

Editorial Snap Shots.

Clean up the city. The grass, now that the cows are not allowed to chew it up, give the city an ill-kept appearance.

Garibaldi beach property appears to be on the horizon now that the railroad is to be built right away along the beach.

The travel in the direction of the depot on Monday is a good indication of what it will be when the railroad is finished.

Surely a devil of a time must be looked for at the tent meetings for the next few days by the look of the subjects to be discussed, and his Satanic Majesty must be prepared for a good shaking up.

It looks as though the city council is endeavoring to choke off the "water hog." It has had its snout in the taxpayers' pockets for a long time and the choking off process may become a difficult matter.

Surely the city marshal will not allow the night watchman and special policeman to stand about the city in that smart uniform without rigging himself up in like fashion. Anyway, it would be a great improvement to see the marshal dressed in a uniform.

The Oregonian says: "The output of cheese at Tillamook this year is expected to reach a total value in excess of \$500,000. Cheese is not very bulky freight and \$500,000 worth would not afford very much traffic for a railroad. Viewed from another standpoint, however, the value of the business is somewhat different, for \$500,000 can buy a great many train loads of freight which will be shipped into the country."

Ross, the Portland bank buster might take items. Hembree, the Sandlake murderer, thinks the judge erred when he granted a change of venue from Tillamook to Polk and not to Yamhill county. If the contention of the attorneys in the Hembree case holds good, then the change of venue from Multnomah to Marion county in the Ross case was also an error. But what a farce the courts of justice are made of when it comes to deciding cases on technicalities.

The snap shot man used to come in for a good deal of joshing because he published the news about the numerous "hot air" railroads, so much so that it was characterized as "Another of Haker's hot air railroads." But those who used to jolly us on that score don't do it any more. But we think that Charley Reynolds missed it on Monday when he failed to reproduce the train he constructed for a Fourth of July celebration some years ago when he had built teams for the motive power for his novel train.

Garibaldi beach, which is often called Nehalem beach, should be named "Tillamook beach." We make this suggestion now because that beach is able to accommodate more visitors than any beach in the county, consequently it would be more appropriate to call it Tillamook beach. There is not the least doubt but that the beach will become one of the most popular beaches in Oregon, and all things considered, and to get the name of Tillamook summer resorts before the public, call Nehalem or Garibaldi beach Tillamook beach.

Up in Linn county the near beer sellers have been fined for selling that delectable because it was actually beer they were selling to their customers, for the analysis showed that the product of the Salem Brewery Company was 3.58 per cent of alcohol and the Roseburg product about 3.34 per cent. Anything with over 2 per cent is a violation of law. As the remark is often heard that the near beer sold at the near beer joints in this county is beer of the usual vintage, these two little incidents surely ought to put the county officials next.

It is quite natural that every business man in Tillamook City is interested in every industry which helps to make this city a manufacturing center and creates a pay roll, something which the city must have before the population can become five thousand, ten thousand or twenty thousand. The prospects and possibilities for Tillamook City never looked brighter than they are today. The city is splendidly and logically situated to make an ideal, pretty and attractive city, and with a long pull, and a pull altogether this can be brought about in a few years. The Headlight is confident of this if the citizens would get the boosters' spirit and a little civic pride enthusiasm. Let our motto be: "Pull together to make Tillamook City an industrial center and a live, up-to-date city." It will not be long now before the railroad will be completed, and with the changed conditions it will bring, this city must pull together and do some hustling to sustain its supremacy. An effort will have to be made, and the Headlight is of the opinion that in offering this word of advice, now is the right time to get together and boost and boom Tillamook City with the object of making it a large industrial center and a busy business city. But this cannot be done by knocking or helping to pull down what supremacy the city has already acquired.

The excursion on the Pacific Railway & Navigation Company's railroad from Tillamook City on Monday afforded a great deal of enjoyment, and especially to some of the oldsettlers who, for the past twenty years have heard of all manner of schemes and propositions to give Tillamook railroad connections. The columns of the Headlight, from the first day it was published, contains "hot air" railroad schemes aglow, so much so that people lost all confidence and hope of seeing a railroad built into this county after so many years of procrastination until Mr. E. E. Lytle appeared on the scene and laid his plans before the people. There were doubting Thomases then, as there are now, as to when the road will be completed. However that may be, the excursion on Monday is an assurance that it is no "hot air" paper road, for it is going to convert Tillamook county into a great industrial center and into a great sea side or summer resort, when the beaches—such as Garibaldi—will have thousands of cottages and also thousands of visitors will flock into this county every year. As the railroad will traverse the whole length of Garibaldi beach, some nine miles in length, it will give those traveling on the cars an unobstructive view of the Pacific Ocean, as well as Nehalem and Tillamook Bays and the beautiful dairying and heavily timbered country, all combining to make this railroad one of the most attractive in the Northwest, with an immense amount of business whenever the last spike is driven. Notwithstanding the heavy down pour of rain on Monday, over a thousand persons took their first ride on the railroad, which afforded a great deal of enjoyment, but the most pleasure and enthusiasm and shouting will take place when the road is completed in commemoration of the day that Tillamook county is liberated from its bottled-up and isolated condition.

The Headlight is vigorously rasping its readers in a fruitless effort to create a sentiment in favor of appointment of a county expert road engineer. Men who have spent the greater part of 15 or 20 years building roads in this county can, if given leeway, build better roads, all things being considered, than a locally inexperienced expert, whose wisdom would be largely theoretical. What the county most needs is a board of commissioners with sufficient blood in its veins from congenial. H. M. Farmer can build roads; so can Dan Hickey. Because there is a standpatter liable to stray from the fold if not provided with a "lucrative position," is no reason why the county official payroll should be burdened with an useless high salaried official name.—Turner's Leaflet.

The above is a most unfair and illogical way to discuss the road question, for the Sage of Hemlock does not help the good roads movement in this county by publishing false insinuations. The Headlight has endeavored to avoid all personalities or politics thus far, feeling convinced that it would do the good roads movement a great deal of good to discuss it fairly and impartially, especially as there is such a conflict of opinion as to how roads should for should not be constructed. But here was the situation. There was a general complaint all over the county that for the large amount of taxes collected for road purposes, the county was not getting the good roads it was entitled to. Then it was that the Headlight undertook to show the cause and suggest a remedy in the management of road construction, for under the present system of road construction there is no practical and experienced person at the head of it, no data or maps showing the grades or location of county roads or bridges, no one to advise the court as whether a bid for contract work was reasonable or exorbitant, etc. And as long as large amounts of money are expended in resurveying and rebuilding roads which have been changed and rebuilt several times before, there is always going to be a leakage of road money, and from the opinion of those who are able to speak authoritatively, enough money have been wasted in Tillamook county to pay a big salary to an experienced engineer for the next hundred years. No matter who may differ with us as to the merits or demerits of the present system of road building in this county, a change will have to be made before the best results can be obtained. Other counties have had to get out of the old ruts before they obtained good roads, and it is only "standpatters" like the Sage of Hemlock who adhere to the antiquated and expensive methods of road building in this county.

Vote of Condolence. Hall of Tillamook Lodge No. 94. Tillamook Oregon, July 6th, 1909. To the officers and members of Tillamook Lodge No. 94, I. O. O. F. We your committee on resolutions beg leave to submit the following: Whereas, It has pleased our Supreme Ruler of the Universe to remove from our midst our beloved brother and co-worker, William H. Mills, and Whereas, We would give a fitting recognition of his many virtues; therefore be it Resolved, By Tillamook Lodge No. 94, I. O. O. F., that while we bow with mournful submission to the will of the Most High, we do not the less mourn for the beloved brother who has been taken from us. Resolved, That in the death of our brother, William H. Mills, this Lodge laments the loss of one who was ever ready to proffer the hand of aid and the voice of sympathy to the needy and distressed of our fraternity, an active member whose utmost endeavors were exerted for the welfare and prosperity of our Order, a friend and companion dear to us all, and a man whose upright and noble life was a lesson for us all. Resolved, That the heartfelt sympathy of this Lodge be extended to the family of Brother Mills in their affliction. Resolved, that these resolutions be spread upon the minutes of this Lodge, a copy transmitted to the family of our departed brother, and also a copy be sent to the Tillamook Headlight for publication. J. C. HOLDEN, CARLA PATZLAF, JOHN ASCHIM, Committee.

Council Meeting. A meeting of the city council was held on Monday evening, with Mayor T. Coates and Councilmen G. P. Wilt, B. C. Lamb and G. Bennett present. Bills allowed were as follows: W. T. Kimball..... 16 45 Herald..... 4 00 Webster Holmes..... 5 00 Headlight..... 1 80 T. J. Handy..... 15 00 E. G. Ford..... 50 25 Electric Light Co..... 107 35 John Williams..... 6 00 E. W. Stanley..... 3 00 Geo. P. Wilt..... 8 25 J. Drummond..... 3 00 Burr Ruger..... 6 75 F. Bush..... 3 75 H. McKinley..... 2 50 O. Schrader..... 15 00 Anna Van Pelt..... 1 00 U. G. Jackson..... 20 00 V. Stewart..... 6 75 B. Jolly..... 12 75 C. R. Hoevet..... 12 75 The Tillamook Lumber Mfg. Co. was awarded the contract for lumber. An ordinance for concrete side walks passed to its third reading. The following resolution was offered by Councilman Lamb and carried: "Whereas, the report of the Tillamook Water Commission shows that the present revenue from the city water system is ample to pay the interest on the bonds, together with running expenses and extensions, and that the amount of money raised by direct taxation for the current year is adequate to provide a proportional sinking fund; Resolved, that it is the sense of the common council that the amount provided for by taxation is all that the city should pay for hydrant rent, and the Water Commission is hereby tendered the tax raised for water purposes for the current year in full payment for all water used for fire and municipal purposes, and all bills rendered by said Water Commission for water rent for the year 1909, are hereby rejected."

Percheron Stallion Ville. The Registered Percheron stallion Ville will stand for the season 1909 in Tillamook at Tillamook City, Beaver and Hebo. Ville is the largest and best proportioned stallion in the county. L. E. SANDERS, Owner. Delay in commencing treatment for a slight irregularity that could have been cured quickly by Foley's Kidney Remedy may result in a serious kidney disease. Foley's Kidney Remedy builds up the worn out tissues and strengthens these organs.—J. S. Lamar, Tillamook; Hawk & Miller, Bay City.

J. R. HARTER, Real Estate and Financial Agent. Insurance. OFFICE: TILLAMOOK HOTEL.

THROUGH STAGE Tillamook to Sheridan Sheridan to Tillamook Every day except Sunday. First-Class accommodations. Rapid transit. HARRIS, MEYERS & HENDERSON, Proprietors. Leaves Sheridan at Hotel Sheridan at 6 a.m. Leaves Tillamook at Harris' Barn at 6 a.m.

Notice to Creditors. NOTICE IS HEREBY GIVEN.—That the undersigned has been by the County Court of Tillamook County, State of Oregon, duly appointed administrator of the estate of AXOM D. FARMER, deceased. All persons having claims against said estate are hereby required to present the same to me, duly verified as required by law, for allowance, at the office of H. T. BOSTON, in Tillamook City, Oregon, within six months from the date hereof. Dated this July 8th, 1909. J. J. MCGINNIS, Administrator.

A Bold Step. To overcome the well-grounded and reasonable objections of the more intelligent to the use of secret, medicinal compounds, Dr. R. V. Pierce, of Buffalo, N. Y., some time ago, decided to make a bold departure from the usual course pursued by the makers of put-up medicines for domestic use, and so has published his full and complete list of all the ingredients entering into the composition of his celebrated medicines. Thus he has taken his numerous patrons and patients into his full confidence. Thus far he has removed all secret ingredients from his nostrums, and made them known to all. He has shown that the formulas are of such excellence that he is not afraid to subject them to the fullest scrutiny.

Not only does the wrapper of every bottle of Dr. Pierce's Golden Medical Discovery, the famous medicine for weak stomach, rapid liver or biliousness and all catarrhal diseases, and that has been made in its own language, a full and complete list of all the ingredients composing it, but a small book has been compiled from numerous standard medical works, of all the different schools of practice, containing very numerous extracts from the writings of leading practitioners of medicine, endorsing in the strongest possible terms, each and every ingredient contained in Dr. Pierce's medicine. By letter to Dr. R. V. Pierce, Buffalo, N. Y., and requesting the same, from this little book it will be learned that Dr. Pierce's medicines contain no alcohol, narcotics, mineral salts or other poisonous or injurious agents of great value; also that some of the most valuable ingredients contained in Dr. Pierce's Favorite Prescription for weak, nervous, over-worked, "run-down," nervous and debilitated women, were employed, long years ago, by the Indian sages in their efforts to cure their squaws. In fact, one of the most valuable medicinal plants entering into the composition of Dr. Pierce's Favorite Prescription was known to the Indians as "Squaw-Weed." Our knowledge of the uses of not a few of our most valuable native medicinal plants was gained from the Indians. As made up by improved and exact processes, the "Favorite Prescription" is a most efficient remedy for neutralizing all the morbid influences, correcting displacements, as prolapus, intorsion and retorsion, overcoming painful periods, toning up the nervous system, and bringing about a perfect state of health. Sold by all dealers in medicines.

Table with 2 columns: Name and Amount. Includes W. T. Kimball (16 45), Herald (4 00), Webster Holmes (5 00), Headlight (1 80), T. J. Handy (15 00), E. G. Ford (50 25), Electric Light Co (107 35), John Williams (6 00), E. W. Stanley (3 00), Geo. P. Wilt (8 25), J. Drummond (3 00), Burr Ruger (6 75), F. Bush (3 75), H. McKinley (2 50), O. Schrader (15 00), Anna Van Pelt (1 00), U. G. Jackson (20 00), V. Stewart (6 75), B. Jolly (12 75), C. R. Hoevet (12 75).

THE POET SAYS "Beauty draws us by a single hair." This seems like something of an exaggeration on the part of the poet, if at least does not apply to men. The man with a single hair would not draw worth a cent, unless as a curiosity. People to look their best need hair, they need all they ever have. If the hair begins to go it is time to use IMPERIAL HAIR TONIC. This preparation saves hair. It stimulates the hair bulbs, cleans the scalp of dandruff or eruptions, and promotes new growth. Try it now. Price 50c. and \$1.00 a bottle. CHAS. I. CLOUGH CO., Reliable Druggists and Prescription Experts.

CHAMBERLAIN'S COUGH REMEDY CURES Coughs, Colds, CROUP, Whooping Cough. This remedy can always be depended upon and is pleasant to take. It contains no opium or other harmful drug, and may be given as confidently to a baby as to an adult. Price 25 cents, large size 50 cents.

Reformed Spelling. A commercial traveler tells us of an interesting notice exhibited in the window of a small shop in the west of England. It ran: OME GRONE UNE 6 A POTT. To upholders of the new orthography this should be interesting. It refers to home grown honey and its price.—London News. Extremely So. "But why did you eat the cake she baked?" "I wanted to make myself solid." "Did you succeed?" "I should say so. I felt like a ton of lead."—Cleveland Leader. Woman's Way. Blobs—Have you ever noticed that the average woman gets off a trolley car backward? Blobs—That's the way she gets off a joke too.—Philadelphia Record. Family Ties. Old Gentleman—Have you any family ties? Willie—Oh, yes, str. Father makes me wear all his old ones.

A MUTUAL SURPRISE. The Meeting Between an Ambitious Hunter and His First Grizzly. In "Sketches of Life in the Golden State" Colonel Albert S. Evans tells an amusing anecdote of an ambitious hunter who met his first grizzly bear in the woods near the site of the present town of Monterey. The hunter sat down to rest in the shade of a tree and unwittingly went to sleep. When he woke it was near sunset, and he sat up, rubbing his eyes and contemplating a return to his hotel, several miles distant. Just then a rustling and crackling noise from a clump of chaparral about 100 yards away attracted his attention. Out walked a grizzly bear, a monarch of his kind. He yawned, licked his jaws and then advanced toward the tree where our hunter sat, but evidently was unconscious of his presence. His grizzly majesty had proceeded about twenty paces when a female bear followed him, and an instant later a third grizzly followed her at a slow, shambling pace. The hunter sat spell-bound with terror as the procession came toward him until the forward grizzly was within thirty yards. Then, scarcely realizing what he did, he sprang to his feet and uttered a frenzied yell—yell upon yell! The effect was magical. The foremost bear sprang into the air, turned sharply about, knocked the female down, rolled over her, gathered himself up and bolted "like forty cart loads of rock going down a chute" straight for the chaparral again, the other two bears close at his heels and never turning to see what had frightened them. The hunter, seeing the enemy retreating, sprang to his feet and fled at top speed for the hotel, leaving hat and gun behind. The truth of his wild and startling tale was proved the next day by the numerous bear tracks of different sizes found in the marshy ground near by. But the three bears had gone off beyond pursuit.

DAMASCUS. An Isolated Oasis in the East. The situation of Damascus is remarkable—she stands on the banks of the vast desert where hems her in. Yet Damascus the sunset gleams on the low western hills miles away. These hills are the beginning of the great desert, and there is nothing but waste and the long roads and Bagdad. The prosperity of Damascus is the presence of two rivers, converted this spot of the olate and uninhabited smiling and well-watered Pharrar approaches early miles of Damascus, but canals and aqueducts are giving waters to the city. The Abana is the which the city's main water is obtained. Minerva full born from the abdominal rock at Ain Fijeh of the Anti-Lebanon, a course of ten miles in a river twenty to thirty four feet deep, its waters and ice cold, cascading everywhere, permeating every corner of the city, said, "literally there is no bazaar, khan, courtyard house which has not in stone fountain constantly running water supplied from Abana itself." Thus the fruitlessly saving her thirsty land, saves her row gorge till she can get out on the desert and can life at once in the cradle city.—Biblical World.

CHANGED HIS MIND. Influence of a Game of Man's Life. A New York pastor in his study one morning from a man with whom pleasant but not intimate. And the visitor out much ado that he had peculiar errand. "Some time ago," he knew, I lost my wife, I dren, I have no kind, very lonely in the world, by an unlucky speculation whole fortune. I am in companionship, without without money. I am again, and I have no joy is. I have deliberately before, to commit suicide. Tell you of my purpose in favor of you that when found you will make mention as your good judgment feeling toward me, may have come simply to and not to argue the question have settled for myself. In this last service I shall be full." The preacher said little too wise to undertake to do but he permitted the man that he had to say his tion. Then as he was going preacher called to him and "I have not seen you links for some time. You joy the game." "Yes," said the other. "Well, go out and play game today before you purpose." The man smiled for and went to the golf club living yet.—World's Work.

THE NEW ORE. One of Andrew Carnegie's Early Iron Experiences. Andrew Carnegie once stated that a short time after the starting of his first plant in Pittsburgh he had an odd experience with iron ore. "I was offered some ore that sampled about the usual grade, so far as I was able to judge from appearances, at a reduced price," he said. "I bought several thousand tons—a big order for those days. The second day after we commenced to run it the foreman came to the office and told me the new ore was of no account, that it did not flow and that the furnaces were so choked that they would have to be dumped unless some remedy was found. Those fires were built to last two years, and to dump them at this time would mean so heavy a loss as to practically put me out of business. A young chemist had called on me a few weeks before, and, while I had not paid much attention to him, I had kept his card. It occurred to me that he might possibly be of some help, though I confess I did not then see what chemistry had to do with the iron business. But I sent for him, and he came at once. First he examined the new ore and then the old that we had been running without difficulty, and finally he looked at the furnaces. To avoid delay he made a little test of the two ores right there. I had told him when he arrived that I felt sure the new ore was worthless and admitted my mistake in buying it. Of course I did this as I did not want him to think I was ignorant of the business. You can imagine my surprise, then, when at the conclusion of his test he quietly informed us that the new ore was so good we did not know how to run it. The fact was that the new ore contained 20 per cent more iron than the old, and all that was necessary to do was to add a proportionate increase of flux to bring about reduction."—American Industries.

Heat Conductors. Some substances conduct heat more freely than others, silver among the metals being the best conductor, and as a unit of measurement is taken at 1,000. Compared with silver as a conductor, gold is 981, copper 845, zinc 641, tin 422, steel 307 and wrought iron 436. Glass, wood, gases, liquids and resinous substances are bad conductors. Water is such a poor conductor that if heat is applied to the top it will boil at the top, while the bottom will remain cold.

Our civilization demands or less degree of mental and the abuse person. stantly encountering a phrase, some conventional which is absolutely "ity." "That's right," answered agent. "That's perfectly reminded of it every the front step where the mat with the word 'Washington Star." The Right Why do you speak of "ished artist?" "Because he told me discouraged and was profession. If that he's finished I don't know."—Chicago Post. The Painful fraudulent transactions much?" "I donno about that."—Baltimore American. Exercise and eating. Neither can ing without exercise.
