

OREGONIAN NEEDS CORRECTING.

Tillamook County Manufactured 3,500,000 lbs. of Cheese Valued at \$550,000.00.

The Oregonian on Sunday underestimated the output of cheese from Tillamook County, making it only 2,000,000 pounds, while it produced 3,500,000 pounds last year, and the same amount the previous year. The receipts from last year's cheese was \$550,000, not \$400,044.84 as stated by the Oregonian. The articles goes on to state "that the output of cream cheese from the county around Tillamook Bay exceeds 2,000,000 pounds yearly." For the information of the Oregonian we will state that there is not one cheese factory on Tillamook Bay, the great bulk of the cheese manufactured is in the vicinity of Tillamook City, which is in the heart of the rich dairy section, and out of the 3,500,000 pounds of cheese manufactured 3,000,000 pounds was shipped from Tillamook City.

Another most glaring mistake is to be found in this:

"With the growth of the industry, however, it has been found desirable and more profitable to clear the pasture land, so that an acre which formerly furnished pasture for 30 or 40 cows often furnishes pasture for 30 or 40."

Will the Oregonian please inform us how many cows should be kept in Tillamook County if this is correct? According to that calculation a dairyman with 150 acres of land would be able to support a herd of 6,000 cows! As the price of dairy land is estimated by the number of cows it will support and the market price of butter fat, or cheese, it wouldn't take the wide-awake Tillamook dairymen long to figure out how much a farm was worth when each acre would support from 30 to 40 cows! The Headlight man rubbed his eyes and read and reread this startling information, but at last came to the conclusion that the wonderful productivity and fertility of Tillamook county soil had enormously increased while he was taking a night's sleep and the Oregonian "scooped" the startling news and published it to the world that each acre of dairy land in Tillamook county would support from 30 to 40 cows! Next, please.

And still another:

"At present the Maple Leaf Company handles close to 25,000 pounds of cream daily, the Tillamook about 22,000 pounds, and the Fairview slightly more than 20,000."

This is something new by way of information to those who have been living in the back woods of Tillamook County to be told that the large output of cheese from this county is made from cream. Here is a mathematical problem for the cow puncher editor of the Oregonian: If Maple Leaf, the Tillamook and Fairview cheese factories have 61,000 pounds of cream daily, how many pounds of milk would there be produced in the vicinity of those factories? Certainly it is astounding information to Tillamookers, who have manufactured somewhere near 50,000,000 pounds of cheese since the industry was first started here. Will someone please give the Oregonian a friendly hunch and put it next, that it is milk without any cream taken from it, that Tillamook cheese is made from. A practical farmer at the head of an agricultural department would be a valuable addition to the staff of the Oregonian.

Grand Chancellor Here.

Frank E. Wrightman, Grand Chancellor of the K. of P. Lodge; L. R. Stinson, Grand Keeper of Records and Seals; J. T. Knight, of the Insurance Department; J. B. E. Bourne, editor of the official paper; Judge Wm. M. Cake, past Grand Chancellor, came to this county last Sunday to visit their fellow lodge members. Sunday afternoon and Monday forenoon were spent at Bayocean, after which the party came to this city with the exception of Judge Cake, who was compelled to return to Portland because of business matters.

Mr. Stinson gave the statement Monday evening that "at the next convention of the Lodge a report will be given showing an increase in membership in this state of over 1000." He said in conclusion, "the order is in the best condition that it has ever been."

The local lodge entertained the gentlemen Monday evening in their hall, when a banquet was served and speeches were given by a number of the leading members.

Church of Christ.

At 10 a.m.—Bible School, with classes for all. This is a good place for you to spend an hour if you do not attend elsewhere come and we will do you good.

11 a.m.—Preaching by the pastor. Subject, "Has Christ Failed?"
3 p.m.—Junior C.E.
7 p.m.—Christian Endeavor.
Preaching Service at 8 p.m.—Subject, "Five Fools."
A cordial invitation is extended to you to attend these services.
R. E. JOPE, Pastor.

BAYOCEAN WORK STARTS

Potter Realty Company, Reorganized, Lets Paving Contract.

A reorganization of the Potter Realty Company, which is promoting the Bayocean project, went into effect last week an active campaign of development is the immediate plan under the new system.

T. B. Potter, the former president of the company will retire from active connection with the company, but still retains his interest in the project. T. Irving Potter, H. L. Chapin and George M. Hyland constitute the new management and board of directors, all three having been actively identified with the company, practically from the inception of the Bayocean project.

Mr. Hyland, of the board of directors, represents a number of business men of Portland who while they are taking part in the project are holding their identity in the background.

One of the first steps in the campaign of development, which contemplates a completion of the project along the lines originally proposed, was the signing Friday morning of a contract with J. O. Hoyt, the local representative of the Warren Construction Company, for 15 miles of hard-surfaced pavement at Bayocean, which when completed will represent an outlay of \$200,000. Construction of the proposed new hotel is in immediate contemplation and it is expected that this will be completed early next year in time to accommodate the beach travel of the season of 1913.

BAR VIEW BEACH RESORT IS OPENED.

Large Crowds Attend the Two Days Festivities.

Close on to five hundred people attended the formal opening of the Bar View beach resort last Saturday and Sunday. The rooms were all taken long before night and large crowds of people were compelled to either walk the beach during the night or lay down by the side of some bon fire and secure what little sleep that they could with a light rain falling.

Saturday night the Tillamook Concert Band of this place conducted an excursion from Tillamook to Bar View, where they were to furnish the music for the dance in the new pavilion. All of the boats that left the railroad dock were heavily loaded. In addition to the launches there were large numbers of people who went in machines. Every car in town that could be secured was carrying passengers to and from Bar View and most of them were running all night.

When the band reached the beach they went at once to the pavilion, which was crowded to its fullest extent, from the very first until it was nearly morning many having no other place where they could stay. During the latter part of the night, after the band boys had become tired, Dr. Perkins orchestra furnished the music for the dance.

On Sunday morning large numbers again left for the beach both on board the boats and on the train. The launches were completely filled and there was a large crowd on board the train. The base ball boys went along expecting to play ball with the Baltimore Dairy team at Bar View. However, upon reaching that place it was soon found that there was no grounds where base ball could be played and it was raining, they started home as soon as the Henrietta could arrive.

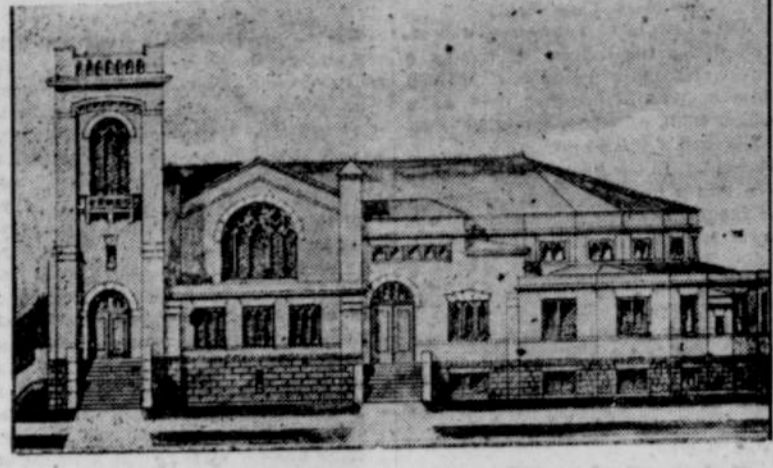

In the afternoon a large crowd again gathered at the pavilion, where the band boys were playing for the dance. Nearly all of those who live in town returned either on the train or on the boats, Sunday evening.

Mrs. Rudolph Schiffman Dies at Bay City.

Mrs. Viltha Mary Schiffman, aged 72 years, passed away at the home of her son, Solon Schiffman, near Bay City, Wednesday, July 10th, at 4:30 p.m. The cause of death was peritonitis.

Mrs. Schiffman came to this county about four weeks ago to spend the summer visiting with her two sons who live at Bay City. At the time of her arrival here it seems that her health was very poor, but it remained about the same until a few days ago, when it failed her entirely. Undertaker R. N. Hinkle prepared the body for removal to the old home in Clay Center, Kansas, Thursday, and Myron Schiffman, son of the deceased, accompanied it to the east, leaving on the Friday morning train.

A husband and five children, two of whom live at Bay City, remain to mourn the departure of the wife and mother.

The sealed bids will be opened today for the construction of the new Christian Church building which is to be erected this summer at the corner of Third Ave. East and Fourth Street. The inside dimensions of the new edifice will be 75 x 95 feet and the full seating capacity will be over 900. The class rooms will be separated from the main auditorium by means of rude screens, which may be raised so as to make the rooms a part of the main room. Each of the classes will have a room separate from the others. The main auditorium together with the galleries will be 50 x 50 and will seat about 450.

The basement will be arranged for church socials and will have a full equipped gymnasium, and kitchen and a large dining room. The church is endeavoring by this to eliminate the excuse of many young men that they must frequent the saloons because they have no other place to go. There will be a large space left for the choir, and back of this there will be a place prepared for the installing of a large pipe organ at some future date.

On the lot adjoining the property on which the church will be built, there will be a play ground fitted with courts for tennis, croquet, basketball, and hand ball for the larger children and with swings and other devices for the smaller ones. "This playground is to be made public," is the statement of Rev. Jope, of the Christian Church. The present church building and parsonage have been moved from the property which was purchased recently from the Church by the Tillamook Hotel Co. A deal in which a lot belonging to I. F. Larson was purchased by the trustees of the church for \$800, was confirmed the last of the week and the parsonage has been moved onto it. This property is located on Fourth Street just across from where the new church is to be built. It is the intention to have the new structure ready for occupancy by the first of November.

BITULITHIC AWARD AT HILLSBORO.

Citizens and Taxpayers generally seem to appreciate what good Streets do for a city.

Hillsboro continues in the progressive column. At the recent meeting of the city council in that city, another contract was awarded for street pavements. Bitulithic will be used.

Ever since the first bitulithic pavement was laid in Hillsboro, the citizens and taxpayers have gradually been lining up in favor of paved streets everywhere, and now it is almost a universal sentiment. A good share of the credit is due to the character of the pavement used—bitulithic—and to the council which originally named this kind of pavement for the streets of Hillsboro.

This contract was awarded to bitulithic in the face of the fact, like all bitulithic awards necessarily are, that many other "just as good" pavements were offered at 50 to 100 per cent less.

The people of Hillsboro very wisely prefer "let the other fellow pay for the experimenting."

Oregon Agricultural College.

This great institution opens its doors for the fall semester on September 26th. Courses of instruction include: General Agriculture, Agronomy, Animal Husbandry, Dairy Husbandry, Bacteriology, Botany and Plant Pathology, Poultry Husbandry, Horticulture, Entomology, Veterinary Science, Civil Engineering, Electrical Engineering, Mechanical Engineering, Mining Engineering, Highway Engineering, Domestic Science, Domestic Art, Commerce, Forestry, Pharmacy, Zoology, Chemistry, Physics, Mathematics, English Language and Literature, Public Speaking, Modern Languages, History, Art, Architecture, Industrial Pedagogy, Physical Education, Military Science and Tactics, and Music.

Catalogue and illustrated literature mailed free on application. Address: Registrar, Oregon Agricultural College, Corvallis, Oregon. School Year Opens Sept. 20th.

Prices for Hogs.

Up to 225 lbs., 10c., dressed.
225 lbs. to 275 lbs., 8 1/2c. dressed.
275 pounds and over, 7c.

JAMES T. MOORE, Pastor.

Lake Lytle, TENT CITY.

Is now open for CAMPERS, Tents are 12 x 10, furnished for light-house keeping. EXCEPT BEBBING.
Fine mountain water piped to the door, grocery store on the grounds and every thing convenient. Fine fishing and boating on the Lake.
RATES, \$2 per day or \$10 per week.
Address, AUSTIN & WELCH, ROCKAWAY, OREGON.

Now is the time to have that group picture made.

Let us show you our special display of attractive new styles. We are perfectly equipped for making group pictures and will please you with the quality of our work.

Monk's Studio.

Skeletons For Doctors.

The mode of preparing skeletons for the use of the medical profession is a very delicate operation. The scalpel is first called into requisition to remove the muscular tissues. Its work being done, the bones are boiled, being carefully watched meanwhile that they may not be overdone. After this caustic procedure they are bleached in the sun. Even the spots of grease are sure to appear when they are exposed to heat. The French treat these with ether and benzine, securing thereby a dazzling whiteness, which is a distinguishing mark of their skeletons.

A brass rod with all the proper curvatures supports the spinal column. Delicate brass wires hold the ribs in place. Hinges of the most perfect workmanship give to the joints a graceful and lifelike movement. Cleverly concealed hooks and eyes render disjunction at pleasure possible. The whole construction plainly indicates the care and skill of an artist and connoisseur.

She Was Willing.

The man was one of the sort that women like because of their awkwardness, ugliness, masculinity, gaucherie and all that. His feet were too big for his legs, though his legs were enormous. His chest was too big for his head, though he wore a seven and one-half size in hats. He was like a St. Bernard pup, but older than any young dog. He had never been at a regular dance before. The girls looked like delicate flowers to him, and he hardly dared to touch one of them. He looked to the girls like a new idea, and they hoped he'd arrive. He did after a minute or two. He waddled across the floor, made a stand in front of the bluest girl and said, more or less grammatically:

"Can I dance with you?"
She was rattled, but she answered with a smile:
"I don't know, but I like you enough to let you try!"—Cleveland Plain Dealer.

A Mighty Orchestra.

One of the most remarkable concerts ever held was projected by P. B. Moore of Boston as a celebration of the peace following the war between the states. A remarkable feature of the concert was the grand orchestra, composed of 1,004 pieces, the largest orchestra ever assembled in this country. It consisted of the following instruments: One hundred and fifteen big violins, 100 second violins, 65 violas, 65 cellos, 8 double basses, 4 flutes, 8 clarinets, 8 oboes, 8 bassoons, 12 horns, 8 trumpets, 9 trombones, 12 tubas, 10 drums, 25 piccolos and 20 Eb clarinets, 50 Bb clarinets, 50 Bb cornets, 75 Bb cornets, 75 Eb alto horns, 25 Bb tenor horns, 50 tenor trombones, 25 bass trombones, 25 Bb baritones, 75 Eb bass tubas, 50 small drums, 25 bass drums, 10 cymbals and 10 triangles.

Whistler and His Tailor.

"Curious enough," wrote Mortimer Menpes, "whenever one came in contact with Whistler one entirely forgot one's own affairs and became completely occupied with his. The fit of the master's coat was far more important to me than my own artistic work at the tailor's Whistler would give an elaborate description of how a certain coat was to be made, and the tailor would carry out his directions literally. But no sooner had the man accomplished the work than Whistler would say: 'This is all wrong. How dare you say that it is what I told you to do? I am a painter. It is not my business to make coats. That is your province. Therefore you should have led me on to do what you knew to be right.'"

The Imperial Eagle.

The Imperial eagle, the largest of the species known, flies to a height of from 10,000 to 15,000 feet. It is a native of South America, and its habitat is among the lofty mountains of that country. Its power of flying to high altitudes is only exceeded by the condor of the Andes, which is said to have attained a height of six miles, or within one mile of the greatest height ever attained by a balloon. The eagle sails in the air at heights ranging from three to five miles and when seen to soar upward by an observer on the earth's surface disappears from sight in about three minutes.

Old Time Virginia Taverns.

So universal in the early days in this country was the custom of free entertainment that it was a law in Virginia that unless there had been a distinct agreement to pay for board and shelter no pay could be collected from any guest, no matter how long he remained. In the few taverns that existed the prices were low, about a shilling a dinner, and it was ordered that the meal must be wholesome and good.

Settlement Work.

"Come into a fortune, didn't he?"
"Yes, a big one."
"What's he doing these days?"
"He has become interested in settlement work."

Hidden.

Dianna Dawson—I'm trying to get back to me poor old mother. She hasn't seen me here for ten years. Old Gableman—I guess that is the truth. Why don't you wash it?

Hard Luck.

First Actor—I hear you turned your back on me when you were on tour.
Second Actor—We tried to, but they wouldn't let us until they got their money back.

We cannot always oblige, but we can always speak obligingly.—Voltaire.

Low Round Trips East.
