Office corner of Main and 1st st. etc.

As the time for election approaches the importance of united effort on the part of the republicans becomes more and more evident. There is a strong probability of a union being formed between all the anti-republican forces, and a determined effort will be made to wrest Oregon from the list of republican States.

The collections being taken up all over this country for the suffering Cubans, speaks well for the goodness of heart of the American people. So universal and spontaneous has been the response of our people to the call for aid, that it is hoped the present suffering, at least can be relieved.

We publish in this weeks issue the Meteorological Record for the month of January as kept by J. J. Dawson, at Kilebis Station. Capt. Dawson is a very careful and pains taking observer, and his report may be depended upon as being correct.

The news of the blowing up of the U. S. Man of War, Maine has filled the heart of every American with apprehension. Aside from the great loss of life sustained, and the fact that the Maine was one of the finest battleships in our small navy there is the possibility that the blowing up of the ship was not accidental, but designed either by the Spanish government or those in sympathy with Spain.

The death of Miss Francis Willard removed from the stage

of action one of the foremost women of America. Under her administration the W. C. T. U. has developed into a formidable and aggressive body that has struck many hard blows against its enemy, the liquor traffic.

The Woods, Ocean Wave, prophesies a victory for the "Union" forces in Tillamook County this year. Better wait till the pops and democrats unite, neighbor.

Beet-sugar manufacturers who have always relied upon the Republican party for all legislation favorable to the production of beet sugar in the United States are doing that party and themselves an injustice by their attempts to create public sentiment against Hawaiian annexation through assertions that the prices of sugar beets will be reduced in case annexation is accomplished.

What a time the calamity shriekers are going to have revising their arguments of 1896 and the subsequent year. They insisted that farm products could not advance without the free coinage of silver, yet, as has been already shown, practically every article of farm production has increased from 10 to 50 per cent, in value without the adoption of their pet theory.

The farmers of the United States ought to be very well satisfied with the first years developments under President McKinley. Despite the Democratic assertions that the adoption of a protective tariff would "destroy our foreign markets," the sales of agricultural products abroad in the calendar

year 1897 were \$730,323,514, which is the largest sum ever realized by the farmers of the United States from sales of their products to other parts of the world, the next highest being in the last year of President Harrison's administration, 1892, when the exportation of farm products amounted to \$712,539,832.

How are the calamity wailers of 1898 going to justify their assertions of 1896 that prosperity could not come through protection, or without the adoption of free coinage of silver? It is generally admitted that the best possible barometer is that furnished by the current business of the banks of the country.
