Beasick Fish.

Fish become ill and die from seasickness when carried long distances upon the ocean, says Popular Mechanics Magazine. For that reason many rare and interesting specimens captured in tropical countries cannot be brought alive to northern points for public inspection. In a recent shipment of 400 fish from Key West to New York more than 100 died on the way and the remainder arrived in a condition that required beroic treatment to save their lives. According to this it may be presumed that the agony endured by hupractically nothing for at least one day before being taken on board. The galvanized iron tanks in which the fish are carried contain from ten to fifty gallons of sea water kept at a constant temperature of about 60 degrees by steam from the ship's boilers during

Very Scientific Punishment, Here is a charming description of corporal punishment as given in American schools and prisons. It is taken from one of the leading newspapers of Italy much as it probably astonished the

"The punished youth, being unable to see whence the blows come, suffers all the more and is soon under subjection." -New York World.

A Legal Comedy.

The conservatism of the law as it is practiced in Philadelphia received an illustration recently in the loud sumnons by the clerk of the court to William Penn, Richard Penn and John Penn to appear in court in order that a certain title to land of which they were the original grantors could be cleared of an encumbrance.

No one suggested to his honor, the president judge of common pleas No. 4, that William Penn had been dead 200 years, and his sons Richard and John nearly as long. There was no need of such a suggestion. Every one within hearing of the clerk's voice knew that it was a vain show and an empty form that was proceeding before their eyes. Through the idle crying of the names of men two centuries dead the demands of the law were satisfied and a title was cleared .- Case and Comment.

When an Animal Chokes.

Few emergencies which arise on the farm are more easily dealt with than choking. In cases of this kind we have never known the white of an egg, when poured down the sufferer's throat to fail to give relief. To administer the egg quickly and surely it should be broken into a wide mouthed bottle, When such a bottle is not quickly available, however, any ordinary bottle can be used by using a funnel to get into it, and where a funnel is not at hand one can be made by rolling a piece of paper into the desired shape. When everything is ready the animal's head should be raised as high as possible, the bottle thrust far back in the throat and the contents emptied. The egg will immediately pass down and make the throat passage and the offending obstacle so smooth that it will pass on into the stomach.-Farm and Fireside.

She Didn't Like It.

Even unto honors, if they must carry them alone, children in America would not be born. A little girl who lives in my neighborhood came home from school in tears one day not long ago Her father is a celebrated writer. The schoolteacher, happening to select one of his stories to read aloud to the class, mentioned the fact that the nuthor of the story was the father of my small friend.

"But why are you crying about it, sweetheart?" her father asked. "Do you think it's such a bad story?" "Oh, no," the little girl answered; "It is a good enough story. But none of ries! Why do you, daddy? It's so pe

cullar!"-From "The American Child." Turning Away Wrath,

The garden gate was open, and a small boy paused to look at the daffodils within easy reach. He was just about to grab one when a bedroom window opened and an angry housebolder appeared. "These need tying up badly, sir," said the smart boy. "These big flowers are too heavy for their stems." There is no question that if that boy keeps out of prison he will get on.-Manchester Guardian,

"There goes a chap who does a deal to elevate mankind."

"Who is he?" "The district attorney." "How does he elevate humanity?"

"Sends 'em up, doesn't be?"-Kansas City Journal.

Unsettled. "I want some sort of present for a

young lady." "Yes, sir-fiancee or sister?" "Er-why-she basn't said which she will be yet."-Exchange.

You cannot eat your cake and have

your cake.-Cervantes.

A STOLEN BANKNOTE.

And a Keen Eyed Detective Who Was Unable to Locate It.

A police officer tells au interesting tale of an old woman he once had to deal with. A batch of banknotes had been stolen, and the detective found some one to tell him that the old woman in question, a notorious "fence." had one of the notes, at least, at ber house.

So implicity did the detective rely upon his informer that he set aside the formality of a search warrant and proceeded to visit the old woman's house, locked the doors on the inside and rummaged the rooms from cellar to roof. He is an officer who prides himself on his keen scent in a search, but he was completely baffled, and after tearing up some boards and knocking down some plaster by way of making a show of doing something, while he waited for a new idea, at last he gave it up.

Turning to the woman and handing her back a candle which she had lent him to work with, he said:

"Well, this time I confess I am beaten. Tell us where it is, mother, and I'll get you off."

The promise was sufficient. "You've had it in your hand more of the time," she said, "and gave it to k to me this minute. It's wrapped round the candle."-London Answers.

ONE PEEP WAS ENOUGH.

It Satisfied the Skipper That He Was Right In His Guess

When the Adeline's master came on deck in the morning his passenger stared at him bewilderedly.

"Why, what's the matter?" be asked. A grin overspread the face of the mate, who stood near, but the person questioned scowled and made no re-

"What has happened?" persisted the "Where are inquisitive passenger. your whiskers and your eyebrows?"

The mate snickered, and after a moment his superior snapped, "Oh, tell him if you want to!" and stalked away forward with what dignity be could command.

"The skipper is feeling just a mite sore," said the mate, "and no wonder It was like this," he proceeded to explain. "Last evening he was hard up for a job, and he decided to overhaul the motor launch. He rather thought there was a little gasoline left in the tank, but to make quite sure be lit a

match and looked." "Ah, yes," exclaimed the passenger, "and there was."

"Well," drawled the mate, "for about half a second there was, and then there wasn't."-New York Post

British Army's First Trousers.

Perhaps the army revolution of deepest interest to the soldier himself was that effected in 1823, when for the first time he was put in trousers. The announcement from the horse guards took the following remarkable form: "His majesty has been pleased to approve of the discontinuance of breeches, leggings and shoes as part of the clothing of the infantry soldiers and of blue gray cloth trousers and half boots being substituted." In order nify the "clothing colonels" for any hardship which the new order might cause it was decided that these gentlemen should no longer be called upon to provide the waistcoat of Tommy. but that Tommy should himself supply it out of his shilling a day. To reassure him it was pointed out that be was in a position to do so with comfort, because he would no longer have to buy gaiters .- London Chronicle.

Letters That Wear Away.

The professor was talking of English words that, originally harsh, had been softened by a slight change in form or in the elision of some letter. The professor on this occasion gave rein to his fancy. "Now, for instance," be said, "bere's the word 'numerous,' from the Latin 'numerus,' a number. What have we done with that word? One may suppose that originally it was written and pronounced 'numberous. Why not? But the 'b' in the middle of the word, in the abdomen, as it were, was very awkward. It was in reality of no more use than the appendix vermiformis. So an operation was performed, probably without the use of an anaesthetic and the objectionable 'b' was removed. That operation was an entire success."-Indianapolis News.

Disease and the Egyptians. The most important me al anuscript found in Egypt is the Uapyrus Ebers, written 3000 B. C. and discovered in Memphis. Disease, according to the Egyptians, was due to the anger of some delty, the result of the triumph of evil in its struggle with good, an idea which is still very general throughout Africa and Asia and which

at some time has been prevalent in

modified forms in almost every race.-
