CLOUGH'S PLAIN TEAT BISTOURY

For Cutting Obstructed Teats.

Illustration shows instrument both open for cutting and closed for inserting.

This obstruction may be a stricture or other growth of a tumorous nature, which is often the result of the bite of a dog, a kick or a bruise caused by going over a fence or through a dense underbrush; or the cow may have had some trouble with that quarter of her leg, and in milking and forcing the thickly curdled milk out, a small rupture had resulted, so that when the scurf is formed, the opening became smaller.

I also carry of German silver milking tubes, four different lengths.

Improved Instruments for opening obstructed teats without cutting.
