**GUNS IN A CRATER**

Diamond Head, Uncle Sam's Lava Fortress in Hawaii.

**GIBRALTAR OF THE PACIFIC.**

The Mighty Defenses of Oahu Make That Lovely Island a Veritable Fire Lined Wall of Steel, Behind Which Crouches "the Lion of Hawaii."

Diamond Head, that monumental elevation of lava which stands out so prominently on the Honolulu side of the lovely island of Oahu, Hawaii, is the one and only original crater in the world which is being devoted to the use of the army of a great power. The island of Oahu is the key to the Pacific, and Uncle Sam carries that key on a chain in his capacious pocket. At any time war breaks out Uncle Sam's hand, which has not lost its cunning, will go to that pocket with the swiftness of a western sheriff, and the result will be a roar of guns which will be heard around the world. The roar will be contributed to by the guns of Fort Ruger, which are at the base of Diamond Head on the landward side.

From Diamond Head, called by poets "the Lion of Hawaii," to Pearl Harbor, named by newspaper writers "the Gibraltar of the Pacific," there is a chain of forts which makes Oahu one of the greatest fortresses in the world. When in Honolulu the writer had the pleasure of working with Albert Pierce Taylor, who has been spoken of as "the recognized literary authority on things pertaining to Pearl Harbor and the defenses of Hawaii." He said on one occasion:

"Uncle Sam has declared to the world that he is on guard in the Pacific. At Pearl Harbor is Fort Kamehameha, with its battery of twelve inch guns; at the mouth of Honolulu harbor will be a battery of small guns; at Fort De Russy, Walkiki, a battery of fourteen inch guns, while at Diamond Head a battery of eight mortars has been manned for some few years. Within the extinct crater of Diamond Head Gibraltar-like galleries have been constructed, and in one of them an observatory has been established. The fire control for all the Oahu coast batteries has been located in this gallery. From this station the fire of the guns of all the forts can be directed by the electric telegraph. The guns of Pearl Harbor cross those of Diamond Head and with the batteries between make a veritable wall of steel."

After inspecting the guns at Fort Ruger two of us, with a soldier guide, walked to the entrance of the gallery which has been bored through the lava and sandstone which compose the steep sides of the crater of Diamond Head. A sentry barred the way. The permit was produced and proved the open sesame.

The heavy iron door at the entrance to the volcanic passage was swung back, and with a soldier in front and another in the rear, the visitors started down the gallery. A single narrow gauge track ran the entire length of the passage. On this steel small trucks had been pushed by the soldiers, who loaded and unloaded the debris which army comrades had dug from the walls of the crater. The ties were broken in places, and the guide issued a warning to step carefully.

On first stepping into the gallery the darkness, after the tropical sunlight, was of the kind that Milton described as visible. Only a few steps had been taken before the light at the far end of the gallery was easily seen.

Instead of the barren lava bowl, "hard as flint and as smooth as glass," as the picture man so picturesquely puts it, the inside of the crater was found to be grass covered, with trees and bushes standing here and there, which drew their moisture from the "liquid sunshine," as the Honolulu people charmingly describe the rain.

The guide pointed out the observatory high up on the Ewa side of the crater from which officers direct the shooting by the men who man the big guns at the fort outside the crater. Those men never see the target at which they aim far out at sea. The projectiles from the high powered guns pass over the crater, and by telephone from the observatory the men learn whether they have made a hit or miss. They generally score a hit.

In the event of a war involving the United States on the Pacific the crater of Diamond Head may indeed prove "the Lion of Hawaii," as Frances Bent Dillingham, a Honolulu poet, has described it, and "if once stirred his paw could sweep a navy to its death. If once aroused his roar would soon be heard across the sea and echoed from the sky."—Harold Sands in Los Angeles Times.

Mrs. Ellsworth had a new colored maid. One morning, as the maid came downstairs, the mistress said: "Emma, did you knock at Miss Flora's door when I sent you up with her breakfast?"  
"No, ma'am," replied the maid, with preternatural gravity. "What was de use ob a knockin' at her do' w'en I knowed fo' sure she was in dar?"—New York Post.

W. D. Stillwell, familiarly known as Capt. Stillwell, on Sunday last celebrated his 89th birthday, amid relatives and friends. Mr. Stillwell, who is a veteran of two Indian wars, and who is now vice-president of the Oregon Pioneer Association, is a well preserved man for his age, and looks and acts much younger than he is.
