

The Fee System.

The fees received in the county clerk's office from July 2nd to August 2nd, amount to \$271.47. This will pay the salary of the clerk and deputy and leave a balance of \$171.64 for the month, besides it is hard cash, whereas the clerks get county orders. Outside of this, the work done by the clerk for the county amounts to over \$100, which would have been paid to the clerk under the old law. Thus the saving to the county in one month is \$291.66. Mr. Conder, during his four years in the clerk's office received a little over \$18,000 in fees, but he was at the expense of hiring a deputy, etc., which cost him \$1980 per year, as he says. However, he received \$13,680 for his four years work, or \$3,420 per year. The clerk now gets \$1,500, and the deputy \$800. The fees received in the sheriff's office from July 2nd to August 2nd, amount to \$28.40. The sheriff under the old law would have earned \$20 besides attending county court. The salary of the sheriff and deputy for this time amounts to \$150 per month. The county is apparently out \$101.60 on this office, but the delinquent taxes collected during the time cover the amount, and a little to spare. The sheriff's salary is \$1,200 per year, and the deputy \$600.

The fees of the sheriff for serving jury summons, criminal papers, and for making delinquent tax levy, etc., will amount to a neat sum however, and under the old law the county paid the sheriff for doing this work. So, it is very hard to estimate just what the county really gains by the salary system in this office at present.

The fees of Ex-Sheriff Edwards for the two years he held the office, amounted to \$6,184.63. Out of this the expenses of the office, in the way of stationery, boarding prisoners, traveling expenses, horse hire, and deputy hire, amounted to \$2,359, leaving a net salary of \$3,825.63 for the two years, besides there was some profit, perhaps, in boarding prisoners and like work.

Poor Sheriff Jackson must shudder when he reads this, as the expenses of the office for two years amount to within \$41 of what his salary is under the new law.

The sheriff gets the fee from the state for taking insane persons to the asylum, when the court gives him this work, though the sheriff has taken out only one insane person so far, the other two being taken out by private parties appointed by the court.

School Report.

District No. 10, Tillamook Co., Oregon. Term commencing May 21, and ending Aug. 10, 1894

Total number enrolled during the term 34. Average number enrolled 31. Average number attending each day 26

Pupils neither absent nor tardy for the term are as follows:

Nellie Price, Mary Price, Lottie Price, Arvard Benson and Fred Eklof.

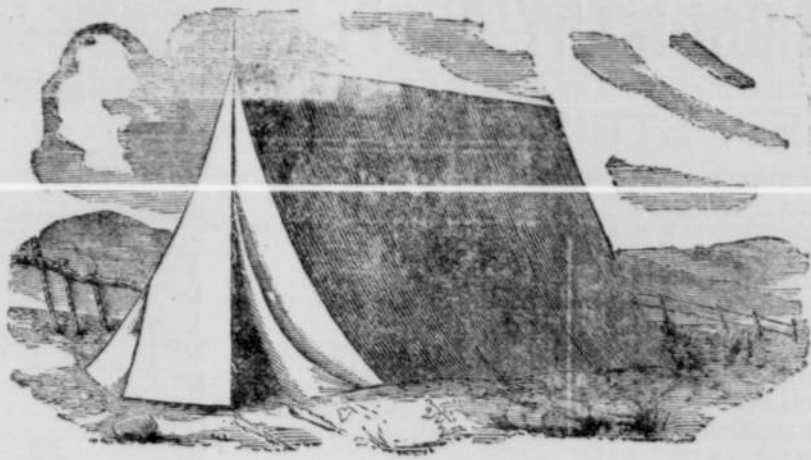

Pupils neither absent nor tardy for the last month were:

Nellie Price, Mary Price, Lottie Price, Arvard Benson, Fred Eklof, May Morton and Zelma Morton.

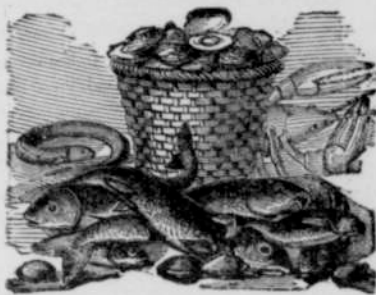

The prize for most head marks in spelling class, was awarded to Mary Price.

Number of days taught during term, 59. T. J. STANTON, Teacher.

The action of hopgrowers near North Yamhill in reducing the price of hop picking is causing considerable talk. The pickers claim they will not go into the fields for less than \$1 per hundred, for at that price they are just barely able to make \$1 per day, that is for the average picker. Picker's prices in Washington are \$1.20 per 100 pounds.—McMinnville Telephone.
