> Improving the Book of Job. I remember the relief with which, after long feeling the sway of Franklin's imperturbable common sense, 1 came upon a project of his for a new version of the book of Job to replace the old version, the style of which, says Franklin, has become obsolete and hence less agreeable. "I give," he continues, "a few verses which may serve as a sample of the kind of version I would recommend."

We all recollect the famous verse in our translation, "Then Satan answered the Lord and said. Doth Job fear God for naught?" Franklin makes this, "Does your majesty imagine that Job's good conduct is the effect of mere personal attachment and affection?"

I well remember how, when I first read that, I drew a deep breath of relief and said to myself, "After all, Just as civilization overcame the evils of savagery the Kingdom of God is ordained to remedy the faults of civilization.

There is a stretch of humanity beyond evils of savagery the Kingdom of Franklin's victorious good sense."—

An Awful Experience. A native diver descended into the water to see whether one of the piers, then in course of construction, had set. While he was engaged in this work a great iron cylinder subsided a little, crushing his hand between it and the masonry. When, on a signal being given, another diver came down he found his unfortunate comrade imprisoned under water without hope of escape. After a few moments of mute despair and harrowing uncertainty a speech-less decision was arrived at, and the newcomer proceeded with chisel and hammer to hack off his unhappy companion's hand at the wrist. The prisoner was thus liberated, but died soon
