HIS RETURN BANQUET.

It Was a Grand Social Success and Cost the Major Nothing.

A veteran officer in the United States army recently told of the shrewdness displayed by a major in the old days. He had been appointed to the command of an army post on an island not s great way from San Francisco.

Soon after his arrival there a French feet dropped anchor in the harbor. The commander invited the major stoard the flagship and entertained him royally.

The idea struck the worthy major the next day that he was in honor bound to return the compliment, but he was staggered by the expense involved.

To give a banquet befitting his dignity as a United States officer entertaining a distinguished representative of a foreign nation would mean bankruptcy, as the government had not authorized him to draw on its treasury for such a purpose, and the cost of the affair would have to come out of his own pocket. A bright idea struck him,

He invited the naval visitors to be his guests the third day thereafter at au "American picule." Then he sent invitations to the best people of the neighborhood to join him in a basket pleule at a grove near at hand on the same day, "to meet our French paval friends now on our shores."

The people came with great baskets and hampers of provisions. A royal feast was spread in the grove, and the picnic was long remembered as one of the most notable social successes of its time.-Chicago Record-Herald.

COFFEE AND ITS EFFECTS.

Not Injurious When Used Moderately by Persons In Health.

In the light of the data that have been accumulated in respect to the physiological action of coffee it may safely be affirmed that it is not injurious when used moderately by reasonably healthy people. With the neurasthenic and the dyspeptic it is a somewhat different matter. While alarming symptoms have followed the ingestion of enormous quantities, there is no evidence that fatally toxic effects have ever ensued.

Coffee is a mild stimulant, and the effects are rather translent. The moderate use of coffee will not make a well man sick. Such moderate use will not occasion disagreeable symptoms in the healthy, such as insomnia. headache, nervousness, drowsiness, palpitation, dyspepsia, vertigo, etc. On the other hand, it will obviate or relieve fatigue.

We do not consider coffee a necessary concomitant of civilized life, which some extremists claim it to be. To our minds it is rather a luxury which it is not necessary to dispense with unless one is compelled to do so as a part of the attempt to combat the increasing cost of living. Af to the moderate use of any of the things which we ingest the same principles apply. Even such a valuable substance as milk has to be imbibed within reason as to quantity. lest autointoxication ensue -- Medical Times.

Facing a Waterspout.

What it means to encounter a waterspout in the south sens is described by a writer: "First of all, a black trank. like an elephant's, began to feel *

bilndly about in midair, hanging from

THE LOVELIGHT IN HIS EYES. Did He Thought That Was What Made All

the People Stare. "You have read in novels how a great emotion will transform a man's countenance, how a poet's face in the hour of inspiration sets the sparrows singing on the housetops. My own features are of the commonplace type -nobody thinks of regarding them twice-yet I, too, have had my experiences, declares a contributor to Punch. "They occurred on the morning when I received a letter from Phyllis, which said briefly. 'Yes, I think so.' Not

much in that, you may say, but when I tell you it was the delayed answer to a proposal of marriage you will understand. Shortly after reading it I stepped out into the street to walk to the

"What a walk that was! The light in my eyes seemed to brighten the very sun; the song in my heart was echoed from a hundred motorbuses. Never have the winds of May wooed so winningly a February morning.

"Every man I met turned his bead as if lonth to take his eyes from my irradiated countenance. Every girl seemed to take the keenest pleasure in my happiness and smiled at me prettily as if infected by its contagion. "Tis well," I thought (in blank verse), that Phyllis now is pledged to me or, by my troth, these flattering glances shot from beauty's eyes- might make my heart unfaithful."

"It was only when I reached the office and looked in the glass that I discovered the large black smudge on the end of my nose."

COURAGE OF NAPOLEON.

The Way It Carried Him From Aspern. Essling to Wagram.

Professor J. Holland Rose in "The Personality of Napoleon" writes of Napoleon's courage. He says that his personality "never stood forth so grandly as after a defeat." The most serious blow in the middle part of his career was that dealt him by the Archduke Charles at Aspern-Essling, north east of Vienna. The Austrians were nearly double him in strength. The bridges over the Danube had been broken down in his rear. His great marshal, Lannes, had been killed, and, in fact, he had suffered a terrible reverse. All his generals were for retreat, but he withstood them, and Professor Rose ranks the next six weeks "among the most glorious of his military career." He secured new troops. deceived his enemy by false movements and finally defeated him at

But a decline came to such a prodigious man. He bimself said at St. Heleua that he had been spolled by success. It was natural that the victor in fifty pitched battles and innumerable smaller engagements should come to believe himself omniscient and invincible. It was this hardening of the mind that betrayed him into the Russian campaign, that caused him to refuse all compromise in 1813 and 1814 and that led him to defeat by his inferiors, Wellington and Blucher, at Waterloo, just as Hannibal was finalbeaten by his inferior, Scipio, at

Putting Trees to Bed. An interesting method of protecting peach trees from frost during the winter has been practiced for several years at the agricultural experiment station at Canyon, Colo. Early in November the earth is removed from a circle about four feet in diameter round each tree, and water is turned in to saturate the soll. When the ground has become soft the tree is worked back and forth to loosen the roots and is then pushed over on its side. The branches are brought together and fastened with a cord. and burlap covered with earth is put over them. Thus the trees lie snug until spring. when the covering is gradually loosened and finally removed, and they are raised and propped up.-Rocky Mountain News.

ADHESIVE TAPE. One Use to Which the Parcel Post In You Ever Think How Useful It England May Be Put.

May Be In the Home? Elisha Yale Held the First One In England In 1700.

The first auction sale in England was held in 1700 by Elisha Yale, who had been governor of Madras and who adopted that plan for selling the East Indian wares he had brought home. Garden in August, 1872. The money The sale attracted wide attention and was so successful that others immediately adopted the pian.

AUCTION SALES.

Before the close of the eighteenth thing that might be called dramatic. century England began to place a tax on auction sales, and at times these and incoherent spectacle, with red lob duties have ranged as high as 5 per sters recumbent at the bottom of the cent. In 1845 the tax was repealed. sen. Boucleault, who had run up bills but a charge imposed on the license to to the extent of £10,000 or so, did not be taken out by all auctioneers. The stay for the production, but betook abuses at auctions, caused by combihimself abroad. All that persists of nations of brokers to bid up the offerthis magnificent fiasco is the boys' choings, led to the adoption of stringent rus, "Spring, Spring, Beautiful Spring," regulation which was retained almost by chance

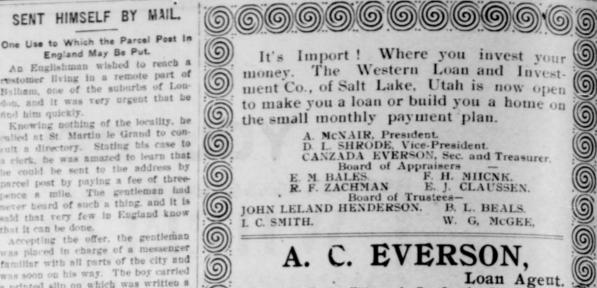

In America auctioneers of a certain class have also been guilty of many impositions on the public. Fake "auction sales" of alleged bankrupt stocks of merchandise, "fire sales" and similar schemes have long been used to impose on the credulous. At many such sales the auctioneer has confederates in the crowd who start the bldding and continue it until some legitimate bidder has offered a price that affords the promoters a bandsome profit. The imposition of heavy fines and prison sentences has discouraged this class of auctioneers in most sections .- Milwaukee Sentinel.

a cloud. It came nearer and nearer with uncanny speed, drawing up to itself as it came a colossal cone of turbulent sea until the two joined together in an enormous black pillar some quarter of a mile broad at the base and probably a good thousand feet high, uniting as it did the clouds and the sea below. Across the darkening sea, against the threatening copper crimson sunset, came this gigantic borror, waltzing over troughs of torn up water in a veritable dance of death. like something blind, but mad and cruel, trying to find and shatter our fragile little ship."

Wise Insects.

In his experiments to determine whether it is the color or the odor of flowers that attracts bees and other insects M. Plateau, the Belgian zoologist, bethought him of trying a mirror. He selected a flower of striking color and strong odor and placed it before an excellent glass in which the reflection was perfect. All the insects went straight to the real flower, and not a single one approached the reflection in the mirror,

BOTH PHONES.

"Females."

Our woman words have all experienced vicissitudes of fortune. "Female," like the rest, has had its day. Chancer introduced it under the guise of "femelle" and Shokespeare used it a few times instead of "woman." But it was the early novelists who clothed it with respectability by making all their women "females." So exceedingly respectable had it become in the time of Dr. Johnson that Fanny Burney called the princess royal "the secoud female in the kingdom." Even so late as the publication of Tennyson's "Princess" Mrs. Browning was able to write with perfect propriety that the poem dealt with "a university attended by females." Then decadence set
