A ... drill bore-hole 6700 feet ... down in Upper Silesia in 1930. ... deep hole was put down on the Rand, South Africa, in 1905, the depth being 8304 feet.

New naphtha springs and a large naphtha lake have been discovered about eight miles from Nabilskava Bay, in the Russian portion of the Island of Sagha-Lee.

Bricks made of sand and lime and hardened in the air are used largely in districts where there is no clay from which clay brick can be made, but where an abundance of sand can be found.

It is stated that so much had been learned by the fight of "Nulli Secundus" at London that its use will be abandoned and that a new ship with considerable alterations, based on the experience of the fight, will be immediately put in hand.

An investigation of manhole explosions in Aberdeen some time ago disclosed the fact that coal gas leaking from street mains may become odorless by passing through a moderately thick layer of earth without losing its explosive effect.

When the conversion of the locomotives of the Mexican Railway into oil burners is completed, says the Engineering and Mining Journal, it will cause another decrease of British coal imports into Mexico. At present the patent fuel and coal used on the engines are imported from Wales.

According to L'Electricen, a Vienna firm has recently placed on the market brushes made of glass, which are to replace emery cloth for cleaning and polishing the commutatores of dynamos and motors. These brushes are said to clean the commutators without scoring the metal, and their use avoids the inconveniences and dangers of emery cloth.

According to a contemporary, a brick which contains 60 percent or more of silica expands on heating, but a brick containing 93 per cent or less of silica contracts at temperatures above 3000 degrees Fahrenheit. On this account, if a brick silica brick is used in lining a furnace, there should be a layer of sand between the shell and the brick in order to make room for the elastic lining.

An article in Science asserts that "the electrotyping of a scientific book ought not to be permitted, for it always means that the publisher proposes to keep it in its present form for as long a time as possible. We should not be dead and disowned, ideas merely because our publishers prefer to issue them by electrotyping."

Dr. Richard Abbe is authority for the statement that radium has solved many problems connected with the treatment of cancerous growths and other lesions. "I hesitate to say positively," he said, "but it seems that at a certain stage can be cured by radium. Thick, animal-like tissue with mouse-like hair, can be cured by radium to a normal condition. I don't just how these cures are effected, a matter of conjecture."

The dock of the Pittsburg Coal Company at Duluth, will be the largest on the lakes. Its estimated cost is $1,000,000. The plans for the new dock were made last year, but the contract was let on account of the condition of the steel market. The steel for the dock will be made in Pittsburg, at the plant of the United States Steel Corporation. The dock will be situated next to the dock of that corporation at Duluth, and when completed will hold the world's record for rapidity of loading.

The new German street car fender the invention of part of the mechanism is a horizontal strip extending in front of the fender the entire width of the car and attached to the lower end of a rod carried by the platform. When the fender comes in contact with any object it recedes easily and forces the shaft to move. By this movement the electric current is cut off, an automatic brake is applied and a broad fender is swung back, immediately in front of the wheels, drops to the rail level and picks up the object on the track. During the continuous daily experiments carried on for many months there has been no failure to pick up safely and easily all obstacles encountered. The device is controlled by the City Council of Dresden.

The Independent Church.

TO THE EDITOR TILLAMOOK HEADLIGHT.

The first consideration of a religious organization is its God. If men cannot agree on a God they cannot agree on the functions of a Church.

God is imaginary, yet the man who prays to the graven image will tell you that God is real, and that he does things, that he saves men in time of peril, and rules the destinies of the world.

The Catholic Church tells us that there is one God, and, too, that God the Father, God the Son and God the Holy Ghost is not three Gods, but one God. How that there should not be three Gods and still at the same time three distinctions is called a mystery. Then what is a mystery? Something you cannot imagine. Our ideas of God are built up by the development of our imagintion.

To me God is real, and does real things, but not the God of Abraham, nor the God Jesus Christ, but God the Spirit. I imagine God the Father to reside permanently in Heaven, and that God the Son is at his right hand, that God the Father and God the Son are two that express images, that God the Spirit is without form or body, the only God we have to deal with.

God is a Spirit, not what he was or will be.

God the Spirit is the God of the Independent Church, which is for man, who are susceptable to that Spirt. We do not obligate ourselves to obey the law of Moses, or the precepts of Jesus Christ, for if either had been a success there would have been no need of the revelation of the Spirit.

The law of Moses failed to make men what they should be, and Christ was a tramp without recognition. So long as the world was devoid of God the Spirit men were without a standard of right and wrong within their ownselves. They had to rely on what others said, which often proved false.

Heaven is a mystery because it is beyond our imagination.

Imagination is a reality that governs our lives. A man has a thousand bushels of wheat worth $1.00 a bushel. Wheat falls 50c. a bushel. He imagines he has lost $500.00. It makes a jump to $1.50. He imagines he has gained $1,000. It drops back to $1 00. He has lost $500. Yet he has had the same wheat all the while. It will make the same number of barrels of flour and they in turn loaves of bread. We imagine we were lost by the fall of the first man, Adam, and we are very despondent, then we imagine we were redeemed by the second Adam, and we are made glad. If the man had not heard of the fall and rise of wheat would he not be just as well off? So with us. We are at just where we started, whether we have heard of it or not. Circumcision and baptism was for men before God was revealed in Spirit.

J. C. GOVE.

A special newspaper correspondent writing from Shiloh, N.J., October 21, says:

Although she is a young woman, Mrs. Isaac Redrick, of Seeley, near here, has a head of gray hair, where a few weeks ago there was an abundance of brown tresses. The change was caused by her terrifying experience during a cyclone which passed over this section.

Alone with her little child, Mrs. Redrick tried to escape from her home, which was lifted from its foundations, but found her way blocked, with the roaring wind carrying trees, farm buildings and live stock through the air. It was but a few moments, but since then the young matron's hair has been slowly turning till now it is all gray.

Believing that there was another life after death, Henry Stevens, whose body was found near the New Haven Railroad tracks, at Webster, Mass., recently, hoarded a fortune estimated at from $15,000 to $50,000, which he desired placed in his coffin and buried with him. It was at first thought the miser had met a violent death; but, in the opinion of the local police and the medical examiner, death was due to natural causes.

Stevens, though wealthy, lived in a room scantily furnished and prepared his own meals. He worked about the neighborhood haying, digging potatoes cutting lawns and cleaning carpets. He was reticent about his wealth; but after completing his work for Mrs. A. D. Searle, of School street, said he was keeping his money to take with him when he died, so that he could take things easy in his second life. Frequently he spoke about this after life, and requested two of his intimate friends to see that his money was buried with him. No will has been found.

STATE OF OHIO, CITY OF TOLEDO, } S.S.

Sold by all Druggists, 75c.
Take Hall's Family Pills for constipation.

Dairy Management.

The Vermont Dairymen's Association has promulgated the following rules for the management of dairies:

The stable should be well ventilated, lighted and drained; should have tight floors and walls and should be plainly constructed.

No musty or dirty litter, no strong smelling material and no manure should remain in the stable longer than is absolutely necessary.

Whitewash the stable once or twice a year. Would recommend the use of land plaster in manure gutter daily.

Weed no dry, dusty fodder previous to milking. If dusty, sprinkle before it is fed.

Brush the udder just before milking and wipe with a clean cloth or sponge.

Keep healthy cows. Promptly remove suspected animals. In particular, add no cows to the herd unless it is certain that they are free from tuberculosis.

Do not excite cows or expose them to stress of weather.

Feed a good cow liberally with fresh, palatable feeding stuffs. Do not change these suddenly. Provide water, pure, but not too cold, in abundance.

The milker should be clean and his clothes likewise.

Milk quietly, quickly and thoroughly.

Throw away into the gutter the first streams from each teat. This milk is very watery, of very little value and is quite apt to injure the remainder of the milk.

Remove the milk promptly from the stable to a clean dry room where the air is pure and sweet.

Drain the milk through a clean flannel cloth, or through two or three thicknesses of cheesecloth.

Aerate and cool the milk as soon as it is strained. The cooler it is the more souring is retarded. If covers are left off the cans, cover with cloth or mosquito netting.

Never mix fresh milk with that which has been cooled, nor close a can containing warm milk nor allow it to freeze.

"The Blood is The Life."

Science has never gone beyond the above simple statement of scripture. But it has illuminated that statement and given it a meaning ever broadening with the increasing breadth of knowledge. When the blood is "bad" or impure it is not alone the body which suffers through disease. The brain is also clouded, the mind and judgement are effected, and many an evil deed or impure thought may be directly traced to the impurity of the blood. Foul, impure blood can be made pure by the use of Dr. Pierce's Golden Medical Discovery. It enriches and purifies the blood thereby curing, pimples, blotches, eruptions and other cutaneous affections, as eczema, tetter, or salt-rheum, hives and other manifestations of impure blood.

In the cure of scrofulous swellings, enlarged glands, open eating ulcers, or old sores, the "Golden Medical Discovery" has performed the most marvelous cures. In cases of old sores, or open eating ulcers, it is well to apply to the open sores Dr. Pierce's All-Healing Salve, which possesses wonderful healing potency when used as an application to the sores in conjunction with the use of "Golden Medical Discovery" as a blood cleansing constitutional treatment. If your druggist don't happen to have the "All-Healing Salve" in stock, you can easily procure it by inclosing fifty-four cents in postage stamps to Dr. R. V. Pierce, 663 Main St., Buffalo, N. Y., and it will come to you by return post. Most druggists keep it as well as the "Golden Medical Discovery."

You can't afford to accept any medicine of *unknown composition* as a substitute for "Golden Medical Discovery," which is a medicine OF KNOWN COMPOSITION, having a complete list of ingredients in plain English on its bottle-wrapper, the same being attested as correct under oath.

Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels.

A Hard Debt to Pay.

"I owe a debt of gratitude that can never be paid off," writes G. S. Clark, of Westfield, Iowa, "for my rescue from death, by Dr. Kings's New Discovery. Both lungs were so seriously affected that death seemed imminent, when I commenced taking New Discovery. The ominous dry, hacking cough quit before the first bottle was used, and two more bottles made a complete cure." Nothing has ever equaled New Discovery for coughs, colds and all throat and lung complaints. Guaranteed by Chas. I Clough's druggist. 50c and $1.00. Trial bottle free.

He Fought at Gettysburg.

David Parker, of Fayette, N.Y., who lost a foot at Gettyburg, writes: "Electric Bitters have done me more good than any medicine I ever took. For several years I had stomach trouble, and paid out much money for medicine to little purpose, until I began taking Electric Bitters. I would not take $500 for what they have done for me." Grand tonic for the aged and for female weaknesses. Great alterative and body builder; best of all for lame back and weak kidneys. Guaranteed by Chas. I. Cough, druggist. 50c.
