Ex-County Commissioner L. Parrish is in from Douglas County on a visit, and came here once more to enjoy the cool weather and renew acquaintance with old friends. He sees many improvements in Tillamook, and is surprised at the progress in good roads in the county. Mr. Parrish resides three miles from Roseburg, and as the heat was so intense and all vegetation parched up he came to Tillamook, and he says the green grass and green foliage looks good to him, as it does to most visitors who come here at this season of the year.

Oregon Law as passed by the last Legislature in regard to the carrying of lights on moving vehicles on the streets and public highways is: All vehicles including farmers' buggies and wagons are required to display one white light in front and one red light in the rear, when moving on the public highway between sunset and one hour before sunrise, the front light to be of sufficient brilliancy to reflect light 50 feet in direction vehicle is moving. All teamsters and others should at once provide for this requirement.

The new gasoline schooner Tillamook arrived in port Saturday evening for the first time while making her maiden trip down the Coast. She is one of the staunchest vessels that has ever come to this city. She is 123 feet in length, has 28 foot beam and 11 feet draught. She is equipped with two 155 h.p. engines and travels at a speed of 12 knots an hour. She was built for the Elmore Company and will be used exclusively in the carrying of freight, the vessel having a capacity of 400 tons. She can be made to carry passengers. Capt. Fritz Antonson, former first mate of the Elmore, has been placed on the Tillamook as master. She is a valuable acquisition to the Elmore fleet, as she is strongly built and well equipped for the Coast trade.

COAST IS LINE'S OBJECTIVE.
New Road Proposed From McMinnville to Bay City.

SALEM, Or., Aug. 4.—Articles of incorporation filed with the Secretary of State today by the Portland & West Coast Railroad & Navigation Company show plans for an electric road to be constructed from McMinnville to Bay City. The company is capitalized at \$1,000,000 and its principal place of business will be Portland.

The papers filed here show the road will leave McMinnville via Sheridan and Willamina along the Yamhill and Little Nestucca Rivers to Salmon River and to Siletz, and from either of these points to the Pacific Ocean. Among the towns that the road will pass through are Willamina, Grand Ronde, Tillamook, Sheridan and Pacific City. The company also wishes to furnish power and light for Sheridan, Willamina and Tillamook the power to be secured from the Little Nestucca. In addition, the company plans to operate a system of steamboats on the Yamhill, Nestucca, Siletz and Tillamook Rivers, and on Tillamook Bay and the Pacific Ocean. The incorporators are W. F. Prier, C. F. Hendrickson and Jay H. Opton.

Tillamook to Have Tannery.

Peter Remer, an expert tanner, and his partner, John Pankner, have purchased five acres of land along the Trask water front from A. W. and A. A. Atterbury and will put up a tannery as soon as they can secure the material. The land purchased is just across Trask River, south of this city and is situated so that it will be easy to secure hemlock bark for tanning purposes.

Mr. Remer and Mr. Pankner closed the deal with Mr. Atterbury the last of the week, paying \$600 cash, an acre for the land. They left, as soon as this was finished, for Portland, where they will purchase their material to start work with, after which they will return to this city and start construction work on their plant.

Mr. Remer has had over twenty-five years experience with tanning and knows what can be done in this country.

Bids Wanted.

Bids wanted to paint Maple Leaf school house, school district No. 10, with two coats of pure white lead and oil. Bids to be in by the 21st August which are to be left with Peter Heisel, school clerk. The Board reserves the right to reject any and all bids.

APPROVE JETTY PROJECT
Engineers Recommend That Tillamook Pay Half of Cost.

The River and Harbor Board of Army engineers have approved the report of Major Morrow on the proposed improvement of Tillamook Bay and have recommended to the Secretary of War that an expenditure of \$814,000 be made for the construction of the north jetty and for dredging and other work, looking to the creation of a 20-foot channel. The Board recommends that half the cost of this improvement be borne by the local community and half by the Federal Government.

WASHINGTON, Aug. 8.—Details of the recommendation of the Army Engineering Board on the proposed improvement of Tillamook Bay show that the cost of the north jetty will be \$558,000. In addition to this amount it will cost \$120,000 to dredge a 16-foot channel to Bay City, instead of a 20-foot one, and \$10,000 is allowed for contingencies.

The Board recommends that before any appropriation is made by the Government, the community must agree to pay half the cost of this work, or \$407,000, and also must bind itself to dredge a nine-foot channel from Bay City to Tillamook City, and have this channel completed within two years.

If the community meets these terms, the Board recommends that Congress appropriate \$200,000 cash, and authorize a continuing contract for the remaining \$307,000 of the Government's share of the cost.

BAR WORK AWAITS ENGINEERS REPORT.
Favorable Action on Nehalem Harbor Improvement Is Thought Probable.

It is strongly believed that Major Morrow, Corps of Engineers, U. S. A., will compile a favorable report on the proposed Government aid for the improvement of Nehalem Bay, Bar and River, as a result of a meeting held at his office yesterday but as such matters are not public until passed on at Washington, no intimation has been given out.

On behalf of the Port of Nehalem, Commissioners Alley and F. A. Rowe, the latter being secretary of the board, and C. H. Wheeler discussed the situation. Manager McLeod, of the Hammond Lumber Company, which has interests in the Nehalem region, was also present. It was pointed out that when work ends this season on the jetty about 2000 ft. of the jetty will have been constructed and approximately \$65,000 expended by the port.

It has not been determined whether two jetties will be built, but the plan is for the taxpayers to shoulder half of the cost. At low water there is a depth of five feet on the bar, which gives 12 feet at high tide. It is desired that at least 18 feet be available, and there are prospects that a jetty project will give even 20 feet.

The Coffee Pot Bank. The Up to the Minute Bank.

The savings idea is just as worthy, just as necessary to business success to-day as it was in 1740, but the methods have advanced during that time.

We now have the most modern savings convenience invented and respectfully invite the people of Tillamook County to call and see them.

In brief, let us tell you that it is a small HOME SAVINGS BANK which registers, or indicates, at all times, THE EXACT AMOUNT OF MONEY which has been placed in it.

The amount of money is plainly shown at all times, the amount of each kind of coin—Nickles, dimes, quarters and so on.

The thing that stimulates saving is to see the amount grow, to see it every day, right before your eyes. With one of our new banks this feature is the big thing and these banks have proven very popular wherever they have been placed.

GET ONE THE FIRST TIME YOU ARE IN TOWN, especially if you have children, for you know the adage, "as the twig is bent, so is the tree inclined," and the children will take unusual interest in these banks because THEY ARE SOMETHING NEW AND UNIQUE.

THEY ARE to be had FREE for we loan them to anyone who starts an account of \$1 or more.
