Correspondence Wanted.

The HEADLIGHT is for the people, and they are invited to write for its columns. We have no free exercise of opinion, and wish to encourage independent thought and action. Local topics are preferred. Our name stands at the head of this column, and everything, not otherwise signed, we stand responsible for. If you write, don't be afraid to father your own opinions, but sign your name for publication. It is cowardly to do otherwise, and articles with fictitious names have little weight. We adhere to this condition, except as to local correspondents who send news items pure and simple. In such cases we do not publish the name of the writer.

But if you wish to express an opinion or criticize somebody, you must sign your name for publication. And in all cases we must know the name of the writer. Don't throw out petty personal slanders, or deal in calumnies regarding your neighbors. Would rather you'd abuse the editor of this paper. Such letters would be more apt to be published. In fact, people who hold opinions different from ours are urged to write them for publication. We'll answer you fairly and courteously if your opinions are worth answering. We are anxious to have parties of different faith express their opinion in this paper. We pride ourselves on granting everybody to think and act according to his conscience, regardless of our own beliefs.

The public doesn't care about "somebody" going to see his girl, "new fence," "bad cold," "building of hen coops," etc. Write about something interesting or not at all. Write as plainly as possible. If you can't spell correctly, or use good grammar, never mind that. Don't let a good news item spoil on that account. We furnish printed instructions, the weight of help to those who wish to write for papers.

The space in this paper is yours. Make use of it if you like.

Those who expect to get fine farms at little or no cost on the Siletz reservation are likely to be disappointed. After the allotment is made to the Indians there will be no good land left, and it will cost \$1.50 per acre to get it, besides living on it.

Satisfactory results have been secured by ordering from the Pomona Nursery, Wm. Barry, advertised in this paper. One party who made a large order, having young trees and cuttings sent by mail, received them in fine shape, all fresh and alive, and everything as represented. You should get Barry's catalogue.

The little book, "Coin's Financial School," which has been advertised in the HEADLIGHT so long has raised a terrible noise at last. Every gold-bug newspaper in the country is attacking it vociferously, and so much has been said about it that its circulation is running up into the millions. It stands the attacks first rate, however, and one of the results is that several so-called answers have been written, among them "Coin's Financial Fool," "Coin up to Date," etc. They expect to sell on the fame of the first publication. No political question since the war has attracted so much attention as the financial question. Those who have not studied the question should go to some book store and get "Coin's Financial School," and some one of the alleged answers. It will do good for the people to read both. W. H. Harvey, the author of "Coin" has suddenly sprung into great prominence as an author and lecturer on financial topics, and the more abuse heaped upon him the more he will prosper. The sale of his little book has no doubt netted him quite a little fortune already.

DANGEROUS BUSINESS

We take the following from the Forest Grove Times:

John McNamer went out to the toll gate above Gales Creek where Jos. Campbell had been felling trees across the road in revenge for having the gate taken from him. It was found necessary to arrest him and Deputy Sheriff Vaughn went out Wednesday and brought him in charged with breaking telegraph lines."

Since receiving the Times it has been learned that Campbell plead guilty, and was fined \$25 and cost, the lowest fine under the circumstances. Mr. Campbell became very ugly because the toll gate had been removed from his place, and began cutting and slashing in every direction.

He was obliged to settle for the damages done the road, and was very properly fined for interfering with telegraphic communication.

The actions of Campbell have caused the line to be down half

the time lately, greatly inconveniencing the public, and it was thought necessary to make an example of him. Other offenders are not likely to get off so easy. Campbell, being very ignorant, was allowed to plead guilty to a simple misdemeanor, but it is a penitentiary offense to maliciously cut a telegraph wire and the next one who disturbs it is likely to get the full benefit of the law.

Since the stages are running regularly to Forest Grove the line is being kept up in good shape, and doubtless will be all summer, if people don't get to cutting it as Campbell did.

FROM SHERIDAN SUN.

A. A. Malaney and Bud Pollard pulled out for Ocean Park Wednesday last with a well ordered newspaper office on the latter's wagon. The Const. Land Company will soon start a paper at Ocean Park. A new hotel is under way, and indications are that Ocean Park will develop.

Say Bro. HEADLIGHT JONES. The item about "wild cattle" in your last issue, originated with the Sun. You got it from the Itemizer, and Bro. Wash hooked it from us—head, hair, hide, horns and hoofs. Maybe you haven't noticed it, but Wash is a horrible newspaper pirate—almost as reckless as a buccaneer.

OUR SCHOOLS.

As a result of the ignorance of school officers and the competition of school teachers we have many poor schools. It is very hard to realize the importance of this fact, and its result on the future destiny of our great country. It is the duty of every school officer and teacher to obviate this evil as far as possible.

The main requisite to teach in this county after receiving a certificate is the willingness to accept whatever the district board thinks it is able to pay, which, considering the vacations, cost of board, and traveling expenses, is very low; therefore, a majority of our teachers today are experimenters, those who are too old to do anything else or those who wish to pay their way just for a short time. Think of it, the profession, that should be the most carefully guarded, is very often left in the hands of those who know nothing about it just because they can be hired for a few dollars less than others who do know a great deal about it.

I'm afraid that many who have the power of selecting teachers think more of what some old fogey of a taxpayer says than the eternal result. I wish that all could realize the fact that education is a growth and not like a spontaneous combustion or something that can be attended to after all the debts are paid, or when the younger boys can help at home, or something else comes about. An old gentleman who was foolish enough to think that a boy could be educated in one year, said to me, "If you teach here next year I'll have my oldest son go to school. He can't go this year for I have so much work to do," and this man was worth his thousands, and his poor boy was ignorantly slaving for a few more dollars, and losing the best part of his life for gaining knowledge.

Parents let me beg of you not to put off your children's education until it is eternally too late. Don't misunderstand me, ignorance is no sin, but it is a sin to sell your child's future happiness for a few cows or a few acres of land.

There are many who make the mistake of thinking that anyone can teach the little children and we often hear the remark "our school is small" as an excuse for hiring a cheap teacher. The little ones need the very best teacher you can get. While their minds are easily impressed, a teacher who understands her work can build a foundation that will be firm and strong, while an experimenter is very apt to disgust the little mind with everything pertaining to school. Do you know that many who regret the lack of an educa-

tion can justly charge it to the account of those who had charge of their early school work. The impressions we get before we are seven years old are very apt to stay with us during the rest of our lives and many are not able to overcome their disgust for all study until it is too late, all because the school directors hired some cheap experimenters in human minds.

The young people need more help now than formerly for competition in every vocation is becoming sharper every day and in order to succeed with anything they must compete with those whose minds have been broadened by a good general education, and other things being equal, those who have not had the training of their faculties in early life will be driven to the wall.

A performance which seems very ridiculous to me is that of hiring some incompetent person to teach and then to listen to criticisms of incompetent parents. The better way would be to hire the best teacher obtainable and then do everything possible to help her carry out her plans.

We can not afford to keep teacher's wages down, for the result is ruinous to our schools.

What would be the result if every district in this county would pay one hundred dollars per month and hire only the very best teachers obtainable? I think it would be a benefit both to the schools to teachers, for although in some districts there could be only three or four months school during the year, yet a short term of good school based on true educational principles would be far better than a whole year of poor miserable experimental work. Money paid for a poor school is worse than thrown away. Another result would be that those who were fit for this noble work would not seek after employment but could afford to teach. We ought not to let the number who call themselves teachers, regulate the wages and proficiency of our schools but we should raise the standard as fast as possible by requiring more knowledge for the money paid, i. e. quality and not quantity should regulate the price of teachers.

I hope none of my friends who are just beginning and who have fought their way up to their present position, against great odds will think me harsh, for I'm not trying in any way to injure them; in fact I wish to help them and any one who can think will see that, the better schools we have the better it is for those who wish to fit themselves for teaching as a life work.

There are many districts where one might see fine houses and large fertile fields but a poor dilapidated school house with no decent out buildings or grounds, where the poor disgusted children are obliged to sit on benches with their little limbs as well as their minds are warped all out of shape.

How much time has been wasted in passing around that old worn out sheep skin eraser do you suppose? And Oh! think of the headaches caused by the stove being so close to the seats. Look at that little three by six black board and tell me if this state of things is necessary.

Just think what a splendid thing it would be to have a fine large school house with modern apparatus and a beautiful school yard well fenced and ornamented with trees and flowers, and inside a teacher who understands how to awaken the very best thoughts in the child's mind. What pride would the children take in such a school and what a great encouragement for them to study. They would learn to love the very name of school and would become an honor to their parents and useful prosperous citizens. Such a school can be in every district, and no right thinking person can rest until it is accomplished, in fact, no district can afford to be without just such a school, and I hope the friends of education in this county will all work without ceasing until cheap teachers and poor schools are things of the past.

Horticultural Quarantine Regulations.

At a special meeting of the Oregon State Board of Horticulture, held in Portland, April 2, 1895, all members present, the following regulations were adopted, in accordance with the laws regulating such matters, and are, therefore, binding upon all persons. The regulations are to take effect and be in force from and after May 4, 1895:

RULE 1—All consignees, agents or other persons, shall, within 24 hours, notify the quarantine officer of the State Board of Horticulture, or a duly commissioned quarantine guardian, of the arrival of any trees, plants, buds or cions at the quarantine station, in the district of final destination.

RULE 2—All trees, plants, cuttings, grafts, buds or cions, imported or brought into the state from any foreign country, or from any of the United States or territories are hereby required to be inspected upon arrival at the quarantine station in the district of final destination, and if any such nursery stock, trees, plants, cuttings, grafts, buds or cions are found to be free of insect pests and fungous diseases, the said quarantine officer or duly commissioned quarantine guardian shall issue a certificate to that effect. And furthermore, if any of said trees, plants, cuttings, grafts, buds or cions are found infested with insect pests, fungi, blight or other diseases injurious to fruit or to fruit trees, or other trees or plants, they shall be disinfected and remain in quarantine until the quarantine officer of the State Board of Horticulture or the duly commissioned quarantine guardian can determine whether the said trees, plants, cuttings, grafts, buds or cions are free from live injurious insect pests or their eggs, larvae or pupae, or fungous diseases before they can be offered for sale, gift, distribution or transportation. All persons or companies are hereby prohibited from carrying any trees, plants, cuttings, grafts, buds or cions from without the state to any point within the state beyond the nearest point on its line or course to the quarantine station in the district of ultimate destination; or from any point within the state to any other point therein, until such trees, plants, cuttings, grafts, buds or cions have been duly inspected, and if required disinfected as hereinbefore provided, and all such shipments must be accompanied by the proper certificate of the inspecting officer. Provided, however, that after such persons or company have given the proper officer four days' notice, he or they shall not be required to hold such shipments further, without directions from such officer.

RULE 3—All peach, nectarine, apricot, plum or almond trees, and all other trees budded or grafted upon peach stock or roots, all peach or other pits, and all peach, nectarine, apricot, plum or almond cuttings, buds or cions, raised or grown in a district where the "peach yellows" or the "peach rosette" are known to exist, are hereby prohibited from being imported into or planted or offered for sale, gift or distribution within the state of Oregon.

RULE 4—All trees, plants, cuttings, grafts, buds, cions, seeds or pits arriving from any foreign country found infested with any insect pests or their eggs, larvae or pupae, or with fungi, or other disease or diseases hitherto unknown in this state, are hereby prohibited from landing. **RULE 5**—Fruit of any kind grown in any foreign country, or in any of the United States or territories, found infested with any insect or insects, or with any fungi, blight, or other disease or diseases injurious to fruit or fruit trees, or to other trees or plants, is hereby prohibited from being offered for sale, gift or distribution within the state.

RULE 6—Any boxes, packages, packing material and the like infested by any insect or insects, or their eggs, larvae or pupae, or by any fungi, blight, or other disease or diseases known to be injurious to fruit or to fruit trees, or to other trees or plants, and liable to spread contagion, are hereby prohibited from being offered for sale, gift, distribution, or transportation until said material has been disinfected by dipping it into boiling water and allowing it to remain in said boiling water not less than two minutes; such boiling water used as such disinfectant to contain in solution one pound of concentrated potash to each and every ten gallons of water.

RULE 7—Animals known as flying fox, Australian or English wild rabbit, or other animals or birds detrimental to fruit or fruit trees, plants, etc., are prohibited from being imported or landed in this state, and if landed shall be destroyed.

RULE 8—Quarantine stations: For the first district, comprising the counties of Multnomah, Clackamas, Yamhill, Washington, Columbia, Clatsop and Tillamook, shall be Portland. Henry E. Dosch, quarantine officer, or any member of the Board or the secretary thereof.

RULE 9—Importers or owners of nursery stock, trees, or cuttings, grafts, buds, or cions, desiring to have such nursery stock, trees, plants, cuttings, grafts, buds or cions inspected at points other than regular quarantine station, may have such inspection, if the importer is provided, however, that such importers shall pay all charges of inspection. Such charges and expenses to be paid before a certificate is granted.

Transportation companies, or persons and consignees or agents shall deliver and cause to be detained all nursery stock, trees, plants and fruit at one or other of the quarantine stations for inspection, as provided by the rules and regulations of the board.

Details as to quarantine stations, offices, fees of inspection, receipts for disinfestation and all desired information may be obtained on application to the secretary or any member of the Board, or by reference to pamphlet circulated.

Passed at a meeting of the State Board of Horticulture at Portland, Or., April 3, 1895.

Attest, GEORGE I. SARGENT, Secretary.

J. R. CARDWELL, President.
