The Tillamook Headlight.

Fred C. Baker, Publisher.

Japan's arrogant attitude toward China shows what might be the fate of the United States if we had persisted in remaining as defenseless in the Pacific as we had been until recently. The issue which caused the crisis is simple. On February 7 the Japanese steamboat Tatsu Maru was seized by aChinese gun boat off Macao, a Portuguese port. The Tatsu carried a cargo of arms and ammunition consigned to a Portuguese merchant. The Chinese Government said it had evidence to show that they were intended for the Chinese rebels who are just now making trouble for the Pekin Government. Pekin explained the situation to Tokio, when the latter made a protest against the seizure and offered to submit the case to arbitration. Tokio declared, however, that there was nothing to arbitrate, demanded that the vessel with its cargo be surrendered to Japan, with an ample indemnity to the owner, and that an apology be made for hauling down the Japanese flag If China should refuse to agree to all these terms, or if she should delay in complying with them, Japan threatens to take "immediate action." As a last concession China offers to surrender the Tatsu. but says she will hold the arms and ammunition pending arbitration of the controversy. And Japan is rushing war ships toward the Chinese coast.

A former chief engineer of the Panama Canal, John F. Stevens, now the vice-president of a New England railroad system, predicts that the canal will be commercially and navally a failure, basing his argument on the comparative smallness of the population in the southern hemisphere and the lack of development among the nations in that part of the earth. In this matter Mr. Stevens pits his judgment against that of the American people, who are cheerfully and hopefully building and paying for the canal, with no party or group of public men opposing it or questioning its results. The work was not hastily undertaken. For more than half a century it occupied public attention and was approved by a succession of engineering commissions. No boom methods were employed to make popular sentiment. The canal is going forward because all the people have believed in it from the start.

A Norwegian inventer has patented a suit of clothes which is said to protect its wearer against drowning. The garments are lined with a nonabsorbent material made of specially prepared vegetable fiber which, without being too heavy, will effectively hold up the weight of a man in the water. Twelve ounces of the new material will, it is claimed, save a person from sinking. The invention has been tested with favorable results at Christiania. Successful trials were also made with rugs made of the same material, capable of supporting two persons in the water.

The Knickerbocker Trust Company of New York is to resume business on March 26. This announcement has an importance which may not appear on the surface. The Knickerbocker was the first and the biggest banking institution of New York to close its doors in the recent flurry. After a run which exhausted $7,000,000 of its cash it suspended. The suspension, which was telegraphed all over the country, increased the scare, and helped to send several banks in New York and many outside of New York down.

* * *

It is stated that Congress will take action to permit the re-enlistment of the negro soldiers who were discharged in a body for the shooting at Brownsville, as far as no proof of guilt exists, and provided that each soldier re-enlisted is willing to swear that he had no part in the outbreak. The punishment of the innocent in order to reach the guilty is a proceeding that Congress is not likely to put in its record.

Mrs. Hetty Green, the richest woman in America, has moved into a $19 flat at Hoboken. Instead of an automobile she can use the $70,000,000 tunnel under the Hudson. Mrs. Green is an economist who looks closely to details in providing against a rainy day.

* * *

Naval critics are reminded that there is no absolutely safe place in a sea fight. Nelson's plan was to get close and hit the hardest. He lost an arm in one fight and his life in another, but his theory was splendidly vindicated. The critics who are splitting hairs about construction should try a few scrimmages.

* * *

It is a compliment to the Republican National Convention that its action is conceded to be subject to its own decision. The case with Mr. Bryan's convention is entirely different. Everybody knows what it will be, and only a minority care.

Gen. Stoessel is lucky to get off with ten years after his effort to do something with the military system of the grand dukes.

Boosting Oregon.

One of the most convinging compilations of facts ever circulated to advertise a given section of country is "One Thousand Facts of Production", collected by J. R. Shepard, giving actual results of producers throughout the Willamette Valley This compilation deals with fruit, vegetables, live stock, cereals grasses, poultry, hops, and nuts. Mr. A. F. Hofer, secretary of the Salem Board of Trade, will be glad to send this to any address, and it is a character of information that should be in the hands of every active newspaper man as well as the officers of every commercial body throughout the State of Oregon, and in fact all over the United States.

A fund of $6900 for publicity purposes, with the assurance that this will be incrared to over $8,000, places Albany in the front rank of active Oregon communities. At the euthusiastic 'get-together'' meeting held Friday night which was responsible for this result, Governor Chamberlain and Tom Richardson of the Portland Commercial Club made rousing addresses. More than three hundred people participated in the banquet.

Never in the history of the Pacific Northwest have the wheat exports held up as they have this season. All records for foreign shipments were broken in February, Portland leading all the wheat shipping ports of the entire United States with 2,279,792 bushels ; Puget Sound was second with 2,056,332 bushels. March figures will not fall far behind those for February.

Portland runs more special excursions of her business men out to points of interest throughout her trade territory in the northwest than any other city in the United States, and special excursions are now being discussed to the Rogue River Valley, Lewiston, Idaho, and Hermiston, Oregon, as well as to other points. The Portland Commercial Club, the Pendleton Commercial Association, and the commercial bodies of Umatilla, Echo, La Grand, Baker City, The Dalles, Hood River, and other points along the line of the O. R. & N. will join in an excursion to Hermiston the latter part of May to celebrate the opening of the head-gates of the Umatilla Government Irrigation project, upon which the Government is spending $1,100,000. It is expected that several thousand people will be present to witness the turning of the water upon the arid lands of Umatilla County.

Meetings are being held in different parts of Yamhill County for the purpose of organizing the Yamhill County Development League. This will in no way interfere with the local bodies in the different cities and towns, but will embrace them all in an effort to advertise Yamhill County. A meeting was held at Newberg last Tuesday—another will be held at McMinnville tomorrow. N. O. Lownsdale has been elected president, and the people of Oregon can rest assured that Yamhill County will do its full part in advertising the resources of the State.

The Portland Commercial Club has decided to move into its new home May 1st. This building is an eight story steel covering a quarter block, and when completed will cost to exceed $500,000, and be the most complete equipment owned by a popular commercial body in the United States.

Items Worth Knowing.

A rubber tree 4 feet in diameter yields twenty gallons of sap, making 40 pounds of dry India rubber.

Ninety-three per cent of the theoratical heat of coal is wasted, and only 50 per cent of the heat of oil.

Germany's twenty-one universities have an enrollment of 27,000 students, under the care of 2000 professors.

England spends $40,000,000 per year for eggs and poultry, for one half of which she is dependent on foreigners.

The infant death rate of the fashionable end of London is 11 per cent, while that of the East End is 38 per cent.

No bird can fly backward without turning; the dragon fly, however, can do this, and can outstrip the swallow in speed

A suit of clothes which will float the wearer in case of accident at sea has been patented by a Norwegian inventor.

The deepest hole in the world has been bored in Silesia. It has reached a depth of about 7000 feet, and passes through eighty-three beds of coal.

A German technical journal has gone to the trouble of estimating that the water of the whole ocean contains in solution over 2,000,000 tons of pure silver.

The sanctury of the tomb of the Prophet Mahoment, at Medina, Turkey, is to be lighted with electricity. The contract has just been given to an English construction company.

The development of the watercress growing iudustry in Dorset, England, is enormous. One farm alone employes forty persons in picking, packing and preparing the cress for market.

The city of Berlin has appropriated $12,500 toward the fund for combating tuberculosis, to be named in honor of Dr. Robert Koch. About $40,000 has been subscribed from private sources.

The artificial cultivation of snails is an extensive and flourishing industry in France, no less than 2,500,000 pounds of this succulent delicacy—as Frenchmen consider it— being consumed annually.

The tiny stormy petrel is a bird of immense wing power ; it belongs to every sea, and, although to seemingly frail, it easily breasts furious storms. Petrels have been observed 2000 miles from the nearest land.

Formost among the minerals, etc., which Russians regard as the source of Siberia's future wealth are gold, iron, coking coal, manganese, copper, platinum, emeralds, topazes, asbestos, gluber's salt, rock salt and, in all probability, naphtha.

The world contains at least four mountains composed of almost solid iron ore. One is in Mexico, one in the United States, another in India and a fourth in Africa just below the Sadan, and there have been reports of such a mountain existing in Siberia.

Kiss Her.

Say, young man ! If you've a wife
Kiss her.
Every morning of your life,
Kiss her.
Every evening when the sun,
Marks the day of labor done
Get you homeward on the run—
Kiss her.
Even though you're feeling mad,
Kiss her.
If she's out of sorts and sad,
Kiss her.
Act as if you meant it too ;
Let the whole true heart of you
Spead its ardor when you do
Kiss her.
If you think it "soft" you're wrong,
Kiss her.
Love like this will make you strong,
Kiss her.
You're her husband now, but let
Her possess her lover yet,
Every blessed chance you get.
Kiss her.
Every good wife likes her man,
Kiss her.
Be a man then, when you can ;
Kiss her.
If you'd strike with telling force
At the evil of divorce,
Just adopt this simple course ;
Kiss her.
—J. Daly in Catholic Standard.

Prof. H. A. Howell, of Havan, Cuba, Recommends Chamberlain's Cough Remedy.

" As long ago as I can remember my mother was a faithful user and friend of Chamberlain's Cough Remedy, but never in my life have I realized its true value until now," writes Prof. H. A. Howell, of Howell's American School, Havana, Cuba. " On the night of February 3rd our baby was taken sick with a very severe cold, the next day was worse and the following night his condition was desperate. He could not lie down and it was necessary to have him in the arms every moment. Even then his breathing was difficult. I did not think he would live until morning. At last I thought of my mother's remedy, Chamberlain's Cough Remedy, which we gave, and it afforded prompt relief, and now, three days later, he has fully recovered. Under the circumstances I would not hesitate a moment in saying that Chamberlain's Cough Remedy, and that only, saved the life of our dear little boy." For sale by all Druggists.
