

PLANTING NUT TREES.

Following Nature's Own Way as far as Possible.

It is not the nuts themselves that depend on the care given to the trees. Some authorities state that fifteen or twenty years are necessary to bring them into full bearing...

Some persons may enjoy raising these trees from seed. To be sure, it is rather a slow process, but it is interesting work.

The fall planting is nature's own plan, and the nearer we follow her ways the better results we may expect.

Another thing, do not plant the nuts deep. Nature drops them on the surface and gives them a thick covering of leaves, in which the dirt catches as it blows about...

BURNING MARTYRS.

Cost of the Funeral Pyres Told in a Curious Old Bill.

A bill for the materials with which to burn Cranmer and his fellow martyrs is probably the most curious and suggestive document ever presented for payment.

The memorandum of the bill is included in the book which was found by Strype when he wrote his "Memoirs of Archbishop Cranmer" in 1803.

The following are exact transcripts from the bills by the person who had charge of the funeral pyres:

"Paid for the burning of Archbishop Cranmer and his two fellow sufferers, Ridley and Latimer: For one hundred of wood fagots, 6s.; for one hundred and a half of furze fagots, 3s. 4d.; to the carriage of them, 8d.; to two laborers, 1s. 4d.; to three loads of wood fagots to burn Ridley and Latimer, 12s.; item, one load of furze fagots, 3s. 4d.; for carriage of these four loads, 2s.; item, a post, 1s. 4d.; for chains, 3s. 4d.; item, for stipes, 6d.; item, for laborers, 4d."—Scrap Book.

REAL COUNTRY LIFE.

Why the American Farmer Grows Old Early in Life.

Any one who has lived on a farm does not need to be told the reason farmers grow old early, for he knows of the strain under which the American farmer lives during the five months of spring and summer.

His workday is from 4 or 5 in the morning until 8 or 9 at night, including chores—fifteen to seventeen hours of the hardest kind of physical labor, and every minute of it at high tension, especially during harvest.

Then comes a period of relaxation in the fall, the one time in the year when he has just enough muscular exercise to keep him in health; later, the winter season, approaching stagnation, in which he takes on flesh, gets "loggy," and then a furious debauch of hard labor through the spring and summer again.

No wonder that by forty-five he has had a sunstroke and "can't stand the heat," or has "a weak back," or his "heart gives out," or a chill "makes him rheumatic," and when you add to this furious muscular strain the fact that the farmer sees his income put in peril every season and his very home every day, so that each unfavorable change in the weather sets his nerves on edge, it can be readily imagined that the real "quiet, peaceful country life" is something sadly different from the ideal.—Woods Hutchinson, M. D., in Harper's.

An Optical Illusion.

An interesting optical experiment may be made with the ordinary incandescent light. Gaze steadily at the light for a few seconds, then suddenly extinguish it. The experiment is best performed in a very dark room.

In about half a minute you will see the perfect image of the light, with the fine strands of wire plainly visible. It will be red at first. In a few minutes it will turn purple and then a bright blue. Later it will apparently move to the right. As you turn your gaze it will continue moving to the right. If you keep your gaze fixed, it will come back. It is surprising how long the illusion will last. It will be seen for fully five minutes, perhaps longer, and if you turn on the light and look away from it you will see the old image for several minutes, though more faintly than at first.

Only Slight Mistakes.

Mrs. Lombard is a zealous and loyal friend, and she means withal to avoid exaggeration. "It's perfectly wonderful to see the way Cousin Henry counts bills at the bank," she said to a patient friend. "Why, I think they are so lucky to have him! He'll take a great pile of five and ten and twenty dollar bills and make his fingers fly just like lightning and never make a mistake!"

"Never!" said the friend, who knew Mrs. Lombard's weakness and could not forbear the question. "Why—no—at least—why, perhaps he might get 5 or 10 cents out of the way, but not any more, ever." And Mrs. Lombard spoke with the air of one who has taken a stand and refuses all access to retreat.—Youth's Companion.

Disraeli's Confidence. Disraeli wrote a letter to his sister in 1833 in which he said: "Heard Macaulay's best speech, 'Shiel and Charles Grant.' Macaulay admirable, but, between ourselves, I could floor them all. This entree nous (sic), I was never more confident of anything than that I could carry everything before me in that house. The time will come."

The Poor Girl. "The woman I marry," he said, "must be glad to take me with all my faults." "Oh, she will be," the girl replied. "She'll be so desperate that faults won't cut any figure with her."

Logical. Little Dot—Oh, mamma, there's a sign, "Puppies for Sale." Won't you buy me one? Mamma—Wait till you are a little older, dear. Little Dot—But they'll all be dogs then.—London Answers.

If doctors fall thee, be these thy doctors—rest, cheerfulness and moderate diet.—Latin Proverb.
