The Tillamook Headlight.
Fred C. Baker, Publisher.

To Save the Forests.

A decidedly practical piece of forestry work has just been done in Congress. In the appropriation which the Senate has passed for the support of the Department of Agriculture there is an item of \$1,000,000 for the forestry service. This provision was fought vigorously by some of the senators from the far Western States, but most of these from the Middle West and from the rest of the country favored it. As it passed the House in very nearly the same shape, the chances that it will go to the president are favorable. The slight differences between the bill now and the measure which passed the House are not likely to keep the conference committee busy long.

Senator Heyburn, of Idaho, was the leader in the opposition to the forestry provision of the bill. There is much feeling in his region against it, but the country believes there is good reason for the timber protection which the Department of Agriculture has been carrying on, and which it is anxious to continue. On the whole Secretary Wilson has been an active and efficient official. He has held the office since 1897, and thus has a record of duration which is longer than any of his predecessors. Only a few men in the century and a fifth of the country's history have ever been in any post in the cabinet for a longer time than Mr. Wilson has served.

In these days, when many of the public men of the country, from the president downward, are trying to arouse a sentiment which will lead to the intelligent protection of all our natural resources, this forestry work of the Department of Agriculture ought to have many friends. As it has triumphed in Congress it is fair to presume that a large majority of the American people are behind it. We will hear much in the next few days and weeks about the necessity for preventing the waste in the basic elements of our natural wealth, and most of this talk will probably be accurate. The secretary of agriculture and some of his subordinates, with the hearty co-operation of the president, is doing things which are transmuting this talk into deeds.

"Centrifugized Milk."

If you don't know what "centrifugized" milk is, go to Kobe, Japan, and there sit at the feet of Taisero Hanamiya, "dealer in milks," and drink in wisdom spiced with sweet phraseology. Here is an advertisement sent out by Mr. Hanamiya and copied in an English newspaper published in the Japanese ports:

"I have the honor to write a letter for you that we have now established the Japan milk sanitary laboratory and its branch or special milk delivering office, as which caused our dairy men are very poor to deliver an unsanitary or tuberculous and even had cow's milk bacteria and milk constituents before their delivering and even for their cow's health, under and food, and in this branch or milk delivering office their pure milk is again filtered through pass the Bundo's method's apparatus till the air bacteria is all out, and we can deliver their pure milk with the satisfactory proof, as the seal is on the bottle, and now your drinking milk or city's milk is all about when danger comes, as their milk is included many dirt and air bacteria, but you are very hard to see them well with your naked eyes, and if you can often through pass the flannel or cotton covered with linen or it is centrifugized which is very easy well to see with naked eyes if always, I beg if you are sanitary man or baby and sickman have, you must have the pure sanitary milk and take your health. If you can make me for order to have the sanitary milk sooner as possible you should soon write me without your servant or make your order for my delivering boy who can always ask you. Please make me your order with kind regards."—From the New York Sun.

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.
F. J. CHENEY & CO., Toledo, O.
We, the undersigned, have known F. J. Cheney for the last 18 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by their firm.
WALDING, KINMAN & MARVIN, Wholesale Druggists, Toledo, O.
Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 50c. per bottle. Sold by all Druggists. Take Hall's Family Pills for constipation.

Feminine Inconsistency.
A clubwoman, writing in the Philadelphia Record, reveals a feminine inconsistency in the peculiar views held by some women about the use of their first names. She says:
"A couple of years ago I had occasion to send a letter to a married woman, and in addressing her I wrote 'Mrs. Henry.' Imagine my surprise when in reply I received an indignant letter from her, in which she said: 'I do not at all like to have my identity submerged in that of my husband. I do not see why I cannot be addressed by my own name. Because I am married is that any reason why I should lose my individuality? My name is Anna.' The next letter I wrote to the indignant wife you can be sure it bore the first name of the woman in question, but the climax came recently, when the husband died and my fastidious friend was left a widow. I wrote her on club business and, bearing in mind her first scolding, took particular pains to address her as 'Mrs. Anna.' The answer to this from her makes me shiver to think about. 'Do you think I have so far forgotten my beloved Henry?' she said, 'as to be willing to abandon his name altogether? I wish you would address me as Mrs. Henry in the future, please. I may be an unfortunate widow, but I still bear my husband's name, I think.'"

The President's Salary.
It is safe to say that very few of the people living in this country know how the president of the United States draws his salary of \$50,000 a year. Of those few who may have given the matter a thought, a large majority do not know whether he receives his salary monthly, quarterly or semiannually. As a matter of fact, the salary due the president is taken to the White House by a trusted messenger from the office of the treasurer of the United States on the last day of each month and handed over to the official whose business it is to look after it. The president receives his salary in the shape of a check, the \$50,000 being divided into eight checks of \$4,166.67 each and four checks of \$4,166.66 each. Thus one month out of every three the president receives 1 cent less on his check than he does the other two. Some such arrangement as this is necessary, as, of course, \$50,000 is not exactly divisible by twelve.

How to Guess Any Number.
Desire one of the company to think of any number she chooses, provided it be even. Tell her to triple it, halve the product, triple this half and then tell you how many times nine will go into this last number. Multiply this by two and it will produce the original number. Thus suppose 4 to be the number thought of. You triple it, making it 12; halve this product, leaving 6; again triple this, making 18, in which 9 will go twice. This twice, multiplied by 2, gives you 4, the number thought of. Or, to give another example, suppose 6 to be the number. Triple it, 18; halve this, 9; triple it again, 27. You ask how many times 9 will go into the result and, being told three times, multiply 3 by 2, and the answer is 6.

On What Their Fate Depended.
During the week certain members of the Scotch minister's flock had been paying overmuch attention to sampling the local whisky, and the minister took advantage of his position in the pulpit to administer gentle reproof. "An' I tell ye, one an' all, ye're on the way to perdition!" he cried. At that moment a fly settled on the Bible before him. He raised his fist. "Ye're gainin' the hell!" he shouted. "An' ye'll all get there, just see sure as—see sure as I ding the life out o' this flee!" His fist crashed down as he uttered the words. Then he looked to see the result of his handiwork. "Missed!" he ejaculated. "Ah, weel, maybe there's a chance for some o' ye yet!"—London Belman.

The Wrestler's Pride.
In olden times a wrestler who had won a belt used to go to his village church on the following Sunday wearing the belt. On the Sunday following that he went to some neighboring church in his belt and claimed precedence over the other young fellows. Nearly all the champions were men great in girth and weight. Old Steadman, accounted by many the most powerful wrestler ever known, was twenty stone weight.—Manchester Guardian.

How the Dutch Eat.
A Dutch meal is always reminiscent of a game of cards, for the mother deals out all round the table, and when that first hand is played out she deals afresh, and so on until the dish is empty. There is no promiscuous serving, as with us, and the quick feeder (if such a person could exist in leisurely Holland) reaps no advantage. If meals are to be likened to games of cards, our meals in Dutch eyes must look like games of "grab."—London Queen.

The Jaws of Death.
Teacher (after reading the "Charge of the Light Brigade")—Who were the six hundred referred to in the verse, "Into the jaws of death rode the six hundred?" Pupil—I expect they were dentists, ma'am.—Illustrated Bits.

Not Worth Stealing.
A certain dramatic author was seen by a friend to have a manuscript almost falling from his pocket. "If you were not so well known you would have had your pocket picked," said the friend.

The careful reader of a few good newspapers can learn more in a year than most scholars do in their great libraries.—F. B. Sanborn.

Laundrying Shirt Waists.
Mathilde, the popular washerwoman, having sprained her wrist, was unable to do her week's ironing, but she stood over the young Irish girl she had hired and directed the work.
"Maybe, Bridget," observed Mathilde, with a watchful eye on her under study, "you'll think you, dat all shirt waist ees iron alike. Maybe you'll think she ees som' easy job for iron shirt waist for hall dose lady of different shape."
"But non, Bridget, she ees mos' difficult. Som' of dose vaist ees for dose so fat Mme. Jones, w'at weigh t'ree, two honder pound. Som' ees for dose so t'in Mile. Smit, w'at weigh lak som' small feddiale."
"Eet ees not sufficient to but iron dose vaist, she mos' hall be mold to fit dose bodie."
"De vaist of dose t'in, dose tall, dose fat, she ees iron hall of a difference. Dose fat, she ees not desire som' hump hon behin' hees shouldaire. Does t'in, she ees weesh for stick out hiffare. For dose tall mann'selle you mus' took high dose collaire; for dose fat mann'selle mak wide dose arm'sle."
"Eet ees dose weesdom, Bridget, w'at ees bring hall dose mos' best? she vaist dose town to de door of de Mathilde."—Youth's Companion.

Congressional Bell Signals.
On the floor of the house the door-keeper has his desk, and it is here that the bells are struck that give notice of the needs of congress. One bell calls for tellers when the house is in committee of the whole; two bells indicate a call for yeas and nays; three declare a recess; with four bells the red light over the door goes out; five bells mean a "call of the house" and which the sergeant at arms is supposed to summarily arrest any member on sight and bring him in, whether on foot or horseback. Any member who is not present at a call of the house is subjected to a severe reprimand. Looking down the corridor, the going out of the red light gives the curious suggestion of the tail end of a passenger train dashing through a tunnel. While the red light burns bright and clear it means that congress is under way, but when the light winks and goes out then the visitors understand that the wheels of legislation have ceased to revolve.—National Magazine.

Countermanded.
A very devout clergyman had just married a couple and, as was his custom, offered a fervent prayer, invoking the divine blessing upon them. As they seemed to be worthy folk and not overburdened with this world's goods, he prayed, among other things, for their material prosperity and bountifulness. The Lord to greatly increase the man's business, laying much stress on this point.
In filling out the blanks it became necessary to ask the man his business and, to the minister's horror, he said, "I keep a saloon."
In telling the story to his wife afterward the clergyman said that as he wrote down the occupation he whispered:
"Lord, you needn't answer that prayer."—Philadelphia Ledger.

Lord Kelvin and the Cable.
It is perhaps not generally known that the success of the Atlantic cable was due to the calculations and experiments of the late Lord Kelvin, at that time plain William Thomson. He discovered that the current through a long cable would arrive gradually at the receiving end and devised the apparatus which rendered it possible to utilize such a current for making the Morse signals. It was through disregard of his theoretical prediction that the first Atlantic cable, in 1858, was ruined by too powerful currents. With his mirror galvanometer to translate into visible signals the delicate impulses received through the cable the enterprise would have been a complete failure.

How to Fill Up Holes in Wood.
It sometimes becomes necessary to fill up cracks or dents in fine wood work, furniture, floors, etc. The following is the best way of doing it. White tissue paper is steeped and perfectly softened in water and by thorough kneading with glue transformed into a paste and by means of ochers (earth colors) colored as nearly as possible to the shade of the wood. To the paste calcined magnesia is then added, and it is forced into the cracks or very firmly to the wood and after drying retains its smooth surface.

An Apology.
An excited military looking gentleman entered the editorial sanctum one afternoon, exclaiming: "That notice of my death is false, sir. I will horse-whip you within an inch of your life, sir, if you don't apologize in your next issue."
The editor inserted the following next day: "We extremely regret to announce that the paragraph which stated that Major Blazer was dead is without foundation."—Detroit Free Press.

A Loud Kiss.
Bob Footitt (actor)—Failure? I should think it was! The whole play was ruined.
She—Gracious! How was that?
B. F.—Why, at the end of the last act a steam pipe burst and hissed me off the stage.

A Lark.
What a lark it would be if an egg came down the chimney!
No, it wouldn't, unless it was a lark's egg, and even then not until it was hatched.
Eggsactly!

The head, like the stomach, is most easily infected with poison when it is empty.—Jean Paul Richter.

Centrally Located. Rates, \$1 Per day

LARSEN HOUSE,
M. H. LARSEN, Proprietor.
TILLAMOOK, OREGON

The Best Hotel in the city. No Chinese Employed.

HARNESS, COLLARS, etc.
You Use Them.
We Sell Them.
