A Certain Silver Sixpens. Beau Brummel had a very odd way of accounting for the sad change which took place in his affairs at this time. "He used," observes one of his friends at Caen, "when talking about his altered circumstances, to say that up to a particular period of his life everything prospered with him and that he attributed his good luck to the possession of a certain silver sixpence with a hole in it, which somebody had given him years before with an injunction to take good care of it, as everything would go well with him so long as he did and vice versa if he happened to lose it. The promised prosperity attended him for many years while he held the sixpence fast; but, having at length in an evil hour unfortunately given it by mistake to a hackney coachman, a complete reverse of his previous good fortune took place and one disastrous occurrence succeeded another till actual ruin over; took him at last and obliged him to expatriate himself."—Captain Jesse.

Origin of the "Three R's."
The famous toast to "the three R'sreading, 'riting and 'rithmetic"-was made by Sir William Curtis, lord mayor of London, in the year 1795 and for many years one of the wardens of the tower. What made it more ludicrous was that he proposed it at a dinner given by the London board of education. It was received with great applause and drunk amid much merriment. At the time it was recognized as a jest, but was afterward taken up in earnest by the mayor's detractors, who have handed his name down to posterity as a blundering ignoramus. A writer has now come to his defense and says that when he was a boy an aged member of the board of education assured him that Sir William knew better and that he really used his famous alliteration as a jest. To many people, however, the story will always ound better when it is based upon the belief that Sir William was really se-

A Record Hailstorm.

One of the worst hailstorms ever known in the United States occurred Sept. 5, 1898, in Nodaway county, Mis-The path of the storm was about three miles wide and eighteen miles long, its greatest violence being felt over a region of four square miles east of Clarmont. At one point in this region the fall of hail was so heavy that a drift unprotected by artificial means remained lying on the ground for four weeks after the storm. At the end of that time people in the neighborhood were found gathering the hail for the purpose of making ice cream. During the storm cylindrical pieces of ice were picked up four inches long by about two and a half in diameter. The growing corn was practically all destroyed. In a field of eighty acres only one stalk was left standing .- Chi-

A View of Jefferson Davis. Very straight and tall, thin, with a

clear cut, clean shaven, distinguished face, with a look half military man, half student, with a demeanor to all of perfect if somewhat chilling courtesy; by temperament a theorist, able with the ability of the field marshal or the scholar in the study, not with that of the reader and master of men, the hardest of workers, devoted, honorable, single minded, a figure on which perfect nor always just, bound in the toils of his own personality, but yet an able man, who suffered and gave all, believed in himself and in his cause and to the height of his power labored for it day and night. Such a man was Jefferson Davis .- Mary Johnston in "The Long Roll."

Didn't Tire Him.

He had taken pains when he applied for work to assure the farmer that he never got tired. When his new employer went to the field where he had put the man at work he found him lolling on his back under a tree.

"What does this mean?" asked the farmer. "I thought you were a man who never got tired.'

"I don't," said the hired man calmly. "This doesn't tire me."-Exchange.

His Tribute to His Wife The following obituary notice published in a German paper:

"Today red, tomorrow dead. 🖿 was with my wife, who only days ago 'was springing over bear and table,' and was buried yester During her life she was a live X for a U. For that reason everybody can tell the extent of my sorrow; so young and so merry, and buried. What is human life? I have said to myself repeatedly within the past few days, and also yesterday the church yard when I paid the seston, who will also keep the grave mound in order. So cheerful a wife I sel overflows. shall certainly never, never find again, and therefore my sorrow is a righteous one. I wish that heaven preserves any man from a similar sad fate, and thanks for the flowers, as well as the choir, for the grave hymn, which went through and through me, but was very well sung. The Giraffe as It Feeds. The singular shape of the giraffe is adapted to its habits of life. It feeds on the young branches and top shoots of the trees, and its long fore legs and neck enable it to browse at a far greater height than any other animal, says the Philadelphia Inquirer. In feeding it stretches up its neck and with its long prehensile tongue, which it can protrude to a surprising distance, hooks down the tender shoots and leaves into its mouth. But the creature's peculiar form, though enabling it to feed on what it likes best, is sometimes the cause of its destruction. The fore legs are so long that to reach the ground it has to stretch them wide apart and bend down its neck in a semicircle, and while drinking in this defenseless attitude the lion or leopard springs upon it and overpowers it before it can recover itself.

Splinters In the Fingers.

When you get a splinter in your finger it is sometimes possible to get at it by pressing the point of a needle under it, but unless you have deft fingers or a pair of tweezers you may not be able to pull it out even then. A new pen nib is a very good substitute for a pair of tweezers. Lay the nib over the splinter so as to hide it. Then press down hard enough to separate level with the splinter and allow the nibs to close again they will take hold. and you can draw the splinter out. Remember that any metal thing that is to be applied to a wound, such as a needle, penknife or pen, should be passed lightly through a flame first, so as to disinfect it. A gas jet or a match will do .- New York Sun.

Love and the Drama. A periodical devoted to the drams plends for plays based on some emo tion other than love. The difficulty in producing such plays is that every play must have a hero, and in making a hero the playwright as well as his audience almost inevitably adopts the view expressed 2,000 years ago by a scribbler on one of the dead walls of Pompeii, "He who has never loved a woman is not a gentleman."-Exchange.

Having need of some small change, the mistress of the house stepped to the top of the back stairs.

"Bessie," she called to the maid be low, "have you any coppers down there?"

"You used to say," she complained, "that I was your sunlight; that the world was gloomy when you were not

in my presence."
"I know," he sadly replied; "that was before you had acquired the habit of telling me candidly every few minutes what you thought of me."-Chicago Record-Herald.

Thought Concentration.

Professor Elmer Gates performs a very interesting experiment by immersing his hands and arms to the elbows in separate vessels filled with water just to the point of overflowing. By withdrawing his thought absolutely from one hand and concentrating it man, who did not easily mistabe on the other he so expands the blood vessels in the latter by sending an extra supply of blood to it that the water in the vessel in which it is overflows quite perceptibly. To further prove this power of thought concentration be transfers the thought from one hand to the other without changing their positions until the other ves-

> Jamaica's Booby Eggs. Trade in booby eggs is one of the sights of Kingston, Jamaica. Long ago the British seamen gave the name 'booby" to several of the species of gannets, because these fowls are regarded as stupid. The eggs are gathered in vast quantities on the islets at certain seasons of the year and taken to Port Antonio by the boatload. The arrival of a boat with booby eggs is the occasion of no little excitement among the negro women, who buy them by the box and then sell them by retail chiefly in Kingston, though they re also sold in other towns on the island. Though sold mostly by the dozen to housekeepers, booby eggs are also peddled, hard boiled, on the streets of Kingston, salt and pepper being pro-

Everybody in Middle Bay knew that Mrs. Captain Liscomb was talking about making a visit to her married daughter in Cincinnati. She had been talking about it for two years, but age and the natural timidity of a woman unused to travel had postponed the great event from month to month until the neighbors began to wonder whether it would ever come to pass. So one morning, when Uncle Billy Evans met Captain Liscomb in Eccles' store, there was a twinkle in his eye as he asked:

"When's Mis' Liscomb going out to Ohio, Daniel?"

"Don't ask me!" returned the captain, a little peevishly. "I don't know nothin' about it. If I tell her to go she says I want to get rid of her. If I tell her to stay at home she says word!"-Youth's Companion.

Begging the Question.

The phrase "begging the question," or in Latin "petitio principii." signifies the treating of a proposition as a fully demonstrated fact when it is actually only a premise or statement brought forward and not yet proved. In other words, to beg the question is to assame something to be true, in order to evade the task of bringing forward the necessary argument to show its truth. -Uncle Remus' Magazine.
