OULD HURT INSTEAD OF HELP.

Free Coinage Would Injure the Farmers.

The chief strength of the 16 to 1 agi-tion lies in the belief that it would ment the agricultural classes. This is a jous error. The facts of all human perience show conclusively that free ver would cause widespread and promged injury to the farmers of this

mere threat of free coinage would injure the farmers by causing ediate calling in of all loans of londer to be address to be add The mere threat of free coinage would geatly injure the farmers by causing trough the natural desire of lenders to st back money worth as much as they at. Hundreds of thousands of farmers would be unable to pay their mortrages, and their farms would be sold at

and by each farmer for himself. A second way in which free coinage would hart agriculture would be by the financial panic which would inevitably follow the overthrow of cur present sound financial system and the adoption of the unstable cheap silver standard. With the millions of bank depositors demanding their savings the machinery of credits, by which so large a part of the country's business is done, would be the country's business is done, would be sound financial system and the adoption of the unstable cheap silver standard. With the millions of bank depositors the country's business is done, would be the country's business is done suddenly stopped. Merchants would be mable to buy goods for lack of credit; manufacturing industries would be clos-bated this the 7th day of November 1826 ed down, as in 1893, and millions of workers would be idle. Men out of employment do not buy as much farm roducts as when they are at work, and the farmers who now complain of the lack of markets for their produce would find themselves with a large part of their crops unsold. Would not this be a serious injury to agriculture?

Another evil which free coinage would bring to American farmers would be the unsettlement of their trade relation with the great gold standard commercial nations, which purchase each year \$600,000,000 worth of our surplus farm products. The adoption of the silver standard, with its constantly fluctuating scale of prices, would prove the same barrier to commerce between this and other countries that it has to trade between gold standard Europe and India, China and Japan. Do the farmers want to curtail and unsettle our foreign trade?

These are some of the ways in which free coinage at 16 to 1 would hurt the farmers? No advocate of 53 cent dollars has ever been able to show a single way in which it would help them.

A Trade Journal's Summary.

To a man who has no money there are several ways to get it-namely:

- (a) Beg it.
- (b) Steal it.
- (c) Borrow it.
- (d) Secure it by gift. (c) Trade something for it.

If we are to beg for it, we might just as well do the best we can. Therefore a dollar based on a gold standard is better than a 16 to 1 silver dollar, which today is worth about 53 cents intrinsically. If we are to steal it, we want the best.

A thief who would steal a silver dollar in preference to a gold dollar would be

money which will go farthest, for so we claim, and that said proof will be made before

are about to receive.

This brings us to e, which is the of Netarts, Ore, Bernard O'Hara of Netarts, Ore, Jame way most money is obtained. A perti- Bartholomew O'Hara of Netaris, Ore., James nent question for each of us to ask at Kodad of Netarts, Oregon. this time is, What have I got to trade for money which I want? It may be labor; it may be a horse or cow; it may be lumber or shingles; it may be a sawmill. At the present time we can trade any of the above and get a gold dollar for every dollar's worth of value, as may be agreed upon between buyer and seller. We can get a dollar which is worth a dollar anywhere and everywhere.

Now, y #r labor or horse or cow or lumber or machinery will be worth just as much, or nearly as much, next year as it is this, but if we have free coinage at 16 to 1 will the dollar which you get in trade be worth as much as the dollar you can get now? What will that be worth? Can you tell? It may be worth 53 cents or more or less. One day this, one day that, but can any one tell? These are all pertinent questions, and, when carefully considered, must guide us in voting at the next election in November, and do not lose sight of the fact that if all the silver in the world is coined into money you cannot get a cent of it except by a. b, c, d or e, above referred to.-Lumber Trade Journal.

With free coinage of silver at the ratio of 16 to 1 every mine in the world would be worked to its fullest capacity and the entire output dumped at our mints. Why? Because for every \$9.94 of silver bullion our government would give the owner \$18 60-a net profit of \$8.66 upon 16 ounces. Who would blame the millionaires who own silver mines for making this money? Common people will be forced to take from the rich mine owner a dollar at 100 cents whose intrinsic value is about 53 cents and whose purchasing value is never higher than its intrinsic value --Richmondville (N. Y.) Phœnix.

"We don't want any 53 cent dollars in this town" was the emphatic greeting of a workman to the presidential candidate of the Populists and Silverites as he passed through Huntingdon, Pa. If the American workingmen are wise they will see to it that every town and city in the United States gives the same answer to the free oinage appeals for votes.

If we are to secure it by gift, certainly N. W. 4 of Sec. 32 and S. 2 of S. W. 4 of Sec. 2). we should not depreciate that which we Tp. 1 S. R. 10W. He names the following with nesses to prove his confinuous residence upon and cultivation of, said land, viz: Henry Mills
