Such a Thoughtful Woman. When the man and woman started down the subway stairs the man feit Warning That Came to a Granddaugh

in his pockets for tickets. "By George!" he said. "Isn't that a mob and buy tickets."

"Ob, no, you haven't," said the woman. "I have them. When I came downtown 1 remembered what you said about those people who buy only one ticket at a time making such a nuisance of themselves, so, as I had 15 cents to spare, I bought three tick-I have two left. We can go right on through."

So the man and the woman drifted along with the pushing crowd to the point where the ticket chopper held them up and demanded tribute. Then the woman looked in her purse for the tickets. Suddenly her face assumed a painful blankness.

"1-1 haven't got them," she faltered. "I was in such a hurry when I came through that I must have dropped all three tickets into the uptown box."-New York Herald.

### A Note That Was Paid.

History is constantly repeating it-self. Once upon a time a landlady in Washington called on President Andrew Jackson and told of a government clerk who owed her a big bill for board. In those days it was easy to have access to the White House President Jackson listened to her story and advised her to get a promissory note from the clerk and put it in bank. She replied:

"I've done that twice, general, and he won't pay even then." "Is that so?" said the president in

surprise. "Now you go and get his note and bring it to me. I simply want to see it, and I'm sure that the clerk will pay that note. Go and bring 't to me. The landiady did so, and soon return-

ed with the promissory note. The president turned it over and wrote across the back of it his own indorsement: "A, Jackson." That note was paid at maturity .-

Waves In Solid Metal. As illustrating the advances in metal-

lurgy and eugineering it has been demonstrated that solid metals may reveal by their structure the vibrations to which they have been subjected. In explaining this phenomenon experiments have been shown proving that a beautiful wave structure can be imparted to the surface of mercury by the vibrations of a tuning fork, and that even the surface of solid lead which had been subjected to similar vibrations possesses a structure resembling that of a vibrating surface -New York Sun. of mercury. A CURIOUS DREAM.

ter of Sir Walter Scott. An instance in which a dream was shame? I've got to stop in all this useful in preventing an impending catastrophe is recorded of a daughter of Mrs. Rutherford at Ederton, the granddaughter of Sir Walter Scott. This lady dreamed more than once that her mother had been murdered by a black servant. She was so much upset by this that she returned home, and, to her great astonishment and not a little to her dismay, she met on entering the house the very black servant she had met in her dream. He had been engaged in her absence. She prevailed upon a gentleman to watch in an adjoining room during the following

night. About 3 o'clock in the morning the gentleman heard footsteps on the stairs, came out and met the servant carrying some coals. Being questioned as to where he was going, he answered confusedly that he was going to mend the mistress' fire, which at 3 o'clock in the morning in the middle of summer was evidently impossible. On further investigation a strong knife was found hidden in the coals. The lady escaped, but the man was subsequently hanged for murder, and before his execution he confessed that he intended to assassinate Mrs. Rutherford.-London Standard.

#### GRAND CANYON.

An Ideal Place In Which to Realize the Insignificance of Man.

There is one place in this country where a man can step back not by hundreds but by thousands of years. back to the time when the continent was in the making. This place is the Grand Canyon of Arizona. There the Grand Canyon of Arizona. There the visitor sees a panorama in a million colors as the mists gather about the rugged peaks and the sunlight glistens on the metallic denosits of the cliffs. on the metallic deposits of the cliffs. A whole chaotic world discloses itself. Rock forms of uncanny beauty stand out on those unrivaled cliffs, and far down runs the river channel.

down runs the river channel. Stand on some ledge and realize the insignificance of man when compared with the handicraft of nature, watch a party of travelets threading their a party of travelers threading their way down some winding trail that clings to the great wall and see them grow smaller and smaller until they become mere specks in the great rift. then some idea is gained of this wonderful place. Yet the canyon is so symmetrical and so unlike anything else that it is with difficulty that one can acquire any notion of its immensity. Niagara poured in would hardly have the dignity of a mountain stream.

#### Humors of "Hamlet."

William Davidge related in his Footlight Flashes" that during his strolling days in England, when companies were small, he had on the same evening done duty for Polonius, the ghost; Ostric and the first gravedigger. and Edwin Booth remembered Thomas Ward dying in sight of the audience as the player king and being dragged from the mimic stage by the heels to enter immediately at another wing as Polonius, crying "Lights, lights, s!" The Worst.

"My wife has been having some trouble with her throat," confided a friend, "and I got pretty worried about it and sent for a doctor. He examined her and looked very grave, and that scared me even worse. So I said. 'Tell me the worst at once. Doc,' and he whispered, 'She will recover her voice.' And my wife overheard the question and the answer, and now Doc and I are both in bad."-Cleveland Plain Dealer.

Corn and Water.

To those engaged in the handling of grain the natural shrinkage of shelled corn while in storage and in transit is a matter of prime importance and often a source of dispute because of shortage reported at time of receipt at warehouse and a further loss at date of final sale. In order to determine the amount of shrinkage or loss of weight occurring in corn the department of agriculture bas conducted an experiment with 500 bushels of shelled corn. At the time of storage the moisture content was 18.8 per cent and at close of the test 14.7 per cent, or a loss of 4.1 per cent. The weight per bushel had decreased from

54.7 pounds to 50 pounds, and the total loss of weight was 1.970 pounds, or slightly more than 7 per cent.

#### Sir Roger de Coverley.

Sir Roger de Coverley was the name f a member of the imaginary club of twelve under whose direction Addison's Spectator was professedly published. He was an old school, bluff, good hearted English gentleman. The dance named after him is an English dance corresponding somewhat to the Virginia reei.

### THE City and the Country are bound together by the telephone line.

The farmer and his family use the rural telephone constantly, calling up each other and the market town on all sorts of matters and for all sorts of supplies and information.

City people also find the rural telephone of great advantage. A traveler from his room in the hotel talks with the farm folk miles away. Without the telephone he could not have reach them.

The farmer himself may travel far and still talk home over the Long Distance Lines of the Bell System.
