**ONE FACTORY RECEIVES  
 3,745,480 POUNDS MILK.**

**681 Cows Average \$66.78 per  
 Cow at the Maple Leaf  
 Creamery Factory.**

We give below this week two annual reports, that of the Maple Leaf Creamery Association and the Clover Leaf Creamery Company, which are but a sample of what the other co-operative companies did last year. Take the report of the secretary (Carl Haberlach) of the Maple Leaf Creamery Association and it shows flattering results for a new corporation with nearly four million pounds of milk and 681 cows averaging \$66.78 per cow for 1906. And when taken into consideration that the dairy men raise their own feed and do most of their own work, it is easy to calculate the profits in dairying in Tillamook, and in comparison to wheat raising the farmer gets a pay day but once a year, while the dairy men in this county have a pay day once or twice a month.

**Maple Leaf Creamery Association.**

To the directors and stockholders of the Maple Leaf Creamery Association, Tillamook, Oregon.

Gentlemen: I herewith submit my report as secretary of your association for the past year.

Amount of milk received for the year 1906, 3,745,480 pounds. January 21,066 lbs., February 24,384 lbs., March 140,104 lbs., April 436,424 lbs., May 628,203 lbs., June 579,491 lbs., July 564,177 lbs., August 458,000 lbs., September 336,141 lbs., October 316,181 lbs., November 175,753 lbs., and December 66,556 lbs. This is a gain over the preceding year of 1,146,505 pounds, or over forty five per cent.

Amount of butter fat in milk, 148,852.22 lbs. Average test for the season was .03972 per cent.

Amount of cheese manufactured and sold, 387,180 pounds. Average yield was 10.34 lbs. cheese per 100 lbs. milk. No. boxes cheese sold 6,521.

Amount received for cheese \$45,484.20. Average price received 11.75 cents per lb. for cheese. No. cows kept 681, average for cow \$66.78.

Amount of money paid the patrons \$40,184.23.

Amount received by factory for making cheese \$5,839.73.

Average amount cheese per lb. butter fat, 2.60 lbs. Average amount milk required for lb. cheese, 9.68 lbs.

Patrons were paid for butter fat as follows: January 29 1/2 cents, February 31.8 cents, March 33.1 cents, April 26.5 cents, May 23 cents, June 25 1/2 cents, July 26.6 cents, August 26.7 cents, September 27.5 cents, October 29.5 cents, November 30 cents, and December 29 cents. Amount charged for making being 1 1/2 cents, except for the months of January, February and December, when 1 1/2 cents was charged.

Assets and liabilities of the company are as follows: Resources, factory building valued at (cost price), \$2614.40; amount of supplies on hand, \$238.08; due from merchants for cheese, \$1,447.65; cash in hands of treasurer, \$46.18. There is, however, due patrons for milk \$953.05. This leaves the resources at \$3,393.26, with no liabilities.

Total amount received for making and supplies sold and held over, \$6,177.27. Total expenses for the season were \$5,153.39. Amount paid for painting creamery in addition to the foregoing, \$95. Amount paid as dividends since last report, being 8 per cent on the stock in force, \$106.

I will say in conclusion that the factory is in good financial condition, having \$549.78 to its credit besides supplies left over of \$238.08, and the factory all paid for. Prospects were never brighter for the dairy men than are those for the coming season, prices being good and with no large stocks of cheese in hands of any holder. There are probably not to exceed 250 cases of cheese in the county.

Dated at Tillamook, Oregon, February 2nd, 1907.

Respectfully submitted,  
 CARL HABERLACH,  
 Secretary Maple Leaf Creamery Assn.

**Clover Leaf Creamery Co.**

To the directors and stockholders of the Clover Leaf Creamery Company. Gentlemen: I herewith present my report as secretary and salesman of the Clover Leaf Creamery Company for the year 1906.

Amount delivered at the factory, 1,510,182 lbs.

For a violator fat in milk, 59,182.22 lbs. sold in London, value \$100,000. Lupton fetched \$240.

Amount of cheese manufactured and sold, 162,616 lbs.

Amount of money received for cheese, \$19,154.12.

Amount of money paid patrons, \$15,901.77.

Amount received by factory for making cheese, price received being two cents per pound for each pound of cheese manufactured and sold, \$3,252.35.

No. boxes cheese sold, 2,583.

Average test for the season, .0392 per cent. Average yield, 10.74 lbs. of cheese per 100 lbs. of milk. Average price received for cheese, 11.77 cents per lb.

Average butter fat in cheese .364 lbs.

Average amount of cheese per lb. of butter fat, 2.75. Amount of milk required for lb. of cheese, 9.29 lbs.

Price paid for butter fat for the seasons were as follows: March 35 cents, April 39.1 cents, May 23 cents, June 25 cents, July 26.3 cents, August 26.5 cents, September 27.6 cents, October 30 cents, November 29.5 cents, December 30 cents. This makes the average price received for butter fat 26.87 cents. Average monthly price 28.3 cents per lb. The factory having charged two cents per lb. for making cheese, it will be necessary to add 1/2 cents per lb. for butter fat to show amount factory would have paid had one and one half cents been charged for making up the cheese.

Assets and liabilities of the company: Resources: Factory plant valued at \$1,500. stock on hand, being supplies paid for, \$142.04, cash in bank \$399.80, due from merchants for cheese \$284.92, a total of \$2326.76.

Liabilities: Mortgage and notes dated Jan. 2nd, 1906, for \$900, interest at 7 per cent from said date, total \$968.25.

Expenses for the past year have been \$2,704.72. Receipts from all sources, including supplies sold, \$3426.41, leaving a balance in favor of the factory of \$721.69.

In addition to the expenses above set forth, the company expended \$226.70 in repair and fitting up factory, although some of the expense account should probably be properly charged to repair account.

I have made out a statement showing how much each stockholder is entitled to be credited with on account of surplus earnings. By a resolution adopted by your board of directors on January 26th, 1907, I was instructed to ascertain how much each subscriber to the stock of the company was entitled on account of excess earnings, and that I credit each stockholder accordingly. The amount of stock subscribed was \$630, and this amount has been credited to subscribers. This leaves a balance due the company from certain subscribers of stock in the sum of \$63.34, which is again due by the company to other subscribers.

The gain in gross receipt of milk for the past year over the preceding one was 28 per cent for the community, the amount received the year 1905 at the Kiches factory and the Riverdale factory having been 1,190,097 lbs. This is certainly a substantial gain. It is not generally known that the Clover Leaf factory is located a Riverdale.

I wish to thank the directors for their uniform kindness and consideration shown me in our work together, as our relations throughout have been the most cordial.

Dated this 2nd day of February, 1907.  
 CARL HABERLACH,  
 Secretary, Clover Leaf Creamery Co.

**A Safe Fraternal and Beneficial Organization.**

The Western Trade Journal, in an editorial, speaking of the Modern National Reserve, which appears to be a safe fraternal organization, with a good plan to work on, had this to say of it after inquiring into its merits:

A perplexing problem and one constantly confronting the person employed at salary, as well as one engaged in pursuits upon a small capital, which, properly and judiciously handled, leaves a small amount, is, how can this amount be safely and properly invested, and at the same time procure insurance protection, such as is needed by every man? That opportunities to invest are innumerable, a glance at our daily papers will sufficiently demonstrate. But are they safe, as well as profitable is the question. These remarks are inspired by inquiries recently received by us regarding the security and reliability of the Modern National Reserve, head office Charles City, Iowa. The tenor of these letters would indicate entire satisfaction with the plans presented by the institution in question, the sole inquiry being, is it reliable and sound? (These letters were written by investigators and not by the company.) In pursuance of these inquiries, we have made a full and fair investigation of the order, with a view of enabling us to give our readers absolutely authentic information upon the subject of their inquiries, and as a result we can give an unqualified indorsement of the society's plans, methods, its contracts and all these entrusted with the management of its affairs. Its officers are competent, experienced and strictly reliable, and have met with success in their former avocations. It follows that they would not lead the strength given by their names to the support of any enterprise that did not appeal to them as being practical and as promising fair and just returns.

We find the Modern National Reserve being known as has a certificate that it is a safe and sound organization.

ive insurers. The Modern National Reserve is conducted on a plan absolutely safe, and one that is certain under its careful management to realize and pay to its members the benefits that its certificates provide. Every person receiving a salary or engaged in any small business will find it no hardship to invest in one of the contracts issued by the society, and secure returns better than any stock or endowment insurance affords.

Careful and consistent salaried and business people are becoming interested in the plan, owing to the fact that the order presents a proposition which must appeal to all who are looking for a safe investment as well as insurance protection. The plan of the order is an inflexible one. But one has not to die to get his return on his investment; he can live and enjoy the benefits of his savings, alone with himself for his family. In conclusion we will say that we have thoroughly examined and investigated the Modern National Reserve, and find it deserving of the fullest confidence of all, and the Western Trade Journal recommends the order and its benefits to the public and all those that desire sound protection. For particulars see Gen. F. Zimmerman, Tillamook, Oregon, State Manager for Oregon.

**Neglected Colds Threaten Life**  
 (From the Chicago Tribune.)

"Don't trifle with a cold," is good advice for prudent men and women. It may be vital in the case of a child. Proper food, good ventilation, and dry, warm clothing are the proper safeguards against colds. If they are maintained through the changeable weather of autumn, winter and spring, the chances of a surprise from ordinary colds will be slight. But the ordinary light cold will become severe if neglected, and a well established ripe cold is to the germs of diphtheria what honey is to the bee. The greatest menace to child life at this season of the year is the neglected cold. Whether it is a child or adult, the cold slight or severe, the very best treatment that can be adopted is to give Chamberlain's Cough Remedy. It is safe and sure. The great popularity and immense sale of this preparation has been attained by its remarkable cures of this ailment. A cold never results in pneumonia when it is given. For sale by Clough's Drug Store.

**Teachers' Examinations.**

NOTICE IS HEREBY GIVEN.—That the County Superintendent of Tillamook County, Oregon, will hold the regular examination of applicants for state and county papers, at the Court House, in Tillamook City, Oregon, as follows:

Work will commence promptly at nine o'clock in the forenoon, and one o'clock in the afternoon. All applicants must be present at the commencement of the examination.

Dated this 24th day of January, 1907.  
 WAYNE W. WILEY,  
 County School Supt.

**The Modesty of Women**

Naturally makes them shrink from the indicate questions, the obnoxious examinations, and unpleasant local treatments, which some physicians consider essential in the treatment of diseases of women. Yet, if help can be had, it is better to submit to this ordeal than let the disease grow and spread. The trouble is that so often the woman undergoes all the annoyance and shame for nothing. Thousands of women who have been cured by Dr. Pierce's Favorite Prescription and female weakness. It always helps. It almost always cures. It is strictly non-alcoholic, non-secret, all its ingredients being printed on its bottle-wrapper; contains no deleterious or habit-forming drugs, and every native medicinal root entering into its composition has the full endorsement of those most eminent in the several schools of medical practice. Some of these numerous and strongest of professional endorsements of its ingredients, will be found in a pamphlet wrapped around the bottle, also in a booklet mailed free on request, by Dr. R. V. Pierce, of Buffalo, N. Y. These professional endorsements should have far more weight than any amount of the ordinary lay, or non-professional testimonials.

The most intelligent women now-a-days insist on knowing what they take as medicine instead of opening their mouths like a lot of young birds and gulping down whatever is offered them. "Favorite Prescription" is of known composition.

If sick consult the doctor, free of charge by letter. All such communications are held sacredly confidential.

Dr. Pierce's Pleasant Pellets invigorate and regulate stomach, liver and bowels.
