the house Chinese bill on Monday. There has been some effort to delay the reporting of this bill until the beginning of the regular session, but the administration has expressed a wish that the bill be reported and disposed of as soon as possible, and the committee is now disposed to act on the bill immediately. It is not believed that the house bill will be amended in any particular by the committee as it is their desire that as little time as possible be allowed to elapse before its passage.

It wasn't going to be lonesome.

A Harlem lawyer's convivial habits are beginning to excite the apprehension of his wife, who is a very estimable lady. "Why, George, do you think you can drink that entire bottle of claret all alone by yourself?" she said. "Oh, no, I don't think anything of the kind, my dear. I am not going to drink it all alone. I've just taken a couple of toddies, and after I get through with the bottles of claret I'm going to put down a pony of brandy to keep it company. That bottle of claret is not going to be lonesome if I can help it, and I think I can."

More Liberty.

CHICAGO, Oct. 25.—One million dollars will be given by Marshall Field to a permanent museum which is to be the outcome of the World's Fair, on condition that \$600,000 be subscribed, and that the stockholders of the exposition subscribe to the fund \$2,000,000 of their holdings which represent the investment of five millions, but which are worthless. George M. Pullman has subscribed \$100,000. The total attendance today was 284,027, of which 250,583 were paid.

Death Met.

PRINCETON, N. J., Oct. 26.—At a meeting of the faculty of the seminary tonight the members decided against football playing by the students of that department. The reason given is that it is beneath the dignity of the divinity students in the college. The theologians are very angry over the decision. All games are canceled, including those of the big teams. Two seminary men were on the college team, and the faculty consented to their continuing with it this year.

Endorses Grover.

NEW YORK, Oct. 26.—The democrats held high carnival in and around Tammany hall tonight. It was a ratification meeting of the campaign. Governor Flower presided. In a speech he said: "We made Grover Cleveland president a year ago because we as business men wanted a strong man there to stand up for an honest dollar, and we want to show him in this election the people of New York are again behind him and that they endorse his administration."

We can have the school.

WASHINGTON, Oct. 27.—The bill in the senate to aid the states of California, Oregon, Washington, Montana, Idaho, Nevada, Wyoming, Colorado, and South Dakota to support schools of mining, allowing each 25 per cent. of the proceeds of the sale of mineral lands within the state, but not to exceed \$12,000 per year, was, on motion of Dubois, of Idaho, considered Minnesota was added and the bill was passed.

A Nervy Scoundrel.

MORTON, Va., Oct. 27.—Marshal Taylor, better known as "Doc" Taylor, one of the survivors of John Morgan's famous guerilla band during the war, was hanged this afternoon for the murder of Ira Mullins, his wife, and two children. Taylor appeared on the gallows in a suit of pure white linen, and preached his own funeral sermon.

To the Arctic Ocean.

PITTSBURG, Oct. 26.—Captain Aaron Kingston, of California, and a party of ten left Pittsburg today in three small vessels, the objective point being Berrel island in the North Arctic Ocean about 200 miles north of where the Jeanette was lost. The boats are not much larger than an ordinary skiff.

Most of the girls who wear shirt waists seem to have a look on their faces that means "I wonder if my waist and skirt are keeping together behind."

GOSSIP.

ABOUT MANY PEOPLE AND THEIR DOINGS.

Bright and newsy Clippings of the world's happenings.

No language can express the feeling of a deaf mute who steps on a tack in a dark room.

It is calculated that the expenditure for liquors and narcotics absorbs the net proceeds of one day's work of the world per week.

The most ancient piece of music extant is the Hebrew "Blessing of the Priests," which is still used in the Spanish and Portuguese synagogues.

The love of music amounts almost to a passion with the Countess of Dunraven. When living at the Adare she always sings in the village choir.

Twenty-six hundred dollars was contributed last Sunday morning at the Broadway Tabernacle for the American Board of Foreign Missions.

The English Royal family never have cars furnished them free by railroad companies when they travel. The Queen pays her own fare, like the humblest passenger.

Half the counties of England claim the house of the tragedy of the "Mistletoe Fough," but the village of Owslebury, near Winchester, claims to possess the fatal chest itself.

Dr. Perion, a French physician, has invented a new name for the habit of gnawing the finger nails, "onychophagy" or, in English, onchyophagy. He calls it a nervous disease.

The amount of tobacco consumed per head of the population last year was one pound ten and five-eighths ounces. This represents a considerable advance upon the preceding year.

The man who wagers a lady that he could thread a needle in less time than she could sharpen a pencil won in sixteen minutes, at the end of which time the lady had whittled up her pencil.

It is not generally known that the John D. Rockefeller who recently celebrated his 25th anniversary as superintendent of the Euclid-avenue Baptist church, of Cleveland, is the New York millionaire of that name.

Mr. John Lockwood Kipling, Rudyard's father, now on a visit to his son's new home at Battleboro, Vt., is described as "a courteous and engaging Englishman of the best type." He is pleased with all that America has shown him of its best. His life has been largely passed in the Indian civil service.

Angelo, the Bulgarian brigand, who has been killed recently by the mounted police, was a man of business. He kept a record of his stealings and his expenditures, and noted down all his murders which reached a total of 190. Even this number does not include police and soldiers, whom he thought beneath his notice.

Miss Dudley, an English bicyclist, holds the record for long-distance riding by women. She made the distance of 100 miles, between Hitchin and Lincoln in a little more than seven hours, or at an average speed of nearly 14 miles an hour. This, too, in regular petticoats, and not in the new style of wheeling trousers.

Sir Henry James is one of the best sportsmen in the house of Commons and a most excellent shot. He is, therefore, often chosen to accompany the Prince of Wales when he goes out with his gun. Sir Henry does most of the shooting and his Royal Highness gets the credit from the outside world for the dimensions of the bag.

The sun never sets on the Salvation Army. It extends around the world. Some of its best work is done in India. In that country the Salvationists wear the native dress instead of the Army uniform. There is just now a very favorable outlook for the opening of Army work in Spain. The comrades in South America are having a hard struggle.

The authorities have decided to make an important alteration in the lowlight and foghorn at Dungeness Point by moving it nearer to the shore-line. This work has been rendered necessary by the extraordinary growth of shingle at this point of the coast. At the present time the lighthouse is nearly half a mile from the sea, whereas when it was erected 100 years ago it was close to the shore.

Bees can learn to tell the time of day as well as a clock. A correspondent of "Science Gleanings" lately noted that a large number of bees were frequenting the flowers on his lawn, and every day when he came home to lunch he put a piece of sugar on a brick in the garden for them. They soon learned the time when they might expect the sugar, and now, when he goes out at noon, he finds about 100 bees sitting around waiting for their lunch.
