

Advantages of a Checking Account

I. Safeguarding Funds.

Over ninety per cent transfers of funds in business are made through the medium of bank checks, thus avoiding the dangers incident to carrying large sums about, and the risk of making the wrong change.

This method enables the business man or individual to keep his money safely in the bank, instead of on the premises or about the person, where it would be subject to hazard.

A checking account at this bank is a convenience and costs the depositor absolutely nothing. To obviate handling the account at a loss the bank requires that reasonable average balance be maintained.
