Mr. Page's second-hand store furnishes a really desirable acquisition to the business places of this city. He buys and sells everything of value. His place is a veritable curiosity shop in which almost anything can be purchased. Mr. Page has sold nearly half a hundred stoves alone in the last six months.

Mr. Reynolds has on exhibition at his hardware store, a unique centre table. The frame and legs of the table are made entirely of spools of all shapes and sizes, from the finest silk twist spools to the largest linen thread spools. There are about 800 spools in the table. It was made by Mrs. Billings, of Sand Lake, and represents several months of patient toil. The top of the table is 22 x 30 inches in size, and covered with beautiful garnet plush.

A number of questions have been asked us with reference to the power of the water motor now in our office and which runs all our presses. The motor is a Chicago Motor, the wheel of which is only about 1 1/2 inches in diameter. The pressure of water is about 70 pounds to the square inch. The water is conducted to the wheel in 1 1/2 inch pipe and the nozzle at the point of discharge is only 3/8 of an inch in diameter. Our largest press requires at least 2 horse power to run it and the wheel does the work easily with power to spare.

The Netarts telephone line is now, thanks to the energy, push, pluck and enterprise of Manager Tuttle, an established fact. The line will prove a great convenience to the people of Netarts, who have hitherto been quite isolated in winter time, especially I will prove equally convenient to the people at this end of the line, who desire to communicate with the people of that lovely little place by the sea. This county owes a great deal to Mr. Tuttle for what he has done in the way of establishing telephone lines here. Scarcely another county in the state so isolated and sparsely settled as this, has the telephone conveniences that we have. Mr. Tuttle has worked under great disadvantages. He started without capital, and it has only been by dint of incessant toil that he has been able to accomplish what he has. The next move will be to establish a line from Netarts to Woods and intermediate points.

At the council meeting Wednesday eve, the council instructed the City Marshal to strictly enforce the law concerning the use of fire crackers or other explosives on July 5th, and not to permit their use within one block of the line of the parade, on the day of the celebration. If the citizens will assist the marshal in this matter it will probably save trouble with accident from such sources.

THE ARENA

AN EXPRESSION OF PUBLIC OPINION But for which the Editor Does Not Hold Himself Responsible

This department of the HEADLIGHT is devoted to communications received from the people and all are invited to contribute to it. The subjects treated must be subjects of general interest. Under no consideration whatever will anything of a personal nature be admitted.

Editor HEADLIGHT: Not long since I listened to a sermon on infidels, that might have been considered, by some, just the proper thing, but as for me, I considered it the most shallow argument I ever listened to. It prompted me to ask the question, "What makes Infidels?"

Every now and then, some religionist—generally a preacher—undertakes to answer the above question, only to make a mess of it. One will say that "infidels are made by immoral and hypocritical Christians," whereas, we lay many immoral and hypocritical infidels; others will say that "infidels are made by the divisions and dissensions so frequent among Christians"; a third will charge all infidelity up to the love of the world and the things of "the world," forgetting that Christians are just as fond of the world and the things of the world as infidels are.

Infidels are made by thinking, in a plain common sense way, about what they see, hear and feel. Any person who will subject religion to a rational process of examination is likely to become an infidel. If one has education enough to read, and independent enough to reason freely about what he reads, he really needs to study but one book, the Bible, in order to become an infidel. When once you begin to reason on the subject you soon observe that the whole fabric of religion is based upon assumption. Everything necessary for the demonstration of its claims is assumed. All the reasoning by which it is urged upon the people is without any foundation in fact. Superstition is so deeply seated in some people that they dare not give the same scope to their reasoning on religion as on other matters. Such people are frequently logical and correct in their conclusions on all questions that do not involve religion; but, the moment a proposition is suggested that questions the truth of their religion they shrink from considering it. Religion had its origin in the ignorant childhood of the race, but, as people learn to think naturally and freely it loses its influence over them. So in the years to come it will pass away and be numbered with the things that were. What we want is education, freedom of thought, perfect equality, good government and just laws. Religion busies itself about happiness in some other world while in this one we are left to struggle in despair. In order to save our souls it damns our bodies. The so-called "holy men" religious people profess are delusives—they fall when most needed. Even Jesus died in despair, crying my God! My God! Why hast thou forsaken me.

Base Ball.

The junior men of the Tillamook base ball club had a very interesting game with Bay City at that place last Saturday. The "kids" went down more for the fun of the thing than with any idea of winning the game, but they found the Bay City Boys handicapped by the absence of their catcher and another of the best men, and proceeded to trounce them out in the prettiest game of ball that has been played in the county this season.

The game was hot from start to finish and it was nobodys game till the last out was made. The best of feeling prevailed and though every player was on his mettle, all evinced the manly fairness and good will that is so essential to the success of athletics.

Bay City latted a little harder than the Kids but the latter played an outfield that was a surprise to themselves. Nine flies, neatly captured, three of them yielding doublets attest the skill of the outfielders. A feature of the game was a long fly to right center, taken in by young Edmunds on the run and returned to first in time to double up an unwary base runner by a great play on the part of young Kimball. In the last half of the ninth, Bay City went to the bat with four to make. Three men batted out bases but no one got to the plate. A long fly to the left

neatly pulled down by Nolme when two men were on bases, a lightning throw out at first and a strike out settled it. Bay City could have won out long for over confidence in running on long fly balls.

At the close of the game after hearty cheers for each other Bay City marched the Kids to Rhodes Hotel where a fine supper had been prepared for them, and wound up the sport with an agreement for a return game at an early day.
