**The Tillamook Headlight.**

**Editorial Snap Shots.**

Tax paying is now in order. They come high, especially on high priced land that have inflated valuations.

Talk about 'coughing up,' it was the 'coughing up' of one individual who said that there were several grafters who were paid a per cent when the water system was constructed. Ask Bill Ryan who 'coughed up.'

We are anxious to see how many persons, who bolted the Republican party, are going to register as Progressives, and who intend to stand by that sinking craft. We gamble there will be very few in Tillamook.

Some of the Willamette Valley towns have been visited by a little army of I.W.W.'s, who are creating discontent, strife and trouble. They are trouble makers where ever they go, and it is no wonder they get little or no sympathy.

With the railroad tied-up and the freighters bar bound at Astoria, this county is going through an experience that is not by any way new or novel. No one thought for one moment, after the railroad was finished, that freight and passenger business would be cut off for several weeks.

Don't get excited Bro. Effenberger on account of the delay in the mail. Patience is one of Tillamook's virtues. It took years of patience before a railroad was built into this county, and it takes a deal of patience when anything gets out of the usual rut with the postal department.

Clean up! Yes, there is too much old rubbish around some of the business places. Not only clean up, but the city should be kept clean up, especially back premises. The habit of dumping boxes and trash in the business section is not tolerated in up-to-date cities, neither should it be here.

It appears that before persons can be placed on election boards they should be registered voters on the new registration books. As the citizens have not been given an opportunity to register in this county, owing to the failure of the books to reach here owing to the tie-up, the County Court did the next best thing and appointed the election boards.

The county is now divided into 29 voting precincts, which had to be done owing to the increase in the voting population and the right of women to vote. This means a shuffling of the cards and a number of our citizens transferred to new voting precincts. We are publishing the boundaries of each precinct so that the voters may know where they are at.

We feel like roasting the two school teachers whose moral conduct deserved censure, but we refrain from doing so for the best interest of our public schools. Yet it is hardly the right thing to do. Suppose it had been some other class of citizens, no doubt some of our well-intentioned moral reformers would have become highly indignant and demanded justice.

The annual encampment of the G.A.R. will be held in Tillamook next June, and this, as far as is known at present, is the

only convention to be held here this year. About 1500 persons attend the encampment, and it is the business of everybody that the visitors be given a royal welcome to this city. This should take the place of the usual Fourth of July celebration. The Tillamook Commercial Club will assist the local Post in making arrangements for the entertainment of the visitors, and, no doubt, with sufficient funds, the encampment will be made a success of and prove creditable to the city.

If the snap shot man made a slight mistake in reporting the case of Beals vs. Chase, in one small particular, it was not done intentionally, but the fact remains the same the Beals is suing Chase for \$3000. So Bro. Trombley, Freddie's mouth organ, devoted a column of editorial matter roasting the snap man, and, as usual, the readers of the Herald are treated with a large amount of pavement dope. Dope it up, Bro., dope it up, for most people have a good idea where it originates and who the man is behind the gun.

In ascertaining the value of dairy land in this county, which the real estate agents have inflated, the person who invested in high priced land with a small amount of cash and a big mortgage plaster, cannot say that the land is only half the value when the assessor comes round. Its tough, no doubt, to have to pack a big mortgage, and on the top of that taxed to death for high priced land. This is not a very healthy condition in any county, for those who are loaded down and kept at the grind stone paying for real estate agents' commissions and enhanced valuations are certainly up against a hard row of stumps.

To create a spirit of civic pride in this city, a little rivalry along those lines would not be out of place. What helps to beautify a city, is well kept residences, nicely painted, and a profusion of pretty flowers in the summer. If the City Council would offer a few prizes for the best kept residence it would have a wonderful effect in creating a spirit of civic pride. A few of the citizens did so last year, but more should have done so. We believe in making Tillamook City as attractive and pretty as possible, and one way to help bring this about is to offer a few premiums, which should be done now, for it is too late to offer prizes for that purpose in the summer.

Prepare the next few months for the Tillamook County Fair, which should be made the best and most enjoyable fair ever held in this county. Unfortunately the storm last year had a great deal to do in curtailing the exhibits, but that should help to increase the interest in this year's fair. We have every confidence in the Fair Board doing its part, but it must have the co-operation of the citizens in all parts of the county, who should take a pride in the county fair. Every summer there is a large increase in the number of visitors to this county, and we believe that we should have a county fair the equal, if not better, than other counties. And we can, too, if the citizens will make preparations for exhibits and co-operate with the board.

The establishment of a rest room in this city is assured, as Mrs. Royal Stillwell has been successful in obtaining funds to operate it for six months. The rest room is for the special convenience and benefit of those who come to this city from the country to trade here, and Mrs. Stillwell has kindly consented to manage it and make it as pleasant for the visitors as possible. This, no doubt, will lead up to the establishment of a permanent rest room, maintained by either the City Council or the Commercial Club, but in the meantime Mrs. Stillwell should be encouraged and supported in her efforts. We feel assured that she will make a success of it and it will result in a great convenience to those, especially women and children, who visit the city.

Most every dairyman in the county have an idea that the new tariff law is going to lower the price of Tillamook cheese. We hope they will be disappointed. But indications are they have rightly surmised what is going to happen. It was too late when the tariff law went

into effect to interfere with last year's prices. What is liable to cause a slump the coming summer is the dumping of Canadian cheese into the United States, which will come in competition with Tillamook cheese. Then the dairymen will be given another object lesson, as many dairymen in this county wanted and voted for a change. It will not be long now to wait to see whether they will profit or be at a loss. Their monthly statements the coming summer will tell the story, one way or the other.

Some persons complain about watered stock in railroads, yet they cannot see the watered stock that is being injected into Tillamook land. When a farm is sold several times and every time that it changes hands a land agent or land shark makes several thousand dollars, that is pouring water into the price of Tillamook land, probably much faster than water is being injected into railroad stocks. As to 'unearned increment,' it is those who have been induced to purchase farms 'watered' by real estate agents who have to slave and toil to pay it, with fear and dread also, for whenever the price of cheese takes a tumble, as it is predicted it will be by those who know, then it will be impossible to meet principal, interest and taxes. We all understand what will follow then. Those who have 'watered' farms and cannot meet their obligations will have cold blooded individuals to deal with.

The Herald, Freddie's mouth organ, says:

For the edification of Bro. Baker and for fear he will have another brainstorm over F. R. Beals private affairs we wish to advise him that Mr. Beals has, some weeks ago, ordered new office furniture and has made arrangements for office rooms in the Tillamook block. It now behooves Bro. Baker to prepare to get out of the dark, dingy, cob-web covered, back alley quarters he occupies and get into a location where he can get a glimpse of the sun occasionally. This might dispel the gloom that enshrouds him and brighten up his vision so that he could see some of the virtues of his fellow men, lay aside his hammer and become a booster.

The snap shot man evacuated what was known as the Headlight building years ago because typhoid, small pox and other microbes were getting too numerous and for fear that his anatomy would fall victim to those dread diseases. As small pox is known amongst the medical profession as a dirt disease, we are glad that Freddie is evacuating the dirty old building. But whether Freddie and his henchmen should be placed in quarantine before he moves into the Tillamook Block, we will leave that to Bro. Trombley, for the latter for years occupied a old, disease breeding shack and knows from personal experience what should be done with those who have resided in 'dark, dingy, cobweb covered, back alley quarters.' Gee wiz, it seems to us that Bro. Trombley has got into a dark hole and needs more light, in his new quarters, and for that reason he should apply his own remarks to himself.

**Milk Unacquainted With a Cow.**

'Real' milk that is made artificially has been invented in Indianapolis, and the secret would not have been discovered if, through a bit of carelessness, some of it had not been overloaded with cream, so that the 'cream' went to the top! The health authorities examined the compound and could discover no particular in which it differed from genuine milk, either in appearance or healthfulness, but to secure the purchaser from deception, they ruled that it be labeled. If it is milk, however, why should it be labeled? Ice made artificially is not labeled. It is ice, though the Frost King had no hand in its fashioning. It is, in fact, better ice than most of nature's output, for Dame Nature is an indifferent confectionist and isn't deeply impressed with the importance of keeping extraneous matter out of her preparations.

Some time ago the statement of a scientist was published that he could produce milk from grass without the intermediary aid of the cow. Perhaps he or another has succeeded in Indianapolis. We are waiting now for the hen to be declared obsolete in the egg industry. Hail chemistry! Though we are beginning to be afraid of thy necromancy.

Do you begin to cough at night, just when you hope to sleep? Do you have a tickling throat that keeps you awake? Just take Foley's Honey and Tar Compound. It will check the cough and stop the tickling sensation at once. Does not upset the stomach, is best for children and grown persons. For sale by all druggists.

**Second Semester at School.**

The second semester of the present school year in the Tillamook Public Schools will begin Monday Jan. 26th. The work required in each grade is divided in two parts each of which is completed in a half year. Pupils in each grade who are doing the first half of the work for that grade are styled the 'B' class and those doing the second half are the 'A' class. Pupils who have satisfactorily completed the work of the 'B' class will be promoted to the 'A' class of the same grade while those who have finished the work of the 'A' class will be promoted to the 'B' class of the next higher grade.

All children six years old or over who have not attended school, or who dropped out without completing the first half year's work, should start at this time as the 'B' class of the first grade is arranged for just such pupils. A new ninth grade or high school class will also start at this time. Pupils who have just passed the eighth grade examination or who failed in but one subject are entitled to enter this class and are urged to do so, no matter whether they live in Tillamook school district or not. Also those who dropped out without finishing the first semester's work are urged to start again. Beginning classes in English, Algebra, Botany, Roman History, Bookkeeping and advanced Arithmetic will be offered.

Very truly yours,  
 J. W. Buchanan, Principal.

**City Council Meeting.**

On Monday evening the city council met with the following officials present: Mayor, F. R. Beals; Councilmen, A. G. Edmunds, S. A. Broadhead, M. Melchoir, Geo. B. Lamb; City Attorney H. T. Botts; Recorder, P. W. Todd. Geo. B. Lamb was elected chairman of the council.

A resolution was passed directing the city treasurer not to pay warrant No. 1343 for \$884.60, which was issued to the Warren Construction Co., to cover the discount on a warrant previously issued to the company. The treasurer was also ordered to deduct and not pay \$112.04 of another warrant said sum being a commission paid the Warren Construction Co., in connection with the payment of a premium of \$1,120.48, for employer's liability insurance secured by the city for its protection against claims for damages for workmen and employees employed in the construction of the storm sewer.

The finance committee asked further time to report on the report of the Recorder and Treasurer.

The city attorney was instructed to draft an ordinance regulating drays and auto trucks.

Petition of Mrs. Royal Stillwell to furnish rest room with table and chairs was referred to the ways and means committee.

Application of F. D. Small and D. C. Urie for a city light and power franchise as well as the application of the Tillamook Light & Fuel Co., for another franchise was referred to the street committee.

The committee on health and police was instructed to inspect the city jail and order necessary improvements.

The city attorney was directed to confer with Attorney Gearin of Portland as to the advisability of appealing the pavement case, the city being a defendant with the Warren Construction Co. in the suit. From a technical standpoint it may be necessary for the city to take action on an appeal in order to protect its interests.

Attorney Clausen, president of the fire department, asked the council to take up the consideration of an ordinance in regard to better safeguards against fire. An ordinance relative to this matter was placed before the council last year, but nothing was done about it. The mayor instructed the recorder to look into the matter and resurrect the ordinance presented last year.

Mayor Beals made the following appointments on the library board: Messdames Groat, Willett and Everson.

A motion was made and carried giving the mayor authority to draft ordinances bearing upon the reforms as suggested in his message, and incur whatever reasonable expense might be necessary for the securing of good legal advice in regard to the matter.

City Treasurer Gaylord asked the council for a raise in salary, stating that if his salary was not raised he would not qualify for another term. The salary of treasurer is now \$75.00 a year. Mr. Gaylord wants \$15.00 per month and the city to pay the expense of his surety bond. The matter was referred to a committee.

**To Taxpayers.**

Taxes are now due payable. If paid in full before April first 1914 will be received at face. All tax including half payments remaining unpaid April first will be collected with an interest charge of one per cent per month until September first when all tax becomes delinquent and an additional penalty of ten per cent will be added. Please give a complete list of all property you wish to pay taxes on when writing for statement.

B. L. Beals,  
 Tax Collector.

**Why You Need a New Range**

Some housewives who display a remarkable amount of broad, sound, common sense along other lines, persist in the decision—and it is a decision—that they are really practicing economy by trying to get along—to get results—out of an old, worn-out range merely to save the price of a new one.

Your old range or stove was put together with putty and stove bolts and probably you can stick a pen-knife in the seams and joints anywhere on it where the stove putty has crumbled away. When a range gets in that condition, it takes fuel enough to warm all outdoors in order to get your oven hot enough for baking—and then you run the risk of burning what is in the oven. You can soon burn up the price of the best range ever made in a useless waste of fuel in an old, worn-out stove or range—and neither practical economy nor good management.

If you would practice real economy in your household management will pay you, the next time you are in town, to call at our store and see closely into the perfect baking and remarkable fuel saving qualities of

**Great Majestic Malleable and Charcoal Iron Range**

Outwears Three Ordinary Ranges

It is the only range made entirely of malleable iron and charcoal iron. Charcoal iron won't rust like steel—malleable iron can't break, and while the first cost of a Great Majestic may be more than some other ranges, it outwears 3 ordinary ranges.

**Half the Fuel**

The Majestic is put together with rivets (not bolts and stove putty) making it absolutely air tight, like an engine boiler. The joints and seams will remain air tight forever as neither expansion nor contraction can affect or open them.

**Pure Asbestos Lining**

In addition, it is lined with pure asbestos board, covered with a

Other Exclusive Feature  
 It's the best range at any price and should be in your kitchen.
