

THE NEW MODEL SCHOOL BUILDING AT TILLAMOOK CITY.

Professor E. H. Whitney heads fine Corps of Teachers.

Above is a picture of the new school building recently completed in Tillamook City, which cost over \$8,000. It was designed by Charles A. Burggraf, of Albany, and erected by S. A. Brodhead, a local contractor, who has built all the large buildings in recent years in this city. It is a modern, up-to-date building, and contains eight rooms 25x32 feet, and ante-rooms 8x28 feet, being a two-story building with basement of eight feet. Each room is designed alike, well lighted, heated with steam from a boiler in the basement and ventilators from each room between the smoke-stack and brick chimney.

The Board of Directors, who had charge of looking after the work and letting the contract, was composed of: H. H. Alderman, P. W. Todd and B. L. Eddy, and Thomas Coates, clerk. All of the eight rooms are being used this year. The new building was built on the school grounds east of the old school building, which will be kept intact at present. There is some talk of turning the upper story of the old building into an assembly hall, holding the two lower rooms in reserve in case one or more of the outside districts consolidated or the attendance justified more teachers being engaged.

Besides the usual course of studies, the High School course is included, which is made quite a feature. This was a long felt want in Tillamook for several years, until four years ago, when the patrons of Tillamook City district decided to add that branch to the city school. Quite a number of pupils from other districts have attended the high school in this city, and as they can obtain the necessary number of credits from the high school which will entitle them to enter the State University at Eugene, this does away with sending young people outside the county to take high school studies.

The Board of Directors took great pains to secure a strong corps of teachers. The principal is Professor E. H. Whitney, and this is his second year as principal of Tillamook City school. Professor Whitney came from Nebraska, where he graduated from the McPherson Normal College at Republican City, and the Ash Grove College, Missouri. He was vice president of Oaklawn Normal College in Northeast Missouri for four years and principal of High schools in Nebraska for five years. He is a progressive principal, well qualified and persevering, and the school under his management last year was one of the most successful in the history of the public school of Tillamook City. The other teachers are graduates of the state and other universities, and include: Miss Alma Wagner, of Villiska, Ia.; Miss Florence A. Hudson, of Tangent, Or.; Miss Adel Pickett; Miss Minnie Rolland, of Republican City, Neb.; Miss Anne Wallace, of Illinois; Mrs. Beatrice Harrison and Mrs. Ella R. Hays, the latter having charge of the primary department.

To give some idea that the Tillamook City public school is an up-to-date institution in an up-to-date town, the two societies belonging to the High School have ordered 23 of the leading monthly magazines, for supplementary reading; also, high grade piano, which it is obtaining at factory price, paying \$400 for it, and which will be here shortly. One hundred and fifty volumes have been ordered, to be added to the school library; physical and chemical laboratory to be used by P. of Whitney in the high school studies; also the necessary appliances for a gymnasium.

It will be seen that Tillamook City public school started this year under exceedingly favorable conditions, with an able and experienced principal, a fine corps of teacher, a new and commodious building and with all the necessary appurtenances which go to make up a first class school. The HEADLIGHT feels convinced that the pupils appreciate what the patrons of this district have done for them, for they are enjoying opportunities and luxuries which children of parents of pioneers of Tillamook County never dreamed of. We expect to see another successful school year, with no friction and everything working in harmony.

BEAVER.

Rain, rain! Creeks and rivers are booming, but not enough to stop travel. On Saturday last Mrs. Kirk and daughter and Mr. Shortridge, of Tillamook, made a flying trip to Ocean Park.

Al Kirk, of Tillamook, visited relatives at Beaver Saturday and Sunday.

The minister of Beaver, Mr. Smith, was pleasantly surprised by the arrival of his mother last week.

Several of the Beaverites have arrived home from the valley. One wagon we hear had a breakdown. We did not hear particulars, but probably the driver had one of the fair belles of Beaver to occupy the side that broke.

The home of Mrs. Ginn was made happy a few days ago by the arrival of the husband and father after an absence of about five months.

Mr. and Mrs. Kinneman, sr., have returned from the valley; also Mr. and Mrs. Coulson, sr., with their daughter and family from the east.

Mrs. Kirk, son and daughter entertained visitors Sunday evening, among whom were Miss Eva and Lena Bunn, Miss Helen West, Ed. West and A. West, of Washington, and two Master Sailings and Master Bunn, of Beaver.

On account of rainy weather the baptizing that should have been last Sunday was postponed.

Our worthy merchant still is at Beaver bringing on new goods for his increasing trade. He is not the man to let a misty day or little mud make him stay in.

PLEASANT VALLEY.

The last of the hoppers have arrived home and are not sorry to get back to old Tillamook, where green grass and plenty of good water abound.

S. H. Phillips has moved back to his ranch from the Schild's place, but he is still taking care of the place and stock.

B. W. Turner has been afflicted with Job's pets for the last month. He says the best place for one of them is on a spruce tree.

We have some increase in our population. A family moved up to the Yellow Fir mill the other day. Come on, there is room for 15 or 10 more families in Pleasant Valley, and we extend a welcome to all who come.

The other evening J. Riggs met a bear on the tassel, and he had nothing but a cigarette, and it wouldn't go off, so he went off and got a couple of Mr. Blum's pups and chased the animal until darkness put an end to the sport.

John Theiler and Hedges were going to town the other day and were working Freddy. Theiler was showing Peet how to drive the animal. He said "Just show Freddy the whip on this side and on that side and he will make a four minute gait." Freddy got his blood up, thinking he was being scandalized, so he said, "Look out," and struck a two minute gait. Theiler said "Whoa, Freddy; oh, whoa, Freddy," when the lines broke and the team was unmanageable. It went to the north of the track and struck the bank, breaking the car to pieces, injuring the occupants and allowed Freddy to go free. Dozens of persons viewed the wreck, which was 300 yards east of F. M. Lamb's.

There was a social gathering at James Simmons' last Friday night. Jim was not aware of it until they began to serenade him. He was sound asleep and dreaming, so some of the boys had to carry him downstairs to wake him, and the first thing he said was "That was the blam'jest cat fight I ever saw." He apologized to the ladies. The party adjourned to the hall and made merry until 12 o'clock, when they bade their good host good night. Jim is all right.

I noticed an article in one of your papers on marriage and the home. Now I would suggest that it persons wishing a solution to that would read New Zealand in a Nutshell and Looking Backward, by Belmy, the author of New Zealand took most of his data from Frank Carpenter's writings.

Amount of State Fund, \$2,779.20; per capita, \$1.60. In addition to the above \$720 of County Funds was apportioned, giving \$15 to each district at this time. Each district should receive \$50 from the County School Fund, but there being only \$700 on hand it was divided equally among the districts. The remainder of the \$50, and \$5 for teachers' certificate of attendance at the county institute, will be made up at the next apportionment.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is Catarrh. Hall's Catarrh Cure is the only positive cure not known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and securing nature in doing its work. The proprietors have so much faith in its curative powers, that they offer one Hundred Dollars for any case that it fails to cure. Send for list of testimonials.
