

NEW GOODS ! NEW GOODS !

At Cohn & Co.'s Big Store.

Not Goods that have been shipped from one retail store to another and could not be sold, and at last dumped on the people of our city, but Bright, New Styles and New Patterns just received from the factories and the mills.

We, as the people well know, handle no auction or bankrupt stock. The Ladies have said that no Store in our city is showing the up-to-date line of Goods that we are. We are not over stocked, but we have the largest stock of spring goods in the city. New Lawns, New Black Goods, New White Goods, and, in fact, too many new goods to advertise. Come and inspect our Spring Stock, just to see the pretty things. Our big sales speak for themselves that our prices are the lowest.

Beware of Political Knockers.

This is no time to sow the seeds of political discord or to cause wrangles or jealousies between republican leaders in this county, because this one or that one did not get full credit, or all the credit for that matter, for the nomination of Binger Hermann. Those who are trying to cause another split and strife in the republican party of this county have sinister motives in view—to vent their personal spleen and to push themselves into the foreground, where they are not wanted. Whether we agree or disagree with those who went to the local convention with different ideas, the HEADLIGHT is ready to admit that all were sincere in the course they pursued, but with the same object in view, that of Binger Hermann's nomination and election. Now that he is the standard bearer of the republican party, surely it is bad politics and bad blood and the want of good common sense to endeavor to create friction and jealousies amongst republicans, and especially amongst those who have become leaders of the party, when there is only one object in view—the election of Mr. Hermann. Let good politics and harmonious feelings prevail in Tillamook, and the county will do herself proud on election day. Those who act otherwise are "political knockers," trying to create hard feelings and discussion in the republican party, are no friends of Hermann, no matter how much their "hot air" boasts, but simply insignificant tools in the hands of those who are conspiring to defeat the republican nominee, and by throwing bouquets at one republican leader, and stabbing, in true Spartan style, another republican leader in the back, they are resorting to this contemptible method to work out their political schemes.

Tillamook Toll roads Must Go

The toll roads in the South part of Tillamook county are an annoyance to the settler, an hindrance to the development of the county, a genuine hoodoo to home seekers, and an antiquated system of road building that is only tolerated in out-lying districts. No one will, or can, deny these assertions. Why then tolerate them any longer in Tillamook? It is not surprising that the people in Yamhill county, when they find intending settlers headed for Tillamook, that they jeer and compare us to an antediluvian class of people. And they have a right to think so as long as the county is bottled-up with toll roads. Good roads are absolutely necessary to a country's development, and although we are glad to know that the County Court the next few years will greatly improve the roads in Tillamook county, in the judgment of the HEADLIGHT man the County Court should establish and maintain public roads for the benefit of the people who reside in the South part of the county. They are entitled to a public highway, and as public sentiment is strong in that part of the county against toll roads, which is destined to become a burning question if not remedied, it is a matter the County Court should take in hand with as little delay as possible, for they are a detriment, and a bad one as far as getting new settlers, to the county.

Talking Through their Hat.

How some people do talk through their hat. The HEADLIGHT man had taken charge of the newspaper but a few weeks when he was told a certain party said it would not be long before he'd do us up in business. That was nearly five years ago. Our subscription list and the large amount of advertising we have received in that time, is proof enough of the popularity of the HEADLIGHT. We felt somewhat tickled last week to be told that a certain party made the prediction that either the HEADLIGHT or the HERALD would have to go out of business. In answer to this, let us say that these parties must put all the HEADLIGHT man's friends out of business before they can hope to put this newspaper out of business. But why take notice of such people,

whose sole object is to pull down those whom they cannot run or control? We have lived long enough and seen enough of Tillamook people to convince us that, give the little click that is opposed to the HEADLIGHT, for political reasons, plenty of rope and it will not be long before they will run their little career and become just as unpopular as their predecessors who thought they could do the HEADLIGHT man up in business on "hot air" and spite work.

Publicity And The Steel Trust.

The United States Steel corporation has just made public its report for the year 1902 and it is credited with having given a complete statement of its affairs, thus taking its stockholders frankly and fully into its confidence. The report is regarded, according to a New York dispatch, as really an event of the highest consequence. Many think it mark an era in the relations of the great corporate combinations to the public. It is believed that the example must in the long run be followed by other corporations toward which the people are looking with something of apprehension, a fear for which the secretive blink pool management that is characteristic of some of them is in great measure responsible. There is no doubt that this course of the great steel corporation is an example which other industrial corporations will find it necessary or expedient to follow in order to command public confidence. They may not generally be disposed to make publicity of their affairs to complete as has been done by the steel corporation, but they cannot afford to continue the secretive policy they now observe at the risk of suffering from popular suspicion and apprehension respecting the management of their affairs. It is to be expected that after the bureau of corporations begins its work of investigation which will be shortly, most of the combinations subject to governmental inquiry will adopt the plan of publicity, at least to such an extent as will enable their stockholders to obtain a pretty accurate knowledge of how they are being managed and what they are doing.

In regard to the figures of the steel corporation's report, they are somewhat impressive. The gross income from sale of products and from incidental sources in 1902 is stated to have been \$560,000,000, which was considerably in excess of the international trade balance in favor of the United States for that year. The net income was over \$133,000,000 and the surplus for the year \$34,000,000. Such figures certainly bear evidence of the great prosperity of the country and a statement in the report of contracts or orders that are yet to be delivered and that where upon the books at the beginning of the calendar year indicate that the end of prosperity is still distant.

Pointed Paragraphs.

Ignorance and conceit are twins.
Deaf mutes will not answer as servants.
Whiskey and the police get a lot of men into trouble.
Blind people seem to have a monopoly of love at first sight.
A stylish coat on a man's back enables him to put on a bold front.
A blind master and a deaf servant make an ideal combination.
Great men are ordinary men with their shoes carefully polished.
The best man in a controversy is the one who does the most listening.
When some people tell the truth it is only for the purpose of creating trouble.

It may seem like a chestnut to write about the purity of milk. However, it is so important a subject that just at this time of the year the man who handles the cow should have his memory refreshed. Cleanliness is at the base of all successful dairying. Without reasonably pure milk no good product can be made from the milk of the cow.

That old maxim has received a rude shock in the Massachusetts courts. They have decided that the public does not have to support a man who is of a sound body when he refuses to work. This is a distinct gain for the workers and is really no new thing under the sun, for centuries ago it was decided that "if a man would not work neither should he eat." This decision is in harmony with the Darwinian doctrine of the survival of the fittest.

Quant Features of Life.

A comely young woman, tried at Marion, S.C., on a charge of murder for killing a man to whom she claimed to have been secretly married, was acquitted by the jury and the judge of the court then imposed upon her a fine of \$20 for carrying a pistol, contrary to the law of the state. The spectators in the courtroom, who had applauded the verdict made up the amount of the fine and presented it to her, and she departed for her home a free woman.

Here are a few names taken from the rolls of the Chickasaw and Choctaw nations in Indian Territory as made up by the Dawes commission: Excellent Love, Uple Bogle, Cora Tuggle, Indian Territory Spears, Chick and Chock (twins), Okla and Homa (twins), Evil Kiel, Smile Hancock, Hate Fobb, Mesley Tecumseh, Hilly Wolf, Lying Hampton, Sweet Magnolia Brown, Sweetann Cole, Selly Brate Smith (born July 4), Pless Jonathan Keith, Eplurbus Guest, Fancy Nora Brown, Nervus Jackson, Always Billy, Dethadue Watts, Dicy Jiggetts, June Love.

A queer state of affairs exists in Woods county, according to a pipe dream reporter of the Carmen (Okla.) Headlight. At a trial recently before the probate judge in Alva a lawyer drew a gun and was prevented from killing a witness by the bystanders and the court never said a word. The sheriff of that county goes around, and when he finds a man that carries a gun tries him himself and fines him \$50. A man who was once arrested on a false charge in that county and thrown into jail was drugged and robbed, and the attorneys in the district court offered to have Judge McAttee—then judge—poisoned for \$175. The story of the sick negro being held up by six prominent residents of that town who wore masks and robbed him of \$118, and the disappearance of Milt Thomas, a deputy marshal, who was undoubtedly murdered to throttle damaging evidence, evinces the fact that around an educational institution like the Alva Normal there are men who have noble brows, but the spirit of Cain is deep in their hearts.

The old Calvert home, at Mount Airy, Md., which for more than two centuries has sheltered the descendants of the first Lord Baltimore, was offered at public auction recently, but was withdrawn from sale because only half of its actual value was bid. It is rumored that Secretary of State Hay will be among the bidders when the property shall be offered again. The mansion was built in 1660, and was primarily used by the Calverts as a shooting box, but was later enlarged, renovated and made the permanent home of the family.

Three doctors of Naples, Profs. Di Giacomo, Deamicis and Morlora, are studying the extraordinary case of a young woman, a victim of hysteria, from whose body pins and needles have been issuing for some time past. An examination by means of the Roentgen rays shows that there are still a large number of needles and pins in the young woman's body. The doctors are at a loss to explain the phenomenon, but it is supposed that the girl eats the pins and needles when in a hysterical fit. Admitting this, it is still difficult to explain how they find their way out at her extremities. The girl is said to be a spirit medium and to have made extraordinary revelations when in trances.

An Ohio man with \$50,000 in bank has gone to work on a farm as a day laborer and his relatives are attempting to have him declared insane and his property placed under their control. Things have come to a pretty pass when a man who is competent to amass \$50,000 must have his mental faculty questioned because he prefers to live the most wholesome life known. If the insane asylums of the country had to depend upon the farms for their inmates they would never have reached their present capacities.

A golden wedding celebrated at Le Roy, N.Y., recently was in more than usual ways an exception to the mortality of human things. The festivities were held in the house which John R. Olmsted built for the occupancy of himself and his bride more than fifty years before. It has been their home through-

out their married life. Shortly before his marriage Mr. Olmsted employed Annie Connor as cook. She has been in the service of the family all these years. All six of the couple's children are living, and were present at the golden wedding. Mrs. Olmsted wore her bridal wreath and her wedding gown was worn by one of her daughters. Some of the wedding cake of fifty years before was produced at the celebration.

Paddy Lynch is Convicted.

ASTORIA, Or., April 18.—The jury in the case of Paddy Lynch and Theodore Tobiason, on trial on the charge of kidnaping Charles W. Gardner by shanghaiing him on board the British ship Foyledale, returned a verdict of guilty against both defendants at 10 o'clock this evening. The verdict, however, recommended Tobiason to the mercy of the court, and asked that his punishment be confinement to the County Jail. The court complimented the jury on its decision, and said the verdict was fully justified by the evidence. He remanded the prisoners to the custody of the Sheriff, and fixed next Saturday afternoon as the time for pronouncing judgment.

The jury was out 30 hours, and from the first ballot stood 10 to 2 for conviction. At 4 o'clock this afternoon, on receiving further instructions from the court, one of the obstinate ones joined the majority, but the other held out six hours longer. The verdict gives general satisfaction in the community.

Blow to Coast Shingles.

SEATTLE, April 18.—Secretary Victor H. Fekeman, of the Shingle Association, today received a letter from the Treasury Department, asking for information regarding an order recently issued by the Great Northern and Northern Pacific, and three days ago supplemented by an order from the Wisconsin Central, refusing to furnish any more cars for single shipments east of Chicago. The contention of the lines is that they now have upwards of 14,000 cars on foreign lines in the East which they are unable to get back. The effect of this order will be to kill the Washington shingle market in the Eastern States, amounting to about 5000 cars annually, and in the face of present conditions, including the largest surplus stock on record in the hands of the Coast mills and little demand in the Central West, the situation is alarming to the trade.

The purpose of the Treasury Department's inquiry is speculative, but is supposed to be for the purpose of presenting the matter to the Interstate Commerce Commission.

This month is expected to break all records for immigration at New York. At the close of Saturday's business 64,000 aliens had passed Ellis Island in 18 days. Those scheduled for the remainder of this month indicate that the total for April will exceed 90,000. May last year, with 82,000 immigrants, is the record month at that island. Reports from European sailing ports indicate that more than 100,000 aliens will arrive next month.

Mayor Reed's proclamation ordering the killing of all dogs found at large and unmuzzled in Morristown, N.J., has resulted in the practical annihilation of dogs since the edict went into effect it is estimated that 1000 dogs have been killed since its promulgation. The order was the result of an attack of rabies on a bulldog, during which the animal bit about 150 of the town pets. The Town Council and Mayor decided that nothing but a wholesale slaughter would save the situation, and the Mayor issued his proclamation.

As near as can be learned, there will be 31 seining grounds operated on the Columbia River during the coming season, a much larger number than ever before, but as yet none of them has been started. To operate these grounds during the season will entail an expenditure on an average of \$4000 each, exclusive of the cost of gear and horses, or a total of \$124,000, thus requiring a catch of 1240 tons of fish at 5 cents per pound before the expenses are paid. Notwithstanding this enormous expense account, the seiners usually reap big harvests, some of them clearing from \$10,000 to \$15,000 during a single season.

J. S. LAMAR,

WINE AND SPIRIT MERCHANT.

I have the largest and best assorted stock of old Wines and Liquors that has ever been imported into this City.

Whisky, \$2.25 to \$8.00 per gal.
Wines, \$1.00 to \$3.00 per gal.

Don't drink cheap doctored stuff when you can buy it pure and unadulterated from me.
