

Circuit Court on Monday.

The October term of the Circuit Court will convene on Monday next, with Circuit Judge Webster Holmes on the bench. This is his first appearance on the bench at a regular term since his appointment to that honorable position by Governor West. There are no cases of any importance, with the exception of the case of the Warren Construction Co. against Tillamook City for the amount of money owing the construction company for the pavement and the sewer systems. This case will not be tried until the injunction suit brought by property owners is disposed of. Attorney T. H. Upjohn, the new district attorney, will make his appearance at this term of court, but thus far there are but few criminal matters to attend to unless the grand jury should unearth something of a criminal nature. Following is the court docket:

Macdonald Potts, plaintiff, vs. Rollie W. Watson, defendant. Action for money.
S. W. Thompson et al, plaintiffs, vs. Allen H. Wilson et al, defendants. Foreclosure.
In the matter of the petition of Matthe Anderson Sanden. To become a citizen of the United States of America.
S. B. Hill, plaintiff, vs. Frederic Briody, et al defendants. Foreclosure.
C. M. Giddings, plaintiff, vs. Kate Cox, defendant. Tax foreclosure.
George A. Strese, plaintiff, vs. F. Garrison, defendant. To set aside deed.
M. R. Hanenkratt, plaintiff, vs. Thomas Hovenden, et al, defendants. Foreclosure.
Isaac E. Smith, plaintiff, vs. Daniel Hickey, defendant. Damages.
Nellie Hughey, administrator of the estate of Wm. J. Hughey, deceased, plaintiff, vs. W. C. Thun, defendant. Action for money.
James Hughey, plaintiff, vs. F. P. Thun, et al, defendants. Action for money.
B. W. Neilson, plaintiff, vs. Joseph Kutcher, et al, defendants. Foreclosure.
V. S. Grout, et al, plaintiffs, vs. John R. Harter, defendant. To quiet title.
Peter Byrom, plaintiff, vs. The Garibaldi Beach Co., defendant. Foreclosure.
The French China Company, plaintiff, vs. James Myers, et al, defendants. Action for money.
A. B. Saling, plaintiff, vs. Charles Chaffee, defendant. Action for money.
F. R. Beals, et al, plaintiffs, vs. Alden L. Johnson, et al, defendants. Foreclosure.
J. H. Ellison, et al, plaintiffs, vs. Osman Royal, in person and as administrator, defendant. Foreclosure.
F. R. Beals, et al, plaintiffs, vs. Warren Construction Company, et al, defendants. Injunction.
Peter Byrom, as executor of the last will and testament of Bengtha Byrom, deceased, plaintiff, vs. Garibaldi Beach Co. et al, defendants. Foreclosure.
Grace Johnson, plaintiff, vs. J. C. Johnson, defendant. Divorce.
Margaret Bulger, plaintiff, vs. William T. Bulger, defendant, divorce.
Martha M. Bauer, plaintiff, vs. Helen Louise Gilday, et al, defendants. Foreclosure.
Beka Capies, plaintiff, vs. Frank Long, et al, defendants. Foreclosure.
J. H. Hathaway, plaintiff, vs. B. N. Sprout, et ux, defendants. Foreclosure.
Warren Construction Company, plaintiff, vs. Tillamook City, defendant. Damages.
In the matter of the petition of Victor Leander Johnson. To become a citizen of the United States of America.
G. H. Riley, plaintiff, vs. A. H. Beaty, et al, defendants. To set aside deed.
Pacific Northwest Adjustment Co., plaintiff, vs. R. P. York, et al, defendants. Action for money.
The Hillsboro National Bank, plaintiff, vs. J. W. Boyer, defendant. Action for money.

Iretta M. Bignell, plaintiff, vs. Louis J. Bignell, defendant. Divorce.
Clay Daniels, plaintiff, vs. J. D. Jones, et ux, defendants. Action for money.
Fugitives from Mexico, one and all, were doing things that benefited that country and were investing and spending money there. No rational reason can be given for driving them out.
In case of war the United States would necessarily call again for volunteers, as in the past important outbreaks of hostilities. The men who have thus responded in grave national emergencies have made an unbroken record of success. Aided by their high standard of intelligence and a self-reliance and personal initiative seldom, if ever, matched in the ranks of foreign armies, they have added to their reputation in each successive war. But it is timely to ask if they are to be the basis of war strength without a greater degree of preparation for summoning them hastily to the field. The growth of the country in population averages 1,500,000 a year, and within the last fifteen years much territory has been acquired, but our little regular army has remained unchanged numerically. It is kept much below the small maximum allowed. At the same time the militia organization, the national guard, averages but 2700 in the forty-eight states, a fine body of men, yet limited in time available for training. In Europe there is a fixed conscription that makes every able-bodied young man familiar with drill and camp life generally. In our country only 1 per cent of those subject to military duty have ever been in camp or received any system of instruction in a soldier's duties. In our latest war, that with Spain, tens of thousands of volunteers were enlisted who had never had a day's drill or fired a gun at a mark.

Winged Creatures of Borneo. In Borneo winged creatures are encountered where one would least expect them. Flying fish the size of herrings are found in all the waters, and there is the flying fox, the well known fruit eating bat, which the Malays call "krung." They may be seen almost any evening winging their steady flight often at a great elevation well out of range of a shotgun. The flying squirrels as evening twilight comes are also seen. They glide down from one lofty tree to the base of another, up which they scramble to the level they started from. Wide expansions of skin between the fore and hind limbs act in parachute fashion and sustain them in their glide. They are of some size, but are quite harmless. The flying lizard is seen in the heat of the day in the jungle gliding down with a flash in much the same manner as the squirrel. But he is much smaller and it requires a quick eye to detect him. The natives kill him with a clay ball shot from their blowpipes.—North Borneo Herald.
Spiders That Hunt Fish. There are certain large sea spiders two feet from toe to toe, called Colloseid gigas, that live in the water and feed entirely upon mollusks and worms. The carnivorous wolf spider, an amphibious inhabitant of the tropical regions of South America, is said to prefer a fish diet, though it is not averse to eating mice, young birds and even snakes, resembling in this respect the theraphosidae, or bird catching spiders, of India and Queensland, some of which equal a rat in size. The colloseid is the most formidable specimen of the spider family, measuring six inches around the body and possessing twelve long, hairy legs, with which it grips its funny prey. It attacks fish several times larger than itself and after biting them through the back and stinging them to death gluts itself by sucking the juices from the bodies of its victims.
Enterprise. A well known business establishment recently sent out a circular to the trade with which it has dealings announcing the death of the head of the firm. To the astonishment of the firm, there was received from a printing house the following reply to the circular: "Gentlemen—It is with deep regret that we learn by your circular of recent date of the great loss sustained by your firm, and we respectfully beg to express our heartfelt sympathy. "In this connection we observe that your circular is printed by Messrs. Blank & Co. We feel confident that had you placed this order with us we could have quoted you cheaper and better terms than any other firm; consequently in the deplorable event of a future bereavement we trust that you will afford us an opportunity to make you an offer in this regard.—Exchange.
How Caterpillars Build. Many clever caterpillars which dwell habitually in company build a common nest for the common benefit. Of these is the famous American tent caterpillar. The tents are really nests of silk spun among leaves and twigs. In them the caterpillars dwell when young, and to them they resort for shelter in rainy weather even when larger grown. Allied species which pass through the winter in the caterpillar state construct winter sleeping quarters which the bookish folk call hibernaculum. These are often conspicuous among the branches during the cold months of the year. If torn open they reveal a surprising thickness of spun silk, forming a dense nonconductive wall. At the center of the mass lie from thirty to fifty tightly packed caterpillars waiting for the return of the warm weather, when they will resume their feeding.
Why They Quarreled. "I hear that you quarreled with Harry," said one young woman to another. "Is it so?" "Yes, I did," replied the other girl. "He is a horrid thing. He asked me how old I was, and I told him twenty-one, and he wouldn't believe me!" "Indeed!" said the first. "Well, you should have referred him to Bob Yates. He could swear you told him the very same thing four years ago."—Detroit Free Press.
Where He Got It. Teacher—Now, Willie, where did you get that chewing gum? I want the truth. Willie—You don't want the truth, teacher, and I'd rather not tell a lie. Teacher—How dare you say I don't want the truth! Tell me at once where you got that chewing gum. Willie—Under your desk.—Exchange.
Illustrative Dances. "Dances used to originate from tribal customs." "Well, doesn't it seem possible that some of these popular dances tend to illustrate the movements of persons dodging a sock of motorcars?"—Washington Star.
How to Treat a Wire Cut. Never let a wire cut on your stock go unattended. Clean out the wound with soap and water, wash with peroxide of hydrogen and apply a good healing ointment.—Rural Farmer.
Just a Suggestion. He—What! Another new dress? That's enough to make me jump out of my skin! She—Why don't you go? Then I can have a belt and hand bag made of it.—Cik.
A man's future is his own. He makes it himself every day as he goes along through life.

Home-Keeping Women Need Health and Strength. The work of a home-keeping woman makes a constant call on her strength and vitality, and sickness comes through her kidneys and bladder oftener than she knows. Foley Kidney Pills will invigorate and restore her, and weak back, nervousness, aching joints and irregular bladder-action will all disappear when Foley Kidney Pills are used. For sale by all druggists.
If potatoes are to be 40 per cent higher dealers should not try to comfort the consumer by wrapping them in the Baltimore platform.
The suggestion of the American Meat Packers' Association that the people should eat less meat for awhile is entirely gratuitous.
Berlin policemen who speak English wear a German flag and an American flag on their coat sleeves. Here is a conundrum that Englishmen have not yet solved.
Mrs. Pankhurst will have an opportunity to observe that woman suffrage in ten states of the American Union was obtained without militancy, and would not have been granted with it.
A Russian grand duke has the audacity to pick out the most beautiful woman in the United States after only a visit to Newport. He ought to come West and see some of our girls.
The queen of Holland has reached the conclusion that manhood suffrage should be extended and women also allowed to vote. Holland wants no militancy nor such a general strike for equal suffrage as interrupted business in Belgium for a time.
Dr. Harvey Wiley, former chief of the chemistry division of the Department of Agriculture or, for purposes of greater brevity, plain Food Commissioner Wiley, advanced a new thought in social economics at the International Congress and Exposition of Refrigeration at Chicago. The cost of living was under discussion again, and producers of foodstuffs had been designated as among those taking all the traffic will bear. It was in discussing the movement of population from the farms to the cities that Dr. Wiley indicated a new way of adjustment between supply and demand, and producers and consumers. He said: "To my mind it seems the most important factor of the day is to check the aggregation of men in the cities and to encourage the distribution of the great industries where men are employed. The factory in a farm neighborhood is a boon to every farmer, affording him a home market and saving the cost of transportation. The moral and mental effect upon the people of a distribution of industries is no less important. If our productive industries in manufacturing lines were properly distributed, the alcohol evil would be robbed of most of its terrors."

Perhaps the best writ of habeas corpus that could be issued would be one directing that Harry Thaw be sent back to his mother.
Another expedition to Labrador has barely escaped alive. If explorers want something real dangerous that is the region to strike for.
Our submarine torpedo boats are also to become supramarine gunboats, by having a 3-inch gun installed on them, which can be lowered into the hull when the boat goes under water. This renders them of practical service along the coasts and in small ports.
OREGON AGRICULTURAL COLLEGE
BEGINS its forty-fifth school year SEPTEMBER 19, 1913.

WATERPROOF—DURABLE SATISFACTION GUARANTEED \$3.00 Everywhere
A. J. TOWER CO. BOSTON
Tower Canadian Limited, Toronto
A 15 Watt Mazda Lamp
On your front porch can be lit every night until midnight and register not over fifty cents per month on the meter.
TILLAMOOK ELECTRIC LIGHT AND FUEL COMPANY
WILL SPALDING, Manager.
Why You Need a New Range
Some housewives who display a remarkable amount of broad, sound, common sense along other lines, persist in the delusion—and it is a delusion—that they are really practicing economy by trying to get along—to get results—out of an old, worn-out range merely to save the price of a new one.
Your old range or stove was put together with putty and stove bolts and probably you can stick a pen-knife in the seams and joints anywhere on it where the stove putty has crumbled away. When a range gets in that condition, it takes fuel enough to warm all outdoors in order to get your oven hot enough for baking—and then you run the risk of burning whatever is in the oven. You can soon burn up the price of the best range ever made in a useless waste of fuel in an old, worn-out stove or range—and that's neither practical economy nor good management.
If you would practice real economy in your household management, it will pay you, the best time you are in town, to call at our store and inquire closely into the perfect baking and remarkable fuel saving qualities of the
Great Majestic Malleable and Charcoal Iron Range
Outwears Three Ordinary Ranges
It is the only range made entirely of malleable iron and charcoal iron. Charcoal iron won't rust like steel—malleable iron can't break, and while the first cost of a Great Majestic may be more than some other ranges, it outwears 3 ordinary ranges.
Half The Fuel
The Majestic is put together with rivets (not bolts and stove putty) making it absolutely air tight, like an engine boiler. The joints and seams will remain air tight forever as neither expansion nor contraction can affect or open them.
Pure Asbestos Lining
In addition, it is lined with pure asbestos board, covered with an
Other Exclusive Features
It's the best range at any price, and should be in your kitchen.
