LATE RAILROAD NEWS.

Survey Being Made From Scholl's Ferry.

As to what route the United Railways will decide upon for building their road to the coast, they have so far made no public announcement, but we have it from good authority that unless some unforeseen obstacle arises the route chosen will be up the Tualatin and there is every reason to believe that it is the United Railways that is securing the right of way. While it is true they have made surveys and have sought for a route to Tillamook by way of the Nehalem and Wilson rivers, it is only in keeping with the apparent policy of the United Railways in the past, of having two routes to the same place in consideration on either of which they can build and not bound to build on any certain route. The plan given out by the so called Oregon Midland is ridiculous on the face of it. To commence with, no railroad ever became wealthy from a contract obtained from the Southern Pacific of shipping freight over their line, and their is less chance for it, when it will conflict with one of their lines, be it either one that is already built or merely proposed, and it is a well known fact that they have already started to build to Tillamook so it is not at all likely they have given the Oregon Midland or any other proposed road to Tillamook any very handsome bargains.

The figures of a million and a half feet of timber they gave are ridiculous in the extreme. The average load of timber for a car is 20,000 feet. At that figure it would require 75 cars a year to haul the proposed million and a half feet of timber. The freight on it would not amount to enough to buy grease for the engine.

It is positively known that the P. R. & N. have encountered very serious obstacles to their previously contemplated route on which they started to build and have had surveyors in the hills of the Nehalem and Wilson rivers surveying for a railroad route. As to what the difference or combination is between the Oregon Electric, the P. R. & N., and the S. P. can not be seen or told, anyway you look at them you can see the Harriman stamp.

It is readily seen that all of the surveys made into town by the Oregon Electric were made with a view of a way out of town up Gales Creek and it will be remembered that Lytle was negotiating for the local line here and at that time spoke of extending up Gales Creek. A plan about as plausible as the one given by the Oregon Midland. It is more than likely that what ever the line is called which builds to Tillamook it will be a Harriman line just the same. A survey is being made from Scholl Ferry near Groner's place up the Tualatin into this section, with a view of showing up a proposition that a railroad could be induced to take up. This would open a rich section of country and the route suggested would be one over which a road could very easily be built, should this city be decided upon as the terminal as it likely will, we will be glad to give every possible encouragement to the movement. No doubt the road will be built in a few years, but it hardly seems likely it can be secured for this year. The Telegram stated in a recent issue that it was announced at the office of the United Railway that owing to the bad weather of the past month it would be impossible to commence the passenger service between Portland and Holbrook February 1, but they would do so in about two weeks.

"Material is being assembled for the passenger depot, which will be put up at the 12 stations along the line between here and Forest Grove, and some of them will be ready before the end of the present month. It is expected that the whole line between here and the metropolis of the Tualatin Valley will be turned over to the operating department in about 90 days, or not later than June 1. President Greenough is expected here from Missoula, Mont., in a few days for an inspection trip over the line."—Forest Grove Times.

Foley's Honey and Tar clears the air passages, stops the irritation in the throat, soothes the inflamed membrane, and the most obstinate cough disappears. Sore and inflamed lungs are healed and strengthened, and the cold is expelled from the system. Refuse any but the genuine in the yellow package—J. S. Lamas, Tillamook; Hawk & Miller, Bay City.

CREAMERY ASSOCIATIONS' REPORTS.

Seven Factories Receive Nearly Fifteen Million Pounds of Milk.

Seven of the co-operative creamery associations to make their annual reports for last year are the Fairview Dairy Association, Red Clover, South Prairie, East Beaver, Maple Leaf, Three Rivers and Clover Leaf. These factories received 14,376,111 pounds of milk, the factory obtaining the largest amount of milk was Maple Leaf Creamery Association with 3,619,494 pounds. This association carried the banner for the largest amount of milk in 1907. Last year The Tillamook Creamery outdistanced Maple Leaf, making the former the banner factory. The amount of cheese these associations manufactured amounted to 1,574,320 pounds, and this was sold for \$194,448.01.

We give below reports of Maple Leaf Creamery Association, Three Rivers Creamery Association and Clover Leaf Creamery Company:

Maple Leaf Creamery Assn.

To the Stockholders of the Maple Leaf Creamery Association, Tillamook, Oregon.

GENTLEMEN,—Following is my report as secretary and salesman of your association for the year 1908.

The factory received for the year 1908, a total of 3,619,494 lbs. of milk.

Butter fat in milk was 142,041 lbs. at an average butter fat content of .03924 per cent.

Amount of cheese manufactured and sold was 395,241 lbs.

Average yield was 10.92 lbs. of cheese per 100 lbs. of milk.

Cheese sold for \$49,182.66, or an average price of 12.45 cents per lb.

6,062 boxes of cheese were manufactured and sold.

Patrons were paid for butter fat as follows:

January, 32c.; February, 33c.; March, 31c.; April, 30c.; May, 27c.; June, 28.5c.; July, 29.5c.; August, 29.5c.; September, 30c.; October, 31c.; November, 31c.; and December will be 32c.

Average price paid patrons for 100 lbs. of milk, practically \$1.17 per 100 lbs.

The association received \$6,916.71 for making cheese, or 13.5c. per lb.

The expenses for the year were \$5,755.41, but there is included in this part of the improvement about the factory, such as building woodshed at a cost of approximately \$300.00, and dividend on stock, \$113.00.

The association also bought up 33 shares of its capital stock, which it is holding as treasury stock and which can be sold only at regular stockholders meetings. For these shares the association paid \$825.00.

The company also bought the land upon which the factory is situated, paying therefor the sum of \$300.00.

Resources and liabilities of the association at this time are as follows:

Assets: Supplies on hand valued at \$778.79; due association for cheese, \$2,004.96; factory building value at \$2,800.00; land valued at \$300.00; loan to one of the patrons, \$96.88; amount in hands of treasurer, \$638.85; 1909 ex. account, \$27.50; bills receivable, \$25.00. Total resources, \$6671.93.

Capital stock outstanding, \$625.00. Due patrons for December milk, \$1,498.29. Total liabilities, \$2,123.29.

I have been asked to bring the matter of the organization of a cheese inspection association before you at your annual stockholders meeting to-day, for the purpose of asking you to select a delegate to attend the preliminary meetings towards organization of such an association. The purpose of such an organization would be to engage a competent cheese inspector and have all the cheese manufactured by the different members of such organization graded and stamped by the official label of such organization. Several of the larger co-operative factories have been contending for this for several years, but it is only lately that enough have signified their willingness to enter such an association to assure its success. The next meeting of the proposed association will be held in Tillamook, Ore., on the 9th inst. If you would select your delegate at this meeting it would not necessitate calling another meeting for that purpose, although I am of the opinion that the directors could select such a delegate.

Respectfully submitted,
 CARL HABERLACH,
 Secretary.

Three Rivers Creamery Assn.

To the Directors, Stockholders and Patrons of the Three Rivers Creamery Association, Hebo, Oregon.

Gentlemen:—Following is my report as secretary and salesman of your association for the year 1908.

The association received for the year 1908, 1,584,804 lbs. of milk.

Butter fat in milk was 60,588 lbs., being an average butter fat content of .03823 per cent.

Amount of cheese manufactured and sold was 169,367 lbs.

Average yield was 10.7 lbs. of cheese per 100 lbs. of milk.

Cheese sold for \$20,486.06, or an average price of 12.1-10 cent per lb.

Patrons were paid for butter fat as follows: Jan, 29c.; Feb, 29c.; March, 29.4c.; April, 29c.; May, 27c.; June, 28c.; July, 28.1c.; August, 27.8c.; September, 28c.; October, 28c.; November not estimated.

The association received \$3387.34 for making cheese, being 2 cents per lb.

Average price patrons received for milk on this basis was \$1.08 per cwt.

The expenses for the year were \$3201.76. This includes dividend of 8 per cent on stock, \$152.00, and hauling most of the seasons make of cheese to Tillamook at a cost of 15c. per case. Also improvements around the factory, such as laying water pipe, etc. I have attached hereto and make a copy of the expenses of the association to this date. Some of these were made this year, but I have put them all under last year's account. Have also offered several other items of interest.

I think that the coming season we will have to make a large number of triplets, probably 1500 cases triplets and 1000 cases twins and Y. A.'s, as the demand is mostly for triplets and they usually command a higher price. We have had some little trouble with our cheese the past season, all of which is well known by you, and does not need repetition here.

Resources and liabilities: Due for cheese \$264.72; supplies on hand, \$339.10; factory building valued at \$1825.65; in hands of treasurer, \$503.54; total resources \$2633.01.

Liabilities: Capital stock outstanding \$1900.00. Due patrons for milk \$490.73. Total \$2390.73.

Regarding the matter of a cheese inspection association, I wish to state that two members of your board have attended meetings in this city looking toward the organization of such an association. If you should select a delegate to represent your factory in this city at the meeting to be held the 9th inst., it would save calling another meeting for that purpose alone.

I wish that your committee to whom will be referred this report would make a complete examination of all receipts and disbursements to date, so we may have a clean balance sheet with which to commence the coming season.

Should I be selected as salesman of your association for the coming season, I wish you would consider the proposition of paying for such services at a certain sum per month, instead of at a certain sum per lb. cheese manufactured as at present. I regret that it will be impossible for me to attend your annual stockholders meeting, as there are several matters I would like to talk over with you. Respectfully submitted,
 CARL HABERLACH,
 Secretary.

Clover Leaf Creamery Co.

To the Stockholders of the Clover Leaf Creamery Co., Tillamook, Ore.

GENTLEMEN,—Following is my report as secretary and salesman for your company for the past year of 1908.

The factory received for the season of 1908, 1,534,550 lbs. of milk. This was for the tenth month the factory was operated. Gain over 1907, 111,420 lbs.

Butter fat in milk was 60,001 lbs., or an average butter fat content of .03935 per cent.

Amount of cheese manufactured and sold was 171,626 lbs.

Average yield was 11.25 lbs. of cheese per 100 lbs. of milk.

8.68 lbs. of milk required for 1 lb. of cheese.

Cheese sold for \$21,237.88, or an average price of 12.38 cents per lb.

2,733 boxes of cheese were manufactured and sold.

Patrons were paid for butter fat as follows: March, 32.5c.; April, 31.5c.; May, 28.6c.; June, 28c.; July, 28.5c.; August, 29.7c.; September, 30c.; October, 32c.; November, 32c.; and December, 34c. Average for the total lbs. of butter fat was 29.65c.

Patrons received \$1.16 8/10 per 100 lbs. for their milk, at a charge of 2 cents per lb. for making cheese. Estimated at 13.5c., the price many other factories are operated on, the patrons would have received \$1.19 6/10 per 100 lbs. for their milk, and an average price of 30.39c. for butter fat. About 710 cents should be added to monthly butter fat prices on this basis.

The company received \$3,432.52 for making cheese for the year, or 2 cents per lb.

Expenses for the year were \$2,916.28. Resources and liabilities of the company are as follows:

Assets: Supplies on hand, \$389.38; due company from merchants for cheese, \$1,021.12; amount in hands of treasurer, \$802.70; and factory building valued at \$1,000.00. Total resources, \$3,213.20.

Liabilities: Capital stock paid in, \$550.00, and due patrons for milk, \$1010.74; bills payable, \$550.00. Total liabilities, \$2,110.74.

I have been asked to bring the matter of a cheese inspection before you at your annual meeting. Plans are being formulated for the incorporation of a cheese inspection association along progressive lines, and your company has been invited to lend its aid to this end. Each factory is asked to select a delegate to attend the meeting to be held in this city on the 9th inst., when further steps toward organization will be taken. If you can select a delegate at this year's annual meeting, it would not be necessary to call another meeting for that purpose.

If I should be selected to act as your salesman and secretary for the next season, I would ask that you would consider the proposition of paying for such work monthly at a monthly salary, instead of at so much per lb. and think it would be more satisfactory all around.

I would further like to ask that the committee to whom is referred this report make a full and complete examination of all receipts and disbursements of this company to date, that we may have a clean balance sheet to go by.

With the supplies on hand and the surplus in the treasury, the factory should be able to get along nicely by charging 13.5c. for making, which should include the company's part of paying for a cheese inspector.

Respectfully submitted,
 CARL HABERLACH,
 Secretary.

Bids for Hauling Cheese Wanted.

The Red Clover Creamery Co. will receive bids for hauling their cheese from their factory to the dock in Tillamook City.

Bids will be received until February 15th, 1909.
 S. SEVERANCE, Secretary.

For Sale.

One 20 H. Power Boiler.
 One 75 H. Power Engine.
 One 6 x 24 Planer.

Notice

Notice is hereby given that I will not be responsible for any debts contracted by my wife, Florence A. Benson, after this date.
 Tillamook, Ore., Feb. 4, 1909.
 GEORGE H. BENSON.

Bid Wanted for Wood.

The South Prairie Cheese Company will receive bids for 25 cords of Wood, five cords Fir and 20 cords dead sound Hemlock or Alder, to be delivered before the 1st March at the factory.

Sealed bids to be sent to the directors of the company before Jan 13th, 1909.
 L. A. EDGAR, Director.

Hexamethylene-tetramine

The above is the name of a German chemical, which is one of the many valuable ingredients of Foley's Kidney Remedy. Hexamethylene-tetramine is recognized by medical text books and authorities as a uric acid solvent and anti-septic for the urine. Take Foley's Kidney Remedy as soon as you notice any irregularities and avoid a serious malady.—J. S. Lamas, Tillamook; Hawk & Miller, Bay City.

The Jumping Off Place.

"Consumption had me in its grasp, and I had almost reached the jumping off place when I was advised to try Dr. King's New Discovery; and I want to say right now, it saved my life. Improvement began with the first bottle, and after taking one dozen bottles I was well and happy man again," says George Moore, of Grimesland, N.C. As a remedy for coughs and colds and healer of weak, sore lung and for preventing pneumonia New Discovery is supreme. 50c. and \$1.00 at C. I. Clough's druggist. Trial bottle free.

Neighborhood Favorite.

Mrs. E. D. Charles, of Harbor, Maine, speaking of Electric Bitters, says: "It is a neighborhood favorite here with us." It deserves to be a favorite everywhere. It gives quick relief in dyspepsia, liver complaint, kidney derangement, malnutrition, nervousness, weakness and general debility. Its action on the blood, as a thorough purifier makes it especially useful as a spring medicine. This grand alternative tonic is sold under guarantee at C. I. Clough's drug store. 50c.

NOTICE FOR PUBLICATION.

Department of the Interior,
 U. S. Land Office at Portland, Ore.,
 November 25th, 1908.
 Notice is hereby given that GRACE L. BEALS, of Tillamook, Oregon, who, on November 25th, 1908, made application for timber entry, No. 6866, for W. 1/4 of N. 1/4, N. 1/4 of S. 1/4 of section 21, and S. 1/4 of S. 1/4 of sec. 22, T. 2 north range 5 west, Willamette Meridian, has filed notice of intention to make final timber proof to establish claim to the land above described, before W. J. Cooper, U. S. Commissioner, in Tillamook City, Tillamook County, Oregon, on the 15th day of April, 1909. Claimant names as witnesses: J. C. Bewley, of Tillamook, Oregon; A. G. Beale, of Tillamook, Oregon; Frank Crane, of Hobsonville, Oregon; W. A. Peeters, of Bay City, Oregon.
 ALGERNON S. DRESSER, Register.

The Store That Makes Good.

New Year.

We are now entering upon a New Year.

Let us make this the most prosperous year Tillamook County has ever enjoyed.

We should all encourage, aid and assist all industries and enterprises, and not play freeze out with what we have.

We are going to do our part by boosting.

We will also try to do even better than we have heretofore in keeping up with our stock of goods in every line and furnish the best goods possible for as little money.

Now is the time to invest in Tillamook property.
 Values will double in a few years.
