The Tillamook Headlight

Panama's New Shake-Up. Once more there has been a total change in the management of the working forces at Panama.

What the people want is quick and effective work on the canal. They are paying out a great deal of money for it, and they would like to see some results from this expenditure at the earliest possible day.

Cedar Wood For Lead Pencils.

The lead pencil is one of the most common articles in every day use, and nearly 320,000,000 pencils are manufactured in this country every year.

Call for Bids.

Notice is hereby given that the clerk of School District No. 27, Blaine, Tillamook Co., Or., will receive sealed bids until April 12, at 1 p. m., 1907.

Beware of Ointments for Catarrh that contains Mercury.

Mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces.

Some of the congressional visitors just returned from Panama say the excavation will be finished in five years.

Secretary of Agriculture Wilson says the prosperity of the United States can not be destroyed by Wall Street flurries. The people throughout the country are clearly of the same opinion.

The late Silent Smith was worth \$1,000,000 when informed that he had inherited \$50,000,000 more.

Several hundred motor cars will shortly be put in service in New York, each equipped with an automatic machine to record the distance traveled and the illegal fare. But hackmen have never yet failed to demonstrate, in their own fashion, the triumph of mind over matter and space.

It would be hard to find a greaser spot left if New York city and the south side were eliminated from the democratic program.

Oklahoma can grow four crops of alfalfa in a season. Soil like that will not long continue to produce democratic majorities.

Mr. Bryan seemed to have overlooked the fact that the habit of voting against him may be as fixed as his own habit of trying it again.

A dozen states have instituted suits against the Standard Oil Company and its offshoots. It must be that somebody has offered a penny.

Being ashamed to make further advances in the price of oil the Standard company has added a quarter of a cent per gallon to the charge for barrels.

As a congressman Mr. Hearst occupied his seat two days in a session of seventy one days. Mr. Hearst's idea of official duty is a lively sense of favors to come.

The collision of two big ocean liners is reported. If the sea is not big enough for ships the ballonists should chart the atmosphere carefully for their coming voyages.

A private Boston geological expedition will look over the Aleutian islands, which extend to Alaska almost to the shores of Asia. Uncle Sam's real estate has not yet been half prospected.

A new Vermont law provides that prisoners in its county jails shall work ten hours daily, either inside or outside under guard. Tramps will be scarce hereafter in Green mountains.

Berlin is to have a world's fair in 1913 to celebrate the twenty fifth anniversary of the emperor's accession. St. Louis has set the mark so high that the German capital will do well to get next.

Five of the candidates for Senator Spooner's toga have pledged themselves to vote with Senator LaFollette. It is evident that Wisconsin will never be satisfied with less than two fifths kind.

A million dollar dam is to be built across the upper Connecticut river, by which 6070 horse-power will be furnished the neighboring towns. There are vast possibilities in the big and little waterways.

Having been burned out once Mark Twain will build his new house at Redding, Conn., of concrete and steel. The fireproof idea is destined to grow in a country where conflagration cost \$200,000,000 a year.

An Antarctic explorer reports that there is a vast flat glacier near the south pole, and he proposes to journey over it in relays of automobiles. The balloonists must be brisk or they may be beaten to the pole that knocks the persimmon.

Ex. Gov. Pennypacker of Pennsylvania has placed himself several laps ahead of Mr. Cleveland by remarking that "clericality should be contempered with cunctation." Some folks would have said that haste should be wisely mixed with delay.

The Department of Agriculture issued a bulletin showing the cost of hauling the principal crops to the nearest shipping point. Nearly \$29,000,000 was spent in a single year to get the corn crop shipped, this item representing nearly 10 per cent. of the value of the average load carried.

Farmers find many curious things happening around them every day which they can not understand, and nobody, even the scientists, can explain for them. Why for instance, does a horse strain a drink of water through its lips?

Why does a cow poke her entire face into the bran mash, eat all she can, then lick her nostrils with her tongue? Why does the chicken drink exactly opposite to the horse and cow, having to hold its head up when it swallows a drink of water?

Then note the penguin, of the same feathered family, as it keeps its bill immersed while drinking. But a dog laps the water in its mouth. This animal, moreover, never chews its food, while the cat, his companion household pet, always chews thoroughly before swallowing.

How is it that falling to masturbates does not hurt a dog, while in case of all other animals, including man, unchewed food causes dyspepsia. Why has a cow and why can a horse shiver its hide to drive away flies? These questions and many more like them that might be asked will show us that we are far from knowing it all.

Whoooping Cough. I have used Chamberlain's Cough Remedy in my family in cases of whooping cough, and want to tell you that it is the best medicine I have ever used.

If You Read This. I will be to learn that the leading medical writers and teachers of all the several schools of practice recommend, in the strongest terms possible, each and every ingredient entering into the composition of Dr. Pierce's Golden Medical Discovery for the cure of weak stomach, dyspepsia, catarrh of stomach, liver complaints, torpid liver, or biliousness, chronic bowel affections, and all catarrhal diseases of whatever organ, name or nature.

Call for Bids. Notice is hereby given that the clerk of School District No. 27, Blaine, Tillamook Co., Or., will receive sealed bids until April 12, at 1 p. m., 1907.

Beware of Ointments for Catarrh that contains Mercury. Mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces.

The late Silent Smith was worth \$1,000,000 when informed that he had inherited \$50,000,000 more.

Several hundred motor cars will shortly be put in service in New York, each equipped with an automatic machine to record the distance traveled and the illegal fare.

BIG CONTRACT LET. McCabes to Bore First Long Tunnel on Tillamook Road.

E. E. Lyle, president of the Pacific Railway & Navigation Company, has let the contract for the construction of a long tunnel on the road to A. J. and George McCab, Portland railway contractors. This is the first long tunnel to be driven on the Lyle road.

The contract just let calls for a tunnel 1400 feet long at a point five miles almost directly west of Buxton, and the place to which the road has already been completed. The work is heavy rock drilling and a compressed air drill, driven by a gasoline engine, will be set up.

Increased forces will be put on as soon as the weather is sufficiently settled and construction work all along the line will be pushed while the weather is favorable for outdoor work.

Some Mean People. Perhaps the meanness of mean people are more often actuated by feelings of avarice rather than those of economy.

It would be difficult, for instance, to find a worse case than the following: An old man once wrote a letter to a friend, and, wishing to save his stamp, he ordered his servant to take it to its address. It was raining, and the girl wore a new dress that she was afraid of spoiling.

She looked into the street, saw a boy she knew, and, calling out to him, she said: "Deliver this letter for me, and I will give you a penny." The miser heard the offer and said: "Give me the penny, and I will carry the letter myself."

What is more, he did so. "The meanest person of whom I ever heard," says a contributor to The Captain, "was the owner of a certain sweet-shop in a Yorkshire village. One of my aunts, when she was a girl, went to buy a pennyworth of sweets. After carefully placing a number of the required sweets in the scale pan, the shopkeeper, finding that they did not quite make the necessary weight, carefully chose another sweet and added it to the pile. But, unfortunately, the sweet proving heavier than he had expected, the arm of the balance containing the sweet slowly descended.

So he took the offending sweet off the pile and actually bit it in two, placing one-half back in the bottle and the other in the paper bag into which he emptied the pennyworth. Then, without a word of comment on this extraordinary performance, he handed the bag to my aunt."

The workmen's compensation act should put an end to examples of meanness such as the following: Early one morning a bricklayer was going up a scaffolding with a load of bricks, when he fell to the ground, sustaining a broken leg and other injuries. The masterbuilder, who was notorious for his close fisteness, visited the hospital to which the poor fellow had been taken, and, approaching the latter's bedside, observed: "How on earth did you manage to 'tumble'?" "After accident, sir—I slipped," replied the sufferer, faintly. "Oh, well, you know, you should have been more careful," said the masterbuilder. "Every brick in the hod was broken, and I find by the timesheet that you had not earned enough to pay for them, but as you are injured I won't press the matter further—you may pay for them gradually when you recover."

Chamberlain's Cough Remedy Aids Nature. Medicines that aid nature are always most effective. Chamberlain's Cough Remedy acts on this plan. It always the cough, relieves the lungs, aids expectoration, opens the secretions, and aids nature in restoring the system to a healthy condition. Thousands have testified to its superior excellence. For sale by Clough's Drug Store.

Whooping Cough. I have used Chamberlain's Cough Remedy in my family in cases of whooping cough, and want to tell you that it is the best medicine I have ever used.

White Bronze Monuments. If you contemplate the purchase of any Cemetery Work, it is worth your while to investigate White Bronze, a material that makes the only durable Monument, and surpasses Marble and Granite in fine, artistic finish.

No moss growing, cracking or crumbling; no cleaning or care required. Better in every way than granite and less expensive. Leading Scientists endorse it as being practically indestructible. Correspondence solicited.

C. E. REYNOLDS, Agent, Tillamook, Oregon.

M. F. LEACH, Dealer in FRESH AND CURED MEATS, LARD, HIDES, WOOL, Etc.
