**The Tillamook Headlight.**  
 Fred C. Baker, Publisher.

**As It Should be.**

(Received too late last week.)  
 There is no question in the ordinary  
 Astorian mind that this city and the  
 Columbia river will get the first rail  
 and its traffic out of the Tillamook  
 region; that the Astoria & Columbia  
 River Railroad Company, a Hill line  
 and connection, will beat the Harriman  
 system and all its works, in the race  
 down and to the coast of Tillamook.  
 For, as 35 miles are to 70 miles, so is the  
 chance of the A. & C. beyond, and bet-  
 ter than, the Lytle chance, to get in  
 there, and here.

At the same time, the Southern Pa-  
 cific interests are going to be practically  
 supreme in the splendid valley of the  
 Nehalem, by right of traverse and spot-  
 touch with its last product, cultivated  
 and uncutivated; and this is where  
 Astoria must get in her cleverest work;  
 to fix the hauling of the vast produce  
 of that territory directly here, rather than  
 permitting it to go back to the metropo-  
 lis, for marketing. It is ours by every  
 rule of natural tendency; by contiguity,  
 and by the logic of route, distance dis-  
 patch. We must get in and seal it to  
 this port and point of distribution; this  
 the nearest and best depot that can be  
 found.

It is strictly up to the merchants and  
 business men generally, here, to open up  
 the campaign right now, and keep it  
 swinging, along with every west-bound  
 rail that is laid by the Harriman people.  
 We want the fruits, the vegetables, the  
 dairy products, the grain, and the lum-  
 ber of that realm, and we had best file  
 such a bid for it as even the far metropo-  
 lis will balk at. We can do this if we  
 will; we have everything to plead, and  
 offer and make good upon; and what  
 we shall lose in the outcome, will be lost  
 on our own initiative and primary fault  
 and stupidity. There are certain ele-  
 ments of it that will come to us at any  
 hazard, of course; mainly in the lumber,  
 and heavier material out put; beyond  
 that, what comes Astoria-ward will be  
 ours by conquest.—Astorian.

**To Abolish Cigarettes.**

Cigarettes are to be banished from  
 the State of Oregon, on and after Septem-  
 ber 1, 1909—perhaps.

Representative-elect Charles McDon-  
 ald, of Multnomah county, has drafted  
 a bill which he will introduce at the  
 legislature next winter, having for its  
 purpose the utter extermination of the  
 "coffin tack" in the Beaver State. Even  
 substitutes for cigarettes will be placed  
 under the ban, and anyone caught giv-  
 ing or selling the "makinings" will be  
 subject to fine, and if the fine is not paid,  
 then off to prison he (or she) must go.

Conservative statistics show that 500,-  
 000 cigarettes are smoked daily in Ore-  
 gon. The figures may reach 800,000, for  
 the 500,000 daily consumption is based  
 on 40 per cent of the voters smoking only  
 ten of the "tacks" a day, and any cigar-  
 ette smoker will confess that ten "cigs"  
 a day is a biggarded allowance, and  
 should be 20 or 30. Then, again, more  
 than 40 per cent of the voters use cigar-  
 ettes and many who are not voters are  
 heavy customers. The "makinings" sold  
 in this state in a week run into several  
 thousand dollars, so the passing of the  
 proposed reform measure of Representa-  
 tive McDonald would cut deeply into  
 the profits of the tobacconists.

The bill which was prepared by an at-  
 torney and sent to McDonald for approval,  
 follows the Washington law. Mc-  
 Donald, who is now in Curry county on  
 his vacation, has written that the draft  
 of the measure is satisfactory to him,  
 and promises that it will be one of the  
 first bills introduced in the coming ses-  
 sion.

The bill does not prohibit the smoking  
 of the "coffin tacks," but it makes the  
 securing of the materials difficult,  
 almost impossible, in fact. Says the  
 bill:

"It shall be unlawful for any person,  
 by himself, clerk, servant, employe, or  
 agent, directly or indirectly, upon any  
 pretense or by any device, to manufac-  
 ture, sell, exchange, barter, dispose of or  
 give away, or keep for sale, any cigar-  
 ettes, or any paper made or prepared  
 for the purpose of being filled with to-  
 bacco for smoking; any person for vio-  
 lation of the same, shall be guilty of a  
 misdemeanor, and upon conviction shall  
 for the first offense, pay a fine of not less  
 than \$25, nor more than \$100 and costs  
 of prosecution, and stand committed to  
 the county jail until such costs are paid;

and for the second and each subsequent  
 offense shall pay upon conviction there-  
 of, a fine of not less than \$100 nor more  
 than \$500, and the costs of prosecution,  
 or be imprisoned in the county jail not  
 less than one month nor more than six  
 months; provided, that the provisions  
 hereof shall not apply nor interfere with  
 the sales of, or the disposal by any per-  
 son in this state to any person outside  
 of this state.

**HERE IS A LIBRARY FREE.**

**Chance for Some Lodge, Church,  
 Society, or Club to Obtain It.**  
 One hundred and fifty dollars worth  
 of books—and nobody dares guess how  
 much worth of information and amuse-  
 ment—are on view in the window of the  
 dry goods store of Homer Mason.

Want them? Step over to the store  
 when you are down town this afternoon  
 or to-morrow and look the lot over. You  
 will see one hundred volumes hand-  
 somely bound in colored cloth filling  
 and a five section solid oak book case.  
 Do you like to keep up on all the latest  
 novels, the brightest most entertaining  
 and amusing tales of the past few years?  
 If you do, take a look at these books  
 and think it over.

This library is to go to some church,  
 school, lodge or other organization. The  
 public will be allowed to decide which  
 organization shall have it, and this will  
 be done by voting. The lodge, society,  
 school, or church securing the largest  
 number of votes by Jan. 10th, 1909, will  
 be awarded the library. In the mean-  
 time be sure and see for yourself just  
 what this library is. Then make up  
 your mind whether it wouldn't be  
 just the thing for your lodge or your  
 church. Books are expensive and money  
 is scarce just now. But the merchants  
 of Tillamook offer an opportunity to get  
 one hundred and fifty dollars worth of  
 books for the organization where you  
 think it will do most good. Remember  
 to have the privilege of voting will cost  
 nothing. A number of merchants will  
 issue votes with each ten cent purchase  
 and you can then vote for your choice of  
 societies, which you would like to re-  
 ceive this library. The votes are to be  
 deposited in a ballot box located at  
 Lanar's Drug store. Full information  
 and list of merchants giving votes can  
 be had at the following stores: Lanar's  
 drug store; R. L. Wade, hardware;  
 Eugene Jenkins, jeweler; Homer Mason,  
 dry goods; W. M. Mills, groceries;  
 Chester T. Stuart, confectionary; Jones  
 & Kundson, furniture; Catterlin & Mc-  
 Kinley, real estate.

In addition to the foregoing The  
 Tillamook Headlight is enrolled on the  
 list, and for every year's subscription,  
 past due or in advance, paid to this office  
 are given 15 votes. Likewise are votes  
 given on job work brought in, one vote  
 being allowed for every ten cents of  
 value of work. Pay a year's subscrip-  
 tion of \$1.50 and get your 15 ballots for  
 the award of this beautiful library, or  
 get votes by purchases at the establish-  
 ments named. The handsome oak case  
 with its equally handsome volume may  
 be seen, remember, at Homer Mason's  
 dry goods store.

**The Trackless Trolley.**

The trackless trolley is not an idle  
 dream as fourteen of them are being  
 very successfully operated in Europe.

In general outline and construction  
 the trackless trolley looks not unlike its  
 prototype which needs must keep on a  
 track. The same electric motors drive  
 the new trolley but the electricity is  
 gathered from the overhead trolley wire  
 by a flexible connection. The trolley-  
 wheel runs on top of the trolley wire  
 and is connected to the car by a wire  
 cable. The vehicle is steered with a  
 wheel like an automobile. The cars  
 carry thirty passengers.

A number of Pennsylvania capitalists  
 are planning to operate a trackless  
 trolley line from Chattanooga to the top  
 of Walden's Ridge, Tenn., a distance of  
 fifteen miles.

So far the trackless trolley has seen its  
 greatest development in France.

**A Traveling Man Received the  
 Thanks of Every Passenger  
 in the Car.**

"I must tell you my experience on an  
 East bound O. R. & N. R. R. train from  
 Pendleton to Le Grande, Ore.," writes  
 Sam A. Garber, a well known traveling  
 man. "I was in the smoking depart-  
 ment with some other traveling men  
 when one of them went out into the  
 coach and came back and said, 'There  
 is a woman sick unto death in the car.'  
 I at once got up and went out, found her  
 very ill with cramp colic, so bad in fact  
 that I was almost afraid to take the risk;  
 her hands and arms were drawn up so  
 you could not straighten them, and with  
 a deathlike look on her face. Two or  
 three ladies were working with her and  
 giving her whiskey. I went to my suit  
 case and got my bottle of Chamberlain's  
 Colic, Cholera and Diarrhoea Remedy  
 (I never travel without it) ran to the  
 water tank, put a double dose of the  
 medicine in the glass, poured some  
 water into it and stirred it with a pencil;  
 then I had quite a time to get the ladies  
 to let me give it to her, but I succeeded.  
 I could at once see the effect and I  
 worked with her, rubbing her hands,  
 and in twenty minutes I gave her an-  
 other dose. By this time we were  
 almost into Le Grande, where I was to  
 leave the train. I gave the bottle to the  
 husband to be used in case another dose  
 should be needed, but by the time the  
 train ran into Le Grande she was all  
 right, and I received the thanks of every  
 passenger in the car." For sale by all  
 Druggists.

Gov. Hughes refers to Mr. Bryan as  
 a dreamer. What a troubled time he  
 must have in his slumbers if his para-  
 mount issues pass in procession.

**Electric Science Briefs.**

"Electricity is life" is a hackneyed ap-  
 phorism, but from such a result one can  
 only conclude that vitality and elec-  
 tricity are synonymous. When, there-  
 fore, you partake of fruit, though you  
 seem to be merely gratifying a natural  
 appetite, you are in reality absorbing a  
 certain proportion of electric energy in-  
 to the system. For the innocent looking  
 red-checked apple is nothing more or less  
 than a small electric accumulator. It  
 possesses, it is true, only a small unit  
 of electric energy, but this energy is suf-  
 ficient to be detected by an extremely  
 sensitive instrument like the Kelvin  
 galvanometer.

A Jersey City inventor has produced  
 an electric egg beater for hotels and  
 restaurants where eggs are used in  
 large quantities. Like most electrical  
 devices, it is a case of you press the  
 button and the machine does the rest.  
 The beater consists of a vertical support,  
 with an arm holding the eggbeater shaft.  
 Below is an adjustable bracket, provid-  
 ed with a bowl, in which the eggs are  
 placed. By pressing the button the  
 beater is set to revolving swiftly in the  
 bowl, and quickly produces the desired  
 result.

"The Electrolyzer" is a device for  
 producing a clothes bleaching liquid by  
 electricity from ordinary salt brine. The  
 new method, it is claimed, saves linen,  
 takes the place of chlorine of lime, or  
 other bleaches, and reduces the cost of  
 the bleach from thirty to ninety per  
 cent. The new machine can be used in  
 laundries, paper mills, pulp mills, etc.

A new electric device has just been  
 patented to press suits while you wait  
 —with the clothes on. Electric heated  
 plates, which are squeezed together by  
 levers, are used to put the creases in  
 the trousers.

The longest transmission line in the  
 world is that from De Saba to Sausalito  
 in Northern California. Its length is  
 232 miles. The transmission line from  
 Niagara Falls to Syracuse is 165 miles  
 long and is next to the De Saba line in  
 length.

The government of Bavaria is taking  
 preliminary steps for the substitution of  
 electric power, produced from water falls  
 for steam power and the state owned  
 railroads. Careful and exhaustive  
 surveys and estimates were made in ad-  
 vance, and provision has just been  
 made for the first installment of the  
 funds to be expended for this purpose.  
 The first electrical installations are to be  
 on three lines located near the Austrian  
 frontier. In the lakes and rivers of the  
 Bavarian Alps there is an abundant  
 source of supply for water power, but  
 imperfectly utilized at present. The  
 existing falls alone, it is estimated,  
 would furnish 300,000 horse-power.

The Isthmian Canal Commission has  
 ordered the General Electric company  
 six vertical Curtis steam turbine gener-  
 ators of 1500 Kw., 2000 horse-power  
 each.

Thos. W. Lee, until two years ago  
 general passenger agent of the Dela-  
 ware, Lackawanna & Western Rail-  
 road, is the first man in the world to  
 farm by electricity. Lee owns "The  
 Bungalow," a tract of more than 2000  
 acres near Idaho Falls, and all he has  
 to do now when he wishes to farm, is  
 to push a button. Electricity does the  
 rest. The grain was reaped, stacked,  
 threshed, sacked, and made ready for  
 market by electricity. Mr. Lee also did  
 his haying by electricity.

Nitrogen extracted from the air by  
 electricity is the best fertilizer in the  
 world. The process is being tried out in  
 Norway. According to the report just  
 issued by the company, the total pro-  
 duction at their new works during the  
 first three months of the current year  
 was 1059 tons of nitrate and twelve  
 tons of sodium nitrate. At the smaller  
 experimental plant, which has been run-  
 ning since 1905 by the Norwegian  
 Hydroelectrical Nitrate Company, over  
 a thousand tons were produced last  
 year, so that some progress is certainly  
 being made, though the output, of  
 course, is still almost inappreciable as  
 regards the world's consumption. A  
 ton of nitrogen requires eight or nine  
 horse-power per year for conversion into  
 fertilizer.

The largest static electric machine ever  
 built is owned by a New York physician  
 and is 6 feet over all, 7 feet long, and 4  
 feet wide, weighing 650 pounds. It has  
 40 glass discs each 40 inches in diam-  
 eter of which 20 revolve while the others  
 remain stationary. It is driven by an  
 electric of one quarter horse-power, be-  
 ing act excited by a small auxiliary  
 hand machine, and at full speed may  
 yield a spark 30 inches long and ¼ inch  
 in diameter. To fully excite the huge  
 machine requires from 5 to 10 minutes,  
 the charge however, being maintained  
 for as much as 12 to 15 hours.

Wireless telegraph messages were re-  
 ceived at San Diego, California, from the  
 flagship "Connecticut," a distance of  
 2900 miles.

The gross orders received by the Gen-  
 eral Electric company for the first six  
 months of the fiscal year beginning  
 March 1st, were approximately \$21,-  
 000,000. This is about sixty per cent  
 of the new business booked for the same  
 period last year.

**For a Sprained Ankle**  
 A sprained ankle may be cured in  
 about one-third the time usually re-  
 quired, by applying Chamberlain's Pain  
 Balm freely, and giving it absolute rest.  
 For sale by all druggists.

**HARNESS, COLLARS, etc.**

You Use Them.  
 We Sell Them.

W. A. WILLIAMS & CO.,  
 Next Door to Tillamook County Bank.

The Oregon Cheese Co., Incorporated,  
 is prepared to buy all the first class  
 cheese that comes along. Spot cash  
 and highest price. Factory men will  
 do well to see R. Robinson, the mana-  
 ger, before selling. He will be in  
 Tillamook a good part of the time dur-  
 ing the season. Only the best stock  
 wanted.

THE OREGON CHEESE COMPANY,  
 126 Fifth Street, Portland.

**NOTICE**

TO THE PEOPLE OF TILLAMOOK CITY  
 AND COUNTY.

THE RED FRONT  
 SHOE STORE

WILL SELL ALL STOCK ON  
 HAND AT COST.  
 Strictly for Cash Until Further  
 Notice.

So as to make room for a large stock for Spring and  
 Summer Shoes that will shortly arrive from Chicago.  
 Come and get Bargains out of the largest and best selected  
 stock of Shoes in the City.

P. F. BROWNE, Agent.

I have just opened up the most com-  
 plete line of

**STAPLE & FANCY  
 GROCERIES**

in Tillamook, all new and Fresh. The  
 prices are no higher than others.

We most cordially invite you to  
 come and look at what we have and  
 get our prices, whether you buy or  
 not.
