The Tillamook Headlight.

Editorial Snap Shots.

"Wake Up!"

It is just as well to take the bull by the horns and start in and improve the city. Longer it is delayed the city will be kept back, and we want to impress upon the business men and the property owners the necessity of getting busy, for if nothing is done to keep abreast with the other live, progressive business towns, Tillamook City will drag along in its present inactive mood and there will be nothing doing, while other places are going ahead with a rush. Let everybody get a good live move on with the object of boosting and improving the city. It is admirably situated at the head of navigation and in the heart of a rich dairying section, and with a little more ginger and push and pluck and public enterprise injected into our make-ups, Tillamook City can be made to compare with any of the up-to-date progressive towns. Wake up; and get out of the dead, do-nothing mood. Yes, wake up, and keep awake, and everybody get busy. If one fellow thinks that the Port of Tillamook should go right ahead and widen and deepen the water front right away, help him boost the long neglected improvement. Make the Port get a move on. If another fellow thinks that the City Council should take the bull by the horns and prohibit any more board sidewalks and pass a cement sidewalk ordinance, get into his band wagon and boost, too, for what a wonderful improvement it would be to see all the business streets and residence property with cement side walks and parkings. The mayor and city council can do a great deal to bring this about and set things going, if they would only do so, but it is natural, we suppose, for public officials to want the backing of the citizens. Back them up and get them started on this improvement, for the old plank side walks are in a rotten, dilapidated condition. It is impossible to have a clean and up-to-date city with old rotten side and cross walks. Get into the cement side walk band wagon and boost. Then there are the fellows who are wanting a sewer system, hard surface pavements, a public park, etc., all commendable objects, which should have a large following of boosters. Don't let it be said that Tillamook City is dead and gone to sleep and there will be nothing doing here until some of us are killed off or dies off. That's too long to wait, for in the meantime some new town will spring up and outdistance us as a progressive city, and, notwithstanding the natural advantages this city enjoys, it won't amount to very much if another city gets the start. Vie with one another who can be the biggest booster for Tillamook City. Don't "knock" because some fellow is brim full of the boosting spirit and is wanting to make things hum when things are half dead and alive and when there is no progressive movement pushing the city to the front. The future of this city depends up the energy of those who help to build it up and not those who won't do a thing or contribute a cent to help build it up. It is now an important time in the history of Tillamook City. The next few years there will be a struggle as to which is to be the largest city in the county. There is no telling, but there is a possibility of a town site being platted off near to this city, and nearer to the bay with all the modern improvements and cement pavements planned and provided for. Then the citizens will realize the lost opportunities they have allowed to slip by when they should have been straining every effort to make this the cleanest, attractive and most progressive, up-to-date city in the county. That is what will make city property valuable, but if our public bodies remain dead and inactive and won't do a blamed thing, and the property owners are lifeless and

don't want to see public or private improvements, mark down this, there won't be much doing in the old town when it has a real live competitor, for every live business man who can will pack up and go where a progressive spirit dominates the community. The Headlight has implicit confidence in this city if the citizens would only bestir themselves, and get out of the dead, do-nothing mood they have fallen into, and this article is written to arouse the citizens out of their long slumbers and to advise them of the importance of giving this city a good boosting shake up with object of bring about, without any further delay or procrastination, the improvements we have enumerated and many others we have not mentioned. In conclusion, the Headlight will say to one and all within the city limits: "Wake up, and see who can accomplish most to make Tillamook City a clean, wide-awake, progressive business, residence and manufacturing town!"

There was one innovation last week that we want to call our readers attention to, and that was a party of campers coming to Tillamook with its camping outfit in a motor truck. It was a wonderful improvement over teams and wagons and it will not be many years before this kind of travel will increase and become as numerous as automobiles. Some people may not be willing to admit it, the motor truck will eventually displace horse teaming, not only in large cities, but in the country districts. For instance, we see that other counties are hauling gravel and crushed rock at much less cost with motor trucks, and it is only a question of time when they will be used in this county and there will be but few horses used in road work. Not only so, but motor trucks will be used by the farmers of this county on the dairy farms, and instead of coming to town with wagon and team to do their trading they will use light motor trucks.

Deputy Prosecuting Attorney Willett thinks that justice is being defeated on account of perjury in the justice court. Do not worry Bro., for it looks to most laymen that it is the gentleman of the legal profession who advise witnesses to swear black is white and white is black and black is no color at all. Perjury on the witness stand in the justice and circuit courts of Tillamook county have become so common that a oath amounts to nothing. When a few of the perjurers have been sent to the penitentiary, and a few of the gentlemen "higher up" have been caught in the "muck rake," then, and not before, will this custom cease to any great extent. Mr. Willett have bucked up against witnesses who perjury themselves so many times that he ought to know by this time what to expect when he takes a case into court. A little house cleaning amongst the legal profession is what is needed, Bro. Willett.

If Oregon had a strong, energetic and influential delegation at Washington it would be an easy matter to modify the engineer's demand that the people shoulder half the cost of improving Tillamook, bar, which, considering everything, is too much to exact. It is unfortunate for Tillamook county that the Oregon delegation is weak in influence and not supporting the federal government, with three-fourths of the delegation lined up with the insurgent-democrat compact. This, as all will admit, does not help Oregon in getting appropriations, and it will not help Tillamook. The state had a good man in the senate when Charley Fulton represented Oregon, who, obtained considerable influence and respect, but the people of Oregon, swayed by a populistic wave, made a mistake when they sent to the senate men of little or no influence or standing.

The beautiful weather in Tillamook is a source of much enjoyment to the many visitors who have come to the county this year for their summer outings. With everything fresh and green, it is an agreeable contrast to them to be away from the heat, dust and parched appearance of other localities where Old Sol makes it tropical during the summer months. Truly Tillamook is a wonderful country when it comes to cool,

delightful summers, and next year, with one railroad complete, thousands of visitors will be coming and going throughout the summer. How to provide and accommodate them is going to take some hustling if more hotel accommodation is not provided.

At the next junketing trip of the Booster Editors, the snap shot man is glad to say that County Judge Homer Mason has accepted an invitation to join the party and offered the use of his auto. We feel sorry that we did not invite him to go to Nehalem, but the next trip there we'll see that he is an honored guest. The judge is taking a great deal of personal interest in county affairs, frequently visiting all parts of the county and is keeping in touch with what is going on, as well as ascertaining the needs of the people in the different road districts.

Congressman Lafferty is a "firt," and it was the sovereign will of the people of the first congressional district who sent a "firt" to Washington to represent them. And this is what is called the Oregon system.

With a little more boost and little more vim and push altogether, the improvement and building up of this city could be started right away and kept going.

What we have said about the City of Tillamook applies in some respect to all the county. Everybody wake up, get busy and boost.

**Sheriff's Sale.**  
In the Circuit Court of the State of Oregon for Tillamook County.  
Clay Daniel and Dora Daniel, Plaintiffs,  
vs.  
L. H. Kenney, Hallie Kopieske and Wm. Kopieske, Gust Nelson and Peter Nelson, Defendants.

NOTICE IS HEREBY GIVEN,—That in pursuance of an execution and order of sale duly issued out of and under the seal of the Circuit Court of the State of Oregon, for Tillamook County, to me duly directed, dated the 9th day of August, 1911, issued in pursuance of a judgment and decree of foreclosure and order of sale duly rendered in the above entitled cause and suit, wherein it was decreed and adjudged that the plaintiffs recover from the defendants L. H. Kenney, Hallie Kopieske and Wm. Kopieske, the sum of \$300.00, with interest thereon from July 1st, 1909, at the rate of 8 per cent per annum, for the sum of \$75.00 as attorney's fees, and for the costs and disbursements taxed at \$30.00, and said execution and order of sale commanding me to sell the premises and real property therein described as follows, to-wit: The South half of Lot 3, and the South half of the North East quarter of the South West quarter of Section 7, all in Township 2 North of Range 9 West, Willamette Meridian, excepting a strip 100 feet in width across said land heretofore deeded to the Pacific Railway and Navigation Company.

NOW, THEREFORE, by virtue of said execution, judgment, order and decree, and in compliance with the commands of said writ, I will on Friday, the 8th day of September 1911, at the front door of the Court House, in Tillamook City, Tillamook County, Oregon, sell at public auction to the highest bidder, for cash in hand, all the right, title and interest which the above named defendants, or either of them had on July 1st, 1909, or since had in and to the above described real property, to satisfy said execution, judgment, order and decree, interest and costs, and all accruing costs.

H. CRENSHAW,  
Sheriff of Tillamook County,  
Oregon.  
Dated August 10th, 1911.

**A King Who Left Home**  
set the world to talking, but Paul Mathuka, of Buffalo, N. Y. says he always KEEPS AT HOME the King of all Laxatives—Dr. King's New Life Pills—and that they're a blessing to all his family. Cure constipation, headache, indigestion, dyspepsia. Only 25c at Chas. I. Cough's.

**Hay Fever, Asthma and Summer Colds**  
Must be relieved quickly and Foley's Honey and Tar Compound will do it. E. M. Stewart, 1034 Wolfram St., Chicago, writes: "I have been greatly troubled during the hot summer months with Hay Fever and find that by using Foley's Honey and Tar Compound I get great relief." Many others who suffer similarly will be glad to benefit by Mr. Stewart's experience. Chas. I. Cough Co.

Now, people, men and women are suffering from kidney and bladder trouble than ever before, and each year more of them turn for quick relief and permanent benefit to Foley's Kidney Remedy, which has proven itself to be one of the most effective remedies for kidney and bladder ailments, that medicine science has devised. Chas. I. Cough Co.

**FOLEY'S KIDNEY PILLS**  
FOR RHEUMATISM, KIDNEY AND BLADDER

DOWNING STREET, LONDON.

It Bears the Name of a Clever Man From Massachusetts.

Downing street, London, where are the British colonial and foreign offices and the official residence of the first lord of the treasury and where cabinet councils are held, perpetuates the name of a clever man from Massachusetts. Those were the days before the Fourth of July had any significance in American annals, and George Downing, the first scholar in the first public school in Massachusetts and the first graduate sent out by Harvard college, came to England and became a chaplain in Cromwell's army.

By a remarkable stroke of fortune he was sent to represent England at The Hague when Europe was trembling before Oliver, and during three distinct eras in England's history he held the office of British ambassador at the Dutch court. He was as popular or as clever under the Merry Monarch as under the protector and the Commonwealth, and it came to pass in the reign of Charles II. that the man from Massachusetts was granted a great tract of land at Westminster, where he built huge mansions and laid out Downing street.

To this day Downing's street is Downing street still, and though George Downing is forgotten, there is no name in the British empire which is more familiar to us than his.—St. James' Gazette.

GREEN TURTLES.

The Youngsters Have a Perilous Time After Being Hatched.

Concerning the great turtles of the southwest Indian ocean a traveler says: "The chelonian, or green turtle (Chelone mydas), is an animal of considerable economic importance to the atoll, for it still occurs in the vast herds which are so often described by early voyagers in the tropics. There appear to be two distinct groups—one resident and small in numbers, the other migratory and visiting the atoll to breed in numbers impossible to estimate.

"The latter arrives in December, and from then to April the sea seems alive with turtles. The females seek the small sand beaches and then ascend them with the rising tide, pushing themselves laboriously above high tide mark. Holes are then dug in the sand by means of the fore flippers until a satisfactory one is obtained, and the eggs, 200 in number, are buried, the turtle returning to sea immediately.

"After forty days the eggs hatch almost simultaneously, and the young turtles dig their way up out of the sand and go down to the sea in a long procession, in the course of which they offer an easy prey to their enemies, the frigate birds and herons. Once in the sea, sharks and other large fish eat them, and only 10 per cent reach maturity."—Chicago News.

**A Strong Recommendation.**  
"We are not taking on any new traveling men just now," the safe manufacturer said. "Business is rather dull in our line."

"Well, if you need one let me know," said the applicant for a job. "I'd rather sell your safe than any there is in the market. It's the best."

"Are you an expert?"  
"Yes, sir. I know all there is to be known about safes."

"Ever deal in them?"  
"No, sir."

"Ever work in a factory?"  
"No, sir."

"How do you know ours is the best?"  
"Because it takes longest to break into it."

"How do you know that?"  
"I'm a reformed burglar."

He got the job.—Chicago Tribune.

**An Immense Flower.**  
The largest of all the flowers of the world is said to be the rafflesia, a native of Sumatra, so called after Sir Stamford Raffles. This immense flower is composed of five round petals of a brickish color, each measuring a foot across. These are covered with numerous irregular yellowish white swellings. The petals surround a cup nearly a foot wide, the margin of which bears the stamens. The cup of the rafflesia is filled with a fleshy disk, the upper surface of which is covered with projections like miniature cows' horns. The cup when free from its contents will hold about twelve pints. The flower weighs about fifteen pounds and is very thick, the petals being three-quarters of an inch.—Scientific American.

**Rhinoceros Horns.**  
The horns of the African rhinoceros sometimes grow to the length of four feet. In olden times rhinoceros horns were employed for drinking cups by royal personages, the notion being that poison put into them would show itself by bubbling. There may have been some truth in the idea, inasmuch as many of the ancient poisons were acids, and these acids would decompose the horny material very quickly.—London Telegraph.

**Adaptable.**  
Client—Before we decide on the house my husband asked me to inquire if the district is at all unhealthy. House Agent—Er—what is your husband's profession, madam? Client—He is a physician. House Agent—Hum—er—well, I'm afraid truth compels me to admit that the district is not too healthy.—London Opinion.

HEALTH AND FOOD.

A Doctor's Idea of a Perfectly Balanced All Year Round Diet.

That every one is more or less susceptible to tubercular trouble is a matter on which all old fashioned medical authorities are agreed. They tell us that we may pass through a phase and out again without knowing it. According to Dr. T. Y. Hull in the Dietetic Gazette, there is only one thing very certain, and that is that if we keep in good health or adapt ourselves to a perfectly balanced diet the danger is slight.

He advocates a reduction of vegetable food, relying more upon butter, meat and nuts. Here, of course, one has to face the increased danger of tubercular meat, itself probably a large contributory cause of consumption.

This is Dr. Hull's idea of a perfectly balanced diet, calculated to keep the average individual in perfect health all the year round: The basis for the diet is found in meat, eggs, milk, butter, bread, potatoes and fruit. It consists daily of two quarts of milk, five eggs, four ounces of beef, one and one-half ounces of butter, two ounces of nuts (pecan), four ounces of bread, three and one-half ounces of rice, three ounces each of potatoes, peas and oatmeal, one ounce sugar, one ounce raisins, one apple and one orange.

FOLLIES OF SCIENCE.

Seven Problems That Have So Far Baffled Man's Mighty Brain.

The history of science has seven problems that men in all ages more or less have tried to solve, but which have finally been given up by all. Today they are called follies.

The usual list comprises the following: First, squaring the circle; second, duplication of the cube; third, trisection of an angle; fourth, perpetual motion; fifth, transmutation of metals; sixth, fixation of mercury; seventh, elixir of life. Some lists put the philosopher's stone for the last three and then add astrology and magic to make the seven.

To the unlearned it would seem possible to draw a square which shall be exactly equal in area to a given circle, which is the first problem in the list, but we are told by the highest authorities that it is impossible.

Since the discovery of radium it is claimed that the change of one metal into another has been accomplished, but it is yet too early to dogmatize about the matter.—Chicago Journal.

Learn to Think on Your Feet.

It does not matter whether one wants to be a public speaker or not, a person should have such complete control of himself, should be so self-reliant and self-poised, that he can get up in any audience, no matter how large or formidable, and express his thoughts clearly and distinctly. In all ages oratory has been regarded as the highest expression of human achievement. Young people, no matter what they intend to be, whether blacksmith or farmer, merchant or physician, should make it a study. Nothing else will call out what is in a man more quickly and more effectively than the constant effort to do his best in speaking before an audience. When one undertakes to think on one's feet and speak extemporaneously before the public the power and the skill of the entire man are put to the severest test.—Success Magazine.

At Sea on Land.

A clergyman who had neglected all knowledge of nautical affairs was asked to deliver an address before an audience of sailors. He was discoursing on the stormy passages of life. Thinking he could make his remarks more pertinent to his hearers by metaphorically using sea expressions, he said:

"Now, friends, you know that when you are at sea in a storm the thing you do is anchor."

A half concealed snicker spread over the room, and the clergyman knew that he had made a mistake.

After the services one of his listeners came to him and said, "Mr. —, have you ever been at sea?"

The minister replied:

"No, unless it was while I was delivering that address."

Rivulets and the Rivers.

All are to be men of genius in their degree—rivulets or rivers. It does not matter, so that the souls be clear and pure, not dead walls, encompassing dead heaps of things known and numbered, but running waters in the sweet wilderness of things unnumbered and unknown, conscious only of the living banks, on which they partly refresh and partly reflect the flowers, and so pass on.—Ruskin's "The Stones of Venice."

Abrupt.

Judge Stevens had a slight hesitation in his speech, but that affliction did not prevent his using long words. One morning his dog Snip got into a fight with another dog. Tapping him with his cane, Judge Stevens exclaimed, "D-d-dis-con-t-t-tin-ue."—Success Magazine.

Amended.

"James is a physical wreck."  
"Why, he used to have a strong constitution."  
"Yes, but the doctors have amended it several times."—Cleveland Plain Dealer.

Nothing raises the price of a blessing like its removal, whereas it was its continuance which should have cost us its value.—Hannah More.

**General Bate's Unlucky**  
General William B. Bate, who saw after distinguished service half of the south was general then United States senator. In a battle was attended by three horses were shot from him.

"It was a habit of the old said a man who knew him continually carry an umbrella in his month, but few of us noticed it ever knew the reason. He failed to smoke the weed, standing side by side with a horse er asked General Bate for a cigar, he had a cigar, but no general lit a match and handed it to the tobacco er. A came hurtling through the severed the smoker's head body. The terrible tragedy of bloody field was why in all that followed the surviving was never known to lit a cigar.

Our First Steam Warship

The Fulton, which at the construction in the early times classed as a "steam battery," first United States warship propelled by steam. She was under the superintendence of Commodore Matthew Galbraith Perry at a time of her completion in 1815 regarded as one of the world's wonders by way of naval architecture. She was at sea. The Fulton was of no little speculation on the part of European powers, for at she was looked upon by other nations as all but invincible. When the der of the sea was put in Commodore Perry, then in rank of commander, was put in command of her, and he presently was called the "father of the navy." The Fulton was primarily for defense of New York, but she served as well to illustrate the practical utility of power for warships.—New York

Silent Lawyers.

It is almost a maxim among a lawyer's real importance to him is in inverse ratio to his name in the papers. The truth is, the years of great importance seldom adays appear in court. In the great lawyer was the silent lawyer; today the great lawyer made literally at the bar. Today are made in the offices of the scrappers neighboring on Wall in England a visit any day to courts will be repaid by the some famous K. C. assisting in a dramatization of the trial from "Alice in Wonderland." He might prowl for a month in the precincts of the New York courts without encountering a lawyer name would signify anything able to the historian of the New bar.—American Magazine.

Curious Justice.

A Paris contemporary gives a glimpse of the administration of justice among the natives in the Niger territory, which for might be compared with some count of the means adopted by local authorities in Laputa, to discover conspirators. If a village make a dejection of being put into the essence about a ground pepper. The light is lightly applied to the eyes. suspect weeps he is considered. But the murder test is an element upon that of theft. The man of the district draws a water, into which he puts some. Then he takes a cow's tail and perges" the eyes of the suspect. If the man becomes blind is pronounced a murderer.

For Testing Gold.

The acid used by jewelers to test gold is extremely powerful and be very carefully handled. To prevent any considerable quantity of acid being spilled a specially made bottle is employed. This is made of glass and has long pointed glass rod which down the center of the bottle. An article of jewelry is to be tested the stopper is simply removed the article is touched with the glass rod to which a very quantity of acid has adhered. not affected by the acid, but the metal turns green.

One Way to Arbitrate.

Commodore Vanderbilt used to arbitrate his tenants' disputes. One day two farmers called on him for function of arbitrator. The Commodore before consenting to arbitrate will you abide by my decision? The farmer, a hard headed fellow, answered thoughtfully: "Well, commodore, I'd like to know what it is first."

A Cruel Apologist.

"Mr. Bliggins takes himself seriously," said the critical man.  
"Well," replied Miss Cayton, "can't blame him. To be thrown into a cruel world with no more than a few possessions would be a serious thing for anybody."—Washington

Her Tact.

Howard—Did she refuse to see man? Coward—Well, in a direct way. She told me she wanted anything she could get.—Harper's Bazar.

Fixed to no spot is happiness nowhere to be found or ever.

Popo.
