In the end the old tar is utterly disintegrated and dissolved back into primeval dust which mbles somewhere on the outskirts of space where a new star is organized. Pierpont Morgan's Fairy Palace.

Pierpont Morgan's wonderful house in Prince's Gate differed little on the outside from its neighbors, merely two houses rolled into one, but its interior suggested nothing so much as the fairy palace of Aladdin. In the hall a spring was pressed and part of one of the walls "fell away" in the approved style. You walked down into a basement, which at first sight resembled nothing so much as one of the lower lecks on a large liner. Ranged along the walls were what appeared to be a number of safes, but they were really doors opening into small rooms, into each of which a particular portion of Mr. Morgan's collection had been brought. There were rooms for English silver, for porcelain and for half a dozen other objets d'art. No one who was ever fortunate enough to be shown round by Mr. Morgan himself can forget the experience.-London Bystander.

Mercury Poisoning.

"I would suggest," says a doctor, "that, whenever persons are found to have swallowed bichloride of mercury, several eggs be forced down their throats. The albumen in the eggs will form a chemical compound with the mercury, which will be insoluble. Then greenents is kept by the choirmaster intestines or be vomited by the vicpump out the stomach first or to induce vomiting. Many times it is necessary to act quickly if the life of the person is to be saved, and it takes time for a physician to arrive on the scene. Bichloride of mercury will not produce a painless death. It is a polson that paralyzes the liver. It eats through the walls of the stomach, and the victim generally dies in great agony." - Des Moines Register and Leader.

> Witch Burning. There are countries in which the execution of women as witches is only a thing of yesterday. The last instance of witch burning occurred as recently as 1888 in Peru, and in other parts of South America cases continued to occur until well into the second half of the nineteenth century. England's own last conviction for witchcraft took place at Hertford in 1712, and Scotland condemned a witch ten years later, while Spain and Germaey retained a judicial belief in witches and the justice of killing them until 1782

"Devil dogs" are a species of alarm clock used in Greece for the purpose of keeping persons awake, such as watch men, stage drivers and railroad men. They are generally small black dogs Should the person whom the "devil dog" is detailed to keep awake be a stage driver, the dog is strapped to a little stool beside him, and throughout the journey he keeps up a sharp barking, often causing the passengers to keep awake as well as the driver At times be will pause for a minute or two to moisten his parched, rasped throat at the basin of water set before him and then begin again.
