Kruger not Reconciled

LONDON, Aug. 12.—The arrival next Saturday of the South Africa of General Botha, DeWet and Delarey promises to be the occasion of another struggle between Boer and British. The Colonial Office has made special arrangements for the reception of visiting Boers at Southampton. The naval review will be in progress when the Boers arrive, and after their reception by distinction the Colonial officials, Lord Kitchener and other prominent persons, they will be taken on board the steamer chartered for the use of the Colonial Premiers to witness the naval review. The Boer leaders will spend Saturday night on board this vessel, and on Sunday they will be received by King Edward on board the royal yacht and in the presence of a number of distinguished personages.

The arrival in England of the Boer Generals will doubtless be the prelude to another of those life that experienced by the late General Meyer, should the Generals decide to stay in England, but according to the Hague correspondent of the Daily Mail ex President Kruger and his party are equally anxious to prevent Generals Botha, DeWet and Delarey from landing in England. Members of the Kruger party have sent urgent letters and cables to Mafeking in an effort to dissuade the Generals from accepting British hospitality.

Just Like Tracy.

SAN JOSE, Cal., Aug. 9.—A series of daring highway robberies, which resulted in the sensational death of one of the robbers and the wounding of a citizen, occurred on the Monterey road a little before 5 o'clock this evening. Two young men, apparently little more than boys in age, opened the proceedings by compelling an old lady who was driving along the highway near Edendale to alight and deliver her horse and buggy to them. They then drove to E. F. Heples' store at Coyote, where they bought cartridges for a 32-caliber pistol. This they loaded, and immediately proceeded to hold up the proprietor and several bystanders, one of them holding the pistol while the other made the collections. From the till they got only \$5 or \$6, and from the bystanders about as much more. From Heples' they continued toward Gilroy. Within a quarter of a mile of there they met W. W. McKee, a sewing machine agent, accompanied by J. E. Roland. The highwaymen drew a shotgun and pistol, and commanded McKee and Roland to hand over their money. McKee, believing he had met two boys on a lark, did not check his horse, and one of the highwaymen discharged his pistol. The bullet passed through a sewing machine cover and struck Roland in the fleshy part of the hip, inflicting a trifling wound. McKee lashed his horse into a run and was not further molested.

The robbers continued southerly to Stevens' store, a mile and a half from Heples', robbing two or three teamsters on the road of small amounts. They were just entering Stevens' store when they saw five or six armed men riding rapidly toward them. This was a posse consisting of E. F. Heples and the men who had been robbed with him. The robbers abandoned their jaded horse and started across a field toward the westerly foot-hills. A running fight ensued, in which one of the robbers was shot through the stomach. In emulation of Cavivert Tracy, he placed his pistol to his head and blew out his brains and died almost instantly. The other three up his hands and was taken into custody.

The robbers were George Tan and Fred Williams, each about 25 years old, who have been living in the adjacent to the town of Mayfield. Williams was wanted there on a battery charge, he having defrauded his bail. Tan is the one who killed himself after being shot.

Advices received indicate that President Roosevelt will call the Senate in extraordinary session early in November. Ever since it became evident that nothing would be accomplished as to reciprocity with Cuba at the recent session of Congress, rumors of a more or less definite nature have been in circulation that the President would call an extra session either of the entire Congress to enact Cuban reciprocity legislation or of Senate to ratify, if possible, a reciprocity treaty with Cuba.

The Central Federate Union of New York has gone on record against the judges who have issued injunctions against the striking miners. At a meeting just held a long preamble and set of resolutions was unanimously passed. The first paragraph of the preamble denounces the judges mentioned and calls them "willing and subservient tools of the coal trust." After still further scoring the judges the resolutions "urge the miners to insist upon, and if needs be, defend their right to feed starving brothers in defiance of the mandate of the Federal courts, and that we pledge them our hearty support to the furthering of that end."

A majority of the Mississippi press have formed a combine against candidates for office and have decided to mention the name of no candidate for state office unless he advertises. The schedule is placed only on one dollar an advertisement, but as there are 300 newspapers in the state each candidate will have to pay \$300 for advertising. In view of the fact that all nominations for State offices must be made by primary election a candidate is practically compelled to have his candidacy known in such counties. The Mississippi papers, realizing this, have determined to profit by it, to do no booming free and to recognize no candidates who do not advertise.

All existing railroad spans of over 500 feet have been built since 1870, and probably more in America than in all the rest of the world together, and certainly these are much better and cheaper and have been more rapidly and safer constructed than those of any other country. In a word, American engineers have built most of the greatest and most difficult bridge in the world and in less than half a century, largely within the last quarter century, have developed the art of bridge building to a perfection that no other sort of construction has reached in hundreds of years. They have brought in practical limits that cannot be greatly stretched until some revolutionary material is provided that is notably stronger, cheaper or lighter than steel.

At a meeting of the citizens of Forest Grove, Ore., and a number of prominent farmers of that locality, held at Verts' Hall, arrangements were completed making it certain that a condensed milk factory will be started there as soon as the building can be erected and the machinery installed. The committee appointed at the meeting August 2 for the purpose of canvassing the neighborhood to see if the milk from 1500 cows could be contracted for, this number being required before the promoters of the enterprise would start up there, reported that the cows had been secured. The committee selected to secure \$2500 reported that the funds had been pledged. The sense of the meeting was that Mayor F. T. Kane should wire the Pacific Coast Condensed Milk Company, at Kent, Wash., that everything specified in their contract had been secured, and to bring on their factory. Not later than January 1 this industry is expected to be in operation at Forest Grove.

An investigation at Manila by the consular agents cleared up the facts in the killing of a Cuban teaching party of four schoolteachers, shows that the party was ambushed 12 miles from Cebu. Two teachers were shot and killed at the first volley; a third, who ran, was shot in the back, and a fourth, who was captured, was shot in the chest while praying for mercy. It is suspected that the fourth man was buried alive, as his wound was slight and probably would not have caused death. Dogs dug up two of the bodies and devoured the flesh. It is believed that sufficient evidence has been secured to convict all the parties connected with the crime. Two teachers were shot and killed at the first volley; a third, who ran, was shot in the back, and a fourth, who was captured, was shot in the chest while praying for mercy. It is suspected that the fourth man was buried alive, as his wound was slight and probably would not have caused death. Dogs dug up two of the bodies and devoured the flesh.
