

A Saving Plan.

Just about the best plan for saving money is to set as a mark a certain sum to save in a certain time.

Then strive with grim determination to reach it. Figure how much of the income must be set aside regularly to do it.

Deposit this money in our Savings Department or on our Certificates or Deposit which we issue any time in any sum from a dollar up.

Then when you have reached your goal you will have won a thousand battles. You will repeat your achievement in less time and with less effort. You will probably set your next mark higher.

Adopt this plan now, and bring in your first deposit.

"The United States has borrowed money at 2 and 3 percent for canal construction. It can afford to borrow money and lend it to producers from the soil at the gross cost," said R. A. Booth, candidate for Republican nomination for the United States Senate in an address at Eugene last week. "If an American farmer has 40 acres of good land with 20 cleared and 20 uncleared, and is hampered by lack of credit and high interest rates, the government should furnish him long time, low rate money for the improvements. Production would thus be doubled, taxes would be lightened and business stimulated. Such a transaction would in every way be sound. It would give a new meaning to development in the West and should be furnished for buying land and for land improvement, and can be

so lent safely. The government would be the guarantor without loss and the homebuilder would be paying 3 to 3 1/2 per cent instead of 6, 8 or 10 per cent with a commission added."

United Artisan Social.
