Mrs. Stoddard, one of the proprietors of the HEADLIGHT, received word some time since, of the death of her father-in-law, Mr. Stoddard of Ohio. GEO. COHN,

Some one with either an Arabian Nights sort of imagination or the spirit of Achanias, and who richly deserves the aforesaid liar's fate, started the report here, this week, that four men, Messrs. Chatterton, Kimball, Huff, and Ronald, who have been fishing at Siletz, had been drowned.

H. Schollmeyer had his trial last Saturday for having violated the law and engaged in fishing with a seine on Sunday. Claude Thayer, Deputy Dist. Atty., conducted the case for the state, and T. B. Handley conducted the defense. The defendant had a jury trial. The evidence was somewhat conflicting, and evidently not altogether convincing, for the jury was only out a short time when it brought in a verdict not guilty.

Our post-mistress, Mrs. Hoskins, is keeping office in her dairy. She had about \$300 worth of stamps—they had come that day—and the fire broke out before she had time to count them and put them away. She thinks they were burned after they had carried them out of the house.

Mr. Finley, of Beaver, has consented to donate land for a church and parsonage, and the people of that vicinity are at present hauling lumber and making preparations for the erection of the buildings. The Beaver people seem to be prospering and are rather taking the lead in the matter of church buildings, but no doubt much of the enterprise in regard to church matters is due to the efforts of Mr. Mills, who is untiring in his efforts to build up the church in his community.

Mr. C. Christensen was in town Wednesday. He has just returned from Baker City and the mining regions of Eastern Oregon. He says there is considerable mining being done there. He was experimenting with his newly invented machine for separating gold from sand and gravel, and is well pleased with its work in the mines. It saves ninety-nine per cent of the gold, which is much better than anything else in use at the present time; it is especially adapted to use in mining along the beach as it readily separates the flake gold from the black sand. No other method has yet been discovered that will save more than a small proportion of this gold while his machine saves almost the whole of it.

The people of Beaver enjoyed a rare opportunity of being informed on the political issues of the day through an able address by Hon. E. E. Selph. An earlier announcement prior to such a gathering would draw more of an audience. We would greatly enjoy and undoubtedly profit by at least one good speech each week before voting. Some of us are undecided and wish to be on the winning side.
