

ROYAL BAKING-POWDER

Absolutely Pure

To have pure and wholesome food, be sure that your baking powder is made from cream of tartar and not from alum.

The Label will guide you

Royal is the only baking powder made from Royal Grape Cream of Tartar

No Alum No Lime Phosphates

High School Flashes.

The first month of school has just ended and we find that things have proceeded with as much smoothness as possible so far. At present there are sixty-seven students in the High School.

A different order of things is being followed by the faculty at present from that which was followed last year. No one has a chance to miss tests but instead of moving seats each month, the students have been allowed to remain where they are. It was thought at the beginning of school that no grade would be given on deportment but because of the childish actions of some who should have cut their eye teeth years ago, it was found necessary to readopt the old plan. As a result some have grades that are nothing to be proud of.

In our mind one of the greatest things that the High School has ever attempted is self government. This plan was adopted in the school by a unanimous vote after a constitution, having self government as the central feature had been drawn up by a constitutional committee of which Elbert Ginn was chairman, with Oscar Aschm and Benly Stam as assistants. The plan is that, instead of the faculty having to punish those who disobey, a Student Body Court composed of two representatives from each class be given the judicial power. However, the court acts with the principal of the school on all matters.

The officers of the Student Body this year are, Read Bain, president, and Benly Stam vice-president. The President Cabinet is composed of Daisy Goodspeed, Sec. of State; Myron Blanchard, Sec. of the Treas.; Elbert E. Ginn, Student Body Attorney and Oscar Aschm, Student Body Marshal.

On Monday morning Mr. Bain officially appointed the members of the Student Body Court, although the appointment had been made known before and the court had had one sitting. The members of the court are Myron Blanchard and Ethel Gaylord, from the senior class; John Ebinger and Paul Edgar, from the junior class; Leslie Harrison and Alfred Boquist, from the sophomore class, and Ruby O'Neal and Helen Stam, from the freshmen class.

The court tried its first case last Friday evening, when a case of truancy came up for hearing. The sentence was, that the offenders should make a public apology for their misconduct. The matter seemed to be taken as a joke at first, but when it was found that the court would stand for no foolishness, the provisions of the sentence were complied with.

The High School is planning to give a Halloween party on next Saturday night at the school house. The committees are working hard and at present it looks as if the proposition will be an entire success.

A new fraternity and seriority are among the new things this year. It is hard to determine what the name of the "Frat" is as it seems to be rather a secret matter at present. The emblem is a small banner with a big B upon it and a safety pin of still larger dimensions which fastens it to the shirt of the wearer.

We should judge by the emblem that the name of the "Frat" is the Fuzzy B Blanket. However, the name may be disclosed in the near

future. The purpose of this "Frat" is to oppose the work of the latest sorority by studying the most up-to-date works on domestic science in order that a full knowledge of the culinary department may be secured, and to get down to facts, in order that the members may learn to live in single sadness. We hope that the members of the "Frat" will use their knowledge of chemistry in disclosing some way of turning spruce logs into pumpkin pies and monthly tests into apple cider and bon-bons.

The young ladies have had their sorority organized for some time and we have been able to secure its name, which is "The Haberdashers." We judged from the name what the purpose of the club was but thought it best to make sure, and by questioning the President, Ethel Gaylord, we found that it was a combine of young ladies who were working together to break the heart of the over zealous lover; to rid the world of cats; to promote legislation which would make it necessary for a man to be worth \$10,000 before being married; and to produce face powder and paint that will not wash off. The president states that if they succeed with the last named purpose there will be no need of any of the members ever getting anxious about their \$10,000 legislation.

Words of Praise for Court.

To the Editor Tillamook Headlight.

Please allow me a small space to say I am not in favor of electing a county court and then interfering by petition or threat of recall with them in the discharge of the duties devolving upon them. I am in a position to know of some of the hardships imposed on them by cranks, kickers and jawbone dealers, and I for one say out loud it is time for every man that has the interest of our county at heart and desires to see the good roads movement proceed, to stand by our court who has done so much good work under difficulties that at times seemed insurmountable. If these gentlemen (the court) think it best to raise our tax and have the big timber interest pay three dollars to the farmer's one, I say go it. I truly believe good roads will go farther in developing our county than any other one thing and to construct them it takes good tools, good money and good men. We have some of the first; can raise the second; and find plenty of the third. If these progressive hinderances would put in the time at work that they do to finding fault with those who do work, they would probably be able to pay all taxes required to carry on a well begun road work.

C. H. WAYMIRE.
Cloverdale, Ore., Oct. 23, 1911.

Notice.

Beginning with the 1st of September, the following prices will be charged by the physicians of Tillamook.

Confinement, \$30 and mileage (normal case).
City visit, \$2.00.
Visit out of town, \$2.50.
Visit out of town, three miles, \$3.00; one dollar for each mile over three miles as usual.

Commercial Club Meets.

At the regular monthly meeting of the Tillamook Commercial Club on Monday evening, with President Webster Holmes in the chair, the following resolution was adopted:

Whereas the citizens of Tillamook County are fully alive to the incalculable benefits to the whole community by reason of the completion of the Pacific Railway and Navigation Company's line from Portland to Tillamook City, and

Whereas they are also fully alive to the fact that the President of the Company, Mr. E. E. Lytle, has encountered many and serious obstacles and difficulties in completion of the same, but has, with rare pluck and genuine grit, surmounted them as they presented themselves and has through his indefatigable efforts, energy and enterprise, completed the road for which we have been hoping and praying for the last twenty years, and

Whereas there may be some difficulty in operating trains over the newly completed portions of the track during the coming winter, but it is of vital importance that train service be instituted between Portland and Tillamook City as early a date as possible, even if somewhat irregularly:

Therefore, be it resolved by the Tillamook Commercial Club, voicing the unanimous sentiment of this part of Tillamook county, and we think of the entire county, that we do respectfully request Mr. Lytle to use his best efforts and characteristic energy in operating trains to carry passengers and mail, as nearly upon a regular schedule as possible between Portland Oregon, and Tillamook City, to begin by the first of November, 1911, or as soon thereafter as is at all possible and we do hereby pledge our undivided support in such an undertaking and pledge him that we will not become impatient an account of any interruptions in the service if any there be, on account of slides and severe storms, but will be satisfied with the best service he can give us under existing conditions, and in a spirit of sympathy with him and for his enterprises, urge him to undertake this service for which we will consider ourselves under everlasting obligations, and

Be it resolved that we urge other Clubs to adopt similar resolutions to these as well as urge other organized bodies to do likewise, and

Be it further resolved that a copy of these resolutions be forwarded to Mr. Lytle forthwith.

Dairy Farm Wanted.

Wanted by an experienced dairy man, a dairy farm to rent, with 20 to 30 cows. Apply to this office.

You are not experimenting on yourself when you take Chamberlain's Cough Remedy for a cold as that preparation has won its great reputation and extensive sale by its remarkable cures of colds, and can always be depended upon. It is equally valuable for adults and children and may be given young children with implicit confidence as it contains no harmful drug. Sold by Lamar's Drug Store.

Ducks Will Be Flying.

YOU SHOULD BE READY

For them with a good grade of SHELLS. We have the Shelby Shell and in all sizes of shot. Can save you money on your shells in any quantity. Have sold several thousand shells this season in case lots. Get our prices.

THE SUN DON'T SHINE ALL THE TIME,

Therefore you will need something to keep you dry.

DUXBAK OUTING CLOTHING WILL DO IT.

DUXBAK COATS \$6.00
DUXBAK PANTS 3.50
DUXBAK HATS 1.50
DUXBAK CAPS 1.50

King & Smith Co.

WEIGHED THE ELEPHANT.

A Problem Which a Hindu Prince Was Able to Solve.

There is a story often told in India of Shajee, a Hindu prince, who on a certain occasion showed himself almost as clever as Archimedes.

A high official had made a vow that he would distribute to the poor the weight of his own elephant in silver money. But the great difficulty that at first presented itself was the mode of ascertaining what this weight really was. All the learned and clever men of the court seemed to have endeavored in vain to construct a machine of sufficient power to weigh the elephant.

At length Shajee came forward and suggested a plan which was simple and yet ingenious in the highest degree. He caused the unwieldy animal to be conducted along a stage specially made for the purpose by the water-side into a flat bottomed boat. Then, having marked on the boat the height to which the water reached after the elephant had weighed it down, the latter was taken out and stones substituted in sufficient quantity to hold the boat to the same line. The stones were then taken to the scales, and thus, to the amazement of the court, was ascertained the true weight of the elephant.—Exchange.

FIGHTING FISH.

In the Rage of Battle They Turn From Dull to Brilliant Colors.

In the gardens of Singapore it is the custom to stock the ponds with all manner of queer fishes, many of them of the fighting variety so dear to the heart of the orientals. This species of fish is so combative that it is only necessary to place two of them near each other, like fighting cocks, and perhaps to irritate them a little to bring on a lively conflict.

They at once charge each other with fins erect, at the same time changing color in their excitement from the dull color of gray greens to brilliant reds and blues. Indeed, confinement in close quarters is not needed to arouse their combative propensities.

Place two glass jars close together, with one of these fighting fish in each and they will at once swim round and endeavor to charge each other through the interposed glass.

Even a single fish seeing himself reflected in a mirror will dart at his own image and, irritated all the more by his failure to reach his supposed enemy, will assume the most brilliant hues. Seeing his reflected antagonist do the same, he will redouble his efforts to reach him.—Exchange.

Photographs For Lawsuits.

One call for services a professional photographer dislikes above all others and that is to get an order for a picture that is to be used as evidence in a lawsuit. The photographers who are most in demand for this purpose are the busiest ones, those who make a specialty of taking pictures of news events for the papers and magazines. When any one wants photographic evidence he is likely to remember the name of some firm of professionals that he has seen often in print and asks them to do the job.

"We wouldn't mind that sort of work so much if taking the picture was all that there was to it," said one of these picture men. "We get \$3 or \$5 for the picture. Later we get a subpoena, and we have to send to court the man that took it, to swear that he recognizes his work, that he took the picture, that he never was arrested and a lot of other fool stuff that uses up a day's time. Therefore we never touch such a job knowingly."—New York Sun.

A Curious Locomotive.

The Darjeeling-Himalayas railway is one of the most curious in the world. It is of two foot gauge and on account of the steepness is full of loops, curves and spirals, many of the curves having only seventy feet radius. Some of the gradients are as high as one foot in twenty-eight. A special type of locomotive, the Garratt, had to be made for it at Manchester. This locomotive was required by the specifications to be able to travel on reverse curves not exceeding sixty feet radius, with only twenty feet of length of tangent between the curves. The engine consists of a frame supported at each end by four wheeled bogies, each of which is described as a miniature locomotive without boiler. The boiler is carried on the frame between the bogies.—Youth's Companion.

Both Wrong.

Sandy and his master drove up to the small station as the train approached. "Here's yer train, sir," said Sandy. "That is not my train," replied the master, who had his own ideas about correct speech. "But it's the train I am going by." But it happened to be a special train and didn't stop at the station, whereupon Sandy exclaimed, "We're baith wrang, for it's neither your train nor the one ye're gaun by, but it's the one that's gaun by you."—Exchange.

Betrayed.

"Say, mamma, can Anna see in the dark like a cat?"
"Why, child, what makes you ask such a question?"
"Oh, last night when Cousin Car was here I heard Anna say in the dark room, 'You must really behave oftener, Carl.'"
—Exchange.

Better.

"Your wife never sings any more. Did she lose her voice?"
"No; she found her senses."
—Toledo Blade.

Self indulgence deprives a man of everything that might make him great.

THE COMSTOCK LODE.

A "Strike" That Was Destined to Influence the World's Finances.

"You've struck it, boys!" Thus said Henry Paige Comstock to Peter O'Riley and Patrick McLaughlin, who were his fellow prospectors in a search for gold in Six Mile canyon, near the present Virginia City, then capital of Nevada. The date was June 10, 1859. In that remote spot in the American wilderness by these three obscure men was made on that day a discovery destined to affect the current of American politics for a score of years and to have for long a disturbing influence on the world's finances.

The thing which was "struck" on that June day of 1859 was the vein covering what came to be known as the Comstock lode, in which were hidden the richest deposits of silver ever found anywhere on the globe. Their development years afterward simultaneously with that of the silver mines of Colorado started the downward flood in the price of silver which broke the old ratio between the money metals, changed the monetary system of the leading nations from the double to the single gold standard, incited the movement, beginning in 1877 under the leadership of Richard P. Bland, for the reopening of the mints to silver on the same terms as to gold, led hence to the passing of the Bland-Allison limited silver coinage law of 1878 and to that of the Sherman silver bullion deposit act of 1890 and was the issue which split the two great parties and made havoc among the smaller ones in 1896, resulting in the act of 1900 which gave statutory recognition to the gold standard in the United States.—Atlantic.

THE EARTH'S CHANGES.

What the Fossil Remains of Plants and Animals Tell Us.

There was a time when even the polar regions bloomed with many of the splendid and varied forms of life that now adorn the tropics.

The fossil remains of these ancient forms preserved in the bosom of the rocks carry us back perhaps millions of years in the earth's history and show clearly what wonderful revolutions the surface of the globe has undergone since the first plants and the first animals appeared upon it.

Who would think of meeting a rhinoceros nowadays on the prairies of northwestern Canada unless perhaps a traveling menagerie should pass that way? Yet at one time, as discoveries of recent years prove, a creature closely resembling the rhinoceros of India and Africa dwelt in that now comparatively cold, snowy and barren region.

Remains of these extinct ancestors of an animal that in our day thrives only in the tangled tropical forests and under the hot equatorial sun have been found buried in the Canadian rocks, where now the cold blasts of winter blow over treeless plains and sweep the flanks of ice incrustated mountains.

The rhinoceros of that remote age was no less formidable a beast than its descendants, for the skull of one of the skeletons discovered is three feet long, while some of its teeth are four inches across.

The fossil remains of many other forms of animals have been found in the same region within recent years.—Harper's Weekly.

Charms of Labrador.

People are not apt to think of Labrador as a particularly delightful land to dwell in. No tourist thinks of going there for a summer vacation. Yet if Mr. H. H. Prichard's impressions, gathered while hunting big game, are to be accepted, Labrador possesses charms of scenery that it would be difficult to match elsewhere in the world. The words that he quotes from Salta-ta, a "Yellowknife Indian," best indicate the nature of these scenes: "You say the kingdom of heaven is good, my father, but tell me, is it better than the land of the musk ox in summer, when the lakes are sometimes misty and sometimes blue, and the loons cry often? That is good, my father, and if heaven is better I shall be willing to dwell there until I am very, very old."—Youth's Companion.

One Man Overcomes a Nation.

Jean Angot, who died in 1551, was a French merchant in the African and East Indian trade. When some of his ships had been taken by the Portuguese he fitted out an armed fleet that kept Lisbon blockaded until the government of Portugal indemnified him for his losses. At one time he was immensely wealthy, but he lost in speculations and in money lent to the king of France, and the closing years of his life were passed in destitution.

The Truthful Milkman.

Mr. Youngwed—We never get any cream on the milk. Why is it?
Mrs. Youngwed—It's all right, dear. I've spoken to the milkman about it, and he explained that they fill the bottles so full with milk there's no room left for any cream on top.—London Telegraph.

No Hope.

"Well, how are you getting on with your admirer, Alice?"
"Oh, I have given up all hope now. We got stuck in a lift for three hours yesterday, and even that didn't make him propose."
—Fliegende Blätter.

The Penalty.

"There seems to be a penalty provided for everything but stealing a man's daughter."
"There's a penalty for that too."
"I'd like to know what it is."
"Hard labor for life."
—Houston Post.

Those who can command themselves command others.—Bazill.

FELL AMONG THIEVES.

And the Old Man Didn't Know What Set Was the Worst.

An old man from rural England with his wife was on a holiday in London and decided on an evening to go to a theater. He looked up the advertisements in the papers and selected a house where "All Baba and the Forty Thieves" was being played. It was a "cheap" house, the price of stalls being given as two-and-sixpence. The farmer was surprised, however, on arriving at the box office to be met with a demand for 6 shillings for the tickets. The extra sixpence per seat was explained, was for booking. Then he was called upon to pay 50 pence for a program, and the attendant who showed him to the seats also asked for sixpence, in addition to which there was a shilling to be paid for hats and coats being taken care of in spite of his protest that they could take care of them themselves. A footstool was brought by his wife and was accepted without suspicion that it would be charged for, but the attendant who brought it demanded another sixpence, and finally opera glasses were handed to them and payment of another sixpence was requested. Then the farmer went in search of the manager and, finding him, said in a tone of deepest disgust: "You may do what you like with these tickets. There are so many thieves in front of the house that we don't think we want to see the forty on the stage!"—London Answers.

THUNDERSTORMS.

They Kill Over 300 Persons a Year in Madagascar.

Thunderstorms never occur in the arctic regions, and even the north of Scotland very seldom suffers from such a visitation. The nearer you get to the equator the more frequent and severe are the electric manifestations. In parts of Central Africa the average of thunderous days rises to the annual total of 250 per annum.

Yet there are curious exceptions. Java and Sumatra, both intensely hot climates, there are but ninety storms yearly, and in Borneo only fifty.

The Gold coast of Africa has only sixty a year, which is less than even in Florida, though the latter country is outside the tropics.

In Jamaica there is a thunderstorm every day during the rainy season, which lasts for five months. The storms almost always occur between midday and 3 in the afternoon.

Perhaps the most astonishing fact with regard to thunderstorms is that the island of Mauritius, which is only 550 miles east of Madagascar, has, on an average, only one thunderstorm in eighty years. Yet in Madagascar lightning is more destructive than anywhere else in the world, the annual death roll being over 300.—Pearson's Weekly.

Costly Privacy.

Although a waiter, he was very busy, so when he perceived that the young couple who had been assigned to his table had many matters to discuss and confidential under consideration, he retreated to a respectful distance and stared at the opposite wall. The restaurant proprietor disapproved of that humanitarian attitude.

"Don't stand away back there," said "Go up and hang over that low's chair back for awhile."
"Oh, no," expostulated the waiter. "They want to talk."
"Of course they do," the proprietor retorted. "That is why I want you to butt in. Every time you come and they will send you to the kitchen for fresh order to get you out of the way."
—New York Times.

Grim Relics.

A prison sale is held annually in Paris. The articles offered for sale are the clothes of murdered people, the instruments with which the crimes have been committed and the other things which have belonged to the deceased prisoners. Articles which have been taken to the prefecture of police and have not been claimed are also sold. The proceeds go to the Paris prison house. Unclaimed jewelry is usually bought by ordinary brokers, but the articles which have belonged to criminals, especially those who are notorious, are bought at high prices.

Dodging a Difficulty.

"Are you going to send the Spanish girl a wedding present?"
"No, old Sparkler and I had a wedding yesterday."
"That's too bad. What was the cause?"
"I really can't afford his friends. He has five marriageable daughters."
—Cleveland Plain Dealer.

A Fast Talker.

The orator spoke about the things he had not said, the things he did not believe and the things he would not say. "That fellow," observed the audience, "is talking at the rate of about one note an hour."
—Judge.

A Faithful Likeness.

Sapleigh—I really don't think a photographer caught my expression, do you? Miss Keen (looking at picture). I don't see any.—Boston Transcript.

A Strong Player.

Mother—What do you think you are making out of my daughter's piano? Professor—About a dollar a lesson. The piano holds out.

His Monopoly.

"He has unbounded faith in himself."
"In other words, he has a monopoly of the faith in himself, eh?"
—Record-Herald.
