The Spanish Minister of Marine professed to be so overcome with joy when he appeared before the Spanish Cabinet with the news of the battle of Manila that he could not express his emotions. Wonder what would make that cuss feel sorry, any how.

This Justice District owes it to itself to elect Thomas Goyne to the office of Justice of the Peace. Mr. Goyne is a thoroughly honest and upright man and well read in law, being a practicing attorney. No one doubts either his fairness or his ability to discharge the duties of the office. When such a good and thoroughly well qualified candidate offers himself it would certainly be very foolish to run any chances by electing a man in whom the greater portion of the above qualifications are wanting. Mr. Goyne must be elected.

Now that Uncle Sam has fairly whipped the Spaniards in the Philippines, we see no good reason why the United States should not make arrangements to keep the islands as indemnity for the immense cost to which we shall be put by the war. The Philippines are directly in the route between San Francisco and Hong Kong and a coaling station at that point would be of great value. Aside from this, the Philippines are amongst the richest in resources of any of the islands of the earth,

and would be of untold value as a territory, of the United States. At any rate Uncle Sam might be able to trade them off at a bargain if he doesn't want to keep them.

The office of County Judge is one of the most important in the gift of our people and it is of the utmost importance that it be filled by a man who is qualified for it. The mere fact that a man is honest is not in itself a qualification. He needs to be honest but he needs in addition to mere honesty to be a man of intelligence and judgement and to possess a knowledge of law. Important matters come up before the County Judge in this state. All probate matters are adjudicated in his court. Sometimes the estates settled in the County courts are large, amounting to many of thousands of dollars and the judge must decide on points involving vast amounts. In order to do so intelligently he must have a knowledge of the laws of inheritance, etc, and the laws of evidence. This he cannot have unless he is an attorney or has had previous experience in other courts. Withal, he must be a man of good judgement and sound sense. All these qualifications, Justice Sappington possesses in an eminent degree. His experience as a Justice of the Peace is such as to qualify him thoroughly for the office which he seeks. His work in the Justices office has been thoroughly satisfactory and his work as County Judge will be equally satisfactory. There is no doubt of his election.

The approach of the June election will naturally set people to thinking, who have brains to think with. Two years have elapsed since the McKinley campaign and in these two years of republican administration much progress has been made in restoring the country to a normal state of prosperity.

Our farmers have been especially prosperous. Millions of dollars of farm mortgages have been paid. Money lenders, with confidence restored, have opened their coffers and money has been obtainable in plenty at reduced rates of interest. Factories have opened their doors everywhere and working people have been given employment. The amount of money in circulation in the country has greatly increased and everything points to continued and ever increasing prosperity. And all this in the face of the fact that the Democrats in 1896 prophesied most woeful results should McKinley be elected. The farmers were to suffer untold woes. Wheat was to decline to 50 cents and less per bushel, the circulating medium was to suffer a ruinous decrease, factories were to close, and everything was "to go to the demnition bow-wows." Yet the men who lied in '96 are telling the same old lies over again. But will the people believe them?

Mr. Veatch is no doubt a very amiable sort of a gentleman, but if elected to Congress he goes pledged to do all he can toward debasing our national currency. We can not believe that the voters of the First District will lend themselves to such a scheme. They are for the most part wage earners and agriculturalists. Every wage earner with an intellect above that of an oyster, knows that the first use to be made of depreciated money will be to pay wages there-with and every agriculturist knows that the second use made of 'cheap dollars' will be the purchase of farm products, while the merchant, the shipper and the middlemen will protect themselves by demanding their pay in good money or by raising their rates to correspond with the discount on the 'legal tender.'

Realizing these facts and bearing in mind that a vote for T. H. Tongue is a vote for the wage earner, and the farmer to be paid in the best money in the world, while a vote for his competitor is a vote for the issue of currency

which can and will be used for dishonest purposes, it is hard to imagine any danger of this District going wrong on the money question.

The Cuban Republic.

Recognition of the Masso government may indeed follow at a very early day, but at the outset of armed intervention the United States ought not to be hampered. Under the circumstances, our demand that Spain should withdraw her troops and relinquish sovereignty in Cuba can mean nothing except that she is to relinquish authority to the United States. We are in the position of a court which assumes temporary control of an estate with a view of its proper disposal. We distinctly avow that in taking it upon ourselves to expel Spain from Cuba we also assume the duty and responsibility of restoring order in the island and of protecting the lives and rights of all elements of the population. We have further pledged ourselves explicitly in our turn to relinquish authority just as soon as we shall have been able to supervise the establishment of an independent Cuban republic. This, doubtless, will mean the extension of the existing republic under President Masso and his cabinet to all parts of the island. Nevertheless, for the time being it is the United States, and not President Masso's government, that stands before the whole world responsible for the conditions in Cuba; and where there is responsibility there must also be authority. We should be embarrassed in doing for the Cubans what we have set out to do if President McKinley had to shoulder the responsibility, while by our own premature act of recognition we had accorded to President Masso all the rightful authority. If we had acknowledged the Cuban republic, our logical course would have been to form an offensive and defensive alliance with that neighboring sovereign power, and then in a strictly subordinate way to co-operate with Gen. Maximo Gomez. But this would have involved us all in the losses and dangers of war with Spain, while increasing the chance of its being a long rather than a short war. In any case, of course, our forces will avail themselves of the indispensable cooperation of General Gomez's "Army of Liberation."—From "The Progress of the World," in the American Monthly Review of Reviews for May.
