

WHY

"1892" Pure Spun Aluminum Kitchen Ware Is Better Than Agate or Enamel

Because it is sanitary and saves your money, time and health. The genuine spun aluminum ware, stamped with the Maltese Cross, will outlast any other cooking utensils and is guaranteed by the makers for twenty-five years.

It is pure, wholesome and hygienic—no danger of metal poisoning—cannot chip into the food, because pure SPUN Aluminum expands with the heat and will not crack, scale or peel like the old style ware.

Enamel ware is iron coated with colored glass. Heat causes the glass to chip off into the food in minute particles, which, taken into the stomach, is apt to cause serious troubles, including cancer, according to some medical authorities.

"1892" Pure Spun Aluminum Ware is made from solid Aluminum throughout—no coating of glass—and expands uniformly under heat. It cannot crack, scale, peel like the out of date enameled utensils; it does away with all possible danger from this source.

You owe it to yourself, and to every member of the household, to give this new and better kitchen ware a practical test. If it fails to do what is claimed for it, you get your money back without a quibble or a cross word.
