We have found out by diligent inquiry that the treasurer of this county has not the amount of money on hand that his report shows. This is one of the freaks of the Missouri Partisan laws of Oregon.

The regulations are to take effect and be in force from and after May 4, 1896.

**RULE 1**—All consignees, agents or other persons, shall, within 24 hours, notify the quarantine officer of the State Board of Horticulture or a duly commissioned quarantine guardian of the arrival of any trees, plants, buds or cions at the quarantine station, in the district of final destination.

**RULE 2**—All trees, plants, cuttings, grafts, buds or cions, imported or brought into the state from any foreign country, or from any of the United States or territories are hereby required to be inspected upon arrival at the quarantine station in the district of final destination, and if any such nursery stock, trees, plants, cuttings, grafts, buds or cions are found to be free of insect pests and fungous diseases, the said quarantine officer or duly commissioned quarantine guardian shall issue a certificate to that effect. And furthermore, if any of said trees, plants, cuttings, grafts, buds or cions are found infested with insect pests, fungi, blight or other diseases injurious to fruit or to fruit trees, or other trees or plants, they shall be disinfected and remain in quarantine until the quarantine officer of the State Board of Horticulture or the duly commissioned quarantine guardian can determine whether the said trees, plants, cuttings, grafts, buds or cions are free from live injurious insect pests or their eggs, larvae or pupae, or fungous diseases before they can be offered for sale, gift, distribution or transportation. All persons or companies are hereby prohibited from carrying any trees, plants, cuttings, grafts, buds or cions from without the state to any point within the state beyond the nearest point on its line or course to the quarantine station in the district of ultimate destination; or from any point within the state to any other point therein, until such trees, plants, cuttings, grafts, buds or cions have been duly inspected, and if required disinfected as hereinbefore provided, and all such shipments must be accompanied by the proper certificate of the inspecting officer. ## Profit in Poultry

THE People of the Pacific Coast sent East last year over \$3,000,000 in hard cash for eggs and poultry. This great sum of money ought all of it to have gone into the pockets of the Pacific Coast Poultry Keepers. It pays to keep fowls but they must be managed right. No big ranch is necessary; thousands are making money with small and large flocks of hens, in village gardens and small orchards. Fruit growing and Poultry Breeding go together finely.

## The Pacific Coast Fanciers Monthly

Tells all about it. Not thousands of miles away, but right here on the Pacific Coast. It tells how to make Poultry Keeping pay. It's good for what all those who can't make hens lay. It's bright, practical, money making, invaluable to all who keep fowls of any kind. It is brim full of good reading, and beautifully illustrated. If you keep a dozen or a thousand hens you want the Fanciers Monthly, and you can get it by sending \$1.00 to the FANCIES MONTHLY, San Jose, Cal., or we will furnish it, clubbed with the HEADLIGHT, for \$2.00 per year.
