It has been so long since the paymaster was around that Admirals Togo and Rojstevsky have no pocket-pieces to toss up for choice of corners.

Unless Field Marshal Ovama and Gen. Linievitch get busy at an early date their work is likely to be again interrupted by a blinding snowstorm.

Municipal ownership of street rail ways can afford to be sidetracked until the country has perfected its plan for government regulation of freight carrying.

Mr. Cleveland's fish stories are of such an extravagant nature that he is stopped from picking the flaws in the reports of the Roosevelt hunting expedition.

It is the abuses of railways that the government proposes to regulate in the interest of all concerned. The proper uses of railways will be facilitated by the operation.

The job of digging a canal on the isthmus has always been known to be a big one. Uncle Sam is ready to tackle the difficulties and to dispose of fresh ones if they arise.

None of the Presidents of the United States succeeded in accumulating a fortune of a million dollars. It must be that something besides brains is required to make money.

A New England paper claims to have seen "a dry, invisible noiseless thunderstorm." The days are coming when a cool sizzler or wet droutch would be more to the purpose.

Crops are reported to be in fine condition, and the farmer is willing to admit that he has had rain enough for the present, though possibly there is a shade too much wind in places.

When the railway rate question comes up in Congress it is expected that Mr. La Follette will feel obliged to break the rule that a new senator shall remain quiet for a year or two.

A new oil district has been struck within twenty miles of Pittsburg, and prospectors are rushing there in large numbers. Uncle Sam's farm is a good producer, both on and under the surface.

A man of 70 has entered Missouri's state university to study engineering. The Missourian's motto, "Show Me," is proof that he proposes to understand his business and never considers himself too old to learn.

The 120 young women who drew homesteads of 160 acres each in the Rosebud agency, South Dakota, are offered numerous options on husbands, but are careful not to commit themselves without applying the rule that their ought to be more in the man than in the land.

The cruiser Reine Mercedes, captured at Santiago during the war with Spain, sailed from Portsmouth for Newport, R. I., after having been remodeled as a receiving ship. The cruiser has been undergoing repairs for nearly five years and is said now to be one of the best-equipped receiving ships in the navy.

William J. Bryan, in pursuit of a long-cherished intention, is to make a tour of the world. Announcement to that effect was made by him as he boarded a train to participate in the picnic given by him to 50 employes of his paper, the Commoner. The purpose of the trip is to study municipal ownership and railroad problems presented in countries other than his own. Another object of the trip will be to improve the health of his youngest daughter, Grace.

Governor W. E. Hoch, of Kansas, speaking of the effect of the prohibition in the state, says: "Prohibition has not been the entire success that we wished, but I do not believe that there are fifteen hundred thousand people any where on earth more intelligent, more sober, more prosperous, relatively; not fifteen hundred thousand people anywhere better than the fifteen hundred thousand people that inhabit the state of Kansas, and who owe it largely to our prohibitory law."

Dr. Swallow's Church Forum expresses this opinion of the Rockefeller \$100,000 gift to the Congregationalists: "Mr. Rockefeller has just given one hundred thousand dollars to the Congregational Board of Missions. Now if he would use the money in an effort to show Mr. Rockefeller that, as a trust magnate, he is guilty of more wrong doing to his fellows than any other heathen known to the public, the donation will be well spent."

Professor Padelford, of the University of Washington faculty, declared before a meeting of the Puget Sound Schoolmasters' Club, that women teachers were gushing and lacking that degree of sanity that is essential to a good instructor of English. He declared Western boys and girls were deeply interested in Browning and that the study of English literature made the students more just, gentle and humane. The sever criticism of women teachers was resented by some of the listeners, though the majority took it as a joke.

Alcohol for smokeless powder is the latest development in Government circles. The plan is an extensive one. Bids have been opened in the Naval Bureau of Supplies and Accounts to furnish about 1,500,000 pounds of alcohol for use in the manufacture of smokeless powder for the navy. Bids were received from six firms. It is estimated that about 25,000 pounds of this alcohol will be delivered at the Washington Navy Yard for the naval proving grounds at Indian Head.

Theodore P. Shonts, the head of the Panama Canal Commission, enjoyed the distinction of being the only member of his class in college who neither drank intoxicants nor used tobacco. Abstinence from these brain sappers has long enhanced a man's chance of advancement in railway circles. Mr. Shonts belongs to a family of ardent temperance workers. Miss Eva M. Shonts, his sister, being the organizer and president of the Y. P. C. T. U., and his mother having been an active member of the W. C. T. U.

Dispatches from Harbin report a carnival of drunkenness and dissipation among the hangers on of the rear army. Champagne at \$10 a bottle is said to be flowing like rivers, dives are abundant and a multitude of sharpers and gamblers is reaping a rich harvest. The Emporor, at General Linievitch's request, has appointed a new Provost Marshal-General and the Commander-in-Chief intends to wage a vigorous campaign to restore order and institute more satisfactory conditions in the rear.

The Pacific Searchlight says: "The nauseating spectacle of twenty-eight or thirty saloons specially licensed and located adjacent to the entrance to the Lewis and Clark Fair has caused even the Oregonian to turn a little pale in the face. But why? The city needs the money. And according to the settled attitude of the venerable press, the more saloons the better and the more money for the city. And then a few strokes of an indignant pen will easily atone for the year-in-and-year-out support of an administration and a party committed to this unspeakable folly."

Gladstone Dewie, son of the Zion prophet, John Alexander Dewie, and Judge Barnes, a legal advisor, are in Mexico City completing details for the taking over of a large tract of land for the purpose of establishing a colony in Mexico similar to that at Zion City, Ill. In an interview Sunday Mr. Dewie said: "We have secured an option on one of the Conzales haciendas, embracing 700,000 acres of territory in the State of Tamaulipas. We are also negotiating to acquire farming lands, making a total of 1,000,000 acres. The papers closing the deal have been signed by the Zion agents and Lieutenant-Colonel Manuel Gonzalez, the owner of the hacienda, and in a few weeks we will begin the active work of establishing our colony."

Chicago is threatened with a race war of serious proportions. Embittered by the shooting of Enoch Carlson, an 8-year-old boy, last week, by two negroes, the residents in the vicinity of Twenty-ninth and Dearborne streets have armed themselves, and clashes between white and colored men have become so frequent since the Carlton murder that it has been found necessary to detail scores of policemen in the district to preserve peace. Even this precaution has been unavailing in keeping the opposing factions apart. In a riot that broke out in that district Sunday between the whites and the blacks, James Gray, colored, was killed, Harry Bernstein was mortally wounded and a building in which Bernstein was being held a captive, suffered from bullet wounds, was stoned and partially wrecked by a mob of 1000 persons.

Gov. Folk has an opportunity, in one of the counties of southeastern Missouri, to show the vigor with which he proposes to enforce the laws. A negro was lynched there last week for kidnaping, with threats to murder. The criminal was a former convict, with a bad prison record, and was believed by some of the penitentiary officials to be periodically insane. He committed a dangerous offense in Mississippi county, and it is fortunate that, by cool management, he was restrained from murder, if he intended it. But his arrest was accomplished without bodily injury to any one, and his trial could have proceeded with practical certainty as to its results. The crowd that took him from the officers of the law lynched him simply because it was unwilling to wait for regular proceedings.

Two years ago Pennsylvania appropriated \$5,000,000 for improving the roads of the state, agreeing to pay two-thirds of the cost if counties and townships would furnish the other third. The law was so framed that local jealousies were developed, and the appropriation was unused. At this year's session the legislature passed another good roads bill, with an appropriation of \$6,355,232. This time the state offers to pay three-fourths of the cost, if the county and townships, or one township alone, will bear one-fourth. The new provision for a department to promote and supervise the highways of the state. A highway commissioner, with a staff of assistants, will make a survey of all the

roads in the state, and allot a share of the state appropriation on petition from the townships, or from any township that applies to the state direct without reference to the county commissioners.

Walter Wellman, wiring from Washington to the Record-Herald, says President Roosevelt has taken up the immigration question and is preparing to call it to the attention of Congress and the country. The President believes that one of the most serious problems now confronting the American people is how to deal with the hordes of undesirable immigrants Europe is pouring upon our shores. During the fiscal year which ends June 30 next, all immigrant records will be broken. In those 12 months well on toward 1,000,000 steerage passengers will have arrived in the United States, looking for homes or work. The greatest number arriving in any previous year was 857,046 during the 12 months ending in June, 1903. For 1904 the total was 812,870, and for 1905 it will be between 900,000 and 1,000,000. These are appalling figures. They are the most appalling when they are analyzed and their significance more fully understood. They mean that in a single year there pours into the country a multitude of humble people equal to or greater than the present population of 18 states of the Union.

Western Canada's Cheap Lands.

Sir Wilfrid Laurier, the premier of Canada, declares that the twentieth century belongs to Canada. If the premier is right, it will be so chiefly because Canada is still a country of cheap land and virgin opportunities. For various reasons the development of western Canada is about 25 years behind that of the western states. That means that the opportunities for the energetic and ambitious in Western Canada now are just what they were in such states as Minnesota and the Dakotas in the '80s.

In western Canada it is estimated there are still left, though homesteads are now being taken up at the rate of 5,000,000 acres a year, not less than 50,000,000 acres of good government land. Of course, much of this is not near railways, but railway building is going on so rapidly that it will not be long before all the desirable land in western Canada will be near railways.

It is this cheap or free land, producing as it does 20 to 40 bushels of a magnificent quality of No. 1 hard wheat to the acre, that is drawing about 50,000 farmers yearly from the United States and as many more from Europe. Not since the rush for lands in the northwestern states 20 years ago has there been such a general tendency to take farming lands as that is now in evidence in western Canada. The land department of the Canadian Pacific railway at Winnipeg is selling about \$2,000,000 acres a year alone and other large companies are selling several millions of acres more each year. In the sense that it is the last portion of the west, in the region of sufficient rainfall, that offers the homeseeker cheap or free lands, western Canada is really the last west.

God is a Spirit.

It was not until the day of Pentecost A. D. 33 that God was revealed a Spirit, before that he came as a little child who afterwards became the Saviour of the world and before Christ. God was known as the Great I Am, the creator of the universe. It is hard to fix the imagination upon a Spirit, yet this is the only God we have to deal with. God the Father is reconciled to the world through the Son our intercessor. If God could have reconciled the world to his will there would have been no need of sending his son, or if Christ could have them there would be no need of a Spirit, again, if they could not get perfect by the law of God or the precepts of Christ 2000 years ago, what is the use of trying now?

The conscience is the reflection of God the Spirit. Men never had a conscience until after the Spirit was come. We have absolutely nothing to do with the law of God or the precepts of Christ. They were for the people of their day. We are accountable to the dictates of conscience.

With every word, act, and thought of our lives there is an instantaneous impression of right and wrong reflected by the light of conscience under the gentle influence of God the Spirit. Our standard of right and wrong is measured by our inward impulse first, and afterward by the bible and church. The Independent Church recognizes God the Spirit, the guide, the bible account of God and Christ as sacred history of times past and gone. I. C. GOVE.
