Blacksmith.

All kinds of wood work and wagon work done.

Horseshoeing a Specialty.

New shoes \$1.50, old shoes 50c.

Place of business: opposite Jones Bros. Livery Stable.

Prices to Suit the Times:

BOOTS and SHOES

Made to order.

Repairing done as cheap as the cheapest. Come and be convinced.

Advocate Building.

P. F. BROWNE,

CHAS. PETERSON.

BARBER SHOP.

First Class in Every Particular.

Shaving, Hair Cutting, Shampooing

BATH ROOMS IN CONNECTION.

The patronage of the public is respectfully solicited.

Ripans Tabules cure biliousness.

GLORY HALLELUJAH

THE DAY OF THE UTOPIANS IS AT HAND.

Some time ago the Farmer's Alliance opened a meat market in this city, and by doing this they forced the price of beef down to 4 to 7 cents per pound. Many who were too poor to eat good meat heretofore, now feast on the choicest cuts. Nothing is cheaper, and no one goes hungry for nutritious food now. It has been a little hard on the other meat dealers, but it is helping the people. That is all right.

We understand the Alliance people are going to start a large store here, and will sell all kinds of goods at living prices. Then, all kinds of provisions will be so cheap that no family larder need be empty. A man can wear a good suit of cloth without paying a tribute to the sleek, fat, middle men, and avoid the extortionate profits imposed by some merchants. This will make the merchants hustle a little, but it will be a good thing for the people.

A co-operative company is sawing lumber in Bay City, and is selling lumber for the local trade for \$6.50 per thousand. Heretofore we had to pay \$10. This enables the poor man to build a house, and others can build without paying out all their money for lumber. It is a little hard on the other mills, but it's a fine thing for the public.

The cuts in the price of meats has brought the price of cattle down very low, and now every man can buy a fine herd of cattle for a mere song. It is a good time to get a herd and start a dairy, or stock ranch. There was never such an opportunity before, and every man who can should take advantage of it. It may be a little hard on those who have cattle to sell, but it's a good thing for those who have no cattle.

We understand that the farmers will start a bank here, handle their own money, get the use of it, have the benefit of the interest on their money, and loan it out at reasonable rates. This will knock the bonus men out, and enable men to borrow money at reasonable rates. The bank here will be glad to get a low rate of interest for its money.

This will be a good thing for the people.

A certain firm in this county has chartered a large flat-bottomed schooner, and will take in into Nestucca bay, where it will be loaded with hay, potatoes and butter. There is any quantity of such produce on Nestucca, and the ranchers are glad to get three-fourths what it would bring in this city, and it is figured there will be a saving of 15 or 20 per cent on the cost of these commodities. It will be used in the logging camps here, and as the provisions are cheaper, the cost of the production of lumber will be made cheaper. This same firm is going to do a big milling business, and will import a lot of expert loggers from the woods of California, and run their own logging camps. This way they'll make the profit on logging and cheapen the cost of lumber again, something which will permit a large amount of building in this county. Those who are logging now would do better farming anyway, and they will now have the opportunity. This is a good thing.

There will soon be a co-operation boarding house started here, and as produce, meat and provisions, which are cheap now, will be cheaper, this new boarding house will set out meals at a little above cost. It is figured that a good square meal can be produced for eight cents, and the house can make money feeding people at ten cents a meal, or \$2.00 per week. The hotel keepers here hold forth in large, stately, finely finished and elegantly furnished mansions, much better than most of us have at home. The people built those mansions, and don't like to keep paying for them over and over. Their best furnished rooms, Brussel carpets, etc., are reserved for the drummers and big bugs anyway, and as we will all buy more directly, paying less profit, the drummers can't afford to come here, and we common people will get a chance to enjoy those fine rooms. The hotel men here are first-class gentlemen and we don't like to work against their interests, but they've had their turn and we want ours. It will be a great thing to feast on fat of the land at 10 cents per meal. This is a good scheme.

There will be a stock company of farmers who will start a good

county newspaper. Printers can afford to work for the same that farm hands do, especially when living is so cheap, and they ought to be glad to get work at any price these hard times. It's the cost of setting the type that breaks up county newspapers, anyway. When this proposed paper gets started it will be full of news, and can be put in the hands of subscribers at 90 cents per year, (less than the cost of the paper,) as the advertisements will bring something, and then every man can read the home news at reasonable rates. This will be a good—no, a *blamed mean thing*.

BUILDING STONE.

The Pioneer stone quarry near Yaquina City is becoming one of the thriftiest places in the country. A contract has been made for 6000 tons of the stone to be used in another San Francisco building. The steam schooner "Scotia" is at Yaquina after a load of stone, and will be kept busy in this trade the greater part of the summer. A steam derrick is to be erected at Yaquina to expedite the transfer of the stone from the cars to the vessel. The new channel machine for use at the quarry, and the first of the kind to be used in the state has arrived and is now in operation, and will vastly increase the rapidity with which stone can be turned out. Geo. W. Davis and Homer Alexander, of Salem, are largely interested in the management of the quarry. The quarry is the property of J. H. Howell, of this city, but has been leased to several gentlemen for a period of years. One of the contracts for supplying a San Francisco firm calls for 63,000 cubic feet of the building stone or ten times the amount furnished the new city hall in this city.—Statesman.

There is no reason why the fine building stone on Tillamook bay should not be utilized. The building of Thayer's bank has fully demonstrated that there is plenty of fine stone at various points on the bay, easy to get at, and so situated as to be loaded on ships from the quarries. Specimens of Tillamook bay stone should be sent to some of the contractors in San Francisco and no doubt quite an industry could be worked up in quarrying.
